This volume features essays that present a new approach to image theory. It explores the many ways images become active in architecture and engineering design processes and how, in the age of computer-based modeling, images play an indispensable role. The contributors examine different types of images, be they pictures, sketches, renderings, maps, plans, and photographs; be they analog or digital, planar or three-dimensional, ephemeral, realistic or imaginary. Their essays investigate how images serve as means of representing, as tools for thinking and reasoning, as ways of imagining the inexistent, as means of communicating and conveying information and how images may also perform functions and have an agency in their own. The essays discuss the role of images from the perspective of philosophy, theory and history of architecture, history of science, media theory, cognitive sciences, design studies, and visual studies, offering a multidisciplinary approach to imagery and showing the various methodologies and interpretations in current research. In addition, they offer valuable insight to better understand how images operate and function in the arts and sciences in general. **The Writer's Compass** From Story Map to Finished Draft in 7 Stages Penguin Map out your idea and finish your story in 7 stages! This book will show writers how to develop their ideas into a finished novel by working through it in 7 stages, while learning how to mapping out their story's progress and structure so they can evaluate and improve their work. It teaches writers to visualize their story's progress with a story map that helps them see all the different components of their story, where these components are going, and, perhaps most importantly, what's missing. The book simplifies Aristotle's elements of good writing (a.k.a. that each story should have a beginning, a middle and an end) into easily applicable concepts that will help writers improve their craft. The author helps readers strengthen their work by teaching them how to focus on one aspect of their story at a time, including forming stories and developing ideas, building strong structures, creating vibrant characters, and structuring scenes and transitions. Thought-provoking questions help writers more objectively assess their story's strengths and weaknesses so they may write the story they want to tell. **Design Thinking** A Guide to Creative Problem Solving for Everyone Routledge Design thinking is a powerful process that facilitates understanding and framing of problems, enables creative solutions, and may provide fresh perspectives on our physical and social landscapes. Not just for architects or product developers, design thinking can be applied across many disciplines to solve real-world problems and reconcile dilemmas. It is a tool that may trigger inspiration and the imagination, and lead to innovative ideas that are responsive to the needs and issues of stakeholders. Design Thinking: A Guide to Creative Problem Solving for Everyone will assist in addressing a full spectrum of challenges from the most vexing to the everyday. It renders accessible the creative problem-solving abilities that we all possess by providing a dynamic framework and practical tools for thinking imaginatively and critically. Every aspect of design thinking is explained and analyzed together with insights on navigating through the process. Application of design thinking to help solve myriad problems that are not typically associated with design is illuminated through vignettes drawn from such diverse realms as politics and society, business, health and science, law, and writing. A combination of theory and application makes this volume immediately useful and personally relevant. **Thinking with Type** A Critical Guide for Designers, Writers, Editors, & Students Chronicle Books Our all-time best selling book is now available in a revised and expanded second edition. Thinking with Type is the definitive guide to using typography in visual communication, from the printed page to the computer screen. This revised edition includes forty-eight pages of new content, including the latest information on style sheets for print and the web, the use of ornaments and captions, lining and non-lining numerals, the use of small caps and enlarged capitals, as well as information on captions, font licensing, mixing typefaces, and hand lettering. Throughout the book, visual examples show how to be inventive within systems of typographic form--

what the rules are and how to break them. Thinking with Type is a type book for everyone: designers, writers, editors, students, and anyone else who works with words. The popular companion website to Thinking with Type (www.thinkingwithtype.com.) has been revised to reflect the new material in this second edition. Ways to Study and Research Urban, Architectural and Technical Design IOS Press How can we develop a scientific basis for architectural, urban and technical design? When can a design be labelled as scientific output, comparable with a scientific report? What are the similarities and dis-similarities between design and empirical research, and between design research, typological research, design study and study by design? Is there a need for a particular methodology for design driven study and research? With these questions in mind, more than forty members of the Faculty of Architecture of the Delft University of Technology have described their ways of study and research. Each chapter shows the objectives, the methodology and its implementation in search for a deeper knowledge of design processes and an optimal quality of the design itself. The authors - among them architects, urban planners, social scientists, lawyers, technicians and information scientists – have widely differing backgrounds. Nevertheless, they share a great deal. The central focus is a better understanding of design processes, design tools and the effects of design interventions on issues such as utility, aesthetics meaning, sustainability and feasibility. All New Built-Ins Idea Book Closets*Mudrooms*Cabinets*Pantries Taunton Press The completely revised "All New Built-Ins Idea Book" showcases a wide range of built-in and storage possibilities. Grounded Innovation Strategies for Creating Digital Products Elsevier Grounded Innovation: Strategies for Creating Digital Products focuses on the innovation processes and technical properties of digital products. Drawing on case studies, the book looks at systematic ways to ground innovation in both technology and human needs, and it explores how digital products have become integrated in the real world. It