SCIENCE - FOR SPECIFICATION MODULES B1-B3, C1-C3 AND P1-P3

OCR 21ST CENTURY SCIENCE

Collins Educational Three sets of ocean liners, each destined to be of three vessels, dominated the Atlantic in the Edwardian era. The race to build the biggest and the best began with Mauretania and Lusitania in 1906, followed by the White Star Line's Olympic and Titanic in 1911-12. Each of these pairs was to see a larger sister, developed as a result of changes needed or desired as a result of operating the two earlier vessels, with Cunard's being Aquitania and White Star's, the ill-fated Britannic. Germany's answer to these British behemoths was the Albert-Ballin designed trio of Imperator, Vaterland and Bismarck. Through misfortune or war, two of these vessels would sink but the others led useful lives, with Aquitania surviving two world wars before being scrapped. Designed to be the absolute engineering achievements of their time, these nine vessels dominated the Atlantic. J. Kent Layton tells the story of the Edwardian Superliners in this fabulously illustrated volume, showcasing many images previously unpublished and never before seen. Rarely can one describe a book as definitive, but this volume truly deserves the accolade.

ADDITIONAL SCIENCE

Collins Educational This student book provides material to teach and prepare students for OCR 21st Century 2011 Additional Science GCSE with complete coverage of the specification modules B4, B5, B6, C4, C5, C6, and P4, P5, P6 which make up the Additional Science GCSE and the middle parts of the three separate science GCSEs. This book will provide you with complete coverage of the new OCR Twenty First Century Additional Science specification:- Plan and teach low-ability and high-achieving students with differentiated student book content laid out in clear, bitesize sections- Engage your students with content that is presented in a clear and fresh way- Establish and build on prior knowledge with a quick recap of KS3 and a direct link to the GCSE content that will follow at the start of each module- Build and apply the skills needed to understand and carry out controlled assessment- Show the relationship between module content to paint the bigger picture with the summary chart at the end of each module- Encourage students take responsibility for what they have learnt and need to develop by using the student-friendly module checklist that matches the specification- Help students improve to a higher grade with worked examples with explanations of how to improve and exam-style practise questions-This student book links to other components in Collins' OCR GCSE Sciences series as well as to other Collins GCSE Science resources- Capture the interest of students with activities exploring science in the media based on Bad Science by Ben Goldacre
