RADICAL PICASSO

THE USE VALUE OF GENIUS

Univ of California Press **"While the personality cult of Pablo Picasso still holds sway over his popular reputation, the force of his work has fallen into disuse. In this groundbreaking and ambitious study, C. F. B. Miller uses that force to undo and remake our understanding of the twentieth century's most legendary artist. By critiquing this legend and showing how, even now, the art itself disrupts received ideas, Radical Picasso rethinks Picasso's function in the history of modernism. Presenting a fresh account of cubism as an art of negativity and excess, Miller juxtaposes early cubist painting with G. W. F. Hegel, high cubism with Plato and his critics, and 'synthetic' cubism with Walter Benjamin. The 'guitar' assemblages of 1926 radicalize collage, taking up the racialized and gendered remainders of modernist aesthetics. Next to surrealism, Picasso's sexuality becomes a biopolitical problem, while the Crucifixion of 1930, and the Picasso myth at large, intersect with the writings of Georges Bataille. At the same time we see how, from his arrival in the art market to the games he played with his self-image in the 1950s, Picasso exploited the very fictions of genius that today determine his posthumous brand. Ultimately, in deconstructing the institution we call 'Picasso,' Radical Picasso retrieves his art from misrepresentation and argues for its continuing use value as a means of thought"--**

THE DARK SIDE OF GENIUS

THE MELANCHOLIC PERSONA IN ART, CA. 1500-1700

Penn State University Press "Examines 'melancholia' as a philosophical, medical, and social phenomenon in early modern art. Argues that, despite advances in art and science, the topos of the dispirited intellectual continues to function metaphorically as a locus for society's fears and tensions"--Provided by publisher.

BRITISH ROMANTICISM AND THE RECEPTION OF ITALIAN OLD MASTER ART, 1793-1840

Routledge As a result of Napoleon's campaigns in Italy, Old Master art flooded into Britain and its acquisition became an index of national prestige. Maureen McCue argues that their responses to these works informed the writing of Romantic period authors, enabling them to forge often surprising connections between Italian art, the imagination and the period's political, social and commercial realities. Dr McCue examines poetry, plays, novels, travel writing, exhibition catalogues, early guidebooks and private experiences recorded in letters and diaries by canonical and noncanonical authors, including Felicia Hemans, William Buchanan, Henry Sass, Pierce Egan, William Hazlitt, Percy

Shelley, Lord Byron, Anna Jameson, Maria Graham Callcott and Samuel Rogers. Her exploration of the idea of connoisseurship shows the ways in which a knowledge of Italian art became a key marker of cultural standing that was no longer limited to artists and aristocrats, while her chapter on the literary production of post-Waterloo Britain traces the development of a critical vocabulary equally applicable to the visual arts and literature. In offering cultural, historical and literary readings of the responses to Italian art by early nineteenth-century writers, Dr McCue illuminates the important role they played in shaping the themes that are central to our understanding of Romanticism.

GLOBALIZING CONTEMPORARY ART

THE ART WORLD'S NEW INTERNATIONALISM

Aarhus Universitetsforlag Today, contemporary art is a global phenomenon. Biennales, museums, art fairs, galleries, auction houses, academies and audiences for contemporary visual art are all institutions whose presence on a global scale has widened tremendously during the past two decades. Thus, by including contemporary art from non-Western regions, these traditional Western art institutions have not only broadened their scope to a greater extent, but have also been challenged themselves by the new cultural, economic and media world order of globalization. How contemporary art is made 'international' is the subject of this book, tracing as it does developments during the past two decades, while focusing particularly on the mechanisms of 'globality' which are at work in the art world today. The book critically investigates fundamental questions like: What is 'New Internationalism' in contemporary art, and how it affected the art world? How does New Internationalism relate to concepts like ethnicity, aesthetics, standard art

history, and new media? And how is New Internationalism, rather paradoxically, furthered to a greater extent by global capitalism than it is by seemingly progressive art projects?

