### **THE "PEOPLE POWER" FAMILY SUPERBOOK: BOOK 13. SHOPPING GUIDE (ONLINE SHOPPING, PRODUCT REVIEWS, DEPARTMENT STORES, TRADE SHOWS, CLOSEOUT - WHOLESALE, FACTORY OUTLETS)**

---

Lulu Press, Inc In my opinion, unless you're a total introvert, agoraphobic, disabled or too lazy to leave the house, your best bet to buy most things you need is locally. Go to the Yellow Pages, read your local newspapers, drive around the shopping areas, go to local free ad websites and talk to people you know about what you need. I generally buy most of my stuff from the big department stores but if I need something like furniture, I'll check out the furniture stores on the poor side of the town because the prices for the same goods are often much cheaper than a store in the higher class part of town plus you can often haggle with the owner on a cash deal. By shopping on the poor side of town at supermarkets for food, you can often save several dollars on a load of groceries. Beyond that, I generally go to the thrift stores a few times a year to buy t-shirts, clothes and anything else that strikes my fancy as I look around.

### **A GUIDE FOR THE AAMATEUR METEOROLOGIST**

---

The Crowood Press This fascinating and well-illustrated book, which is packed with valuable information and advice, provides a complete guide to observing, recording and understanding the weather and to setting up an amateur weather station. As the author explains, the advent of relatively

modern electronic weather sensors means that weather observing is now within the reach of almost everybody. Moreover, thanks to computer software and the internet, it is easier than ever before to record and share with others your weather data and observations. The book considers why it is useful and interesting to set up a weather station and observe the weather, and outlines many different types of weather. It explains how to get started and describes the instruments that are available to the amateur meteorologist. It further demonstrates how good observations can be made using some simple instruments, or, in some instances, no instruments at all. It discusses clouds, snow, wind, optical phenomena, thunder dust, ash and hail and examines atmospheric pressure, precipitation, thermometer screens, air temperature and humidity, soil and surface temperatures and evaporation. It covers sunshine and solar radiation, and also local weather and climate and includes a valuable chapter on instrument and computer software suppliers. Essential reading for all those with an interest in observing and understanding the weather, and superbly illustrated with 132 colour photographs and 20 charts & graphs.

## **HF ANTENNA ACCESSORIES**

---

Claude Jollet This fourth e-book in the series on Amateur Radio HF Antennas covers essential, and often illunderstood HF antenna accessories. Lightning on the horizon? You are not worried ... because you installed the lightning protection devices described in this e-book, and you have taken the preventive measures as prescribed. But that's not all. Your HF antenna is now transmitting more RF power, and your receiver is getting more milliwatts from your antenna system, because you learned what types of antenna tuners to avoid. You are now using an efficient tuner, and you even know how it works. Your antenna tuner will likely have its own SWR/PWR meter. Notwithstanding, this e-book will help you decide if you still need an outboard one, and which meter will best meet your needs. Furthermore, armed with the valuable information you read here, you finally acquired the antenna analyzer to satisfy the expectations of the antenna experimenter in you. Emboldened by your recent successful acquisitions, you now have the antenna tower you were dreaming of. You heeded the recommendations this e-book provided and, thus, avoided all the pitfalls that await the unwary. Finally, an e-book series on HF antennas would not be complete without a word on HF signal propagation. It outlines the software and online services available today which enable you to take full advantage of band openings.
