Capital Punishment in Twentieth-Century Britain

Audience, Justice, Memory

Routledge Capital punishment for murder was abolished in Britain in 1965. At this time, the way people in Britain perceived and understood the death penalty had changed – it was an issue that had become increasingly controversial, high-profile and fraught with emotion. In order to understand why this was, it is necessary to examine how ordinary people learned about and experienced capital punishment. Drawing on primary research, this book explores the cultural life of the death penalty in Britain in the twentieth century, including an exploration of the role of the popular press and a discussion of portrayals of the death penalty in plays, novels and films. Popular protest against capital punishment and public responses to and understandings of capital cases are also discussed, particularly in relation to conceptualisations of justice. Miscarriages of justice were significant to capital punishment's increasingly fraught nature in the mid twentieth-century and the book analyses the unsettling power of two such high profile miscarriages of justice. The final chapters consider the continuing relevance of capital punishment in Britain after abolition, including its symbolism and how people negotiate memories of the death penalty. Capital Punishment in Twentieth-Century Britain is groundbreaking in its attention to the death penalty and the effect it had on everyday life and it is the only text on this era to place public and popular discourses about, and reactions to, capital punishment at the centre of the analysis. Interdisciplinary in focus and methodology, it will appeal to historians, criminologists, sociologists and socio-legal scholars.

Bahrain's Uprising

Resistance and Repression in the Gulf

Zed Books Ltd. Amid the extensive coverage of the Arab uprisings, the Gulf state of Bahrain has been almost forgotten. Fusing historical and contemporary analysis, *Bahrain's Uprising* seeks to fill this gap, examining the ongoing protests and state repression that continues today. Drawing on powerful testimonies, interviews, and conversations from those involved, this broad collection of writings by scholars and activists provides a rarely heard voice of the lived experience of Bahrainis, describing the way in which a sophisticated society, defined by a historical struggle, continues to hamper the efforts of the ruling elite to rebrand itself as a liberal monarchy.

Law and Regulation of Mobile Payment Systems

Issues arising 'post' financial inclusion in Kenya

Routledge Over the last ten years mobile payment systems have revolutionised banking in some countries in Africa. In Kenya the introduction of M-Pesa, a new financial services model, has transformed the banking and financial services industry. Giving the unbanked majority access to the financial services market it has attracted over 18 million subscribers which is remarkable given that fewer than 4 million people in Kenya have bank accounts. This book addresses the legal and regulatory issues arising out of the introduction of M-Pesa in Kenya and its drive towards financial inclusion. It considers the interaction between regulation and technological innovation with a particular focus on the regulatory tools, institutional arrangements and government decisional processes through the examination as a whole of its regulatory capacity. This is done with a view to understanding the regulatory capacity of Kenya in addressing the vulnerabilities presented by technological innovation in the financial industry for consumers after financial inclusion. It also examines the way that mobile payments have been regulated by criticising the piecemeal approach that the Central Bank of Kenya has taken in addressing

the legal and regulatory issues presented by mobile payments. The book argues there are significant gaps in the regulatory regime of mobile banking in Kenya.

Iraqi Kurdistan, the PKK and International Relations

Theory and Ethnic Conflict

Routledge Due to its primacy in explaining issues of war and peace in the international arena, the discipline of International Relations (IR) looms large in analyses of and responses to ethnic conflict in academia, politics and popular media – in particular with respect to contemporary conflicts in the Middle East. Grounded in constitutive theory, this book challenges how ethnic/ethno-nationalist conflict is represented in explanatory IR by deconstructing its most prominent state-centric models, frameworks and analytical concepts. As much a critique of contemporary scholarship on Kurdish ethno-nationalism as a detailed analysis of the most prominent Kurdish ethno-nationalist actors, the book provides the first in-depth investigation into the relations between the PKK and the main Iraqi Kurdish political parties from the 1980s to the present. It situates this inquiry within the wider context of the ambiguous political status of the Kurdistan Region of Iraq, its relations with Turkey, and the role Kurdish parties and insurgencies play in the war against ISIS in Iraq and Syria. Appreciating these complex dynamics and how they are portrayed in Western scholarship is essential for understanding current developments in the Iraqi and Syrian theatres of war, and for making sense of discussions about a potential independent Kurdish state to emerge in Iraq. Iraqi Kurdistan provides a comprehensive and critical discussion of the state-centric and essentialising epistemologies, ontologies, and methodologies of the three main paradigms of explanatory IR, as well as their analytical models and frameworks on ethnic identity and conflict in the Middle East and beyond. It will therefore be a valuable resource for anyone studying ethnicity and nationalism, International Relations or Middle East Politics.