HANDBOOK OF THE ECONOMICS OF ART AND CULTURE

Newnes This volume emphasizes the economic aspects of art and culture, a relatively new field that poses inherent problems for economics, with its quantitative concepts and tools. Building bridges across disciplines such as management, art history, art philosophy, sociology, and law, editors Victor Ginsburgh and David Throsby assemble chapters that yield new perspectives on the supply and demand for artistic services, the contribution of the arts sector to the economy, and the roles that public policies play. With its focus on culture rather than the arts, Ginsburgh and Throsby bring new clarity and definition to this rapidly growing area. Presents coherent summaries of major research in art and culture, a field that is inherently difficult to characterize with finance tools and concepts Offers a rigorous description that avoids common problems associated with art and culture scholarship Makes details about the economics of art and culture accessible to scholars in fields outside economics

INSIGHTS OF GENIUS

IMAGERY AND CREATIVITY IN SCIENCE AND ART

Springer Science & Business Media Here, distinguished science historian Arthur I. Miller delves into the connections between modern art and modern physics. He takes us on a wide-ranging study to demonstrate that scientists and artists have a common aim: a visual interpretation of both the visible and invisible aspects of nature. Along the way, we encounter the philosophy of mind and language, cognitive science and neurophysiology in our search for the origins and meaning of visual imagery. At a time when the media are overeager to portray science as a godless, dehumanising exercise undermining the very fabric of society, this sixth book by Professor Miller shows how scientists are struggling to understand nature, convince their peers, inform the public and deal with the reactions to their research. Thus, Insights of Genius must interest everyone who cares about science and its place in our culture.

OLD MASTERS AND YOUNG GENIUSES

THE TWO LIFE CYCLES OF ARTISTIC CREATIVITY

Princeton University Press **When in their lives do great artists produce their greatest art? Do they strive for creative perfection throughout decades of painstaking and frustrating experimentation, or do they achieve it confidently and decisively, through meticulous planning that yields masterpieces early in their lives? By examining the careers not only of great painters but also of important sculptors, poets, novelists, and movie directors, *Old Masters and Young Geniuses* offers a profound new understanding of artistic creativity. Using a wide range of evidence, David Galenson demonstrates that there are two fundamentally different approaches to innovation, and that each is associated with a distinct pattern of discovery over a lifetime. Experimental innovators work by trial and error, and arrive at their major contributions gradually, late in life. In contrast, conceptual innovators make sudden breakthroughs by formulating new ideas, usually at an early age. Galenson shows why such artists as Michelangelo, Rembrandt, Cézanne, Jackson Pollock, Virginia Woolf, Robert Frost, and Alfred Hitchcock were experimental old masters, and why Vermeer, van Gogh, Picasso, Herman Melville, James Joyce, Sylvia Plath, and Orson Welles were conceptual young geniuses. He also explains how this changes our understanding of art and its past. Experimental innovators seek, and conceptual innovators find. By illuminating the differences between them, this pioneering book provides vivid new insights into the mysterious processes of human creativity.**

ELECTRONIC ART

Elsevier Computers are more and more becoming creative tools in music as well as in the visual arts and design. In the last few years, it has become clear that digital technology provides a platform for multimedia productions as well as a medium for new art forms. Computer Music and Computer Graphics & Animation have their own international forums. The need was felt, however, to bring together the diverse disciplines within art and technology in one international event - the First International Symposium on Electronic Art (FISEA). The Symposium attracted considerable interest and hundreds of papers and proposals were submitted, of which a selection were accepted. This book, also published as a supplement to the journal *Leonardo*, publishes 20 of these selected papers under the editorship of Wim van der Plas, Ton Hokken and Johan den Biggelaar. This richly illustrated issue on Electronic Art reflects the enormous international interest which FISEA generated and will further stimulate interest in applications of new technology in music, visual arts and design.

