The Journal of Finance European Journal of Finance "European Journal of Finance" (ISSN: 1351-847X) is a journal published quarterly by Routledge, a division of Taylor and Francis Group, an international academic publisher. A sample copy, instructions for authors, subscription details, and the tables of contents of previous issues are available online. The journal publishes research articles that reflect European financial interests and concerns. Taylor and Francis Group provides the information. **International Journal of Finance and Policy Analysis Universal-Publishers Journal of Financial Economics Financial Therapy Theory, Research, and Practice Springer** Money-related stress dates as far back as concepts of money itself. Formerly it may have waxed and waned in tune with the economy, but today more individuals are experiencing financial mental anguish and self-destructive behavior regardless of bull or bear markets, recessions or boom periods. From a fringe area of psychology, financial therapy has emerged to meet increasingly salient concerns. Financial Therapy is the first full-length guide to the field, bridging theory, practical methods, and a growing cross-disciplinary evidence base to create a framework for improving this crucial aspect of clients' lives. Its contributors identify money-based disorders such as compulsive buying, financial hoarding, and workaholism, and analyze typical early experiences and the resulting mental constructs ("money scripts") that drive toxic relationships with money. Clearly relating financial stability to larger therapeutic goals, therapists from varied perspectives offer practical tools for assessment and intervention, advise on cultural and ethical considerations, and provide instructive case studies. A diverse palette of research-based and practice-based models meets monetary mental health issues with well-known treatment approaches, among them: Cognitive-behavioral and solution-focused therapies. Collaborative relationship models. Experiential approaches. Psychodynamic financial therapy. Feminist and humanistic approaches. Stages of change and motivational interviewing in financial therapy. A text that serves to introduce and define the field as well as plan for its future, Financial Therapy is an important investment for professionals in psychotherapy and counseling, family therapy, financial planning, and social policy. **Quarterly Journal of Finance and Accounting Citation Patterns within the Leading Top-Tier Finance Journals Implications for Journal Rankings and Other Issues** This paper examines all citations and self-citations to a list of 94 finance journals appearing in the Journal of Finance, Journal of Financial Economics and Review of Financial Studies from 1995 through 2005. Additionally, the publication profile of 100 prolific authors in top-tier finance journals is tabulated for these 94 journals. Citations to non-finance journals in economics and accounting are also tabulated for comparison with their finance counterpart along with working papers. Five ranking schemes are constructed with each scheme identifying the top fifty finance journals. Citations to finance journals are highly concentrated within ten journals and similarly for self-citations. Authors of papers appearing in top-tier finance journals pay scant attention to the bulk of research published in other finance journals. Furthermore, these authors cite other economic journals with greater frequency than their counterpart in finance. Of the top fifty finance journals identified in this paper, only 19 are listed in Social Sciences Citation Index (SSCI), and this compares to approximately 500 listed economic journals. Some glaring omissions from SSCI are identified, but most notably the Journal of Applied Corporate Finance, Journal of Financial Research, Journal of Empirical Finance and Journal of Fixed Income. An analysis of 2006 citations patterns is also presented. The top-tier mantra assigned to finance journals has a void with the decision by the Journal of Business to cease publication with the November 2006 issue. This paper identifies five finance journals anyone of which could potentially fill the void. **SmartBook Access Card for Finance: Applications and Theory McGraw-Hill Education Journal of the Midwest Finance Association** Includes selected papers presented at its annual meeting. **Midland Corporate Finance Journal A Publication of Stern, Stewart, Putnam & Macklis, Ltd Investor Protection and Corporate Governance Firm-level Evidence Across Latin America World Bank Publications** 'Investor Protection and Corporate Governance' analyzes the impact of corporate governance on firm performance and valuation. Using unique datasets gathered at the firm-level the first such data in the region and results from a homogeneous corporate governance questionnaire, the book examines corporate governance characteristics, ownership structures, dividend policies, and performance measures. The book's analysis reveals the very high levels of ownership and voting rights concentrations and monolithic governance structures in the largest samples of Latin American companies up to now, and new data emphasize the importance of specific characteristics of the investor protection regimes in several Latin American countries. By and large, those firms with better governance measures across several dimensions are granted higher valuations and thus lower cost of capital. This title will be useful to researchers, policy makers, government officials, and other professionals involved