MISSION MOON

EXPLORING THE MOON WITH CHANDRAYAAN 1

Penguin UK It is the year 1568. Emperor Akbar is on the throne and all is well in Hindustan. Or is it? Meet Ash and Tara, two feisty kids who battle the vilest villains in Akbar's court. Devious minds are at work, planning to steal Akbar's precious emerald dagger, which the emperor believes brings him good luck. Ash and Tara, twin brother and sister, growing up in a village across the Yamuna land up in Agra Fort and get to know of the conspiracy. Can they stop the ruthless Magesh and his accomplices from carrying out the plan? Or will they get framed for the theft and end up on the wrong side of the world's most powerful monarch? The breathless adventure twists and turns its way through the magnificent Agra Fort, the bylanes of medieval Agra and the dark, stormy forests across the Yamuna. Each story in the brand new Ash and Tara series will keep you engrossed till the final action-packed ending even as you get to know and love Akbar, Birbal, Ash, Tara and their friends like never before.

A TEXTBOOK OF AUTOMOBILE ENGINEERING

S. Chand Publishing A Textbook of Automobile Engineering is a comprehensive treatise which provides clear explanation of vehicle components and basic working principles of systems with simple, unique and easy-to-understand illustrations. The textbook also describes the latest and upcoming technologies and developments in automobiles. This edition has been completely updated covering the complete syllabi of most Indian Universities with the aim to be useful for both the students and faculty members. The textbook will also be a valuable source of information and reference for vocational courses, competitive exams, interviews and working professionals.

OBJECTIVE ELECTRICAL TECHNOLOGY

S. Chand Publishing In the present edition, authors have made sincere efforts to make the book up-to-date. A notable feature is the inclusion of two chapters on Power System. It is hoped that this edition will serve the readers in a more useful way.

SIGNALS AND SYSTEMS

Birkhäuser This textbook covers the fundamental theories of signals and systems analysis, while incorporating recent developments from integrated circuits technology into its examples. Starting with basic definitions in signal theory, the text explains the properties of continuous-time and discrete-time systems and their representation by differential equations and state space. From those tools, explanations for the processes of Fourier analysis, the Laplace transform, and the z-Transform provide new ways of experimenting with different kinds of time systems. The text also covers the separate classes of analog filters and their uses in signal processing applications. Intended for undergraduate electrical engineering students, chapter sections include exercise for review and practice for the systems concepts of each chapter. Along with exercises, the text includes MATLAB-based examples to allow readers to experiment with signals and systems code on their own. An online repository of the MATLAB code from this textbook can be found at github.com/springer-math/signals-and-systems.

The questions in each practice set have been carefully selected so as to give you a real feel of the exam. The book provides Response Sheet for each test. Post each test you must do a Post-Test Analysis with the help of the Test Analysis and Feedback Sheet which has been provided for each test.

ISRO

A PERSONAL HISTORY

HarperCollins ISRO pioneer R. Aravamudan narrates the gripping story of the people who built India's space research programme and how they did it - from the rocket engineers who laid the foundation to the savvy young engineers who keep Indian spaceships flying today. It is the tale of an Indian organization that defied international bans and embargos, worked with laughably meagre resources, evolved its own technology and grew into a major space power. Today, ISRO creates, builds and launches gigantic rockets which carry the complex spacecraft that form the neural network not just of our own country but those of other countries too. This is a made-in-India story like no other.

HANDBOOK OF COMPUTER SCIENCE & IT

Arihant Publications India limited Scope of science and technology is expanding at an exponential rate and so is the need of skilled professionals i.e., Engineers. To stand out of the crowd amidst rising competition, many of the engineering graduates aim to crack GATE, IES and PSUs and pursue various post graduate Programmes. Handbook series as its name suggests is a set of Best-selling Multi-Purpose Quick Revision resource books, those are devised with anytime, anywhere approach. It's a compact, portable revision aid like none other. It contains almost all useful Formulae, equations, Terms, definitions and many more important aspects of these subjects. Computer Science & IT Handbook has been designed for aspirants of GATE, IES, PSUs and Other Competitive Exams. Each topic is summarized in the form of key points and notes for everyday work, problem solving or exam revision, in a unique format that displays concepts clearly. The book also displays formulae and circuit diagrams clearly, places them in context and crisply identities and describes all the variables involved Theory of Computation, Data Structure with Programming in C, Design and Analysis of Algorithm, Database Management Systems, Operation System, Computer Network, Compiler Design, Software Engineering and Information System, Web Technology, Switching Theory and Computer Architecture

READY TO FIRE

HOW INDIA AND I SURVIVED THE ISRO SPY CASE

Bloomsbury Publishing A top scientist is falsely accused of selling space technology secrets. A police inspector's misadventure with a Maldivian woman results in a fabricated espionage case. A faction within a political party capitalises on the case to bring down a government. An intelligence agency obligingly plays into the hands of vested interests to slow down India's space programme. And a complex investigation finally proves the allegations untrue. In this riveting book, Isro scientist S Nambi Narayanan - who was falsely accused of espionage in ISRO spy case of the 1990s - and senior journalist Arun Ram meticulously unpick the ISRO spy case, revisit old material and discover new details to expose the international plot that delayed India's development of a cryogenic engine by at least a decade. It took four years for the CBI to exonerate Nambi, but his fight for justice to ensure action against the officers who faked the case and tortured him in custody continues. This book is as much a history of the early days of India's ambitious space programme as it is a record of one of the most sensational cases that enthralled the nation long before the era of online updates and 24-hour news cycles.