INGENUITY IN THE MAKING

MATTER AND TECHNIQUE IN EARLY MODERN EUROPE

University of Pittsburgh Press **Ingenuity in the Making** explores the myriad ways in which ingenuity shaped the experience and conceptualization of materials and their manipulation in early modern Europe. Contributions range widely across the arts and sciences, examining objects and texts, professions and performances, concepts and practices. The book considers subjects such as spirited matter, the conceits of nature, and crafty devices, investigating the ways in which ingenuity acted in and upon the material world through skill and technique. Contributors ask how ingenuity informed the “maker’s knowledge” tradition, where the perilous borderline between the genius of invention and disingenuous fraud was drawn, charting the ambitions of material ingenuity in a rapidly globalizing world.

AESTHETICS AT LARGE - ART, ETHICS, POLITICS

Immanuel Kant's *Critique of Judgment*, Thierry de Duve argues in the first volume of *Aesthetics at Large*, is as relevant to the appreciation of art today as it was to the enjoyment of beautiful nature in 1790. Going against the grain of all

aesthetic theories situated in the Hegelian tradition, this provocative thesis, which already guided de Duve's groundbreaking book *Kant After Duchamp* (1996), is here pursued in order to demonstrate that far from confining aesthetics to a stifling formalism isolated from all worldly concerns, Kant's guidance urgently opens the understanding of art onto ethics and politics. Central to de Duve's re-reading of the *Critique of Judgment* is Kant's idea of *sensus communis*, ultimately interpreted as the mere yet necessary idea that human beings are capable of living in peace with one another. De Duve pushes Kant's skepticism to its limits by submitting the idea of *sensus communis* to various tests leading to questions such as: Do artists speak on behalf of all of us? Is art the transcendental ground of democracy? Or, Was Adorno right when he claimed that no poetry could be written after Auschwitz? Loaded with de Duve's trademark blend of wit and erudition and written without jargon, these essays radically renew current approaches to some of the most burning issues raised by modern and contemporary art. They are indispensable reading for anyone with a deep interest in art, art history, or philosophical aesthetics.

MODERN THEORIES OF ART

FROM WINCKELMANN TO BAUDELAIRE. 1

NYU Press

PAUL'S 'SPIRIT OF ADOPTION' IN ITS ROMAN IMPERIAL CONTEXT

Bloomsbury Publishing **Robert Lewis** examines Paul's use of the phrase "Spirit of Adoption" in Romans 8:12-17 against the background of its Roman Imperial context in order to shed light on interpretation of Paul's Letter to the Romans. Whereas other scholars have explored what Paul may have meant when he uses the term "adoption" Lewis instead explores the reasons behind Paul's coupling of it with the term "spirit". Having examined theories for a possible Jewish antecedent for Paul's use of this phrase, and found them less than persuasive, Lewis unlocks the data within the term's Roman Imperial context that significantly clarifies what Paul means when he uses the phrase "Spirit of adoption". Lewis shows that when Paul wrote his letter to the Romans, adoption had become a feature of Imperial succession. Roman religion gave a great deal of prominence to the Roman family spirit - the genius. The Emperor's genius became identified as a deity in Roman religion and its veneration was widespread in Rome as well as the provinces. When Romans 8.12-17 is read against this background, a very different kind of exegetical picture emerges.

ART IS NOT WHAT YOU THINK IT IS

John Wiley & Sons **Few** phenomena in our lives are as inescapable as what we commonly refer to as art--yet few concepts are more elusive than the idea of art itself. So what does 'art' look like "today"? And what is its fate? "Art Is Not What You Think It Is" offers a series of critical incursions into the current state of debate on the idea of art--making manifest what has been largely missing or unsaid in those discussions. Revealing how conventional thinking about art is largely based on misconceptions about its history, Preziosi and Farago call for a radical rethink of the subject and its relationship to a wide swath of today's world--from religion and philosophy to culture and politics. The authors probe a variety of issues, including the dangers of art and trap of the visual; the frame that blinds us; deconstruction of the agencies of art; the intersections of the local and global; the breach of art and religion, and commodifying artistry. Provocative and groundbreaking, "Art is Not What You Think It Is" will reshape conventional assumptions about the nature, meaning, and ultimate fate of art in today's world.

