The activities in this manual encourage students to engage with new vocabulary in many ways, including grouping key terms, matching terms to structures, recalling definitions, and written exercises. Most of the activities in this manual utilize anatomical models, and several dissections of animal tissues and histological examinations are also included. Each unit includes both pre- and post-lab questions and six lab exercises designed for a classroom where students move from station to station. The vocabulary terms used in each unit are listed at the end of the manual and serve as a checklist for practicals.

Each lab exercise consists of a variety of easy-to-follow activities, all supported by a checklist of materials, a Pre-Lab Quiz, background information, learning objectives, and tear-out review sheets. The black and white figures in previous editions are now in full-color, and the 7th Edition further expands on its student-friendly writing style with updated terminology and review questions, streamlined content presented in tables, and a new, more intuitive design.

Pearson Higher Ed This is the eBook of the printed book and may not include any media, website access codes, or print supplements that may come packaged with the bound book. Known for its carefully guided lab activities, accurate art and photo program, and unique practice and review tools that encourage students to draw, label, apply clinical content, and think critically, Wood, Laboratory Manual for Anatomy & Physiology featuring Martini Art, Cat Version, Fifth Edition offers a comprehensive approach to the two-semester A&P laboratory course. The stunning, full-color illustrations are adapted from Martini/Nath/Bartholomew, Fundamentals of Anatomy & Physiology, Ninth Edition, making this lab manual a perfect companion to that textbook for instructors who want lab manual art to match textbook art. The use of the Martini art also makes this lab manual a strong companion to Martini/Ober/Nath, Visual Anatomy & Physiology. This manual can also be used with any other two-semester A&P textbook for those instructors who want students in the lab to see different art from what is in their textbook. This lab manual is available in three versions: Main, Cat, and Pig. The Cat and Pig versions are identical to the Main version but also include nine cat or pig dissection exercises at the back of the lab manual. The Fifth Edition features more visually effective art and abundant opportunities for student practice in the manual.
