The Pumpkin Plan

A Simple Strategy to Grow a Remarkable Business in Any Field

Penguin Each year Americans start one million new businesses, nearly 80 percent of which fail within the first five years. Under such pressure to stay alive—let alone grow—it’s easy for entrepreneurs to get caught up in a never-ending cycle of “sell it—do it, sell it—do it” that leaves them exhausted, frustrated, and unable to get ahead no matter how hard they try. This is the exact situation Mike Michalowicz found himself in when he was trying to grow his first company. Although it was making steady money, there was never very much left over and he was chasing customers left and right, putting in twenty-eight-hour days, eight days a week. The punishing grind never let up. His company was alive but stunted, and he was barely breathing. That’s when he discovered an unlikely source of inspiration—pumpkin farmers. After reading an article about a local farmer who had dedicated his life to growing giant pumpkins, Michalowicz realized the same process could apply to growing a business. He tested the Pumpkin Plan on his own company and transformed it into a remarkable, multimillion-dollar industry leader. First he did it for himself. Then for others. And now you. So what is the Pumpkin Plan? Plant the right seeds: Don’t waste time doing a bunch of different things just to please your customers. Instead, identify the thing you do better than anyone else and focus all of your attention, money, and time on figuring out how to grow your company doing it. Weed out the losers: In a pumpkin patch small, rotten pumpkins stunt the growth of the robust, healthy ones. The same is true of customers. Figure out which customers add the most value and provide the best opportunities for sustained growth. Then ditch the worst of the worst. Nurture the winners: Once you figure out who your best customers are, blow their minds with care. Discover their unfulfilled needs, innovate to make their wishes come true, and overdeliver on every single promise. Full of stories of other successful entrepreneurs, The Pumpkin Plan guides you through unconventional strategies to help you build a truly profitable blue-ribbon company that is the best in its field.

The FAST Plan for Tax Reform

iUniverse Although nearly everyone involved with our federal taxation system agrees that simplification of this system is a positive and even necessary step, achieving it has proven to be difficult. Exploring the issue from start to finish, this detailed blueprint to tax reform offers real solutions to the real problems of our taxation system. Author Donald E. Phillipson, a lawyer who has studied the tax code for years, reveals facts about deficit spending and the national debt and examines alternative taxation approaches. He explores problems with current tax subsidies and individual income, corporation income, and estate taxes and presents new solutions to those problems. Phillipson also offers new perspectives on the total federal tax obligations of individuals and relationships among taxes on individual income, corporation income, and estates and gifts. Our taxation system desperately needs reform that takes into account the function of the system as a whole. This study demonstrates that such reform is possible and that taxes can be fair, accountable, and simple--without the creation of new tax collection structures.

Project Independence Blueprint

Transcript of First- Public Hearing

What is Project Independence? The sources and uses of energy in the United States have changed dramatically in the last several decades. As a result, in just one generation, we have shifted from a position of domestic energy abundance to a substantial and continually growing reliance on foreign energy sources. Project Independence is a wide-ranging program to evaluate this growing dependence on foreign sources of energy, and to develop positive programs to reduce our vulnerability to future oil cut-offs and price increases.

Socioeconomic Monitoring of the Olympic National Forest and Three Local Communities

nly affected timber industry jobs in local communities, but also resulted in declining agency budgets and staff reductions. Mitigation efforts varied. Ecosystem management contracts declined and shifted from labor-intensive to equipment-intensive activities, with about half of all

Economic assistance grants benefited communities that had the staff and resources to develop projects and apply for monies, but provided little benefit to communities without those resources. Payments to counties served as an important source of revenue for rural schools and roads. We also examine socioeconomic changes that occurred in the case study communities, and the influence of forest management policy on these changes. Between 1990 and 2000 all three communities showed a decrease in population, an increase in median age, a decline in timber industry-related employment, and an increase in service-industry and government jobs.
