CONCEPTS OF BIOLOGY

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

DID THE MILLENNIUM DEVELOPMENT GOALS WORK?

MEETING FUTURE CHALLENGES WITH PAST LESSONS

Policy Press *With the target date for the Millennium Development Goals (MDGs) behind us, this book asks did they work? And what happens next? Arguing that to effectively look forward, we must first look back, the editors of this insightful book gather leading scholars and practitioners from a range of backgrounds and regions to provide an in-depth exploration of the MDG project and its impact. Contributors use region-specific case studies to explore the effectiveness of the MDGs in addressing the root causes of poverty, including resource geographies, early childhood development and education, women's rights and disability rights as well as the impact of the global financial crisis and Arab Spring on MDG attainment. Providing a critical assessment that seeks to inform future policy decisions, the book will be valuable to those working in the development community as well as to academics and students of international development, international relations and development economics.*

AGENCY, STRUCTURE AND THE NEET POLICY PROBLEM

THE EXPERIENCES OF YOUNG PEOPLE

Bloomsbury Publishing *For many years, government policy has associated young people 'being NEET' (Not in Education, Employment or Training) with educational underachievement, worklessness, generational poverty, poor health, antisocial behaviour, and reduced life expectancies. Researchers and policymakers continue to debate whether young people become NEET as a result of their own choices (i.e. their personal agency), or as a result of external factors (i.e. social, political and economic structures). Most recognise that the truth is somewhere between the two, but a clear understanding of how each interacts in causing young people to become NEET has so far been elusive, making the development of effective policy and practice problematic. Agency, Structure and the NEET Policy Problem makes headway against this problem through an original approach that draws on social cognitive theory and the lived experiences of young people themselves. Investigating the lives of NEET young people between the ages of 17-21 in London, this book elucidates the interactions between agency and structure that lead to them becoming NEET, and in doing so, offers a new perspective on the phenomenon. It offers a valuable critique of existing policy, providing both breadth and detail on the factors affecting the trajectories of young people in their transitions to continued education, training, or employment. It offers a way forward for all who are interested in developing, supporting and implementing a revitalised approach to NEET policy and practice, and a framework around which a coherent multidisciplinary approach to addressing NEET could be developed.*

MECHADEMIA 5

FANTHROPOLOGIES

U of Minnesota Press *Passionate fans of anime and manga, known in Japan as otaku and active around the world, play a significant role in the creation and interpretation of this pervasive popular culture. Routinely appropriating and remixing favorite characters, narratives, imagery, and settings, otaku take control of the anime characters they consume. Fanthropologies—the fifth volume in the Mechademia series, an annual forum devoted to Japanese anime and manga—focuses on fans, fan activities, and the otaku phenomenon. The zones of activity discussed in these essays range from fan-sub (fan-subtitled versions of anime and manga) and copyright issues to gender and nationality in fandom, dolls, and other forms of consumption that fandom offers. Individual pieces include a remarkable photo essay on the emerging art of cosplay photography; an original manga about an obsessive doll-fan; and a tour of Akihabara, Tokyo's discount electronics shopping district, by a scholar disguised as a fuzzy animal.