in corporate governance, economic policy, and business finance, law, and management. **Handbook of Environmental and Sustainable Finance Academic Press** The use of financial concepts and tools to shape development is hardly new, but their recent adoption by advocates of sustainable environmental management has created opportunities for innovation in business and regulatory groups. The Handbook of Environmental and Sustainable Finance summarizes the latest trends and attitudes in environmental finance, balancing empirical research with theory and applications. It captures the evolution of environmental finance from a niche scholarly field to a mainstream subdiscipline, and it provides glimpses of future directions for research. Covering implications from the Kyoto and Paris Protocols, it presents an intellectually cohesive examination of problems, opportunities, and metrics worldwide. Introduces the latest developments in environmental economics, sustainable accounting work, and environmental/sustainable finance Explores the effects

of environmental regulation on the economy and businesses Emphasizes research about the trade-environmental regulation nexus, relevant for economics and business students **Journal of Financial Economics The African Journal of Finance and Management AJFM. The Public A Journal of Finance, Commercial Interests and Political Science Public A Journal of Finance, Commercial Interests and Political Science The Journal of Finance and Data Science Nigerian Journal of Financial Management International Review of Finance Ranking Finance Journals Using Author Affiliation Index** In this paper we use a new method to rank finance journals. Traditionally, journal qualities are measured either by the citation-based impact factor approach, or by the survey method. Although these two approaches have merits, their efficacy is also limited in many ways. Author Affiliation Index is a cost-effective and intuitively easy to understand approach to journal rankings. We define Author Affiliation Index as the ratio of articles authored by faculties at the world's top 80 finance programs divided by the total number of articles by all authors. Forty-one finance journals are ranked according to this index. The effectiveness of the index is comparable to prior citation-based and survey-based studies. We find Author Affiliation Index, if properly constructed, provides an easy and credible way to supplement the existing journal ranking methods. Due to its easiness to construct, the index is particularly useful for junior faculty seeking the right journals to publish but is unable to justify the journal quality because these journals are not ranked in existing studies. Based upon various definitions of the Author Affiliation Index, our findings indicate that **Journal of Finance, Review of Financial Studies, Journal of Financial Economics, Journal of Financial and Quantitative Analysis, and Journal of Business** unambiguously claim the top five spots in finance journal rankings. Some newer journals, such as **Journal of Corporate Finance and Journal of Financial Markets**, while ranked lower in the other studies, score impressively in our analysis. Compared with prior studies, our ranking is highly correlated with most of those journal rankings. **Journal of Financial Education Quarterly Journal of Finance & Accounting Asia Pacific Journal of Finance TARP and other Bank Bailouts and Bail-Ins around the World Connecting Wall Street, Main Street, and the Financial System Academic Press** Financial crises are recurring phenomena that result in the financial distress of systemically important banks, making it imperative to understand how to best respond to such crises and their consequences. Two policy responses became prominent for dealing with these distressed institutions since the last Global Financial Crisis: bailouts and bail-ins. The main questions surrounding these responses touch everyone: Are bailouts or bail-ins good for the financial system and the real economy? Is it essential to save distressed financial institutions by putting taxpayer money at risk in bailouts, or is it better to use private money in bail-ins instead? Are there better options, such as first lines of defense that help prevent such distress in the first place? Can countercyclical prudential and monetary policies lessen the likelihood and severity of the financial crises that often bring about this distress? Through careful analysis, authors Berger and Roman review and critically assess the extant theoretical and empirical research on many resolution approaches and tools. Placing special emphasis on lessons learned from one of the biggest bailouts of all time, the Troubled Asset Relief Program (TARP), while also reviewing other programs and tools, **TARP and Other Bank Bailouts and Bail-Ins around the World** sheds light on how best to protect the financial system on Wall Street and the real economy on Main Street. Presents a well-informed and rich account of bailouts, bail-ins, and other resolution approaches to resolve financially distressed banks. Uses TARP as a key case study of bailouts that has been thoroughly researched. Provides valuable research and policy guidance for dealing with future financial crises. **M: Finance McGraw-Hill Education** The integrated solutions for Cornett's **M: Finance** have been specifically designed to help improve student performance, meaning that students are prepared for and engaged in class, and they can successfully solve problems and analyze the results. Cornett M's