provides guidelines to innovation in a new technical environment, including prototyping and testing, within the cultural or financial parameters of a business. The book is divided into two parts. Part 1 discusses the history and the basic properties of digital products; the different approaches to innovation; the concept of grounded innovation; and concepts and processes that are important for creating successful innovations such as inquiry, invention, and prototyping. Part 2 demonstrates how the basic properties of digital products can be used as raw material for new innovations, including interaction, networking, sensing, and proactivity. There is also a discussion on recent technology, such as rapid prototyping and mobile mash-ups. A wide variety of examples show how novel technical and conceptual innovations became commercial breakthroughs. Grounded Innovation is ideal for product designers, interaction designers, and design-oriented engineers. It will also be a valuable resource for anyone interested in understanding how digital products are created and in a general approach to information technology. Wide variety of examples show how novel technical and conceptual innovations became commercial breakthroughs Provides guidelines to innovation in a new technical environment including prototyping and testing Discusses how to innovate within the cultural or financial parameters of a business Assistive Technologies- E-Book Principles and Practice Elsevier Health Sciences It's here: the latest edition of the one text you need to master assistive strategies, make confident clinical decisions, and help improve the quality of life for people with disabilities. Based on the Human Activity Assistive Technology (HAAT) model, Assistive Technologies: Principles and Practice, 4th Edition provides detailed coverage of the broad range of devices, services, and practices that comprise assistive technology, and focuses on the relationship between the human user and the assisted activity within specific contexts. Updated and expanded, this new edition features coverage of new ethical issues, more explicit applications of the HAAT model, and a variety of global issues highlighting technology applications and service delivery in developing countries. Human Activity Assistive Technology (HAAT) framework demonstrates assistive technology within common, everyday contexts for more relevant application. Photogenic Montreal Activisms and Archives in a Post-industrial City McGill-Queen's Press - MQUP The agency of photographs is a recurrent concern within the context of the city. Whether found in architectural records, social documentary, photojournalism, or artistic practice, photographic objects are embedded in urban contestation, aesthetically charged by artists, reinserted into social histories, and mobilized to imagine a future city. Photogenic Montreal takes a question initially posed by heritage debates – what does photography preserve? – and creates a rich conversation about the agency of the human actors before and behind the camera, and of the medium itself. The interplay of archives and activisms structures the book. Photographs that appear to be sealed off in newspapers, storage rooms, or archives accrue new meaning when they cross the threshold back into social spaces and circulate anew. It is through the reactivation of archival photographs that submerged traces of urban experience are discovered, and alternate histories of Montreal can be recounted. Multiple forms of activism and artistic expression complement this archival work. Beginning in the 1960s, community-minded and heritage groups responded to the tensions arising from urban reconstruction, gentrification, and the erasure of neighbourhoods; this activism also left its photographic traces. Attentive to the still-changing face of the city's architecture, neighbourhoods, and street life, Photogenic Montreal participates in debates about who the city belongs to, who speaks on its behalf, and how to picture its past and present. No prior expertise in design psychology required! *Winner, 2019 Gold Medal Award, Nonfiction Authors Association Constructing Global Order Agency and Change in World Politics Cambridge University Press For a long time, international relations scholars have adopted a narrow view of what is global order, who are its makers and managers, and what means they employ to realize their goals. Amitav Acharya argues that the nature and scope of agency in the global order - who creates it and how - needs to be redefined and broadened. Order is built not by material power alone, but also by ideas and norms. While the West designed the post-war order, the non-Western countries were not passive. They contested and redefined Western ideas and norms, and contributed new ones of their own making. This book examines such acts of agency, especially the redefinitions of sovereignty and security, shaping contemporary world politics. With the decline of Western dominance, ideas and agency from the Rest may make it possible to imagine and build a truly global order. Blurring the Boundaries Through Digital Innovation Individual, Organizational, and Societal Challenges Springer This book examines the impact of digital innovation on organizations. It reveals how the digital revolution is redefining traditional levels of analysis while at the same time blurring the internal and external boundaries of the organizational environment. It presents a collection of research papers that examine the interaction between Information and Communication Technology (ICT) and behavior from a threefold perspective: First, they analyze individual behavior in terms of specific organizational practices like learning, collaboration and knowledge transfer, as well as the use of ICT within the organization. Second, they explore the dynamics at work on the border between the internal and the external environments by analyzing the organizational impact of ICT usage outside the company, as can be seen in employer branding, consumer behavior and organizational image. Third, they investigate how ICT is being adopted to help face societal challenges outside the company like waste and pollution, smart cities, and e-government. The diversity of views offered makes this book particularly relevant for users, companies, scientists and governments. The content is based on a selection of the best papers – original double-blind peer reviewed contributions –presented at the annual conference of the Italian chapter of AIS, which took place in Rome, Italy, in October 2015, or in other reputable international peer-refereed Information Systems conferences.
