THE VALUE OF NOTHING

HOW TO RESHAPE MARKET SOCIETY AND REDEFINE DEMOCRACY

Granta Traditional Chinese edition of The Value of Nothing: How to Reshape Market Society and Redefine Democracy by raj Patel, the author of Stuffed and Starved: The Hidden Battle for the World Food System. The Value of Nothing is a profound analysis of the global economic crisis stemmed by the "value" set by the "market." The cost of goods made and the ensuing cost of ecological damage do not proportionally represent the "value" of goods we produce and consume. Patel is a fellow at The Institute for Food and Development Policy, a visiting scholar at UC Berkley and a social and environmental activist. In Chinese. Distributed by Tsai Fong Books, Inc.

IL DIBATTITO SUL NEOCORPORATIVISMO

LA TENAGLIA MAGISTRATI-ECONOMISTI SUI CITTADINI

Lastaria Edizioni Devono le leggi economiche dominare i rapporti sociali? Nell'ambito di questo dilemma, nella ricerca di un equilibrio, si muove il presente lavoro. Due sono i pilastri su cui esso si fonda: argomenti e temi giuridici da un lato, che, però, hanno anche un impatto economico, e, dall'altro, la pretesa di egemonia del dato economico su ogni altro valore. Pretesa molte volte ammantata di scientificità, che travolge i rapporti reciproci, influenza il caos delle stesse pronunce giudiziali e il caos normativo, rendendo incerto il destino delle persone. "Per aver paura dei magistrati non bisogna essere necessariamente colpevoli (ma anche con gli economisti non si scherza)" ironizza l'autore, e in questo importante saggio, per contenuti e dimensioni, con garbo e autorevolezza ci spiega chiaramente il perché. Francesco Felis è nato ad Albenga (SV) nel 1957. Vive a Genova dal 1967, dove si è laureato in Giurisprudenza con 110 e lode nel 1982. È notaio dal 1988. Autore di molteplici pubblicazioni, giuridiche e non, è intervenuto a diversi convegni giuridici e politici.

ESTIMO. MANUALE PER INGEGNERI E ARCHITETTI

Società Editrice Esculapio Il testo si rivolge agli operatori del settore edilizio, immobiliare e territoriale con riguardo ai professionisti architetti, ingegneri, geometri, agronomi e periti edili ai quali è spesso richiesta una competenza economico-estimativa non solo in appoggio alle usuali attività professionali (si pensi ad esempio alla redazione di un computo metrico estimativo di un progetto) ma anche finalizzata ad una autonoma attività professionale che si potrebbe definire dell' «estimatore». Il volume è inoltre pensato per gli studenti delle Facoltà di Ingegneria (civile ed edile) e di Architettura poiché, anche in assenza di specifiche conoscenze «preliminari», lo stesso fornisce i fondamenti necessari all'apprendimento dell' «estimo civile urbano» grazie ad un approccio lineare che, con l'apporto di numerosi esempi, parte dalle basi della teoria dell'estimo per svilupparne e approfondire i contenuti con un piglio didattico e pratico.

LETTERA DALL'ITALIA

MICROECONOMICS

Irwin Professional Publishing This text emphasizes a modern approach to microeconomics by integrating new topics in microeconomic theory and making them accessible to students. These topics include risk and uncertainty, assymetric information and game theory. Traditional topics are also treated in a clear way with solid applications. Modifications have been made to the text in this edition, these include new information on the theory of the firm, specifically the coverage of cost, and examples are included throughout the text to reinforce the material presented.

FILOSOFIA DEL DENARO

DOPO IL TRAMONTO DI KEYNES

CONDORCET'S PARADOX

Springer Science & Business Media The book compiles research on Condorcet's Paradox over some two centuries. It begins with a historical overview of the discovery of Condorcet's Paradox in the 18th Century, reviews numerous studies conducted to find actual occurrences of the paradox, and compiles research that has been done to develop mathematical representations for the probability that the paradox will be observed. Combines all approaches that have been used to study this very interesting phenomenon.

MACROECONOMICS IN CONTEXT

Routledge Macroeconomics in Context lays out the principles of macroeconomics in a manner that is thorough, up to date, and relevant to students. Like its counterpart, Microeconomics in Context, the book is attuned to economic realities--and it has a bargain price. The in Context books offer affordability, engaging treatment of high-interest topics from sustainability to financial crisis and rising inequality, and clear, straightforward presentation of economic theory. Policy issues are presented in context--historical, institutional, social, political, and ethical--and always with reference to human well-being.