THE LABOUR OF LITERATURE IN BRITAIN AND FRANCE, 1830-1910

AUTHORIAL WORK ETHICS

Springer This volume examines the anxieties that caused many nineteenth-century writers to insist on literature as a laboured and labouring enterprise. Following Isaac D'Israeli's gloss on Jean de La Bruyère, it asks, in particular, whether writing should be 'called working'. Whereas previous studies have focused on national literatures in isolation, this volume demonstrates the two-way traffic between British and French conceptions of literary labour. It questions assumed areas of affinity and difference, beginning with the labour politics of the early nineteenth century and their common root in the French Revolution. It also scrutinises the received view of France as a source of a 'leisure ethic', and of British writers as either rejecting or self-consciously mimicking French models. Individual essays consider examples of how different writers approached their work, while also evoking a broader notion of 'work ethics', understood as a humane practice, whereby values, benefits, and responsibilities, are weighed up.

GODS IN THE TIME OF DEMOCRACY

Duke University Press In 2018 India's prime minister, Narendra Modi, inaugurated the world's tallest statue: a 597-foot figure of nationalist leader Sardar Patel. Twice the height of the Statue of Liberty, it is but one of many massive statues built following India's economic reforms of the 1990s. In *Gods in the Time of Democracy* Kajri Jain examines how monumental icons emerged as a religious and political form in contemporary India, mobilizing the concept of emergence toward a radical treatment of art historical objects as dynamic assemblages. Drawing on a decade of fieldwork at giant statue sites in India and its diaspora and interviews with sculptors, patrons, and visitors, Jain masterfully describes how public icons materialize the intersections between new image technologies, neospiritual

religious movements, Hindu nationalist politics, globalization, and Dalit-Bahujan verifications of equality and presence. Centering the ex-colony in rethinking key concepts of the image, Jain demonstrates how these new aesthetic forms entail a simultaneously religious and political retooling of the “infrastructures of the sensible.”

IMAGING DESIRE

MIT Press In the 1970s, Kelly's transgressive projects helped to instigate conceptual art's second phase; her daring critiques of the female body as a fetishized, allegorized, commodified site were debated long after they were first seen in galleries and discussed in catalogues, and long before the debut of the "bad girls" in the 1990s. In fact, the debates currently surrounding Kelly's work are a necessary and defining element of theoretical discourse about art today.

ART WORK

INVISIBLE LABOUR AND THE LEGACY OF YUGOSLAV SOCIALISM

University of Toronto Press In *Art Work*, Katja Praznik counters the Western understanding of art - as a passion for self-expression and an activity done out of love, without any concern for its financial aspects - and instead builds a case for understanding art as a form of invisible labour. Focusing on the experiences of art workers and the history of labour regulation in the arts in socialist Yugoslavia, Praznik helps elucidate the contradiction at the heart of artistic production and the origins of the mystification of art as labour. This profoundly interdisciplinary book highlights the Yugoslav socialist model of culture as the blueprint for uncovering the interconnected aesthetic and economic mechanisms at work in the exploitation of artistic labour. It also shows the historical trajectory of how policies toward art and artistic labour changed by the end of the 1980s. Calling for a fundamental rethinking of the assumptions

behind Western art and exploitative labour practices across the world, *Art Work* will be of interest to scholars in East European studies, art theory, and cultural policy, as well as to practicing artists.

