*Vikas Publishing House*

## Management Economics: An Accelerated Approach

## An Accelerated Approach

*Routledge* Thoroughly classroom tested, this text is designed specifically for  
one-semester accelerated and online courses at the upper undergraduate  
and MBA levels. It is based on the theme that business and personal  
decisions are made within both micro- and macro-economic environments.  
By understanding the environments and their effects on outcomes of  
decisions, better choices can be made. The text also differs from others in  
the area because it is less theoretical, it provides a broader perspective for  
management problem solving, and it bridges economics with other  
business disciplines. Each chapter includes a management decision-  
oriented case study that applies tools of economic analysis. An online

instructors manual is available to professors who adopt the text.

## Microeconomics

*John Wiley & Sons* **Microeconomics is a classroom-tested resource for learning the key concepts, essential tools, and applications of microeconomics. This leading textbook enables students to recognize and analyze significant data, patterns, and trends in real markets through its integrated, student-friendly approach to the subject — providing practice problems, hands-on exercises, illustrative examples, and engaging applications that ground theory firmly in the real world. Each chapter, opening with a set of clearly defined learning goals based on the Bloom Taxonomy, features numerous Learning-by-Doing (LBD) problems, mathematical and graphical data, and varied problem sets focused on current events. Now in its sixth edition, the text offers extensive new and revised content throughout. All applications reflect current data and important new developments in the field of economics, including behavioral economics, randomized controlled trials (RCTs) in policy evaluation and design, and computational-based microeconomics. Updated chapter openers, designed to increase student interest, cover topics including the economic impacts of climate change, U.S. household income and spending, surge pricing by Uber and Lyft, the effect of immigration on wages, and advances in robotics, automation, artificial intelligence, and more.**

Ø Semester1 Board Papers & Semester II Specimen Papers merged chapter-wise Ø Semester II Board Papers fully solved on top • Revision Notes : Chapter wise and Topic wise for in-depth study • Mind Maps & Mnemonics: (Only PCMB) for quick learning • Self -Assessment Tests for self-preparation. • Concept videos for blended learning • Exam Questions: Previous Years' Examination Questions and Answers with detailed explanation to facilitate exam-oriented preparation. • Examiner's Comments & Answering Tips to aid in exam preparation. • Academically important Questions (AI) look out for highly expected questions for upcoming g exam • ICSE & ISC Marking scheme answers: Previous year's board marking scheme • Toppers answers: Latest Toppers hand written answer sheet. • Reflections at the end of each chapter to get clarity about the expected learning outcomes

# Soft Computing in Management and Business Economics

## Volume 1

*Springer* This book is a collection of selected papers presented at the Annual Meeting of the European Academy of Management and Business Economics (AEDEM), held at the Faculty of Economics and Business of the University of Barcelona, 05 - 07 June, 2012. This edition of the conference has been presented with the slogan "Creating new opportunities in an uncertain environment". There are different ways for assessing uncertainty in management but this book mainly focused on soft computing theories and their role in assessing uncertainty in a complex world. The present book gives a comprehensive overview of general management topics and discusses some of the most recent developments in all the areas of business and management including management, marketing, business statistics, innovation and technology, finance, sports and tourism. This book might be of great interest for anyone working in the area of management and business economics and might be especially useful for scientists and graduate students doing research in these fields.

## Voices from the Classroom: A Celebration of Learning

*Waxmann Verlag* **Voices from the Classroom** illustrates that teachers have a leading voice in the policies that impact their students and the profession of teaching. The aim is to provide a rich and broad view of the impact of inquiry in the classrooms, from primary to higher education, and to provide a window into the perspective of teachers. **Voices from the Classroom**

allows us to advance this mission by identifying and then turning educators' ideas into action. The publication includes chapters on issues ranging from dyslexic students' geospatial abilities to teachers' differential behaviours related, student characteristics and the experiences of refugees with bullying in the educational space. All the contributions published in this book emerged from real classrooms: our teachers and researchers conducted their research by drawing on their experience as educators. We believe that these insights into everyday classrooms, and the issues affecting them, are crucial to making teaching and learning better. We hope they can help drive real, positive change for students and teachers.

