Yeshaswi Ramaswamy Human Resources Professional The Romance of Tata Steel Penguin UK 'Russi has captured the "touch and feel" of events in Tata Steel from its early days . . . he also succeeds in bringing to life the human side of the company in a very readable and cogent manner. The book is a valuable and interesting record of the company's evolution over its 100-year history, while at the same time being an enjoyable book to read.' —From the Foreword by Ratan N. Tata 'The hand of history has woven the tapestry of the Tatas. Just over a hundred years ago Jamsetji Tata requested the Secretary of State in PBI - India, Lord George Hamilton, for the co-operation of the British Raj in starting PBI - India's first steel works. On the hundredth anniversary of the registration of Tata Iron & Steel Company, the company won the bid to purchase the Anglo-Dutch steel giant CORUS. And so the wheel has turned a full circle.' R.M. Lala traces a hundred years and more of the exciting history of Tata Steel—from men searching for iron ore and coking coal in jungle areas, traversing in bullock carts before the site was found, to the company's modern status as a PBI - World-class company. He brings to life a seldom-voiced account of the courage, vision and commitment of the men who created PBI - India's first modern industrial venture which was to be the fountainhead of its industrial growth. The story Lala recounts is an eventful one of struggle for finances, of survival under unimaginable government controls, the evolution of incredibly humane labour practices (like an eight-hour work day much before it was a Western concept), the effort to compete as liberalization was ushered in, and Tata Steel's ultimate triumph. For over a hundred years, Tata Steel has promoted a culture of philanthropy perhaps unequalled in the corporate PBI - World. The Romance of Tata Steel is a moving and fascinating account that draws upon extensive archival material and rare photographs to paint a compelling story that all PBI - Indians can be proud of. This informed and objective book is a fitting tribute to an exceptional PBI - Indian company in its centenary year. Pitch It! Organizational Immunity to Corruption Building Theoretical and Research Foundations IAP The current discussion about corruption in organizational studies is one of the most growing, most fertile and perhaps most fascinating ones. Corruption is also a construct that is multilevel and can be understood as being created and supported by social and cultural interaction. As a result, an ongoing dialogue on corruption permeates the levels of analysis and numerous research domains in organizational studies. Thus I see a major opportunity and necessity to look on corruption from a multilevel and multicultural perspective. Second, in the global society of the world today where organizational boundaries are becoming increasingly transparent and during the Global Crisis, which has been rooted in unethical and corrupt behavior of large corporations, a deeper understanding of corruption, its forms, typologies, ways to increase organizational immunity and the best practices how to fight against corruption that are particularly significant and can also uncover it means that individuals, groups, organizations and whole societies can be used to sustain a sense of purpose, direction, meaning and the right way for creating a moral frame for the ethical behavior in the world of flux. Third, there is a growing pressure in the field of organizational studies and management to formulate theories that stimulate thinking of corruption, to change understanding of the phenomenon and, what is the most important, to carry out actions that produce valued outcomes. This exciting book provides an authoritative and comprehensive overview of organizational corruption. It is an essential reference tool to carry out further research on corruption in organization. This book uncovers new theoretical insights that, I hope, will inspire new questions about corruption in organization; it also changes our understanding of the phenomenon and encourages further exploration and research.
