ТЕХНОЛОГИЯ РЫБЫ И РЫБНЫХ ПРОДУКТОВ. САНИТАРНАЯ ОБРАБОТКА 2-Е ИЗД., ИСПР. И ДОП. УЧЕБНОЕ ПОСОБИЕ ДЛЯ СПО

Litres Учебное пособие призвано помочь студентам освоить основные санитарные требования, предъявляемые к продукции и предприятиям рыбной отрасли, а также способы санитарной обработки и факторы, влияющие на эффективность мойки и дезинфекции. В пособии содержится обширная информация по моющим и дезинфицирующим средствам, используемым в рыбоперерабатывающей промышленности. Рассмотрены различные способы мойки и физико-химические характеристики санитарно-гигиенических средств.

ТЕХНОЛОГИЯ РЫБЫ И РЫБНЫХ ПРОДУКТОВ. САНИТАРНАЯ ОБРАБОТКА 2-Е ИЗД., ИСПР. И ДОП. УЧЕБНОЕ ПОСОБИЕ ДЛЯ АКАДЕМИЧЕСКОГО БАКАЛАВРИАТА

Litres Учебное пособие призвано помочь студентам освоить основные санитарные требования, предъявляемые к продукции и предприятиям рыбной отрасли, а также способы санитарной обработки и факторы, влияющие на эффективность мойки и дезинфекции. ТИПАЖ И ЭКСПЛУАТАЦИЯ ТЕХНОЛОГИЧЕСКОГО ОБОРУДОВАНИЯ (АВТОМОБИЛЬНЫЙ ТРАНСПОРТ)

Litres В учебном пособии представлена классификация технологического оборудования, применяемая система технического обслуживания и ремонта. Рассматривается оснащение для выполнения очистных и уборочно-моечных работ; контрольно-диагностическое оборудование; шиномонтажное и шиноремонтное оборудование; оборудование и оснастка для разборочно-сборочных работ; смазочнозаправочное оборудование; подъемно-осмотровое и подъемно-транспортное оборудование; выбор и установление достаточного количества оборудования для автотранспортных предприятий разной мощности; характеристики механизации производственных процессов. Предназначено для студентов вузов, обучающихся по направлению подготовки бакалавров 23.03.03 «Эксплуатация транспортно-технологических машин и комплексов» направленности 23.03.03.01 «Автомобильное хозяйство и автомобильный сервис» при изучении дисциплины «Типаж и эксплуатация технологического оборудования».

CHEMICAL ENGINEERING IN THE PHARMACEUTICAL INDUSTRY

DRUG PRODUCT DESIGN, DEVELOPMENT, AND MODELING

John Wiley & Sons A guide to the important chemical engineering concepts for the development of new drugs, revised second edition The revised and updated second edition of Chemical Engineering in the Pharmaceutical Industry offers a guide to the experimental and computational methods related to drug product design and development. The second edition has been greatly expanded and covers a range of topics related to formulation design and process development of drug products. The authors review basic analytics for quantitation of drug product quality attributes, such as potency, purity, content uniformity, and dissolution, that are addressed with consideration of the applied statistics, process analytical technology, and process control. The 2nd Edition is divided into two separate books: 1) Active Pharmaceutical Ingredients (API's) and 2) Drug Product Design, Development and Modeling. The contributors explore technology transfer and scale-up of batch processes that are exemplified experimentally and computationally. Written for engineers working in the field, the book examines in-silico process modeling tools that streamline experimental screening approaches. In addition, the authors discuss the emerging field of continuous drug product manufacturing. This revised second edition: Contains 21 new or revised chapters, including chapters on quality by design, computational approaches for drug product modeling, process design with PAT and process control, engineering challenges and solutions Covers chemistry and engineering activities related to dosage form design, and process development, and scale-up Offers analytical methods and applied statistics that highlight drug product quality attributes as design features Presents updated and new example calculations and associated solutions Includes contributions from leading experts in the field Written for pharmaceutical engineers, chemical engineers, undergraduate and graduation students, and professionals in the field of pharmaceutical sciences and manufacturing, Chemical Engineering in the Pharmaceutical Industry, Second Edition contains information designed to be of use from the engineer's perspective and spans information from solid to semi-solid to lyophilized drug products.