Nile Water Rights

An International Law Perspective

Springer Nature The book provides a comprehensive assessment of the law governing the use and management of the Nile and considers, more broadly, how international water law can guide the development of a legal and institutional framework for cooperation over shared freshwater resources. It defines the current state of international water law and discusses the content of the United Nations Convention on the Law of the Non-Navigational Uses of International Watercourses. On this basis, it assesses the Nile water treaties and the 2010 Cooperative Framework Agreement for the Nile, and examines their compliance with international law, with a specific focus on the legal consequences of South Sudan's secession from Sudan. Moreover, the book recommends important amendments to the 2010 Agreement. Building on these recommendations, it addresses the implementation of the principle of equitable and reasonable use regarding the Nile, illustrating the extent to which the principle can provide a conceptual framework for regulating water use. The book is a valuable resource for academics and practitioners alike as it combines legal assessment with a discussion of how international water law principles can be implemented in practice.

Nordic Nutrition Recommendations 2012

Integrating nutrition and physical activity

Nordic Council of Ministers The Nordic countries have collaborated in setting guidelines for dietary composition and recommended intakes of nutrients for several decades through the joint publication of the Nordic Nutrition Recommendations (NNR). This 5th edition, the NNR 2012, gives Dietary Reference Values (DRVs) for nutrients, and compared with earlier editions more emphasis has been put on evaluating the scientific evidence for the role of food and food patterns contributing to the prevention of the major diet-related chronic diseases. Recommendations on physical activity are included and interaction with physical activity has been taken into account for the individual nutrient recommendations wherever appropriate. A chapter on sustainable food consumption has been added. A Nordic perspective has been accounted for in setting the reference values. The NNR 2012 has used an evidence-based and transparent approach in assessing associations between nutrients and foods and certain health outcomes. Systematic reviews form the basis for the recommendations of several nutrients and topics, while a less stringent update has been done for others. The systematic reviews and individual chapters have been peer reviewed and the systematic reviews are published in the Food & Nutrition Research journal. The draft chapters were subject to an open public consultation. Recommendations have been changed only when sufficient scientific evidence has evolved since the 4th edition. The primary aim of the NNR 2012 is to present the scientific background of the recommendations and their application. A secondary aim is for the NNR 2012 to function as a basis for the national recommendations that are adopted by the individual

Quantities, Units and Symbols in Physical Chemistry

Royal Society of Chemistry The first IUPAC Manual of Symbols and Terminology for Physicochemical Quantities and Units (the Green Book) of which this is the direct successor, was published in 1969, with the object of 'securing clarity and precision, and wider agreement in the use of symbols, by chemists in different countries, among physicists, chemists and engineers, and by editors of scientific journals'. Subsequent revisions have taken account of many developments in the field, culminating in the major extension and revision represented by the 1988 edition under the simplified title Quantities, Units and Symbols in Physical Chemistry. This 2007, Third Edition, is a further revision of the material which reflects the experience of the contributors with the previous editions. The book has been systematically

brought up to date and new sections have been added. It strives to improve the exchange of scientific information among the readers in different disciplines and across different nations. In a rapidly expanding volume of scientific literature where each discipline has a tendency to retreat into its own jargon this book attempts to provide a readable compilation of widely used terms and symbols from many sources together with brief understandable definitions. This is the definitive guide for scientists and organizations working across a multitude of disciplines requiring internationally approved nomenclature.

Successful Aging Asian Perspectives

Springer This book brings together state-of-the-art research on successful aging in Asian populations and highlights how the factors that contribute to successful aging differ from those in the West. It examines the differences between the Asian and Western contexts in which the aging process unfolds, including cultural values, lifestyles, physical environments and family structures. In addition, it examines the question of how to add quality to longer years of life. Specifically, it looks at ways to promote health, preserve cognition, maximize functioning with social support and maintain emotional well-being despite inevitable declines and losses. Compared to other parts of the world, Asia will age more quickly as a result of the rapid socioeconomic developments leading to rising longevity and historically low fertility rates in some countries. These demographic forces in vast populations such as China are expected to make Asia the main driver of global aging in the coming decades. As a result, researchers, professionals, policymakers, as well as the commercial sector, in both East and West, are increasingly interested in gaining a deeper understanding of aging in Asia.

