The Leader in Me

How Schools and Parents Around the World are Inspiring Greatness, One Child at a Time

Simon and Schuster Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Opportunity Leadership

Stop Planning and Start Getting Results

Moody Publishers Don't create change. Capture it. Get ready to forget everything you know about "working your plan." In this counterintuitive book, innovative university president Roger Parrott turns leadership on its head and shows you how unexpected opportunities--the ones you may be missing--are the key to your success. With an Opportunity Leadership mindset, you'll see God-directed results like never before. In plain language, Dr. Parrott guides you in developing six traits to focus your leadership outlook on untapped opportunities. Not only that, he provides a step-by-step plan for you to create six organization-wide tendencies that enable your team to respond to opportunities with expediency, adeptness, and energy.

Leadership U

Accelerating Through the Crisis Curve

John Wiley & Sons Accelerating Through the Crisis Curve Leadership is all about others—inspiring them to believe, then enabling that belief to become reality. That's the essence of Leadership U: it starts with 'U' but it's not about 'U.' Those timeless words are timelier than ever today, as leaders look to accelerate through the crisis curve. As author Gary Burnison observes, "There will likely be more change in the next two years than we have seen in the last twenty." Now, in Leadership U: Accelerating Through the Crisis Curve, Burnison lays out a framework—his "Six Degrees of Leadership"—to show leaders how to create change. Anticipate - foreseeing what lies ahead, amid ambiguity and uncertainty that are throttled up like never before Navigate - course-correcting in real time, to keep the organization on an even keel Communication - constantly connecting with others; the leader is both the messenger and the message Listen - breaking down the organizational hierarchy to gather insights at all levels—especially what the leader doesn't want to hear Learn - applying learning agility, to "know what to do when you don't know what to do" Lead - empowering others in a bottom-up culture that is more nimble, agile, innovative, and entrepreneurial than ever before. Only by embracing these truths can leaders master another 'U'—the "crisis curve" that will completely disrupt the business landscape. The world has changed—forever. The old days are fine to reminisce about, but you can't stay there. Today leadership means becoming comfortable with being uncomfortable. As Burnison says, when a door closes, leaders cannot afford to stand there, staring at it. It's a "get up or give up" moment. For leaders, the only choice is to find and open another door. Leadership U defines and inspires the pathway through that door.

Folk Stories from Southern Nigeria, West Africa

Library of Alexandria MANY years ago a book on the Folk-Tales of the Eskimo was published, and the editor of The Academy (Dr. Appleton) told one of his minions to send it to me for revision. By mischance it was sent to an eminent expert in Political Economy, who, never suspecting any error, took the book for the text of an interesting essay on the economics of "the blameless Hyperboreans." Mr. Dayrell's "Folk Stories from Southern Nigeria" appeal to the anthropologist within me, no less than to the lover of what children and older people call "Fairy Tales." The stories are full of mentions of strange institutions, as well as of rare adventures. I may be permitted to offer some running notes and comments on this mass of African curiosities from the crowded lumber-room of the native mind. I. The Tortoise with a Pretty Daughter.--The story, like the tales of the dark native tribes of Australia, rises from that state of fancy by which man draws (at least for purposes of fiction) no line between himself and the lower animals. Why should not the fair heroine, Adet, daughter of the tortoise, be the daughter of human parents? The tale would be none the less interesting, and a good deal more credible to the mature intelligence. But the ancient fashion of animal parentage is presented. It may have originated, like the stories of the Australians, at a time when men were totemists, when every person had a bestial or vegetable "family-name," and when, to account for these hereditary names, stories of descent from a supernatural, bestial, primeval race were invented. In the fables of the world, speaking animals, human in all but outward aspect, are the characters. The fashion is universal among savages; it descends to the Buddha's jataka, or parables, to sop and La Fontaine. There could be no such fashion if fables had originated among

