Policy Networks, Big Business, and Pedagogy Wars** Routledge **Math Education for America?** analyzes math education policy through the social network of individuals and private and public organizations that influence it in the United States. The effort to standardize a national mathematics curriculum for public schools in the U.S. culminated in 2010 when over 40 states adopted the Common Core State Standards for Mathematics. Rather than looking at the text of specific policy documents, this book complements existing critical reviews of the national math education curriculum by employing a unique social network analysis. **Breaking new ground in detailing and theorizing the politics of math education**, Wolfmeyer argues that the private interests of this network are closely tied to a web of interrelated developments: human capital education policy, debates over traditional and reform pedagogy, the assumed content knowledge deficit of math teachers, and the proliferation of profit-driven educational businesses. By establishing the interconnectedness of these interests with the national math education curriculum, he shows how the**

purported goals of math education reform are aligned with the prevailing political agendas of this social network rather than the national interest. **Why Do I Need a Teacher When I've got Google?** The essential guide to the big issues for every teacher Routledge **Why do I need a teacher when I've got Google?** is just one of the challenging, controversial and thought-provoking questions Ian Gilbert poses in this urgent and invigorating book. Creating Campus Cultures Fostering Success among Racially Diverse Student Populations Routledge Many colleges and universities have not engaged in the critical self-examination of their campuses necessary for effectively serving racially diverse student populations. This timely edited collection provides insights into how campus cultures can and do shape the experiences and outcomes of their increasingly diverse college student populations. By cultivating values, beliefs, and assumptions that focus on including, validating, and creating equitable outcomes among diverse undergraduate students, an institution can foster their success. While attention to campus climate is critical for gauging the nature of an institution's culture and how students are experiencing the campus environment, changes in climate alone will not lead to holistic and deep rooted institutional transformation. Moving beyond previous explorations of campus racial climates, Creating Campus Cultures addresses the considerable institutionally embedded obstacles practitioners face as they attempt to transform entrenched institutional cultures to meet the needs of diverse student bodies. A broad range of chapters include voices of students, new research, practical experiences, and application of frameworks that are conducive to success. This book will help student affairs and higher education administrators navigate this increasingly difficult terrain by providing practical advice on how to foster success among racial minority students and enact long-term, holistic change at any institution. **Soft Power and the Worldwide Promotion of Chinese Language Learning**

**The Confucius Institute Project**

**Multilingual Matters 'The Confucius Institute Project'** - consisting of Confucius Institutes and Classrooms, the posting of Chinese language teachers to overseas schools and universities and the Chinese Bridge language competition - represents an attempt by China to extend its influence globally through the use of soft power. Facilitated by a rapidly increasing demand for Chinese language learning, it has established a presence across the globe and made valuable contributions to the learning and teaching of Chinese. However, this has not necessarily led to an increasingly positive view of China, either at a political or a societal level. Through an analysis of official documents, interviews with those involved, a survey of Chinese-language learners and a study of academic and media sources, the author evaluates the aims of the project, and discusses whether these aims are being met.
