Information System Implementations: Using a Leadership Quality Matrix for Success

System Implementations, Gain Significant Momentum, an Insiders Guide to What You Need to Know

AuthorHouse I had a truly extraordinary career. It is a child-of-farmers tale reflecting discipline, high standards, hard work and high integrity. Today I am viewed as a well respected systems development and implementation leader between my colleagues and team members. Over the years I have dedicated my self to adding value to my employers and team members. I was born on September 25, 1961 in Niekershoop a very small farming community in Northern Cape Province, South Africa to Francois and Martha Jacobs, both from the traditional South Africa farming culture. Twenty-four years since 1985 in business. My international system implementation experience includes countries such as Brazil, Canada, Caribbean, Kazakhstan, Russia, South Africa and United States of America. My biggest value-add is my understanding of Information Systems from both the operational and consulting perspectives. I have management (general, project and business administration management), business analysis (business information analysis and business process engineering) and information system (systems and technology) knowledge and experience in the Consulting, Chemical, Metals, Manufacturing, and Agricultural industries. My leadership and coaching ability is driven by high levels of self motivation, analytical capability, people orientation and ability to communicate at all walks of life. My knowledge and experience are strengthened by formal education: PhD, (Price Decision Support Systems), May 2000. M.Com, (Financial Information for the Management Process), 1993. B.Econ. (Hon), (Marketing, Finance, Information & Control Systems), 1987. B.Agric., (Economics, Business & Agricultural Economics), 1983.

Mission Critical

Realizing the Promise of Enterprise Systems

Harvard Business Press Overviews enterprise system (ES) opportunities and challenges and suggests the ESs are not the right choice for every company. Provides a set of guidelines to help managers evaluate the benefits and risks of ES implementation, stressing that an organization must make simultaneous changes in its information systems, business processes, and business strategy. Such changes are described in detail with extensive examples from real organizations, demonstrating that ESs should be viewed as business rather than technology projects. Davenport is director of a consulting institute and professor of information management at Boston University. Annotation copyrighted by Book News, Inc., Portland, OR