civilised human beings. The polity of the people who tell this story seems to be despotic. The king makes a law that any girl prettier than the prince's fifty wives shall be put to death, with her parents. Who is to be the Paris, and give the fatal apple to the most fair? Obviously the prince is the Paris. He falls in love with Miss Tortoise, guided to her as he is by the bird who is "entranced with her beauty." In this tribe, as in Homer's time, the lover offers a bride-price to the father of the girl. In Homer cattle are the current medium; in Nigeria pieces of cloth and brass rods are (or were) the currency. Observe the queen's interest in an affair of true love. Though she knows that her son's life is endangered by his honourable passion, she adds to the bride-price out of her privy purse. It is "a long courting"; four years pass, while pretty Adet is "ower young to marry yet." The king is very angry when the news of this breach of the royal marriage Act first comes to his ears. He summons the whole of his subjects, his throne, a stone, is set out in the market-place, and Adet is brought before him. He sees and is conquered.

Black Leadership for Social Change

Greenwood Publishing Group This book presents a comprehensive overview of Black leadership in every aspect of American life, including movements for social justice, education, business, and politics. In the quest for human rights and social advancement, African-American leaders have emerged to lead the fight to overcome racial and economic barriers. This struggle has influenced the exercise of Black leadership in many other areas and the author uses an interdisciplinary approach to reveal the changes, continuities, and variety of African-American approaches to effective leadership. The book also suggests a theoretical framework for future research on the impact of Black leadership in America. A wide range of issues are considered in this volume, beginning with the definition of leadership and the concept of Black leadership. Gordon then considers outstanding examples of Black leadership in contemporary America in a variety of fields. Scholars and students in history, political science, and ethnic studies will find this an important resource for understanding Black leadership and its impact on American life.

Compassionate Leadership

How to Do Hard Things in a Human Way

Harvard Business Press Leadership is hard. How can you balance compassion for your people with effectiveness in getting the job done? A global pandemic, economic volatility, natural disasters, civil and political unrest. From New York to Barcelona to Hong Kong, it can feel as if the world as we know it is coming apart. Through it all, our human spirit is being tested. Now more than ever, it's imperative for leaders to demonstrate compassion. But in hard times like these, leaders need to make hard decisions—deliver negative feedback, make difficult choices that disappoint people, and in some cases lay people off. How do you do the hard things that come with the responsibility of leadership while remaining a good human being and bringing out the best in others? Most people think we have to make a binary choice between being a good human being and being a tough, effective leader. But this is a false dichotomy. Being human and doing what needs to be done are not mutually exclusive. In truth, doing hard things and making difficult decisions is often the most compassionate thing to do. As founder and CEO of Potential Project, Rasmus Hougaard and his longtime coauthor, Jacqueline Carter, show in this powerful, practical book, you must always balance caring for your people with leadership wisdom and effectiveness. Using data from thousands of leaders, employees, and companies in nearly a hundred countries, the authors find that when leaders bring the right balance of compassion and wisdom to the job, they foster much higher levels of employee engagement, performance, loyalty, and well-being in their people. With rich examples from Netflix, IKEA, Unilever, and many other global companies, as well as practical tools and advice for leaders and managers at any level, *Compassionate Leadership* is your indispensable guide to doing the hard work of leadership in a human way.

Challenging Leadership Stereotypes Through Discourse

Power, Management and Gender

Springer This multidisciplinary volume brings together wide-ranging empirical research that goes behind the scenes of diverse organizations dealing with business, politics, law, media, education, and sports to unravel stereotypes of discursive leadership practices as they unfold in situ. It includes contributions that explore how leadership discourse is impacted by increasing pressures of "glocalization" (the need to communicate across cultures and languages), "mediatization" (leaving ubiquitous digital traces), standardization (with quality management programmes negotiating organizational procedures), mobility (endless fast-paced long distance synchronization) and acceleration (permanent co-adaptation and change). The discussion of purposefully chosen case studies moves beyond questions of who is a leader and what leaders do, to how leadership stereotypes are being challenged in various communities of practice, and thereby making change possible. Cross-cultural and interdisciplinary approaches are used to get deeper

insights into the competing, multi-voiced, controversial and complex identities and relationships enacted in leadership discourse practices.