TOO MARVELOUS FOR WORDS

THE LIFE AND GENIUS OF ART TATUM

Oxford University Press **Art Tatum defined the limits of the possible in jazz piano. Gunther Schuller called Tatum's playing "a marvel of perfection.... His deep-in-the-keys full piano sonority, the tone and touch control in pyrotechnical passages...are miracles of performance." Whitney Balliett wrote "no pianist has ever hit notes more beautifully. Each one--no matter how fast the tempo--was light and complete and resonant, like the letters on a finely printed page." His famous runs have been compared to the arc left against the night sky by a Fourth-of-July sparkler. And to have heard him play, one musician said, "was as awe-inspiring as to have seen the Grand Canyon or Halley's Comet." Now, in *Too Marvelous For Words*, James Lester provides the first full-length biography of the greatest virtuoso performer in the history of jazz. Before this volume, little was known about Tatum, even among jazz aficionados. What were his origins, who taught him and who provided early pianistic influences, how did he break into the jazz field, what role did he play in the development of other jazz players, and what was he like when he wasn't playing? To answer these questions, Lester has conducted almost a hundred interviews for this book, with surviving family, childhood friends, schoolteachers, and the famous jazz musicians who played with him or knew him. Lester creates a memorable portrait of this unique musician and of the vibrant jazz world of the 1930s and 1940s, capturing the complexity and vitality of this remarkable performer. Tatum, who was virtually blind, suffering between 70% and 90% visual impairment, emerges as cheerful, fun-loving, energetic and out-going, with none of the demonic self-destructiveness that seemed to haunt such jazz greats as Charlie Parker or Billie Holiday. He often joked about his blindness, but did not like it mentioned as a handicap and preferred to pre-plan his entrance to the piano in a club, rather than have someone lead him there. He was simply inexhaustible and had a life-long habit of staying up all night after a gig, usually seeking an after-hours club in which to listen and play until daybreak. Lester also reveals that Tatum was generous with younger players, but his extraordinary technical brilliance often devastated them. No less a talent than Oscar Peterson remembers that after first hearing Tatum, "I gave up the piano for two solid months, and I had crying fits at night." And Les Paul remarked that after hearing Tatum for the first time, he quit piano completely and began playing guitar. Perhaps most important, Lester provides a thorough, knowledgeable discussion of Tatum's music, from his early**

influences, such as stride pianist Fats Waller, to his mature style in which Liszt, Rachmaninoff, Debussy, Waller, and Earl Hines all became grist for his harmonic mill. From unexceptional origins in Toledo, Ohio, Art Tatum evolved into a world-class musician whose importance in jazz is comparable to Louis Armstrong and Charlie Parker and whose command of the piano captured the admiration of Horowitz and Paderewski. *Too Marvelous For Words* is the first full portrait of this extraordinary musical genius.

LIVING IN POSTERITY

ESSAYS IN HONOUR OF BART WESTERWEEL

Uitgeverij Verloren *Living in Posterity*, presented to Bart Westerweel on his retirement as Professor of Early Modern English literature at the University of Leiden, brings together thirty-nine essays on a wide variety of subjects and themes. The contributors, scholars from the Netherlands and abroad, have drawn inspiration from the many dualities that are characteristic of Westerweel's work, such as word/image, Anglo/Dutch, familiar/other, traditional/modern, and form/function. The result is a colourful mosaic of essays on history, culture, art and literature from the first century to the modern era. The binding theme of this richly diverse book lies in the idea of the continuity between the past and the present, the cohesion between what was and what is. As such, *Living in Posterity* is part of the larger project of the humanities to engage sympathetically with the past - to speak with the dead and keep history alive.

