Teacher educators need knowledge and skills to design and successfully implement technology-enhanced learning. In today's world, most people must continuously improve their abilities and information levels to encounter the challenges of lifestyle. The current era of the 21st century is the data and innovation (IT) time. Each viewpoint of life has got to be synonymous with science and advancement. All over the world, information in all ranges is making tremendous advances. Information and innovation are right now being utilized within the field of education to create effective and interesting instruction and preparation for both

understudies and teachers. The term "technology" within the 21st century is a critical issue in many fields, including instruction. This is since innovation has become the interstate information development in numerous countries. Nowadays, the application of technology has experienced progress and has changed our social designs that totally alter the way people think, work, and live. As a component of this, schools and other instructive teaching approaches ought to plan understudies to live in an "information society" to consider ICT support in their instructive programs. "Technology could be a crucial portion of teaching today's students and it is utilized at whatever point conceivable within the classroom so that it moves forward the large learning environment." Students will also get acquainted with innovation since they will utilize it in the future. A great educator not only provides proper ways for students to plan successfully but also motivates them to utilize their abilities in developing their country. This is often the crossover strategy of instructing in which ICT is being utilized for instructing learning circumstances. The combination of both the words "techno" and "pedagogy" implies weaving the innovations into the instructing learning preparation. It needs to consciously recognize the intervening learning environment in order to simplify and clarify the data transmission process to the greatest extent. Hence the thought of the Publication of the Edited book entitled "Essentials of Techno-pedagogy" to make available the rudiments concerning Techno-Pedagogy.
