David Bowie in Darkness

A Study of 1. Outside and the Late Career

McFarland **As an artist, David Bowie was widely considered a "chameleon," shedding one persona to create another and thus staying popular, relevant and compelling. In reality, Bowie was able to work with the resources around him to create something new, causing many to see him as a sort of lone artist rather than a collaborator in the creation of his own celebrity. Mid-career, Bowie began presenting himself as a figure in darkness, progressively more hidden. He required an audience for his continued celebrity but worked against that audience in the creation--or rather the destruction--of his star image. This tension is made clear in his 1995 album 1. Outside, which has him performing for an audience while simultaneously shunning them. This book explores Bowie's negotiation of his celebrity during his later career, with particular focus on 1. Outside, an album symptomatic of deep-seated societal and personal anxiety.**

An Introduction to Competition Law

Bloomsbury Publishing **This book is intended to serve as a first acquaintance with competition law. It aims to reach a broad range of readers: students, teachers in further and higher education, officials and practising lawyers who are not usually faced with competition law issues in their working lives. This second edition has been fully updated in the light of the latest developments, and covers both EU and UK competition law along with an introduction to the EU rules**

on State Aid. It provides insight into the combined system of EU and UK competition law, providing a broad range of examples for the three main subjects - the prohibition of cartels, the prohibition of the abuse of a position of dominance and the supervision of concentrations (ie mergers and acquisitions). Those examples are drawn from European and UK practice. These greatly enhance the exposition of the general principles, taking into account recent legislative and judicial developments.

Experiences of Islamophobia

Living with Racism in the Neoliberal Era

Routledge Since 9/11 interest in Islamophobia has steadily increased - as has the number of academic publications discussing the phenomenon. However, theoretical expositions have dominated the field. Lived experiences of Islamophobia, by contrast, have received little attention. In recognition of the importance of addressing this imbalance, this book provides theoretically-informed analyses alongside everyday testimonies of anti-Muslim racism, set comparatively in an international context. Carr argues that the failure of the neoliberal state to collect data on anti-Muslim racism highlights the perpetuation of 'race' blindness within governance. Not only does this mean that the salience of racism is denied in the lives of those who experience it, but this also enables the state to absolve itself from challenging the issue and providing the necessary supports to Muslim communities. Offering original empirical research and theoretical engagement with the concept of 'race'-blind neoliberal governance, this book will appeal to students and scholars across the social sciences, in addition to policymakers and activists working in this topical area.

Perspectives on the Restoration of the Mississippi Delta The Once and Future Delta

[Springer](#) Human impacts and emerging mega-trends such as climate change and energy scarcity will impact natural resource management in this century. This is especially true for deltas because of their ecological and economic importance and their sensitivity to climate change. The Mississippi delta is one of the largest in the world and has been strongly impacted by human activities. Currently there is an ambitious plan for restoration of the delta. This book, by a renown group of delta experts, provides an overview of the challenges facing the delta and charts - a way forward to sustainable management.

Fugitive Pedagogy

Carter G. Woodson and the Art of Black Teaching

[Harvard University Press](#) A fresh portrayal of one of the architects of the African American intellectual tradition, whose faith in the subversive power of education will inspire teachers and learners today. Black education was a subversive act from its inception. African Americans pursued education through clandestine means, often in defiance of law and custom, even under threat of violence. They developed what Jarvis Givens calls a tradition of “fugitive pedagogy”—a theory and practice of Black education in America. The enslaved learned to read in spite of widespread prohibitions; newly emancipated people braved the dangers of integrating all-White schools and the hardships of building Black

schools. Teachers developed covert instructional strategies, creative responses to the persistence of White opposition. From slavery through the Jim Crow era, Black people passed down this educational heritage. There is perhaps no better exemplar of this heritage than Carter G. Woodson—groundbreaking historian, founder of Black History Month, and legendary educator under Jim Crow. Givens shows that Woodson succeeded because of the world of Black teachers to which he belonged: Woodson’s first teachers were his formerly enslaved uncles; he himself taught for nearly thirty years; and he spent his life partnering with educators to transform the lives of Black students. Fugitive Pedagogy chronicles Woodson’s efforts to fight against the “mis-education of the Negro” by helping teachers and students to see themselves and their mission as set apart from an anti-Black world. Teachers, students, families, and communities worked together, using Woodson’s materials and methods as they fought for power in schools and continued the work of fugitive pedagogy. Forged in slavery, embodied by Woodson, this tradition of escape remains essential for teachers and students today.

