Pain Management and the Opioid Epidemic

Balancing Societal and Individual Benefits and Risks of Prescription Opioid Use

National Academies Press Drug overdose, driven largely by overdose related to the use of opioids, is now the leading cause of unintentional injury death in the United States. The ongoing opioid crisis lies at the intersection of two public health challenges: reducing the burden of suffering from pain and containing the rising toll of the harms that can arise from the use of opioid medications. Chronic pain and opioid use disorder both represent complex human conditions affecting millions of Americans and causing untold disability and loss of function. In the context of the growing opioid problem, the U.S. Food and Drug Administration (FDA) launched an Opioids Action Plan in early 2016. As part of this plan, the FDA asked the National Academies of Sciences, Engineering, and Medicine to convene a committee to update the state of the science on pain research, care, and education and to identify actions the FDA and others can take to respond to the opioid epidemic, with a particular focus on informing FDA's development of a formal method for incorporating individual and societal considerations into its risk-benefit framework for opioid approval and monitoring.

Clinical Pharmacology and Therapeutics

John Wiley & Sons A must-have companion for medical students and junior doctors for almost four decades, Lecture Notes: Clinical Pharmacology and Therapeutics provides concise yet thorough coverage of the principles of clinical pharmacology, the major characteristics of therapeutics, and the practical aspects of prescribing drugs to alleviate symptoms and to treat disease. Clinical Hepatology

History · Present State · Outlook

Springer Science & Business Media Hepatology has come of age in the last decades. Biology of the liver has flourished long before. As the largest homogeneous organ of the body the liver served as useful model in the development of biochemistry and related disciplines. Only gradually were these biological investigations applied to the clinical study of liver disease. This was particularly stimulated by the recognition that in the greater part of the world, the developing countries and what we now call the Third World, liver disease represents a major threat to overall public health. It leads to morbidity and mortality of persons in their productive years from liver cancer, cirrhosis and parasitic disease, particularly, schistosomiasis. Moreover, the growing emphasis on the social impact of diseases focused on disorders of the liver because malnutrition, poverty, and drug addiction contribute greatly to their spread. This is compounded by the increase of alcohol abuse, recently on the rise even in the developing countries. Concern with environmental pollution has also raised the interest in liver diseases, in part because the liver acts as a guardian against polluting chemicals and in part because it is considered, possibly to an exaggerated degree, a vulnerable target of such chemicals.

Research Design (International Student Edition)

Qualitative, Quantitative, and Mixed Methods Approaches

SAGE Publications, Incorporated  *Not for sale in the USA & Canada* The eagerly anticipated Fourth Edition of the title that pioneered the comparison of qualitative, quantitative, and mixed methods research design is here! For all three approaches, Creswell includes a preliminary consideration of philosophical assumptions, a review of the literature, an assessment of the use of theory in research approaches, and reflections about the importance of writing and ethics in scholarly inquiry. He also presents the key elements of the research process, giving specific attention to each approach. The Fourth Edition includes extensively revised mixed methods coverage, increased coverage of ethical issues in research, and an expanded emphasis on worldview perspectives. PRAISE FOR CRESWELL'S RESEARCH DESIGN: 'It provides all of the necessary information and tools to guide my doctoral students through writing their dissertation (research) proposals. Each chapter provides content information, examples that demonstrate the application of the content, suggestions for writing activities, and additional resources. All of this together in one textbook is phenomenal.' — R.M. Cooper, Drake University 'Creswell's is a more comprehensive discussion of design. Most texts approach this issue as either a book on qualitative methods, or one on quantitative methods. Additionally, my students appreciate the language. While not simple, the language and tone in this book are both accessible and inviting.' — Gilberto Arriaza, California State University-East Bay 'The accessibility of the content is a key strength. The students indicated that they will continue to use as a resource after the class is over.' — Heather J. Brace, Whittier College

Slave Stealers

True Accounts of Slave Rescues: Then and Now

*Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.*

MCQs in Pharmaceutical Calculations

*MCQs in Pharmaceutical Calculations aims to help pre-registration trainees and pharmacy students with their study enabling them to perform calculations accurately and with confidence. Pharmacists frequently perform simple calculations as part of their professional practice. It is therefore vital that they are able to employ basic numeracy skills accurately so as not to compromise patient safety. The pharmaceutical societies of Great Britain and Northern Ireland (RPSGB and PSNI) have introduced compulsory calculations elements into the registration examinations. These sections must be passed independently of the rest of the examination. Many Schools of Pharmacy worldwide have also recently increased their emphasis on numeracy skills. It includes: * 360 calculations questions in three commonly used multiple choice formats * questions based on important areas in pharmaceutical science and practice: * manipulation of formulae and dilutions * dosing * pharmacokinetics * formulation and dispensing * pharmaceutical chemistry * descriptive answers*

giving the reasoning behind the answers Note: This book is accompanied by an additional 100 calculation-based multiple choice questions, arranged into five 1-hour tests, which will be available from the Pharmaceutical Press FASTtrack website. Importantly, these questions are available in the format of both The Royal Pharmaceutical Society and the Pharmaceutical Society of Northern Ireland registration examinations. The fourth title in the Tomorrow's Pharmacist series, *MCQs in Pharmaceutical Calculations*, will be indispensable to pre-registration trainees and pharmacy students to help them prepare for their future career. Also available in this series: *Hospital Pre-registration Pharmacist Training Pre-registration Interview*, *The Registration Exam Questions*

Hospital Pre-registration Pharmacist Training

Provides a practical explanation for undergraduates and pre-registration trainees on what to expect from a hospital pre-registration training programme.
