PUBLIC EXAMINATIONS EXAMINED

World Bank Publications High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across countries and histories. It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings." Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning "I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations." Victor Bolotov, Distinguished Professor, Higher School of Economics, National Research University, Moscow; member, Russian Academy of Education; and former Deputy Minister of Education, Russian Federation

HOW TO ACE THE LEAVING CERT

Createspace Independent Publishing Platform Today, the final exam at the end of Secondary School is the main gateway to further education, training, and jobs in Ireland. With an enhanced level of completion, the importance of this exam has come sharply into focus. The emphasis is now swaying towards continuous assessment; you, as a student, have an opportunity to develop, enhance and show off your skills during the year and work done will be aggregated towards your final mark. I am sure you would prefer to have some marks in the bag heading into the final exam as opposed to having all the emphasis on one day, similar to what is currently happening in subjects like History, Construction Studies and Geography for example. Spreading the risk is wise, especially as things can go wrong on the day; you could be unlucky with your paper, have a personal problem, or even feel unwell. While a model of continuous assessment is welcomed, I feel that the terminal exam is, and will continue to be, the fairest and most efficient way to differentiate students in preparation for third level education. The brilliant thing about the Leaving Certificate final exam is that everyone is on the one level playing field. The standard of integrity of the State Exams Commission (SEC) is extremely high, therefore grades achieved by students are genuine and earned. I have always been fascinated with how students prepare, cope with, react to and write final exams. I am intrigued how we, as teachers and parents, can help you improve your knowledge and develop your skills to help you achieve better results. Every year a new group of enthusiastic students arrive into sixth year thinking "How Can I ACE the Leaving Cert?" This book focuses on providing essential advice and techniques that will help you do exactly that. It will discuss studying in the most efficient way, preparing for your mocks, the final lead up, just before the exams, the exam hall itself, and of course, writing the paper. This book will also give an insight into nutrition and advice for your parents, so that they can help you in the best way possible. It is natural for anxiety levels to elevate as the exams approach and you may even find you can't breathe properly or the worry causes butterflies in your stomach. The advantage of knowing what to expect and being seriously prepared is that you can relax and feel confident as you start your exams. This book will provide loads of information that will build your confidence and settle those nerves. You can open it on any chapter depending on what stage of the year you are at. Along with imparting my own practical knowledge, advice lists and examples, I have also enlisted the help of current sixth years and former students who have just completed their exams. They have advised me on what they would have liked to have in place, the pitfalls and what worked and didn't work for them. The survey results from the sixty-strong cohort in Chapter Nine is a very interesting read. On my part, I have attended many conferences and seminars, have reviewed many videos, presentations and documents, and handpicked the most relevant facts for you. Wrapped together, I hope each page will inspire and give you the confidence to achieve your wildest educational dreams, and above all 'ACE' the Leaving Cert.
