## A Music Librarian's Guide to Creating Videos and Podcasts

A-R Editions, Inc. A Music Librarian's Guide to Creating Videos and Podcasts is a guide every music librarian will want to use to develop and enhance multi-media skills. The digital age has created a divide between music librarians and their patrons: traditional models of interaction have been superseded or replaced by electronic communication, and virtually all librarians have felt the ensuing decline of their

users' information-seeking skills. Music librarians can now be proactive in reaching out to patrons digitally with videos and podcasts, since editing technologies for both platforms have become inexpensive and easy to use. In A Music Librarian's Guide to Creating Videos and Podcasts Katie Buehner and Andrew Justice give music librarians the step-by-step instructions for creating their own content in both Mac and PC platforms. This ready reference on videos should find home in every library and also many personal collections.

## How to Produce Videos & Films

[Earl R. Dingman](#) This is the most up-to-date and complete book you will find on producing. It covers the new CUE process from BMI and ASCAP for getting paid for soundtrack music. It includes a buyer's guide for covering Netflix Approved cameras. It covers the essentials and introduces you to the process. It can take a person who knows nothing about film & video production, leading them from story, to script, to budgeting, casting, finding actors, directors, camera people, composers, and distributors. -It will also show you how to do ALL of that yourself, on almost any budget. -You'll learn about the gear you need like cameras, tripods, lighting, editing software, editing computer. -Story & Script, the logline, a spec pitch that went to pilot, Joseph Campbell and the Hero's Journey, John Truby and the Anatomy of Story, the writing concepts of Syd Field, Christopher Vogler, Michael Hague, plus outlines, the screenplay, free and demo screenwriting software sources, adapting a book into a movie, music synchronization licenses. -Finding actors and crew members. Free casting tools. Paid casting services. -A look at cameras, including f/stop, t/stops, depth of field, focal lengths, distortions, filter, matte

boxes, global and rolling shutters, and lens mounts. -How to budget and plan a production economically. -Business types for setting up your production company. How to protect your assets and a discussion of liabilities and taxes. -Copyrights and licensing information. -Making a storyboard and using it for shooting, editing, and composing. -The shoot itself, framing shots, the master shot, the close shots, reverse angles, the 180 rule, lighting a set with sample diagrams, night for day shots, day for night shots, doing coverage of a scene, the role of the script supervisor. -Special Effects, blue, green, and yellow screen, examples. -Editing 16 and 35mm movie film, analog videotape using an edit controller, digital file types, editing software, the timeline, dialog editing, background, music, and room tone tracks. -A primer for Composing Music, learning how to count to make chords and patterns, major chords, minor chords, sevenths, major sevenths, diminished, perfect seconds, including a template for a key wheel to help you change keys and know what notes makeup what chords. Concepts that the video person who is all thumbs can use to make their own basic backgrounds scores if they can't find a composer. -The new ASCAP and BMI Cue Sheets so you can get paid for any music when your productions air on broadcast or network television. Also covers the Harry Fox Agency for the licensing of your song, your music or to obtain permission to use someone else's tunes. -The history of imaging, optics, the photographic process, projectors, sound recording, tube electronics, television, audio recording, the how and why of film speeds, how color movie film works, how color television works, the differences between American and European film and video, the digital age, SD, HD, 4k and 8k. A look at the mystical color spaces of YUV and YIQ. -Distribution concepts for your films. -Los Angeles Union Scale Rates for the cast and crew so you can budget your scripts. -A Bibliography of reference sources for further reading. The author has been doing film, photography, and audio recording for fifty-five years working on productions that have aired on television, been screened theatrically and on YouTube. The author has been writing on the topics of film, video, and audio for magazine since 1980, including contributions for Mix Magazine, Music Connection, Pro Sound News, Technical Photography, Moving Image, etc. The author was schooled in television electronics by engineers at Admiral in Chicago, and in film/theater production at Valley College in Los Angeles, under Dr. Milton Timmons, Dr. Stern, Peter Parkin MFA from Pasadena Playhouse, Elliot Bliss at CBS Television Studios (now Todd-AO).

## Essential Digital Video Handbook

### A Comprehensive Guide to Making Videos That Make Money

Routledge The digital video revolution has blurred the lines between professional and amateur equipment, with some Hollywood movies being shot and edited using the same technology that families use for their vacation footage. With sales of digital video cameras and computer-based editing systems skyrocketing, more and more people are seeing the potential and are anxious to advance their own personal video production skills to a higher level. The Essential Digital Video Handbook will help you, the beginner and budding professional become a better writer, producer, director, photographer, and editor. Author Pete May's sound advice and no-nonsense approach will help you achieve results that will wow audiences whether they're gathered in the family room or the corporate boardroom. The Essential Digital Video Handbook takes the you through every step of the process, from buying the right equipment to editing footage. This book shares tips on achieving professional quality results by understanding and exploiting visual language, both by initially following the rules and then by breaking them with style and confidence. Videographers will also learn to sound like professionals by understanding and speaking the language of the business. Instead of narrowly focusing on just the latest equipment and technology, May uses lessons he learned during twenty-five years in the television business to drill down to the most important stuff: the principles that don't change, and the tricks behind making videos that document, entertain, train, motivate, persuade, satisfy, and even have the ability to make money.

### Ultimate Guide to YouTube for Business

Entrepreneur Press 490 million people log on to YouTube each month-and business owners need to know how to capture them or better yet, be the initial reason for their visit. Jason Rich shares the expertise of practicing entrepreneurs, delivering a step-by-step strategy supported by valuable insights, tips, and resources. From video production to promotion, author Jason R. Rich details how to use the power of YouTube to promote business brands, products, or services, ultimately attracting new customers. Unfamiliar entrepreneurs receive a full tutorial on pre-production and production essentials, from developing video ideas that attract attention to overcoming lighting and sound challenges. Amateur producers receive a full list of equipment needed, and they gain tips from well-known YouTube users on how to produce quality spots without breaking the bank. After covering the basics, Rich - joined by YouTube-savvy entrepreneurs - reveals how small business owners can drive viewers to contact their business. Rich also shows entrepreneurs how they can make money, while promoting themselves.

## Choosing and Using a New CAT

## Getting the Most from Your Schmidt Cassegrain or Any Catadioptric Telescope

Springer Nature Catadioptric telescopes (CATs) such as the Schmidt Cassegrains remain popular among amateur astronomers for their ability to reveal thousands of beautiful deep-space wonders. Additionally, their computer-assisted capabilities allow them to automatically point to and track celestial objects, making astronomy accessible to more people than ever before. However, selecting the right one and learning how to use it can be difficult for stargazers both old and new. That's where this book comes in. The first edition, published in 2009, has remained the standard reference for mastering these popular instruments. This revised edition brings the material completely up to date, with several extensively rewritten chapters covering the most recent developments in telescope and camera equipment as well as computer software. Through the author's 45 years of experience with catadioptric telescopes, readers will learn to decide which catadioptric telescope is right for them, to choose a specific make and model, and finally, to use the telescope in the field. Covered in other chapters are: Solar System and deep-sky observations; astrophotography and computer control of CATs; and troubleshooting and maintaining your equipment. If you dream of owning a telescope or are frustrated by the telescope you already own, this is the book for you!
