iGen Why Today's Super-Connected Kids Are Growing Up Less Rebellious, More Tolerant, Less Happy--and Completely Unprepared for Adulthood--and What That Means for the Rest of Us Simon and Schuster As seen in Time, USA TODAY, The Atlantic, The Wall Street Journal, and on CBS This Morning, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world. **The Cartoonist** Picture book written and created by Joanne Brooker. Full colour illustrated book aimed at seven years upwards. Tells the story of a despotic ruler who is toppled by the art of a Cartoonist. A book on bullying, politics and the power of Cartoons. **Making Schools Work New Evidence on Accountability Reforms** World Bank Publications "This book is about the threats to education quality in the developing world that cannot be explained by lack of resources. It reviews the observed phenomenon of service delivery failures in public education: cases where programs and policies increase the inputs to education but do not produce effective services where it counts - in schools and classrooms. It documents what we know about the extent and costs of such failures across low and middle-income countries. And it further develops the conceptual model posited in the World Development Report 2004: that a root cause of low-quality and inequitable public services - not only in education - is the weak accountability of providers to both their supervisors and clients. The central focus of the book, however, is a new story. It is that developing countries are increasingly adopting innovative strategies to attack these problems. Drawing on new evidence from 22 rigorous impact evaluations across 11 developing countries, this book examines how three key strategies to strengthen accountability relationships in developing country school systems have affected school enrollment, completion and student learning. The book reviews the motivation and global context for education reforms aimed at strengthening provider accountability. It provides the rationale and synthesizes the evidence on the impacts of three key lines of reform: (1) policies that use the power of information to strengthen the ability of clients of education services (students and their parents) to hold providers accountable for results; (2) policies that promote school-based management—that is increase schools' autonomy to make key decisions and control resources, often empowering parents to play a larger role; (3) teacher incentives reforms that specifically aim at making teachers more accountable for results, either by making contract tenure dependent on performance, or offering performance-linked pay. The book summarizes the lessons learned, draws cautious conclusions about possible complementarities across different types of accountability-focused reforms if they are implemented in tandem, considers issues related to scaling up reform efforts and the political economy of reform, and suggests directions for future work." **Clinical Supervision Generation Me Why Today's Young Americans Are More Confident, Assertive, Entitled--and More Miserable Than Ever Before** Simon and Schuster Draws on more than a decade of research to identify the challenges being faced by today's young adults, offering insight into how unprecedented levels of competitiveness, economic imbalances, and changes in sexual dynamics are resulting in higher incidences of life dissatisfaction and psychological turmoil. Reprint. 35,000 first printing. **Managing the Curriculum** SAGE `Each chapter in the book is firmly rooted in research and is well referenced as one would expect of such a book. It will be of particular use to people with an academic interest in this aspect of school management but will also be thought-provoking for those who are involved in the development of the curriculum within their institution' - escalate This book explores many of the new aspects of the core business of schools and colleges, that is, the curriculum. Keeping the focus clearly on learning and teaching, the contributors explore the practical issues for managers at institutional level, within the context of their need to understand and analyze key educational values and principles. Part One presents overviews of theories and models of curriculum, while Part Two examines how these are applied through planning, monitoring and evaluating. Part Three explores in detail the various managerial roles within schools and colleges from leaders to those responsible for cross-curriculum work and special educational needs. The fourth part