Good to Great

Why Some Companies Make the Leap...And Others Don't

Harper Collins The Challenge Built to Last, the defining management study of the nineties, showed how great companies triumph over time and how long-term sustained performance can be engineered into the DNA of an enterprise from the very beginning. But what about the company that is not born with great DNA? How can good companies, mediocre companies, even bad companies achieve enduring greatness? The Study For years, this question preyed on the mind of Jim Collins. Are there companies that defy gravity and convert long-term mediocrity or worse into long-term superiority? And if so, what are the universal distinguishing characteristics that cause a company to go from good to great? The Standards Using tough benchmarks, Collins and his research team identified a set of elite companies that made the leap to great results and sustained those results for at least fifteen years. How great? After the leap, the good-to-great companies generated cumulative stock returns that beat the general stock market by an average of seven times in fifteen years, better than twice the results delivered by a composite index of the world's greatest companies, including Coca-Cola, Intel, General Electric, and Merck. The Comparisons The research team contrasted the good-to-great companies with a carefully selected set of comparison companies that failed to make the leap from good to great. What was different? Why did one set of companies become truly great performers while the other set remained only good? Over five years, the team analyzed the histories of all twenty-eight companies in the study. After sifting through mountains of data and thousands of pages of interviews, Collins and his crew discovered the key determinants of greatness -- why some companies make the leap and others don't. The Findings The findings of the Good to Great study will surprise many readers and shed light on virtually every area of management strategy and practice. The findings include: Level 5 Leaders: The research team was shocked to discover the type of leadership required to achieve greatness. The Hedgehog Concept (Simplicity within the Three Circles): To go from good to great requires transcending the curse of competence. A Culture of Discipline: When you combine a culture of discipline with an ethic of entrepreneurship, you get the magical alchemy of great results. Technology Accelerators: Good-to-great companies think differently about the role of technology. The Flywheel and the Doom Loop: Those who launch radical change programs and wrenching restructurings will almost certainly fail to make the leap. "Some of the key concepts discerned in the study," comments Jim Collins, "fly in the face of our modern business culture and will, quite frankly, upset some people." Perhaps, but who can afford to ignore these findings?

Positive Leadership

Strategies for Extraordinary Performance

Berrett-Koehler Publishers The first edition introduced the newly emerging field called Positive Organizational Scholarship. Rather than focusing on organizational dysfunction, Positive Organizational Scholarship looks at organizations that are functioning at an unusually high level. Learning from such successful groups about what they did right forms the backbone of the strategy, because strategies that capitalize on the positive tend to produce life-giving, flourishing outcomes in organizations. The four strategies discussed in the first edition included the cultivation of positive climate, positive relationships, positive communication, and positive meaning. Each strategy is explained and illustrated. In this revised edition, the author will add the following materials: Chapter 1: Outlining three outcomes associated with positive leadership and one more example. Chapter 2: Adding some empirical findings linking attributes of climate with physiological benefits. Chapter 3: A brief discussion of temporary encounters with positive or negative outcomes. Chapter 4: Additional research on the results of the positive-to-negative-communication-ratio. Chapter 5: Elaboration on the issue of meaningfulness in work. Chapter 6: More ideas for implementation

