Taking account of numerous changes, this timely second edition covers the substantive provisions and procedures which apply throughout the EU, making extensive reference to the case law. The author considers how the exploitation of IP is increasingly global; harmonisation, in contrast, is only partial, even at the EU level. In response, the book sets EU IP law in its wider international context. It also seeks to highlight policy issues and arguments of relevance to the EU, in its relations both within the Union and with the rest of the world. Designed as a compact and approachable account of these difficult and technical areas, and with advice on further reading and research, this unique book is useful both as a work of reference and for more general study. THE LAW OF CORPORATE FINANCE: GENERAL PRINCIPLES AND EU LAW

VOLUME II: CONTRACTS IN GENERAL

Springer Science & Business Media 1. 1 Investments, Generic Contracts, Payments According to Volume I, contracts are one of the five generic legal tools used to manage cash flow, risk, agency relationships, and information. Many investments are therefore based on one or more contracts. Obviously, the firm should draft good contracts. Good drafting can ensure the same intended cash flow with

reduced risk. Bad drafting can increase risk. This volume attempts to deconstruct contracts used by non-financial firms and analyse them from a cash flow, risk, agency, and information perspective. The starting point is a generic contract, i. e. a contract which does not belong to any particular contract type (Chapters 2-7). This volume will also focus on payment obligations. Payment obligations are characteristic of all financial instruments, and they can range from simple payment obligations in minor sales contracts and traditional lending contracts (Chapters 8- 11). 1. 2 Particular Contract Types A number of particular contract types have been discussed in the other volumes of this book. (1) A certain party's investment contract can be another party's fu- ing contract. Particular investment contracts will therefore be discussed in Volume III in the context of funding. (2) Many contracts are necessary in the context of business acquisitions discussed in Volume III. (3) Multi-party contracts are c- mon in corporate finance. The firm's contracts with two or more parties range from syndicated loans to central counterparties' contracts. Such contracts will be discussed both in Chapter 12 and Volume III.