## A Guide to Educational Programs in Noncollegiate Organizations

### Quantitative Research in Economics and Management Sciences

*Cognitione Foundation* In this thematic issue of the *Journal of Entrepreneurship, Management and Innovation*, entitled *Qualitative Research in Economics and Management Sciences*, the authors used many quantitative methods and research models, e.g. SEM, PLS-SEM, or probit models (Table 1). Each of these approaches is characterized by methodological rigor and an assessment of the reliability and validity of the research instruments used. Pini and Tchorek (2022) analyze the determinants of exports in two European, culturally related countries, such as Italy and Poland, using an econometric and probit model, which implies a normal distribution of errors and is adapted to binary responses (excluding size and age variables). The authors investigate the influence of many independent variables (size, age, management by family members or external managers) on the dependent variable (export), controlling the research model by product and process innovation, location in a less developed region, operations in a high/medium-high technology-intensive sector or cooperation with many banks. The results confirm the authors' initial assumptions that the size of companies influences the exports of the surveyed countries; the age of companies exporting their goods is more important in Italy than in Poland, where no such impact has been recorded. In addition, management by an external manager increases the likelihood of exports for younger family businesses in Italy and smaller family businesses in Poland. The authors also showed that product innovation is the engine of exports in Italy and Poland, and geographic location affects the likelihood of exports in Italy, but not in Poland. In other studies,

**Paulino (2022) presents the growing business analytics and business intelligence in the Philippines, their impact on organizational performance, and marketing, financial, and business process performance indicators. Retail companies were selected for the study, focusing on advanced data management used in business operations. The author mainly used the well-known PLS-SEM model, and his research instrument was assessed in terms of content validity, construct validity, and reliability. The results of the measurement and structural model evaluation were also subject to verification. The results indicate the impact of business analytics capabilities (including the ability of the decision support system (DSS), business process improvement (BPM), data dashboard (DD), and financial analysis (FA) on the business intelligence level. In addition, it has been empirically verified that organizational performance influences marketing, financial, and business process performance. Overall, business intelligence is an essential predictor of a retail company's organizational performance. The assumption that the level of readiness to implement business analytics can be treated as a moderating factor between business analytics and organizational performance has not been confirmed. The next article by Klimontowicz and Majewska (2022) presents the positive impact of intellectual capital (IC), especially its three components, such as process capital, human capital and relational capital, on the competitiveness of banks and market efficiency. The authors used the following methods and tools: Principal Axis Factor Analysis, PLS-SEM, PAPI, and CAWI. As a result of their application, they emphasize that, in contrast to previous research, the process capital dominates the bank's potential to create a competitive advantage, not human capital, proving the vital role of technology and innovation. They found that competitive performance moderates the relationship between IC and market efficiency; the environment positively moderates the relationship between IC and competitor performance as well as the relationship between competitor performance and market efficiency. The size of the bank and the length of its market activity affect the market efficiency measured by the average rate of changes in ROA and ROE. The study expands the existing evidence, mainly from well-developed countries, on the intellectual capital of Polish banks, emphasizing the process capital to a much greater extent as a modern and so far little exposed component of IC in other research. The last two articles refer to human resource management. Hassan's study (2022) explores the impact of human resource management (HRM) practices on employee retention. In addition, he moderates the role of performance evaluation, training and development in the relationship between HRM practices and employee retention. Using SEM and questionnaires validated by other researchers, the author proves the originality of research in the retail sector in the Maldives on improving employee retention, a complementary approach to the impact of rewards and compensations, training and employee development, as well as assessing their results in human capital management, recommending practical solutions for the sector retail**