FOUNDATIONS OF HUMAN SOCIALITY

ECONOMIC EXPERIMENTS AND ETHNOGRAPHIC EVIDENCE FROM FIFTEEN SMALL-SCALE SOCIETIES

OUP Oxford What motives underlie the ways humans interact socially? Are these the same for all societies? Are these part of our nature, or influenced by our environments? Over the last decade, research in experimental economics has emphatically falsified the textbook representation of Homo economicus. Literally hundreds of experiments suggest that people care not only about their own material payoffs, but also about such things as fairness, equity and reciprocity. However, this research left fundamental questions unanswered: Are such social preferences stable components of human nature; or, are they modulated by economic, social and cultural environments? Until now, experimental research could not address this question because virtually all subjects had been university students, and while there are cultural differences among student populations throughout the world, these differences are small compared to the full range of human social and cultural environments. A vast amount of ethnographic and historical research suggests that people's motives are influenced by economic, social, and cultural environments, yet such methods can only yield circumstantial evidence about human motives. Combining ethnographic and experimental approaches to fill this gap, this book breaks new ground in reporting the results of a large cross-cultural study aimed at determining the sources of social (non-selfish) preferences that underlie the diversity of human sociality. The same experiments which provided evidence for social preferences among university students were performed in fifteen small-scale societies exhibiting a wide variety of social, economic and cultural conditions by experienced field researchers who had also done long-term ethnographic field work in these societies. The findings of these experiments demonstrated that no society in which experimental behaviour is consistent with the canonical model of self-interest. Indeed, results showed that the variation in behaviour is far greater than previously thought, and that the differences between societies in market integration and the importance of cooperation explain a substantial portion of this variation, which individual-level economic and demographic variables could not. Finally, the extent to which experimental play mirrors patterns of interaction found in everyday life is traced. The book starts with a succinct but substantive introduction to the use of game theory as an analytical tool and its use in the social sciences for the rigorous testing of hypotheses about fundamental aspects of social behaviour outside artificially constructed laboratories. The results of the fifteen case studies are summarized in a suggestive chapter about the scope of the project.

SPORTS MANAGEMENT AS AN EMERGING ECONOMIC ACTIVITY

TRENDS AND BEST PRACTICES

Springer This book examines the sports industry as a broad business and economic sector with an enormous influence on regional economic development. Covering topics such as sports economics, financing sports organizations, sustainability management in sports, sports tourism and doping among athletes, this book provides a timely collection of research and best practices in the areas of sports management and policy. Sports activity is a rapidly growing and evolving industry, offering numerous business opportunities--from the manufacturing of sporting equipment and activity at gyms and sports centers to revenue from sporting events and sport tourism. In order for the varied businesses across the sport industry, whether public or private, to be successful, proper management strategies and policies must be in place. This includes the knowledge of the industry, strategic planning, sector analysis, quality management and sustainable (economic and environmental) use of resources. Featuring case examples from several countries, including Spain, Turkey, Uruguay, Portugal, and Italy, this volume provides international perspectives on a wide spectrum of managerial issues across this dynamic industry.

THE CONSUMER SOCIETY

MYTHS AND STRUCTURES

SAGE Jean Baudrillard's classic text was one of the first to focus on the process and meaning of consumption in contemporary culture. Originally published in 1970, the book makes a vital contribution to current debates on consumption. The book includes Baudrillard's most organized discussion of mass media culture, the meaning of leisure, and anomie in affluent society. A chapter on the body demonstrates Baudrillard's extraordinary prescience for flagging vital subjects in contemporary culture long before others. This English translation begins with a new introductory essay.

SUSTAINABLE DEVELOPMENT REPORT 2021

Cambridge University Press The Sustainable Development Report 2021 features the SDG Index and Dashboards, the first and widely used tool to assess country performance on the UN Agenda 2030 and the Sustainable Development Goals. The report analyses and outlines what needs to happen for the Decade of Action and Delivery of the SDGs. In order to build back better following the Covid-19 pandemic, especially low-income countries will need increased fiscal space. The report frames the implementation of the SDGs in terms of six broad transformations. The authors examine country performance on the SDGs for 193 countries using a wide array of indicators, and calculate future trajectories, presenting a number of best practices to achieve the historic Agenda 2030. The views expressed in this report do not reflect the views of any organizations, agency or programme of the United Nations. This title is available as Open Access on Cambridge Core.