unmatched pedagogy and additional resources within Connect help students solve financial problems, understand the relevance, and apply what they've learned. Cornett M's succinct coverage, magazine-like design, and personal examples combine with a complete digital solution to help your students achieve higher outcomes in the course. Connect is the only integrated learning system that empowers students by continuously adapting to deliver precisely what they need, when they need it, and how they need it, so that your class time is more engaging and effective. **Gold and Silver Coin Chart Manual Supplementary to the Journal of Finance and Bank Reporter, and Bank Note Safeguard. Containing the Largest Number of Fac-similes of Gold and Silver Coins, of Any Publication in the World Fundamentals of Financial Management** Gain the understanding of today's financial markets and corporate financial management you need to propel you toward your goals with the contemporary insights and innovative learning tools found in Brigham/Houston's popular **FUNDAMENTALS OF FINANCIAL MANAGEMENT, 16E**. This longtime market leader offers intriguing insights into the social responsibility of business, the significant effects of recent changes in corporate tax code, the ongoing multiple effects related to the economic impact of the coronavirus pandemic and other emerging issues straight from today's headlines. Clear explanations and real, meaningful examples help you understand the "what" and the "why" of corporate budgeting, financing, working capital decision making, forecasting, valuation and Time Value of Money. Hands-on exercises, cases, Excel spreadsheet models and interactive MindTap digital activities and learning modules guide you in putting the theory you learn into action. **Journal of Financial and Quantitative Analysis The Russian Journal of Financial Statistics Bank Liquidity Creation and Financial Crises Academic Press** Bank Liquidity Creation and Financial Crises delivers a consistent, logical presentation of bank liquidity creation and addresses questions of research and policy interest that can be easily understood by readers with no advanced or specialized industry knowledge. Authors Allen Berger and Christa Bouwman examine ways to measure bank liquidity creation, how much liquidity banks create in different countries, the effects of monetary policy (including interest rate policy, lender of last resort, and quantitative easing), the effects of capital, the effects of regulatory interventions, the effects of bailouts, and much more. They also analyze bank liquidity creation in the US over the past three decades during both normal times and financial crises. Narrowing the gap between the "academic world" (focused on theories) and the "practitioner world" (dedicated to solving real-world problems), this book is a helpful new tool for evaluating a bank's performance over time and comparing it to its peer group. Explains that bank liquidity creation is a more comprehensive measure of a bank's output than traditional measures and can also be used to measure bank liquidity Describes how high levels of bank liquidity creation may cause or predict future financial crises Addresses questions of research and policy interest related to bank liquidity creation around the world and provides links to websites with data and other materials to address these questions Includes such hot-button topics as the effects of monetary policy (including interest rate policy, lender of last resort, and quantitative easing), the effects of capital, the effects of regulatory interventions, and the effects of bailouts **The Journal of Finance Handbook of Consumer Finance Research Springer** This second edition of the authoritative resource summarizes the state of consumer finance research across disciplines for expert findings on—and strategies for enhancing—consumers' economic

health. New and revised chapters offer current research insights into familiar concepts (retirement saving, bankruptcy, marriage and finance) as well as the latest findings in emerging areas, including healthcare costs, online shopping, financial therapy, and the neuroscience behind buyer behavior. The expanded coverage also reviews economic challenges of diverse populations such as ethnic groups, youth, older adults, and entrepreneurs, reflecting the ubiquity of monetary issues and concerns. Underlying all chapters is the increasing importance of financial literacy training and other large-scale interventions in an era of economic transition. Among the topics covered: Consumer financial capability and well-being. Advancing financial literacy education using a framework for evaluation. Financial coaching: defining an emerging field. Consumer finance of low-income families. Financial parenting: promoting financial self-reliance of young consumers. Financial sustainability and personal finance education. Accessibly written for researchers and practitioners, this Second Edition of the Handbook of Consumer Finance Research will interest professionals involved in improving consumers' fiscal competence. It also makes a worthwhile text for graduate and advanced undergraduate courses in economics, family and consumer studies, and related fields.

Hodges's Journal of Finance, and Bank Reporter Jan. 2, 1860 (Classic Reprint) Forgotten Books Excerpt from Hodges's Journal of Finance, and Bank Reporter: Jan. 2, 1860 A new Bank will shortly be organized in Boston under the Free Banking law, with a capital of two-thirds of which has already been subscribed.