**Maldives. In another study on workers' adaptive performance, Tan and Antonio (2022) using PLS-SEM prove that the new form of remote work and the so-called e-leadership forced by the COVID-19 pandemic have changed the way employers and employees interact. Organizational commitment, teleworking and a sense of purpose affect the adaptive performance of employees directly, while the perception of e-leadership indirectly. It is also one of the first studies to capture intrinsic motivation as the antecedent of employee adaptive performance, along with perceived e-leadership and teleworking results.**

## The 1980 Guide to the Evaluation of

# Educational Experiences in the Armed Services: Army Business, Economics, Financial Sciences, and Management

*Springer Science & Business Media* A series of papers on business, economics, and financial sciences, management selected from International Conference on Business, Economics, and Financial Sciences, Management are included in this volume. Management in all business and organizational activities is the act of getting people together to accomplish desired goals and objectives using available resources efficiently and effectively. Management comprises planning, organizing, staffing, leading or directing, and controlling an organization (a group of one or more people or entities) or effort for the purpose of accomplishing a goal. Resourcing encompasses the deployment and manipulation of human resources, financial resources, technological resources and natural resources. The proceedings of BEFM2011 focuses on the various aspects of advances in Business, Economics, and Financial Sciences, Management and provides a chance for academic and industry professionals to discuss recent progress in the area of Business, Economics, and Financial Sciences, Management. It is hoped that the present book will be useful to experts and professors, both specialists and graduate students in the related fields.

## Educating for Values-Driven Leadership

# Giving Voice to Values Across the Curriculum

*Business Expert Press* **Despite four decades of good faith effort to teach ethics in business schools, you'll still find today headlines about egregious excess and scandal. It becomes reasonable to ask why these efforts have not been working. Business faculty in ethics courses spend a lot of time teaching theories of ethical reasoning and analyzing those big, thorny dilemmas—triggering what one professor called “ethics fatigue.” But what if faculty stopped focusing on ethical analysis and focused on a new curriculum—one that builds a conversation across the core curriculum (not only in ethics courses) and also provides the teaching aids for a new way of thinking about ethics education? This is where Giving Voice to Values (GVV) comes in—the GVV curriculum asks the question: “What if I were going to act on my values? What would I say and do? How could I be most effective?” This book will help faculty across the business curriculum with examples, strategies, and assistance in applying the GVV approach. In addition to an introductory chapter, which explains the rationale and strategy behind GVV, there are twelve individual chapters by faculty from the major business functional areas and from faculty representing different geographic regions. The book is a useful guide for faculty from any business discipline on HOW to use the GVV approach in his or her teaching.**

# Managerial Economics in a Global Economy

*McGraw-Hill College -- Instructor's Manual -- Test Bank / Robert F. Brooker.*

# Madame Ph.D.

# Growing up Black in Dc and Beating the Odds Nettie's Dc Story of Perseverance, Hope, and Determination (Phd)

*Archway Publishing* **Every Ph.D. has a story, and Gwynette Ford Lacy is no exception. As a young black girl struggling amid the trappings of inner-city Washington, DC to overcome a broken home, an attempted sexual assault,**

and relentless bullying, she became determined to survive and succeed despite her background, gender, and the color of her skin. In an intimate retelling of her personal story, Lacy details how she emerged from a childhood full of challenges to beat the odds and achieve a series of “firsts,” to become the first African American female to earn a Ph.D., in her business field from the University of Wisconsin-Madison. Lacy discloses how she transformed into a math whiz, STEM trailblazer, high school cheerleader and activist. She received a tuition scholarship to the former all-male Lincoln University in Pennsylvania, where she pledged Alpha Kappa Alpha Sorority and graduated magna cum laude, in three years, earning her department’s Wall Street Journal Award. The great, great, great granddaughter of a female slave, Lacy provides an eye-opening glimpse into major events in American history in the 1960’s and 70’s, such as the Civil Rights Movement, assassinations and riots, and the Vietnam War. She also shares the triumphs she experienced along the way, including laughter, love, and joy, and how she created a life that matters through perseverance, hope and determination (PHD). Madame Ph.D. shares the inspiring true story of an African American woman’s journey from inner-city Washington, DC, to achieve professional success as a college professor/administrator, international management consultant, and motivational speaker.