Making Democracy

Leadership, Class, Gender, and Political Participation in Thailand

University of Hawaii Press *Democracy in Thailand* is the result of a complex interplay of traditional and foreign attitudes. Although democratic institutions have been imported, participation in politics is deeply rooted in Thai village society. A contrasting strand of authoritarianism is present not only in the traditional culture of the royal court but also in the centralized bureaucracies and powerful armed services borrowed from the West. Both attitudes have helped to shape Thai democracy's specific character. This topical volume explores the importance of culture and the roles played by leadership, class, and gender in the making of Thai democracy. James Ockey describes changing patterns of leadership at all levels of society, from the cabinet to the urban middle class to the countryside, and suggests that such changes are appropriate to democratic government—despite the continuing manipulation of authoritarian patterns. He examines the institutions of democratic government, especially the political parties that link voters to the parliament. Political factions and the provincial notables that lead them are given careful attention. The failure to fully integrate the lower classes into the democratic system, Ockey argues, has been the underlying cause of many of the flaws of Thai democracy. Female political leadership, another imported notion, is better represented in urban rather than rural areas. Yet gender relations in villages were more equitable than at court, Ockey suggests, and these attitudes have persisted to this day. Successful women politicians from a variety of backgrounds have begun to overcome stereotypes associated with female leadership although barriers remain. With its wide-ranging analysis of Thai politics over the last three decades, *Making Democracy* is an important resource for both students and specialists.

Adaptive Leadership: The Heifetz Collection (3 Items)

Harvard Business Review Press In times of constant change, adaptive leadership is critical. This Harvard Business Review collection brings together the seminal ideas on how to adapt and thrive in challenging environments, from leading thinkers on the topic—most notably Ronald A. Heifetz of the Harvard Kennedy School and Cambridge Leadership Associates. The Heifetz Collection includes two classic books: *Leadership on the Line*, by Ron Heifetz and Marty Linsky, and *The Practice of Adaptive Leadership*, by Heifetz, Linsky, and Alexander Grashow. Also included is the popular Harvard Business Review article, "Leadership in a (Permanent) Crisis," written by all three authors. Available together for the first time, this collection includes full digital editions of each work. Adaptive leadership is a practical framework for dealing with today's mix of urgency, high stakes, and uncertainty. It has been used by individuals, organizations, businesses, and governments worldwide. In a world of challenging environments, adaptive leadership serves as a guide to distinguishing the essential from the expendable, beginning the meaningful process of adaptation, and changing the status quo. Ronald A. Heifetz is a cofounder of the international leadership and consulting practice Cambridge Leadership Associates (CLA) and the founding director of the Center for Public Leadership at the Harvard Kennedy School. He is renowned worldwide for his innovative work on the practice and teaching of leadership. Marty Linsky is a cofounder of CLA and has taught at the Kennedy School for more than twenty-five years. Alexander Grashow is a Senior Advisor to CLA, having previously held the position of CEO.

The Terms of Order

SUNY Press Do we live in basically orderly societies that occasionally erupt into violent conflict, or do we fail to perceive the constancy of violence and disorder in our societies? Cedric J. Robinson contends that our perception of political order is an illusion, maintained in part by Western political and social theorists who share a dependence on the concept of leadership as a basis for describing and prescribing social order. Robinson uses a variety of critical approaches in his analysis: he synthesizes elements of psychoanalysis, structuralism, Marxism, classical and neoclassical political philosophy, and sociology to support his case for considering Western thought on leadership to be mythological rather than rational. He then presents examples of historically developed "stateless" societies with social organizations that suggest conceptual alternatives to the ways political order has been conceived in the West. As an American Black political theorist, Robinson examines Western thought from the vantage point of a people only marginally integrated into Western institutions and intellectual traditions. His perspective on the conceptualization that structures Western thinking on the most basic levels contributes to the questioning on how our conduct, values, and even perceptions may be shaped by our symbolization.

Dare to Lead

Brave Work. Tough Conversations. Whole Hearts.