HERPESVIRUSES AND IMMUNITY

Springer Science & Business Media The remarkable ability of herpesviruses to escape immunity brings together the two disciplines of immunology and virology in an inextricable way. Because herpesvirus can induce, suppress, and fool the immune system, the most productive herpesvirologists are also expert immunologists, and the results of this latest interdisciplinary effort document the interactions between both disciplines. Herpesviruses and Immunity brings together the contributions of world-class herpesvirus virologists and immunologists who summarize their work to recount some of the most exciting current developments in the field of herpes virology.

MATHEMATICAL MODELLING OF DYNAMIC BIOLOGICAL SYSTEMS

John Wiley & Sons Incorporated This volume introduces readers to the methodology of dynamic systems analysis, using mathematical modelling techniques as an aid to understanding biological phenomena. It creates an ability to appreciate current medical and biological literature, in which mathematical models are being used with increasing frequency, and provides an introduction to the more advanced techniques of systems science. Mathematical concepts are illustrated by reference to frequent biological examples. By the use of case studies drawn from physiology, the various levels of mathematical modelling which can be adopted are presented.

FOOD ETHICS

Cengage Learning FOOD ETHICS, 2E explores the ethical choices we make each time we eat. With twenty-six readings that bring together a diverse group of voices, this textbook dives into issues such as genetically modified foods, animal rights, population and consumption, the food industry's impact on pollution, centralized versus localized production, and more. In addition, this edition includes new introduction, new readings, a comprehensive index, and study questions that frame these significant issues for discussion and reflection. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

SURFACES AND INTERFACES FOR RENEWABLE ENERGY

MDPI Environmental problems derived from the massive use of conventional energy resources are one of the main issues that our society has been facing in recent decades. Renewable energies (and particularly solar energy) have become a highly competitive means to meet the world's increasing energy demands in a sustainable and clean manner. One of the key research challenges for the commercial deployment of several solar energy technologies is focused on the development of feasible and durable coatings that withstand appropriate optical and thermal performance over the lifetime of the solar facilities. This book addresses a number of relevant aspects related to coatings for renewable energies, including a deep survey of coatings used in photovoltaic solar energy, the development of a superhydrophobic and thermal stable silica coating that is potentially suitable for various industrial applications related to renewable technologies, the development of coatings to improve the resistance of structural materials used in concentrating solar thermal technologies with molten salts, and several research works related to solar reflectors for concentrating solar thermal technologies (such as the advanced analysis of the corrosion, the suitability of anti-soiling coatings, and the development of top protective coatings for high-temperature secondary concentrators).

WHAT ABOUT MY CALCIUM?

CircleOHealth The book features 40+ exclusive calcium-rich recipes that are also dairy- & sugar-free with practical advice to boosting bone health and achieving wellness in daily life. The book features exclusive interviews of renowned personalities and is packed to the brim with interesting trivia, meal plans and a reference table.

UNIFIED ACTION ARMED FORCES (UNAAF)

SYNTHETIC BIOLOGY

Royal Society of Chemistry Synthetic biology combines science and engineering in order to design, build and test novel biological functions and systems. As with any multi-disciplinary field, there is a rapidly-growing body of literature concerning synthetic biology and locating the best information or identifying the hottest topics can be time-consuming. This volume captures the expanding primary literature in the form of critical and comprehensive reviews providing the reader with an authoritative digest of the latest developments in this emerging field. Each chapter strives to highlight the most recent findings in specific sub-areas and reviews research reports that were published over the last two to three years. Leading researchers draw material from both dedicated journals and broader sources, revising traditional concepts in light of emerging discoveries while keeping up with recent progress, making this an essential reference to any library supporting this research.