## Vocational Education Bulletin

## The Business School Buzz Book

*Vault Inc.* In this updated guide, Vault publishes the entire surveys of current students and alumni at more than 100 top business schools. Each 4- to 5-page entry is composed almost entirely of insider comments from students and alumni. Each school profile features surveys of about 10 students or alumni. These narratives provide applicants with detailed and balanced perspectives and insider information on admissions and employment prospects, which is lacking in other business school guides.

## Learning in times of COVID-19: Students’, Families’, and Educators’ Perspectives

*Frontiers Media SA*

# Forestry Economics

## A Managerial Approach

*Routledge Forestry Economics* introduces students and practitioners to all aspects of the management and economics of forestry. The book adopts the approach of managerial economics textbooks and applies this to the unique processes and problems faced by managers of forests. While most forestry economics books are written by economists for future economists, what many future forest and natural resource managers need is to understand what economic information is and how to use it to make better business and management decisions. John E. Wagner draws on his twenty years of experience teaching and working in the field of forest resource economics to present students with an accessible understanding of the unique production processes and problems faced by forest and other natural resource managers. There are three unique features of this book: The first is its organization. The material is organized around two common economic models used in forest and natural resources management decision making. The second is the use of case studies from various disciplines: Outdoor and Commercial Recreation, Wood Products Engineering, Forest Products, and Forestry. The purpose of these case studies is to provide students with applications of the concepts being discussed within the text. The third is revisiting the question of how to use economic information to make better business decisions at the end of each chapter. This ties each chapter to the preceding ones and reinforces the hypothesis that a solid working knowledge of these economic models and the information they contain are necessary for making better business decisions. This textbook is an invaluable source of clear and accessible information on forestry economics and management for not only economics students, but for students of other disciplines and those already working in forestry and natural resources.

## Just-in-time Teaching

## Across the Disciplines, Across the Academy

*Stylus Publishing, LLC.* **Just-in-Time Teaching (JiTT)** is a pedagogical approach that requires students to answer questions related to an upcoming class a few hours beforehand, using an online course management system. While the phrase 'Just in time' may evoke shades of slap-dash work and cut corners, JiTT pedagogy is just the opposite. It helps students to view learning as a process that takes time, introspection, and persistence. Students who experience JiTT come to class better prepared, and report that it helps to focus and organize their out-of-class studying. Their responses to JiTT questions make gaps in their learning visible to the teacher prior to class, enabling him or her to address learning gaps while the material is still fresh in students' minds - hence the label 'just in time'. JiTT questions differ from traditional homework problems in being designed, not only to build cognitive skills, but also to help students confront misconceptions, make connections to previous knowledge, and develop metacognitive thinking practices. Students consequently spend more time on course concepts and ideas, but also read their textbooks in ways that result in more effective and deeper learning. Starting the class with students' work also dramatically changes the classroom-learning environment, creating greater student engagement. This book demonstrates that JiTT has broad appeal across the academy. Part I provides a broad overview of JiTT, introducing the pedagogy and exploring various dimensions of its use without regard to discipline. Part II of the

book demonstrates JiTT's remarkable cross-disciplinary impact with examples of applications in physics, biology, the geosciences, economics, history, and the humanities.

# Calculus for the Managerial, Life, and Social Sciences

*Brooks Cole* Author **Soo Tang Tan** knows that students majoring in business, management, economics, and the social and life sciences appreciate understanding how the math they are learning relates to their future careers. So Tan has filled this Fourth Edition of *Calculus for the Managerial, Life and Social Sciences* with a wealth of new applications and examples drawn from newspapers and magazines. It is this real-life, problem-solving approach that makes calculus easier to understand. Tan's concise, inviting writing style and the wide variety of helpful in-text learning features augments this text's user-friendly feel. Wherever possible the author uses an intuitive approach to present new mathematical concepts. Results are often presented informally--without compromising the mathematical content and accuracy--to help students understand new material.