Random House #1 NEW YORK TIMES BESTSELLER • Brené Brown has taught us what it means to dare greatly, rise strong, and brave the wilderness. Now, based on new research conducted with leaders, change makers, and culture shifters, she's showing us how to put those ideas into practice so we can step up and lead. Look for Brené Brown's new podcast, Dare to Lead, as well as her ongoing podcast Unlocking Us! NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Leadership is not about titles, status, and wielding power. A leader is anyone who takes responsibility for recognizing the potential in people and ideas, and has the courage to develop that potential. When we dare to lead, we don't pretend to have the right answers; we stay curious and ask the right questions. We don't see power as finite and hoard it; we know that power becomes infinite when we share it with others. We don't avoid difficult conversations and situations; we lean into vulnerability when it's necessary to do good work. But daring leadership in a culture defined by scarcity, fear, and uncertainty requires skill-building around traits that are deeply and uniquely human. The irony is that we're choosing not to invest in developing the hearts and minds of leaders at the exact same time as we're scrambling to figure out what we have to offer that machines and AI can't do better and faster. What can we do better? Empathy, connection, and courage, to start. Four-time #1 New York Times bestselling author Brené Brown has spent the past two decades studying the emotions and experiences that give meaning to our lives, and the past seven years working with transformative leaders and teams spanning the globe. She found that leaders in organizations ranging from small entrepreneurial startups and family-owned businesses to nonprofits, civic organizations, and Fortune 50 companies all ask the same question: How do you cultivate braver, more daring leaders, and how do you embed the value of courage in your culture? In this new book, Brown uses research, stories, and examples to answer these questions in the no-BS style that millions of readers have come to expect and love. Brown writes, "One of the most important findings of my career is that daring leadership is a collection of four skill sets that are 100 percent teachable, observable, and measurable. It's learning and unlearning that requires brave work, tough conversations, and showing up with your whole heart. Easy? No. Because choosing courage over comfort is not always our default. Worth it? Always. We want to be brave with our lives and our work. It's why we're here." Whether you've read Daring Greatly and Rising Strong or you're new to Brené Brown's work, this book is for anyone who wants to step up and into brave leadership.

Mapping Global Leadership

Cross-cultural analyses of leadership styles and practices

CCBS Press The CCBS Global Leadership series seeks to compare and contrast leadership styles and practices across the world. Based on country-specific literature reviews, and empirical analyses of survey and interview data with local leadership scholars, management trainers, and writers, our series demonstrates how global leadership skills are wholly distinct from those that are required in the domestic context. In this latest edition, the following countries are examined: Algeria, Argentina, Armenia, Azerbaijan, Bahamas, Bangladesh, Belgium, Cameroon, Côte d'Ivoire, Czechia, Dominican Republic, El Salvador, France, Guyana, Luxembourg, Madagascar, Moldova, Nicaragua, Nigeria, Saudi Arabia, Serbia, Slovakia, Tunisia and Uganda. Mapping Global Leadership can help senior executives to create forward momentum within their organisations, remain abreast of the latest developments in global leadership, along with enabling them to successfully operate in unfamiliar cultural settings. It does so by helping leaders navigate the ongoing shift toward culturally-endorsed leadership styles and practices in twenty-four nations. Designed Leadership

Columbia University Press Great leaders aspire to manage “by design”—with a sense of purpose and foresight. But too few leaders incorporate the proven practices and principles of the design disciplines. Lessons learned from the world of design, when applied to management, can turn leaders into collaborative, creative, deliberate, and accountable visionaries. Design thinking loosens the mind and activates innovation. It creates the conditions for employees to thrive and for all kinds of businesses to succeed. In *Designed Leadership*, the strategic-design scholar and urban-systems designer Moura Quayle shares her plan for integrating design and leadership, translating processes, principles, and practices from years of experience into tools of change for professional leaders. Quayle describes the key concepts of designed leadership, such as “make values explicit” and “learn from natural systems,” showing how strategic design can spur individual creativity and harness collective energy. For managers at any level, *Designed Leadership* uses original visuals and field-tested examples to teach the kind of thinking, theorizing, and practicing that result in long-lasting high performance in the workplace and beyond.

