THE MIDDLE CLASS IN WORLD SOCIETY

NEGOTIATIONS, DIVERSITIES AND LIVED EXPERIENCES

Taylor & Francis This volume delves into the study of the world's emerging middle class. With essays on Europe, the United States, Africa, Latin America, and Asia, the book studies recent trends and developments in middle class evolution at the global, regional, national, and local levels. It reconsiders the conceptualization of the middle class, with a focus on the diversity of middle class formation in different regions and zones of world society. It also explores middle class lifestyles and everyday experiences, including experiences of social mobility, feelings of insecurity and anxiety, and even middle class engagement with social activism. Drawing on extensive fieldwork and in-depth interviews, the book provides a sophisticated analysis of this new and rapidly expanding socioeconomic group and puts forth some provocative ideas for intellectual and policy debates. It will be of importance to students and researchers of sociology, economics, development studies, political studies, Latin American studies, and Asian Studies.

THE AMERICAN MIDDLE CLASS: AN ECONOMIC ENCYCLOPEDIA OF PROGRESS AND POVERTY [2 VOLUMES]

ABC-CLIO What is the "American Dream"? This book's author argues that contrary to what many believe, it is not achieving the wealth necessary to enter the top one percent but rather becoming members of the great middle class by dint of hard work and self-discipline. • Includes content related to all the themes of the National Curriculum Standards for Social Studies and the Common Core requirements for primary documents and critical thinking exercises • Focuses on the intersections of middle class society to current issues of interest and policy debates, including diversity, gender, taxation, race, minimum wage, unions, student loan interest rates, school closings, and labor issues • Documents the perspectives of the major economists of each era on the middle class

RESEARCH IN EDUCATION

ECONOMIC GROWTH AND THE MIDDLE CLASS IN AN ECONOMY IN TRANSITION

THE CASE OF RUSSIA

Springer This book studies the evolution of the middle class in Russia after the fall of the Soviet Union. Using data from the RLMS (Russian Longitudinal Monitoring Survey), the volume covers the period of transition (1991-2008) during which many fundamental economic reforms were implemented. The first part of the book is devoted to a discussion of the concept of middle class and a description of the economic situation in Russia during the transition period. Particular attention is given to variations in the distribution of Russian incomes and the estimated importance of the

middle class. The second part of the book focuses on the link between the middle class and income bipolarization. The third and last section of the book uses the semiparametric "mixture model" to discover how many different groups may be derived from the income distribution in Russia, as well as what the main socio-economic and demographic characteristics of those groups are. The mobility of households into and out of the middle class during the transition period is also studied in hopes of determining the factors that contribute to such mobility. Using rigorous empirical methods, this volume sheds light on a relatively unstudied economic group and provides insight for countries which are about to enter a transition period. As such, this book will be of great interest to researchers in economics and inequality as well as professionals and practitioners working with international organizations.

ECONOMIC MOBILITY AND THE RISE OF THE LATIN AMERICAN MIDDLE CLASS

World Bank Publications After decades of stagnation, the size of Latin America's middle class recently expanded to the point where, for the first time ever, the number of people in poverty is equal to the size of the middle class. This volume investigates the nature, determinants and possible consequences of this remarkable process of social transformation. We propose an original definition of the middle class, tailor-made for Latin America, centered on the concept of economic security and thus a low probability of falling into poverty. Given our definition of the middle class, there are four, not three, classes in Latin America. Sandwiched between the poor and the middle class there lies a large group of people who appear to make ends meet well enough, but do not enjoy the economic security that would be required for membership of the middle class. We call this group the 'vulnerable'. In an almost mechanical sense, these transformations in Latin America reflect both economic growth and declining inequality in over the period. We adopt a measure of mobility that decomposes the 'gainers' and 'losers' in society by social class of each household. The continent has experienced a large amount of churning over the last 15 years, at least 43% of all Latin Americans changed social classes between the mid 1990s and the end of the 2000s. Despite the upward mobility trend, intergenerational mobility, a better proxy for inequality of opportunity, remains stagnant. Educational achievement and attainment remain to be strongly dependent upon parental education levels. Despite the recent growth in pro-poor programs, the middle class has benefited disproportionately from social security transfers and are increasingly opting out from government services. Central to the region's prospects of continued progress will be its ability to harness the new middle class into a new, more inclusive social contract, where the better-off pay their fair share of taxes, and demand improved public services.

WAGE LABOUR IN MODERN SOCIETY

THE CURRENT REALITIES AND THE CHALLENGE OF CHANGE

Papazisis Publishers This elaboration is a political analysis within sociological theory. The study has as subject the main propositions of a theoretical framework on the current structure of employment and on the question of the abolition of (the dependent and therefore) wage labour. I note that the latter does not have, as a precondition, the overcoming of capitalism. The analysis, in the form of an intellectual test, examines the methods and the thoroughness of enforcing the new situation of a single work status within the economic activity. This type of labour has morphological similarities to self-employment or otherwise to the own account workers. The basic starting point of the study is the finding that many enterprises worldwide have, already and in many of the aspects of production and business organization, overcome the functions and the classical forms of utilization of wage labour. The creation of working groups, the work from a distance, the instances of self-management, along with the extensive use of part-time workers or workers in various flexible work statuses, the cooperation with independent professionals, through outsourcing, communicates with the changes in the old type of enterprise's management. However, wage labour is retained as an obsession. The economic need for such maintenance, beyond the habit, can hardly be explained. The only remaining reason might be the need for entrepreneurs to command directly large groups of people, while their economic interests pushing in other directions. The survey, at a glance, examines the following issues: i) Major theoretical approaches and debates on the characteristics of capitalist society and the consolidation of wage labour, ii) The evolution of the division of labour and the industrial changes during nineteenth and twentieth century, iii) The realities of employment, through empirical data, in six groups of countries, worldwide, iv) The evidences of the real overcoming of wage labour, through the mainstreaming strategies of the contemporary enterprises, despite the maintaining of the typical form of wage dependency, v) The elaboration on the transformation of the model of employment under the process for the imposition of autonomous labour and the abolition of wage status, through the political and finally the legal interference, in the modern state, vi) The consideration on the pattern of the social structure, which could be formed, during the evolution and after the end of the previous project, and vii) The importance of the procedure to the social and political system. In the final analysis, there is an important suggestion: The autonomous worker would be in equilibrium with the status of citizen. A wage labourer has never had a similar balance. Especially when he was under the authority of an employer during the hours of work he was not, exactly, a citizen. We owe the restoration of social and political equilibrium because of the faith in our civilization. Freedom, work autonomy and democracy are the only limitations.
