Geography should be learned chiefly from maps, and the child should begin the study by learning “the meaning of map,” and how to use it. These subjects are well fitted to form an attractive introduction to the study of Geography: some of them should awaken the delightful interest which attaches in a child's mind to that which is wonderful—incomprehensible. The Map lessons should lead to mechanical efforts, equally delightful. It is only when presented to the child for the first time in the form of stale knowledge and foregone conclusions that the facts taught in these lessons appear dry and repulsive to him. An effort is made in the following pages to treat the subject with the sort of sympathetic interest and freshness which attracts children to a new study. A short summary of the chief points in each reading lesson is given in the form of questions and answers. Easy verses, illustrative of the various subjects, are introduced, in order that the children may connect pleasant poetic fancies with the phenomena upon which “Geography” so much depends. It is hoped that these reading lessons may afford intelligent teaching, even in the hands of a young teacher. The first ideas of Geography—the lessons on “Place”—which should make the child observant of local geography, of the features of his own neighbourhood, its heights and hollows and level lands, its streams and ponds—should be conveyed viva voce. At this stage, a class-book cannot take the place of an intelligent teacher. Children should go through the book twice, and should, after the second reading, be able to answer any of the questions from memory. Charlotte M. Mason **A Map to the Sun First Second** A Map to the Sun is a gripping YA graphic novel about five principle players in a struggling girls' basketball team. She's dealing with a lot, including family troubles, dropping grades, and the newly formed women's basketball team at their high school. With Ren's new friends and Luna all on the basketball team, the lines between their lives on and off the court begin to blur. During their first season, this diverse and endearing group of teens are challenged in ways that make them reevaluate just who and how they trust. Sloane Leong's evocative storytelling about the lives of these young women is an ode to the dynamic nature of friendship. \*Lettering by Aditya Bidikar **Out of My Mind Simon and Schuster** Considered by many to be mentally retarded, a brilliant, impatient fifth-grader with cerebral palsy discovers a technological device that will allow her to speak for the first time. **Follow that Map! creative endeavors—from innovation to the arts—are not achievements but conversions, corrections after failed attempts. The gift of failure is a riddle: it will always be both the void and the start of infinite possibility. The Rise—part investigation into a psychological mystery, part an argument about creativity and art, and part a soulful celebration of the determination and courage of the human spirit—makes the case that many of the world’s greatest achievements have come from understanding the central importance of failure. Written over the course of four years, this exquisite biography of an idea is about the improbable foundations of a creative human endeavor. Each chapter focuses on the inestimable value of often ignored ideas—the power of surrender, how play is essential for innovation, the “near win” can help propel you on the road to mastery, the importance of grit and creative practice. The Rise shares narratives about figures past and present that range from choreographers, writers, painters, inventors, and entrepreneurs; Frederick Douglass, Samuel F.B. Morse, Diane Arbus, and J.K. Rowling, for example, feature alongside choreographer Paul Taylor, Nobel Prize-winning physicists Andre Geim and Konstantin Novoselov, and Arctic explorer Ben Saunders. With valuable lessons for pedagogy and parenting, for innovation and discovery, and for self-direction and creativity, The Rise “gives the old chestnut ‘If at first you don’t succeed...’ a jolt of adrenaline” (Elle). **Me and My Place in Space Knopf Books for Young Readers** Where am I in the solar system?