Hurricane Hazel

A Life with Purpose

HarperCollins Canada Throughout her ground-breaking career in business and politics, Hurricane Hazel McCallion has seen it all. In 1978, she defeated a popular incumbent to win election as mayor of Mississauga, a rising city near Toronto that was, until then, a collection of towns, villages and farms. No one would have foreseen that the indomitable Hurricane Hazel would become so wildly popular she would remain mayor until 2014, retiring at age 93. Within months of taking office, Mayor McCallion orchestrated the largest Canadian peacetime evacuation at the time after a train derailed and put almost 250,000 Mississauga residents in harm's way of deadly chlorine gas. The incident made her an international media star and cemented her reputation as a plain-speaking, decisive political leader. She's been courted by federal and provincial parties over the years but turned them all down, declaring, "I could never toe the party line. I'd wear out the carpet crossing the floor." In her memoir, McCallion writes about her early years as the feisty mayor of a growing city; battles with politicians and business leaders; her love of hockey and abhorrence of on-ice violence; where the feminist movement misses its mark; and how she watched and dealt with her beloved husband's fall into the grip of Alzheimer's. Hazel's run as the leader of one of the fastest-growing cities in Canada has been nothing short of remarkable. The book is the story of Hazel's political, personal and business life, with all of its bumps and bruises along the way, as honest, bold and straightforward as the woman herself.

Strengths Based Leadership

Great Leaders, Teams, and Why People Follow

Simon and Schuster Two leadership consultants identify three keys to being a more effective leader: knowing your strengths and investing in others' strengths, getting people with the right strengths on your team, and understanding and meeting the four basic needs of those who look to you for leadership.

Why Should Anyone Be Led by You?

What It Takes To Be An Authentic Leader

Harvard Business Press Too many companies are managed not by leaders, but by mere role players and faceless bureaucrats. What does it take to be a real leader—one who is confident in who she is and what she stands for, and who truly inspires people to achieve extraordinary results? Rob Goffee and Gareth Jones argue that leaders don't become great by aspiring to a list of universal character traits. Rather, effective leaders are authentic: they deploy individual strengths to engage followers' hearts, minds, and souls. They are skillful at consistently being themselves, even as they alter their behaviors to respond effectively in changing contexts. In this lively and practical book, Goffee and Jones draw from extensive research to reveal how to hone and deploy one's unique leadership assets

while managing the inherent tensions at the heart of successful leadership: showing emotion and withholding it, getting close to followers while keeping distance, and maintaining individuality while "conforming enough." Underscoring the social nature of leadership, the book also explores how leaders can remain attuned to the needs and expectations of followers. *Why Should Anyone Be Led By You?* will forever change how we view, develop, and practice the art of leadership, wherever we live and work.

Diversity, Conflict, and Leadership

Routledge Current Topics in Management is an annual scholarly journal and this volume is divided into four major sections: *Managing Conflict and Justice; Leadership, Social Capital, and Personality; Entrepreneurship and Small Business Management; and Ethics, Learning, and Change*. These contributions seek an integration of theory, research, and practice, which is the essential goal of *Current Topics in Management*. The first section contains two empirical studies on organizational conflict and a theoretical work that addresses the application of organizational justice theory to consumer behavior. The second section contains three empirical studies relating to the leadership language used by senators Hillary Clinton and Barack Obama during the last presidential election, building social capital through leader-member exchanges, and the big-five personality and financial performance of fund managers. Section three contains an essay on revising Phelan's model on entrepreneurship and a case study on a small business organization. The fourth section contains three contributions, two theoretical papers and an empirical study of the administration of state governments. The contributions included are "The Moderating Role of Social Attitudes on the Relationship between Diversity and Conflict" "The Effects of Geographic Dispersion and Team Tenure" "Fairness and Consumer Behavior" "Obama vs. Clinton: Exploring the Impact of Leadership Language" "Social Capital Via Leader" "Financial Performance of Fund Managers" "A Conceptual Framework Linking Entrepreneurs to International New Venture Competitiveness" and "BSL Printing Company: A Case Study."