Financial Inclusion in Asia and Beyond

Measurement, Development Gaps, and Economic Consequences

Routledge The World Bank considers financial inclusion to be an enabler for at least 7 of the 17 United Nation’s sustainable development goals (SDGs). Financial inclusion, with its associated policy implications, is an important issue for ASEAN. This book examines the economic effects of financial inclusion. It explores issues surrounding measurement and impact of financial inclusion. The book looks at various, salient topics including measurement of financial inclusion, the impact of (various indicators of) financial inclusion on development outcomes and

macroeconomic volatility using aggregate data, as well as the effects of financial inclusion on poverty and development outcomes using micro data.

Model Rules of Professional Conduct

American Bar Association **The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.**

Class and Group Actions in Arbitration

Kluwer Law International B.V. **Several decades ago, a typical arbitration would involve one claimant against one respondent. Over the years, more and more cases involve several claimants against several respondents. Today, one third of all international ICC arbitrations seem to involve multiparty cases, multi-contract cases involving multiple contracts, multiple parties. The evolution has continued and the debate today is whether it would be possible for a class of people in the same situation or a group of citizens having the same interest to start one single arbitration procedure as a group or as a class. This publication examines the complex issues involved in class or group arbitration on a comparative law basis. Is there a place for such proceedings within the framework of the arbitration process? Class action procedures, as developed in the United States court system and more recently in Canada, are almost nonexistent in Europe. The European Commission has advocated collective redress as an important means of access to justice but class actions have found little enthusiasm in the Members States. The book highlights the lessons which have been learned from the experience of cases in the US and in Europe. What does the future hold for class, collective and mass arbitrations? Are they a marginal phenomenon or has their potential yet to be realized? What are possible solutions to the issues that have been encountered? Can we expect to see more of such arbitrations in the future? Written by arbitrators, academics and practitioners, this Dossier will provide the answers to these questions and many**

more.

Dialogue Interpreting

A Guide to Interpreting in Public Services and the Community

Routledge **Routledge Interpreting Guides cover the key settings or domains of interpreting and equip trainee interpreters and students of interpreting with the skills needed in each area of the field. Concise, accessible and written by leading authorities, they include examples from existing interpreting practice, activities, further reading suggestions and a glossary of key terms. Drawing on recent peer-reviewed research in interpreting studies and related disciplines, Dialogue Interpreting helps practising interpreters, students and instructors of interpreting to navigate their way through what is fast becoming the very expansive field of dialogue interpreting in more traditional domains, such as legal and medical, and in areas where new needs of language brokerage are only beginning to be identified, such as asylum, education, social care and faith. Innovative in its approach, this guide places emphasis on**

collaborative dimensions in the wider institutional and organizational setting in each of the domains covered, and on understanding services in the context of local communities. The authors propose solutions to real-life problems based on knowledge of domain-specific practices and protocols, as well as inviting discussion on existing standards of practice for interpreters. Key features include: contextualized examples and case studies reinforced by voices from the field, such as the views of managers of language services and the publications of professional associations. These allow readers to evaluate appropriate responses in relation to their particular geo-national contexts of practice and personal experience activities to support the structured development of research skills, interpreter performance and team-work. These can be used either in-class or as self-guided or collaborative learning and are supplemented by materials on the Translation Studies Portal a glossary of key terms and pointers to resources for further development. Dialogue Interpreting is an essential guide for practising interpreters and for all students of interpreting within advanced undergraduate and postgraduate/graduate programmes in Translation and Interpreting Studies, Modern Languages, Applied Linguistics and Intercultural Communication.