discusses the importance of effectively managing resources for the curriculum - the environment, support staff and finance. Contributors use empirical research evidence to analyze current curriculum trends whilst proposing various new models which are likely to emerge in the 21st century. **Three Sips of Gin Dominating the Battlespace with Rhodesia's Elite Selous Scouts** Helion & Company Limited There is nothing that terrorized Russian and Chinese-backed guerillas fighting Rhodesia's bush war in the 1970s more than the famed Selous Scouts. The very name of the unit struck fear into the very heart and soul of even the most battle-hardened guerillas. Too afraid to even whisper the name amongst themselves, they referred to soldiers of the unit simply as Skuzapu, or pickpockets. It was not for nothing that history has recorded the Selous Scouts Regiment as being one of the deadliest and most effective killing machines in modern counter-insurgency warfare. **The Three-Minute Classroom Walk-Through Changing School Supervisory Practice One Teacher at a Time** Corwin Press Change the entire school culture with this collaborative method of supervision! For years, the classic supervision model has frustrated both principals and teachers by fostering superior-subordinate relationships, focusing on teacher conformity rather than growth, or producing checklist data that are irrelevant to the curriculum. The Three-Minute Classroom Walk-Through offers a practical, time-saving alternative that impacts student achievement by cultivating self-reliant teachers who are continuously improving their practice. This method answers principals' key questions: Is the work of my teachers aligned with district curriculum? Are my teachers using research-based "best practices"? Are they choosing the instructional strategies that will promote student achievement? **Rules of Law and Laws of Ruling On the Governance of Law** Ashgate Publishing, Ltd. Offering an anthropological perspective, this volume explores the changing relations between law and governance, examining how changes in the structure of governance affect the relative social significance of law within situations of legal pluralism. The authors argue that there has been a re-regulation rather than a de-regulation, propagated by a plurality of regulative authorities and this re-regulation is accompanied by an increasing ideological dominance of rights talk and juridification of conflict. Drawing on insights into such processes, this volume explores the extent to which law is used both as a constitutive legitimation of governance and as the medium through which governance processes take place. Highlighting some of the paradoxes and the unintended consequences of these regulating processes and the ensuing dynamics, Rules of Law and Laws of Ruling will be a valuable resource for researchers and students working in the areas of legal anthropology and governance. **The Reform and Abolition of the Traditional Chinese Examination System** Harvard Univ Asia Center **Practical Waste Management** John Wiley & Sons **Manual for Inspectors The Command to Look A Master Photographer s Method for Controlling the Human Gaze** Feral House The Command to Look was one of William Mortensen's most influential and sought-after books, and has been out of print for fifty years. Reproduced here in full, this book includes an essay by Michael Moynihan on how its images influenced the occult "lesser magic" of the founder of the Church of Satan, Anton Szandor LaVey. The book reproduces fifty-five images of Mortensen's best work and text by the wittiest and most biting writers on photography of their time. **Curriculum Renewal** Assn for Supervision & Curriculum This book is a manual for educators to use in curriculum planning and development. Chapter 1 examines the nature of curriculum and its relationship to instruction by (1) defining curriculum and the four main levels of curriculum work (curriculum policy, field of study, program of studies, and course) and (2) distinguishing between six types of curriculums (recommended, written, taught, supported, tested, and learned). Chapter 2 explains the process of reflecting district goals in the curriculum. Chapter 3 explains how to improve the curriculum in a given field of study. Chapter 4 discusses improving a program of studies at a given level through aligning goals, achieving balance and curricular integration, improving skills, achieving open access, and responding to student needs. Chapter 5 discusses improving a set of skills across the curriculum in areas of writing, reading, and critical thinking. Chapter 6 reviews the standard model for developing new courses and then explains a naturalistic model that emphasizes quality of learning. Chapter 7 discusses responding to individual differences and describes three specific approaches: mastery learning, cooperative learning, and computer-assisted instruction. Numerous figures illustrate chapter contents. An appendix contains a bibliography of resources for the subject fields of art, business, English/language arts, foreign language, health, home economics, mathematics, music, reading, science, social studies, and technology. Aha! Solutions MAA Every mathematician (beginner, amateur, and professional alike) thrills to find simple, elegant solutions to seemingly difficult problems. Such happy resolutions are called "aha! solutions," a phrase popularized by mathematics and science writer Martin Gardner. Aha! solutions are surprising, stunning, and scintillating: they reveal the beauty of mathematics. This book is a collection of problems with aha! solutions. The problems are at the level of the college mathematics student, but there should be something of interest for the high school student, the teacher of mathematics, the "math fan," and anyone else who loves mathematical challenges. This collection includes one hundred problems in the areas of arithmetic, geometry, algebra, calculus, probability, number theory, and combinatorics. The problems start out easy and generally get more difficult as you progress through the book. A few solutions require the use of a computer. An important feature of the book is the bonus discussion of related mathematics that follows the solution of each problem. This material is there to entertain and inform you or point you to new questions. If you don't remember a mathematical definition or concept, there is a Toolkit in the back of the book that will help.