CHEMICAL ENGINEERING IN THE PHARMACEUTICAL INDUSTRY, ACTIVE PHARMACEUTICAL INGREDIENTS

Wiley A guide to the development and manufacturing of pharmaceutical products written for professionals in the industry, revised second edition The revised and updated second edition of Chemical Engineering in the Pharmaceutical Industry is a practical book that highlights chemistry and chemical engineering. The book's regulatory quality strategies target the development and manufacturing of pharmaceutically active ingredients of pharmaceutical products. The expanded second edition contains revised content with many new case studies and additional example calculations that are of interest to chemical engineers. The 2nd Edition is divided into two separate books: 1) Active Pharmaceutical Ingredients (API's) and 2) Drug Product Design, Development and Modeling. The active pharmaceutical ingredients book puts the focus on the chemistry, chemical engineering, and unit operations specific to development and manufacturing of the active ingredients of the pharmaceutical product. The drug substance operations section includes information on chemical reactions, mixing, distillations, extractions, crystallizations, filtration, drying, and wet and dry milling. In addition, the book includes many applications of process modeling and modern software tools that are geared toward batch-scale and continuous drug substance pharmaceutical operations. This updated second edition: • Contains 30 new chapters or revised chapters specific to API, covering topics including: manufacturing quality by design, computational approaches, continuous manufacturing, crystallization and final form, process safety • Expanded topics of scale-up, continuous processing, applications of thermodynamics and thermodynamic modeling, filtration and drying • Presents updated and expanded example calculations • Includes contributions from noted experts in the field Written for pharmaceutical engineers, chemical engineers, undergraduate and graduate students, and professionals in the field of pharmaceutical sciences and manufacturing, the second edition of Chemical Engineering in the Pharmaceutical Industry focuses on the development and chemical engineering as well as operations specific to the design, formulation, and manufacture of drug substance and products.

TOTAL TRAINING FOR YOUNG CHAMPIONS

Human Kinetics Collects conditioning programs for athletes between the ages of six and eighteen, offering over three hundred exercises for increasing coordination, flexibility, speed, endurance, and strength

THE BOOK OF L

Springer Science & Business Media This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been customarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the interest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

COMPUTER AND COMPUTING TECHNOLOGIES IN AGRICULTURE II, VOLUME 1

THE SECOND IFIP INTERNATIONAL CONFERENCE ON COMPUTER AND COMPUTING TECHNOLOGIES IN AGRICULTURE (CCTA2008), OCTOBER 18-20, 2008, BEIJING, CHINA

Springer Science & Business Media The papers in this volume comprise the refereed proceedings of the Second IFIP International Conference on Computer and Computing Technologies in Agriculture (CCTA2008), in Beijing, China, 2008. The conference on the Second IFIP International Conference on Computer and Computing Technologies in Agriculture (CCTA 2008) is cooperatively sponsored and organized by the China Agricultural University (CAU), the National Engineering Research Center for Information Technology in Agriculture (NERCITA), the Chinese Society of Agricultural Engineering (CSAE), International Federation for Information Processing (IFIP), Beijing Society for Information Technology in Agriculture, China and Beijing Research Center for Agro-products Test and Farmland Inspection, China. The related departments of China's central government bodies like: Ministry of Science and Technology, Ministry of Industry and Information Technology, Ministry of Education and the Beijing Municipal Natural Science Foundation, Beijing Academy of Agricultural and Forestry Sciences, etc. have greatly contributed and supported to this event. The conference is as good platform to bring together scientists and researchers, agronomists and information engineers, extension servers and entrepreneurs from a range of disciplines concerned with impact of Information technology for sustainable agriculture and rural development. The representatives of all the supporting organizations, a group of invited speakers, experts and researchers from more than 15 countries, such as: the Netherlands, Spain, Portugal, Mexico, Germany, Greece, Australia, Estonia, Japan, Korea, India, Iran, Nigeria, Brazil, China, etc.