The Sum of Small Things

A Theory of the Aspirational Class

Princeton University Press **How the leisure class has been replaced by a new elite, and how their consumer habits affect us all In today's world, the leisure class has been replaced by a new elite. Highly educated and defined by cultural capital rather than income bracket, these individuals earnestly buy organic, carry NPR tote bags, and breast-feed their**

babies. They care about discreet, inconspicuous consumption—like eating free-range chicken and heirloom tomatoes, wearing organic cotton shirts and TOMS shoes, and listening to the Serial podcast. They use their purchasing power to hire nannies and housekeepers, to cultivate their children’s growth, and to practice yoga and Pilates. In *The Sum of Small Things*, Elizabeth Currid-Halkett dubs this segment of society “the aspirational class” and discusses how, through deft decisions about education, health, parenting, and retirement, the aspirational class reproduces wealth and upward mobility, deepening the ever-wider class divide. Exploring the rise of the aspirational class, Currid-Halkett considers how much has changed since the 1899 publication of Thorstein Veblen’s *Theory of the Leisure Class*. In that inflammatory classic, which coined the phrase “conspicuous consumption,” Veblen described upper-class frivolities: men who used walking sticks for show, and women who bought silver flatware despite the effectiveness of cheaper aluminum utensils. Now, Currid-Halkett argues, the power of material goods as symbols of social position has diminished due to their accessibility. As a result, the aspirational class has altered its consumer habits away from overt materialism to more subtle expenditures that reveal status and knowledge. And these transformations influence how we all make choices. With a rich narrative and extensive interviews and research, *The Sum of Small Things* illustrates how cultural capital leads to lifestyle shifts and what this forecasts, not just for the aspirational class but for everyone.

International Arbitration and EU Law

Edward Elgar Publishing This book examines the intersection of EU law and international arbitration based on the experience of leading practitioners in both commercial and investment treaty arbitration law. It expertly illustrates the depth and breadth of EU law’s impact on party autonomy and on the margin of appreciation available to arbitral tribunals.

Regulating Charities

The Inside Story

Taylor & Francis In this volume charity commissioners and leading charity policy reformers from across the world reflect on the aims and objectives of charity regulation and what it has achieved. *Regulating Charities* represents an insider's review of the last quarter century of charity law policy and an insight for its future development. Charity Commissioners and nonprofit regulatory agency heads chart the nature of charity law reforms that they have implemented, with a 'warts and all' analysis. They are joined by influential sector reformers who assess the outcomes of their policy agitation. All reflect on the current state of charities in a fiscally restrained environment, often with conservative governments, and offer their views on productive regulatory paths available for the future. This topical collection brings together major charity regulation actors, and will be of great interest to anyone concerned with contemporary third sector policy-making, public administration and civil society.

Business, organisational and consumer resilience and
the Christchurch earthquakes

Routledge **This book provides a comprehensive examination of the effects of a natural disaster on businesses and organisations, and on a range of stakeholders, including employees and consumers. Research on how communities and businesses respond to disasters can inform policy and mitigate the cost and impacts of future disasters. This book discusses how places recover following a disaster and the vital roles that business and other organisations play. This volume gives a detailed understanding of business, organisational and consumer responses to the Christchurch earthquake sequence of 2010-2011, which caused 185 deaths, the loss of over 70 per cent of buildings in the city's CBD, major infrastructure damage, and severely affected the city's image. Despite the devastation, the businesses, organisations and people of Christchurch are now undergoing significant recovery. The book sheds significant new light not only on business and organisation response to disaster but on how business and urban systems may be made more resilient.**

America, As Seen on TV

How Television Shapes Immigrant Expectations Around the Globe

NYU Press Finalist, 2020 Latino Book Awards, Best Academic Themed Book The surprising effects of American TV on global viewers As a dominant cultural export, American television is often the first exposure to American ideals and the English language for many people throughout the world. Yet, American television is flawed, and, it represents race, class, and gender in ways that many find unfair and unrealistic. What happens, then, when people who grew up on American television decide to come to the United States? What do they expect to find, and what do they actually find? In *America, As Seen on TV*, Clara E. Rodríguez surveys international college students and foreign nationals working or living in the US to examine the impact of American television on their views of the US and on their expectations of life in the United States. She finds that many were surprised to learn that America is racially and economically diverse, and that it is not the easy-breezy, happy endings culture portrayed in the media, but a work culture. The author also surveys US-millennials about their consumption of US TV and finds that both groups share the sense that American TV does not accurately reflect racial/ethnic relations in the US as they have experienced them. However, the groups differ on how much they think US TV has influenced their views on sex, smoking and drinking. *America, As Seen on TV* explores the surprising effects of TV on global viewers and the realities they and US millennials actually experience in the US.