Making Sense of Cyber Capabilities for Small States

Case Studies from the Asia-Pacific

Routledge Domingo explores the potential of cyber capabilities for small states in the Asia-Pacific, the most active region for cyber conflict. He develops a systematic explanation for why Brunei, New Zealand, and Singapore have developed or are developing cyber capabilities. Studies on cyber conflict and strategy have substantially increased in the past decade but most have focused on the cyber operations of powerful states. This book moves away from the prominence of powerful states and explores the potential of cyber capabilities for small states in the Asia-Pacific, the most active region for cyber conflict. It develops a systematic explanation of why Brunei, New Zealand, and Singapore have developed or are developing cyber capabilities despite its obscure strategic value. The book argues that the distribution of power in the region and a "technology-oriented" strategic culture are two necessary conditions that influence the development of cyber capabilities in small states. Following this argument, the book draws on neoclassical realism as a theoretical framework to account for the interaction between these two conditions. The book also pursues three secondary objectives. First, it aims to determine the constraints and incentives that affect the utilization of cyber capabilities as foreign policy instruments. Second, the book evaluates the functionality of these cyber capabilities for small states. Lastly, it assesses the implications of employing cyber capabilities as foreign policy tools of small states. This book will be an invaluable resource for academics and security analysts working on cyber conflict, military strategy, small states, and International Relations in general.

History for the IB Diploma: Causes, Practices and Effects of Wars

Cambridge University Press An exciting new series that covers the five Paper 2 topics of the IB 20th Century World History syllabus. This coursebook covers Paper 2, Topic 1, Causes, practices and effects of wars, in the 20th Century World History syllabus for the IB History programme. It is divided into thematic sections, following the IB syllabus structure and is written in clear, accessible English. It covers the following areas for detailed study: First World War (1914-18); Second World War (1939-45); Asia and Oceania: Chinese Civil War (1927-37 and 1946-9); and Europe and Middle East: Spanish Civil War (1936-9). Tailored to the requirements and assessment objectives of the IB syllabus, it allows students to make comparisons between different regions and time periods.

Biological Invasions and Its Management in China

Volume 2

Springer The book discusses invasive-species problems in agriculture, forests and aquatic ecosystems, highlighting the invasive mechanisms and management of the selected invasive species. Biological invasion has become a serious global ecological and economic problem that deserves particular attention from both government officials and scientists. This volume focuses on three key scientific areas: 1) population establishment and spreading mechanisms of the selected invasive species; 2) ecology adaptation, population growth, expansion and evolution of invasive species; and 3) impact of bio-invasion on the ecosystem structure and function at community and ecosystem levels. The presented research will result in techniques for better management of invasive species.

The Harms of Hate for Gypsies and Travellers

A Critical Hate Studies Perspective

Springer Nature Gypsies and Travellers have often been overlooked as victims of hate crime and discrimination. This book redresses that exclusion by shining a light on the harms of hate experienced by Gypsies and Travellers in the UK. In doing so James explores how hate permeates all aspects of their lives and identifies the hate crimes, incidents, and speech that they are subject to. It goes on to explore how hate against Gypsies and Travellers occurs as discrimination, social exclusion and criminalisation and how that hate is embedded within the language and practice of neoliberal capitalism. This book provides new insights to critical criminology and ways of understanding hate by using the critical hate studies perspective to gain a full appreciation of the harms of hate. As a consequence of this, the book is able to do justice to Gypsies' and Travellers' experiences of hate by extrapolating how harms manifest and the impact they have on Gypsies' and Travellers' social and personal identities. The book explains and acknowledges how hate harms imbue Gypsies' and Travellers' daily lives, including common events of serious abuse and assault, regular ill-treatment in provision of services, and everyday micro-aggressions. It argues hate experienced by Gypsies and Travellers can only be fully recognised through an analysis of the neoliberal capitalist context within which it occurs and the harmful subjective experience it engenders. The author's expertise in this area, having carried out research with Gypsies and Travellers for 25 years, underpins the book with excellent empirical knowledge and research-informed discussion.

