INVITATION TO PHYSICAL CHEMISTRY

(WITH CD-ROM)

World Scientific Publishing Company This is a unique book with a different aim from other books on the subject. The idea is to provide readers with the "big picture" first, yet at a level that helps further the study of physical chemistry. The text covers all the important topics in physical chemistry – thermodynamics, statistical thermodynamics, quantum chemistry, and chemical kinetics – staying rigorously close to the basic theory, using appropriate mathematics but avoiding long derivations. Moreover, the book is supplemented by a CD-ROM to make it more comprehensive, interactive and useful for a wider audience. The CD-ROM contains examples, extended discussion, exercises and details of important derivations to reinforce understanding of physical chemistry.

CONCEPTS OF BIOLOGY

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

COMMUNITY IDENTITY AND PLACE

ISLAMIC ARCHITECTURE AND COMMUNITY FOR A NEW ZEALAND CONTEXT

Situation and proposition: For a migrant population, establishing community and identity is an important part and parcel of integrating into the new environment as well as interacting with others. Even more so for the identity of a Muslim population whose sense of identity is linked by common threads which goes deeper than external appearances, and is not limited by temporal or geographical boundaries. In New Zealand, the Muslim community is one that has been growing for some time; having originated from a migrant population, not from one particular country, but from all over the world bound by a faith. With the migrants having settled, a new generation of Muslims emerge, connected to both a migrant and local culture, which at have the potential to become overemphasised, drowning out the true essence of a Muslim identity within the individual and community. This is manifest in the built environment through the community's need for key facilities such as masjids, which were often the purchase of existing buildings and converting its use to suit the purpose of a masjid as best as possible, often leading to neglecting part of the use of a masjid and a degradation of the quality of the environment for those who use it. Thus, in order to develop purity of identity, a place is required which brings together the community facilities necessary for learning and growth for both the individual and community.

Methodology and investigation: The topic of Islamic architecture can be vast, including many aspects, and spanning across multiple civilisations in an ever expanding trend. This is due to Islam being an inclusive way of life which took on board and allowed each civilisation to flourish with its own culture as long as it stayed within the limits of the core principles and beliefs. As a result of its vastness, it must be acknowledged that it is not possible to capture, portray, and include every value in one single design nor is it possible to convey all its meanings in a single piece of research such as this, as the analysis of the cultures that Islam spread to and the product of its influence alone requires in-depth researches to be done. With this understanding, the methodology employed will be one that explores some of the core beliefs and principles in Islam in order for them to be incorporated, addressed and reflected in the design of a place for the community in the context of New Zealand. In all Muslim societies the masjid is the most significant building type in the community, being central to one's spirituality as well as accommodating secular activities, acting as a community hub and providing a sense of identity and place. The approach taken to the architecture and building type in question will thus be an internal one, of attempting to bring out the values and principles embedded in the teachings of Islam as well as the practice of the Prophet and his companions, which in turn speak more volume in forming identity than the shape of an arch or the size of a dome. The investigation will explore the principles in the faith and the functional requirements of a masjid which form the primary identity shapers, as well as formal developments and architectural expressions which, although varied stylistically over region and period, was unified by key features which remained universal and formed part of a global identity for the building type concerned. Project initiative The design will explore the needs of a growing population within the Muslim in New Zealand with an emphasis on the idea of community identity, looking to provide a community centre and associated facilities to cater to the typical and specific needs of the population, in order to create a community hub within a New Zealand context that helps establish, develop and strengthen individual and community identity, place and interaction of the community within a positive environment.

THE MASTER PLAN

MY JOURNEY FROM LIFE IN PRISON TO A LIFE OF PURPOSE

Penguin The inspiring, instructive, and ultimately triumphant memoir of a man who used hard work and a Master Plan to turn a life sentence into a second chance. Growing up in a tough Washington, D.C., neighborhood, Chris Wilson was so afraid for his life he wouldn't leave the house without a gun. One night, defending himself, he killed a man. At eighteen, he was sentenced to life in prison with no hope of parole. But what should have been the end of his story became the beginning. Deciding to make something of his life, Chris embarked on a journey of self-improvement--reading, working out, learning languages, even starting a business. He wrote his Master Plan: a list of all he expected to accomplish or acquire. He worked his plan every day for years, and in his mid-thirties he did the impossible: he convinced a judge to reduce his sentence and became a free man. Today Chris is a successful social entrepreneur who employs returning citizens; a mentor; and a public speaker. He is the embodiment of second chances, and this is his unforgettable story.

A PRACTICAL GUIDE

Routledge The author explains why it's essential to begin the preparations by deciding what the meeting is intended to accomplish. That, in turn, determines what kind of meeting you should conduct: informational, advisory, or problem-solving. The author breaks down the essential tasks involved and even suggests the right type of person to handle each

one. She describes various types of troublesome meeting attendees-from accusers and apathetics to fence-sitters and know-it-alls-and offers advice on how to deal tactfully but firmly with them all. The author also tackles working effectively with the media, a subject that terrifies most planners. True stories of public meetings, both good and bad, add humor to her no-nonsense narrative. Follow her step-by-step checklist and leave nothing to chance."
