The Canadian Patent Agent Examination Board and the Doctrine of Essential Elements

Tremendous confusion has revolved around the theory and application of the doctrine of essential elements in Canadian patent law ever since the Supreme Court of Canada first introduced the doctrine in Free World Trust c. Électro Santé Inc. In recent years, the Canadian Intellectual Property Office's (CIPO) interpretation and application of the doctrine in its patent application examination guidelines has been the subject of considerable criticism from the Canadian patent profession. However, CIPO's misapplication of the doctrine in recent years' Patent Agent Qualifying Examination has received relatively little attention. This paper examines the application of the doctrine of essential elements in recent years' Canadian Patent Agent Qualifying Examination. The analysis begins with a thorough and comprehensive review of the doctrine of essential elements under Canadian patent law. The analysis reviews the last ten years' Canadian Patent Agent Examination, with a focus on recent years' emphasis on the doctrine of essentiality. Despite the fact that the doctrine itself is still unsettled under Canadian law, the approach taken on recent years' Patent Agent Exams is at best an ambiguous, and at worst an inaccurate application of the doctrine. This paper concludes by demonstrating that the concerns surrounding the doctrine of essentiality may be significant contributing factor to invalidity issues surrounding recent years' Patent Agent Exams.

Patent Law

Cases and Materials: A Synthesis For India

Wolters Kluwer India Pvt. Ltd. It is a casebook on patent law that involves comparative jurisprudence tailored for India. The book is best described by highlighting the following features: (1) Casebook format - The casebook format suits practitioners and judges. It allows the reader to independently interpret and assess the implication of each caselaw, which forms a vital component of the practice of law. The reader is assisted towards this objective by only containing extracts of the relevant portions of the judgment. Even from an academic perspective, it provides an unfiltered view of the law, better than any unnecessary prose. (2) Comparative approach - For each topic of patent law, the book would provide a single point congregation of the relevant Indian provisions and extracts from relevant caselaw across India, the UK, the EU and the USA. This approach is ideal for India, where jurisprudence on the subject is limited. Courts, practitioners, and the Patent Office often resort to such a comparative approach to learn from the experiences of other jurisdictions. (3) Notes - Author's notes before and after each caselaw or topic fulfil four purposes: (i) set the context for the reader; (ii) critique the caselaw or to bring focus on to issues that arise in practice; (iii) contextualize the discussion to the Indian statute; and (iv) examine the historical perspective, including the legislative history. (4) Focus on law - it is a no-nonsense, no-rhetoric book, focussing on the law, its interpretation and application.

PATENT LAW ESSENTIALS and BAR EXAM TECHNIQUES

There are five parts to this book. Part I (Essentials) breaks down the bulky content of the MPEP 9th Edition into a simple and easy to remember format outlining the core U.S. patent law. I emphasize materials that frequently appear in officially published patent bar exams, and also AIA materials based on both MPEP and USPTO's frequently asked AIA questions. Each topic is itemized with bullet points accompanied by notes, examples and comparisons to enhance your learning experience. The MPEP chapters are not designed in a sequence conducive to learning. This book reorders them in a logical sequence starting with chapters 200, 600, 700, 2100, 800, 1200, 1400 and 1800. These are the key MPEP chapters for passing the patent bar exam. The remaining MPEP chapters mainly require memorization. Part II (Techniques) reveals techniques for passing the bar exam. Honing these techniques will save you time and avoid costly mistakes. As a few representative examples, techniques on Process of Elimination and Time Saving Tips on Exam Date will help you manage your exam time more efficiently; and techniques on Finding Key Words in Claim Drafting Questions will help you quickly discover if a dependent claim lacks antecedent basis, or is in the alternative way, or further limits the preceding claim, or is indefinite. Part III includes 50 curated questions from published bar exams focusing on all claims drafting issues. Claims are the most important part of the patent law. A considerable number of claim related questions appear in every patent bar exam, pre-AIA and post-AIA. Part IV includes 50 frequently asked AIA Q&A questions from the latest www.USPTO.gov. Intellectual Property Law in China

Kluwer Law International B.V. Intellectual property law and practice in China has changed dramatically since the first edition of this influential book published in 2005. Today, judicial and administrative application of law plays a major role, and accordingly this entirely rewritten new edition draws on an abundance of court and administrative decisions clarifying how the law is applied. In a thorough and systematic manner, the authors clearly demonstrate the sophisticated level of legal certainty available for domestic and foreign entities doing business in China, including the adaptation of the legal framework to new technologies, broadened scope of protected subject matter, improved quality of filings, and significant enhancement of enforcement not only with regard to remedies but also to procedural aspects. Providing comprehensive coverage of all aspects of intellectual property protection in China - including analysis of IP-related provisions of China's new Civil Code - the book emphasizes issues of concern to foreign traders and investors such as the following: copyright law and software protection; protection of trademarks, including Chinese character and Roman script trademarks, well-known marks and bad faith applications; technology transfer; enforcement of trade secret and patent protection; criminal liability for infringement; unfair competition and antitrust law; role of the binding interpretations of the Supreme People's Court; administrative regulations that supplement the laws; co-operation with administrative authorities; protection of geographical indications; protection of trade names; domain name dispute resolution; special patent-related laws protecting such areas as plant varieties, integrated circuit layout designs,; and relevant provisions of the distinct laws of Hong Kong and Macao. Full descriptions of the competencies of China's IP-related institutions are included with detailed attention to procedural matters. Brief historical notes in each chapter feature the most significant changes in each amendment of law and regulation. Because in China the laws are supplemented and interpreted by numerous guidelines and circulars issued by ministries or courts, the up-to-date knowledge and awareness provided in this new edition is essential for all companies investing in China or considering such investment, as well as for practitioners counselling their clients on strategies. In addition, officials and policymakers involved in trade or other relations with China will benefit from a comprehensive update of what the current law is and a critical view of what the challenges are.