Trauma and the Rehabilitation of Trafficked Women

The Experiences of Yazidi Survivors

Routledge Based on research in camps in Iraqi Kurdistan and among refugees in Germany, this book addresses the challenges, strategies and support systems that exist for the rehabilitation and reintegration of Yazidi women recovering from human trafficking. Through in-depth interviews, focus group discussions and case studies, it gives women trafficked by ISIS their own voice to express their experiences during captivity, whilst offering an overview of the forms of support and protection available and necessary for survivors. An examination of the experiences and needs of refugee women who have undergone traumatizing experiences, Trauma and the Rehabilitation of Trafficked Women will appeal to scholars and policy makers with interests in gender studies, feminist thought, sexual violence during war, human trafficking and trauma recovery.

Reading Dylan Thomas

Edinburgh University Press A collection of essays on Dylan Thomas, reading culture and his place in modernist studies Reclining quietly with a book; an ear glued to the Hi-Fi; sifting a library stack; the TV flickering; a website gone live Few poets have inspired such remarkable scenes and modes of interpretation as Dylan Thomas. Our means of access and response to his work have never been more eclectic, and this collection sheds new light on what it means to 'read' such a various art. In thinking beyond the parameters of life writing and lingering interpretative communities, Reading Dylan Thomas

attends in detail to the problems and pleasures of deciphering Thomas in the twenty-first century, teasing out his debts and effects, tracing his influence on later artists, and suggesting ways to understand his own idiosyncratic reading practices. From short stories to memoirs, poems to broadcasts, letters to films, manuscripts to paintings, the material considered in this volume lays the ground for a new consideration of Thomas's formal versatility, and his distinctive relation to literary modernism. Key Features Evaluates the breadth of Thomas's creative practice, from short stories to memoirs, poems to broadcasts, letters to films, manuscripts to paintings Draws on recently discovered manuscripts and archival material in Britain and North America A distinctive combination of cultural history, close reading, and critical theory

Transforming the Workforce for Children Birth Through Age 8

A Unifying Foundation

National Academies Press Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

Morbidity and Mortality Weekly Report MMWR. Recommendations and reports In-Flight Simulators and Fly-by-Wire/Light Demonstrators A Historical Account of International Aeronautical Research

Springer This book offers the first complete account of more than sixty years of international research on In-Flight Simulation and related development of electronic and electro-optic flight control system technologies ("Fly-by-Wire" and "Fly-by-Light"). They have provided a versatile and experimental procedure that is of particular importance for verification, optimization, and evaluation of flying qualities and flight safety of manned or unmanned aircraft systems. Extensive coverage is given in the book to both fundamental information related to flight testing and state-of-the-art advances in the design and implementation of electronic and electro-optic flight control systems, which have made In-Flight Simulation possible. Written by experts, the respective chapters clearly show the interdependence between various aeronautical disciplines and in-flight simulation methods. Taken together, they form a truly multidisciplinary book that addresses the needs of not just flight test engineers, but also other aeronautical scientists, engineers and project managers and historians as well. Students with a general interest in aeronautics as well as researchers in countries with growing aeronautical ambitions will also find the book useful. The omission of mathematical equations and in-depth theoretical discussions in favor of fresh discussions on innovative experiments, together with the inclusion of anecdotes and fascinating photos, make this book not only an enjoyable read, but also an important incentive to future research. The book, translated from the German by Ravindra Jategaonkar, is an extended and revised English edition of the book *Fliegende Simulatoren und Technologieträger*, edited by Peter Hamel and published by Appelhans in 2014.

The Making of the English Working Class

Open Road Media A history of the common people and the Industrial Revolution: "A true masterpiece" and one of the Modern Library's 100 Best Nonfiction Books of the twentieth century (Tribune). During the formative years of the Industrial Revolution, English workers and artisans claimed a place in society that would shape the following centuries. But the capitalist elite did not form the working class—the workers shaped their own creations, developing a shared identity in the process. Despite their lack of power and the indignity forced upon them by the upper classes, the working class emerged as England's greatest cultural and political force. Crucial to contemporary trends in all aspects of society, at the turn of the nineteenth century, these workers united into the class that we recognize all across the Western world today. E. P. Thompson's magnum opus, *The Making of the English Working Class* defined early twentieth-century English social and economic history, leading many to consider him Britain's greatest postwar historian. Its publication in 1963 was highly controversial in academia, but the work has become a seminal text on the history of the working class. It remains incredibly relevant to the social and economic issues of current times, with the Guardian saying upon the book's fiftieth anniversary that it "continues to delight and inspire new readers."