Meeting Jesus in the Sacraments Encountering Jesus **Boomtown Saloons Archaeology And History In Virginia City** University of Nevada Press The image of Old West saloons as sites of violence and raucous entertainment has been perpetuated by film and legend, but the true story of such establishments is far more complex. In Boomtown Saloons, archaeologist Kelly J. Dixon recounts the excavation of four historic saloon sites in Nevada's Virginia City, one of the West's most important boomtowns, and shows how the physical traces of this handful of disparate drinking places offer a new perspective on authentic life in the mining West. During the second half of the nineteenth century, the Comstock Lode's mineral wealth attracted people from all over the world. At its peak, Virginia City had a cosmopolitan population of over 20,000 people. Like people everywhere, they sought to pass their leisure time in congenial company, often in one or another of the four saloons studied here. Dixon's account of the role these four establishments played in the social and economic life of Virginia City offers keen insight into the businesses and people who made up the backdrop of a mining boomtown. The saloons in this study were quieter than legend would have us believe; they served relatively distinct groups and offered their customers a place of refuge, solidarity, and social contact with peers in a city where few people had longtime ties or initially any close contacts. Boomtown Saloons also offers an equally vivid portrait of the modern historical archaeologist who combines time-honored digging, reconstruction, and analysis methods with such cutting-edge technology as DNA analysis of saliva traces on a 150-year-old pipestem and chemical analysis of the residue

in discarded condiment bottles. The book is illustrated with historical photographs and maps, as well as photographs of artifacts uncovered during the excavations of the four sites. Dixon's sparkling text and thoughtful interpretation of evidence reveal an unknown aspect of daily life in one of the West's most storied boomtowns and demonstrate that, contrary to legend, the traditional western saloon served an vital and complex social role in its community. Available in hardcover and paperback.

The Psychology of Reading Routledge Originally published in 1984, this new introductory text fulfilled a need amongst both psychology and education students for a book which dealt with reading in a way that explored areas beyond the strictly practical question of how to teach children to read. Previous books on the psychology of reading had often concentrated on the analytic approach, in which reading had been seen in terms of a set of interconnected sub-skills and the experimental study of these components had become an end in itself. As a result, although great advances had been made in our understanding of certain aspects of the process, psychological studies of reading had increasingly been seen by teachers and others as unduly abstract. The Psychology of Reading goes back to first principles and attempts to set reading in its context alongside other cognitive activities, particularly those involving memory and perceptual processes. Professor Kennedy argues that it is wrong to set reading apart as a 'skill' when it needs to be understood against a background of work in cognitive psychology. Reading is a social phenomenon concerned with human communication, and in this context it must be seen in terms of an interaction between writer and reader. The book explores the nature of this interaction and the various stylistic and other devices which sustain the 'contract' between reader and writer. In particular, the psychological processes which allow a reader to make sensible assumptions about a writer's intentions are dealt with in detail. No theory of reading, the author argues, should ignore the purpose of the enterprise. Similarly, explaining success and failure in teaching children to read may well hinge on an understanding of what children think reading is about. The style of this book is concise and largely non-technical. The Psychology of Reading will be welcomed as stimulating and demanding by experts and non-specialist general readers alike.

Brazil The Emerging Economic Boom, 1995-2005 McGraw-Hill Is your company ready to take advantage of the new growth cycle that is beginning in Brazil and should last the next ten years? Few Brazilian experts are as qualified to answer this question as the author of this book, Stephen Charles Kanitz. The original version of this book, written in Portuguese, became a best seller in Brazil only a month after publication. A Harvard MBA, Professor Kanitz is the editor of the Brazilian equivalent of Fortune 500, the 'Best and Biggest' yearbook published by Exame, Brazil's leading business magazine. As long ago as 1984, Professor Kanitz predicted the recession then awaiting the Brazilian economy. He is no intrinsic optimist. In this book, buttressed with masses of data, figures and examples, Professor Kanitz shows that the years of stagnation have been left behind. To take maximum advantage of this new economic boom, before competitors do, you must become aware that Brazil is ready for a new surge of growth, which will be similar in many respects to the 'economic miracle' of the seventies.