PHILOSOPHERS ON ART FROM KANT TO THE POSTMODERNISTS

A CRITICAL READER

Columbia University Press Here, for the first time, Christopher Kul-Want brings together twenty-five texts on art written by twenty philosophers. Covering the Enlightenment to postmodernism, these essays draw on Continental philosophy and aesthetics, the Marxist intellectual tradition, and psychoanalytic theory, and each is accompanied by an overview and interpretation. The volume features Martin Heidegger on Van Gogh's shoes and the meaning of the Greek temple; Georges Bataille on Salvador Dalí's *The Lugubrious Game*; Theodor W. Adorno on capitalism and collage; Walter Benjamin and Roland Barthes on the uncanny nature of photography; Sigmund Freud on Leonardo Da Vinci and his interpreters; Jacques Lacan and Julia Kristeva on the paintings of Holbein; Freud's postmodern critic, Gilles Deleuze on the visceral paintings of Francis Bacon; and Giorgio Agamben on the twin traditions of the Duchampian ready-made

and Pop Art. Kul-Want elucidates these texts with essays on aesthetics, from Hegel and Nietzsche to Badiou and Rancière, demonstrating how philosophy adopted a new orientation toward aesthetic experience and subjectivity in the wake of Kant's powerful legacy.

DIMENSIONS OF ORIGINALITY

ESSAYS ON SEVENTEENTHCENTURY CHINESE ART THEORY AND CRITICISM

The Chinese University of Hong Kong Press This book investigates the issue of conceptual originality in art criticism of the seventeenth century, a period in which China dynamically reinvented itself. In art criticism, the term which was called upon to indicate conceptual originality more than any other was "qi", literally, "different"; but secondarily, "odd," like a number and by extension, "the novel," and "extraordinary." This work finds that originality, expressed through visual difference, was a paradigmatic concern of both artists and critics. Burnett speculates on why many have dismissed originality as a possible "traditional Chinese" value, and the ramifications this has had on art historical understanding. She further demonstrates that a study of individual key terms can reveal social and cultural values and provides a linear history of the increase in critical use of "qi" as "originality" from the fifth through the seventeenth centuries, exploring what originality looks like in artworks by members of the gentry elite and commoner classes, and explains how the value lost its luster at the end of the seventeenth century.

SUDDEN GENIUS?

THE GRADUAL PATH TO CREATIVE BREAKTHROUGHS

OUP Oxford The highly admired scientist Linus Pauling, a double Nobel laureate in chemistry and peace, was once asked by a student. 'Dr Pauling, how do you have so many good ideas?' Pauling thought for a moment and replied: 'Well,

David, I have a lot of ideas and throw away the bad ones.' Where do ideas come from? Why do some people have many more of them than others? How do you distinguish the good ideas from the bad? Most intriguing of all, perhaps, why do the best ideas sometimes strike in a flash of 'sudden genius'? These questions are the subject of this book. Andrew Robinson explores the exceptional creativity in both scientists and artists by following the trail that led ten individuals from childhood to the achievement of a famous creative breakthrough as an adult, in archaeology, architecture, art, biology, chemistry, cinema, music, literature, photography, and physics. Broken into three parts, the book begins with the scientific study of creativity, covering talent, genius, intelligence, memory, dreams, the unconscious, savant syndrome, synaesthesia, and mental illness. The second part tells the stories of five breakthroughs by scientists and five by artists, ranging from Curie's discovery of radium and Einstein's theory of special relativity to Mozart's composing of *The Marriage of Figaro* and Virginia Woolf's writing of *Mrs Dalloway*. Robinson concludes by considering what highly creative people who achieve breakthroughs have in common; whether breakthroughs in science and art follow patterns; and whether they always involve imaginative leaps and even 'genius'.

ABRAMS The definitive anthology of the pioneering cartoonist and creator of Mad magazine, featuring 100s of classic and never-before-seen illustrations. Harvey Kurtzman was an astonishingly talented and influential artist, writer, editor, and satirist. The creator of MAD and Playboy's "Little Annie Fanny" was called, "One of the most important figures in postwar America" by the New York Times. Kurtzman's groundbreaking "realistic" war comics of the early '50s and various satirical publications (MAD, Trump, Humbug, and Help!) had an immense impact on popular culture, inspiring a generation of underground cartoonists and comedians.
