LIFELONG LEARNING IN THE DIGITAL AGE

SUSTAINABLE FOR ALL IN A CHANGING WORLD

Springer This book provides a comprehensive overview of the issues involved in Lifelong Learning supported by Information and Communication Technology (ICT). In this overview, the following issues are discussed: "Lifelong Learning in the Digital Age" contains reviewed papers by invited authors, as well as a comprehensive report with resource materials produced by a Focus Group of invited participants in the Lifelong Learning Working Track at the e-Train conference, "E-Training Practices for Professional Organizations." The conference was sponsored by the International Federation for Information Processing (IFIP), Technical Committee 3 (Education), and was held in Pori, Finland in July 2003. "Lifelong Learning in the Digital Age" will help both decisionmakers and educational designers to deal with the issues connected with Lifelong Learning. Solutions will have to be unique for each culture and each country, but this book will certainly inform and should considerably assist decision-making and problem resolution.

HUMAN CHOICE AND COMPUTERS

ISSUES OF CHOICE AND QUALITY OF LIFE IN THE INFORMATION SOCIETY

Springer Human Choice and Computers: Issues of Choice and Quality of Life in the Information Society presents different views about how terrorist actions are influencing political and social discussions and decisions, and it covers questions related to legitimacy and power in the Information Society. Ethical principles are important guidelines for responsible behavior of IT professionals. But even under strong external pressure, long ranging aspects such as education and the roles of developing countries in the Information Society are important to discuss, especially to enable all to actively participate in information processes.

PRIMARY ICT: EXTENDING KNOWLEDGE IN PRACTICE

Learning Matters Still the biggest concern for many on initial teacher training courses is the acquisition of subject knowledge and the ability to translate that into effective teaching. This book addresses this - building on the core subject knowledge covered in the Achieving QTS series and relating it to classroom practice. It supports trainees in extending and deepening their knowledge of ICT and demonstrating how to apply it to planning and implementing lessons. Practical and up-to-date teaching examples are used to clearly contextualize subject knowledge. A clear focus on classroom practice helps trainees to build confidence and develop their own teaching strategies.

GCSE ENGINEERING

Nelson Thornes This full colour student resource has been specifically written for the new GCSE in Engineering and is suitable for all awarding body specifications.

If you need a guide to using ICT in the classroom or for professional support, start with this book.

DATA PROTECTION ON THE MOVE

CURRENT DEVELOPMENTS IN ICT AND PRIVACY/DATA PROTECTION

Springer This volume brings together papers that offer methodologies, conceptual analyses, highlight issues, propose solutions, and discuss practices regarding privacy and data protection. It is one of the results of the eight annual International Conference on Computers, Privacy, and Data Protection, CPDP 2015, held in Brussels in January 2015. The book explores core concepts, rights and values in (upcoming) data protection regulation and their (in)adequacy in view of developments such as Big and Open Data, including the right to be forgotten, metadata, and anonymity. It discusses privacy

promoting methods and tools such as a formal systems modeling methodology, privacy by design in various forms (robotics, anonymous payment), the opportunities and burdens of privacy self management, the differentiating role privacy can play in innovation. The book also discusses EU policies with respect to Big and Open Data and provides advice to policy makers regarding these topics. Also attention is being paid to regulation and its effects, for instance in case of the so-called 'EU-cookie law' and groundbreaking cases, such as Europe v. Facebook. This interdisciplinary book was written during what may turn out to be the final stages of the process of the fundamental revision of the current EU data protection law by the Data Protection Package proposed by the European Commission. It discusses open issues and daring and prospective approaches. It will serve as an insightful resource for readers with an interest in privacy and data protection.
