How to Restore Classic Largeframe Vespa Scooters

Rotary Valve 2-Stroke 1959 to 2008

Veloce Publishing Ltd The 2-stroke Vespa is a style icon - an undoubted classic, and an immediately recognized symbol of its native Italy. Demand for these stylish scooters is booming, and interest in restoring and renovating them is at an all-time high. With its clear and concise text aided by extensively captioned full color photographs, this practical book guides the DIY enthusiast through all the stages of restoring a classic 2-stroke Vespa, taking it from a rusty unroadworthy wreck back to its factory fresh, former glory. It shows how to assess wear in all mechanical components, then assists in deciding the best and most cost effective method to renovate or repair. Both large and small frame power units are covered in detail, giving the reader confidence to carry out their own repairs to a high standard, which is both satisfying and cost effective. Brakes, suspension, electrical systems and brightwork are all addressed, from changing a bulb to welding in a new floor pan. An essential reference for all Vespa enthusiasts.

Noninferiority Testing in Clinical Trials Issues and Challenges

CRC Press *Take Your NI Trial to the Next Level* Reflecting the vast research on noninferiority (NI) designs from the past 15 years, *Noninferiority Testing in Clinical Trials: Issues and Challenges* explains how to choose the NI margin as a small fraction of the therapeutic effect of the active control in a clinical trial. Requiring no prior knowledge of NI testing, the book is easily accessible to both statisticians and nonstatisticians involved in drug development. With over 20 years of experience in this area, the author introduces the basic elements of the NI trials one at a time in a logical order. He discusses issues with estimating the effect size based on historical placebo control trials of the active control. The book covers fundamental concepts related to NI trials, such as assay sensitivity, constancy assumption, discounting, and preservation. It also describes patient populations, three-arm trials, and the equivalence of three or more groups.

Global Business Strategy

Multinational Corporations Venturing into Emerging Markets

Springer This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. The case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

A Text for Africa

Fundamentals of Aircraft and Rocket Propulsion

Springer This book provides a comprehensive basics-to-advanced course in an aero-thermal science vital to the design of engines for either type of craft. The text classifies engines powering aircraft and single/multi-stage rockets, and derives performance parameters for both from basic aerodynamics and thermodynamics laws. Each type of engine is analyzed for optimum performance goals, and mission-appropriate engines selection is explained. Fundamentals of Aircraft and Rocket Propulsion provides information about and analyses of: thermodynamic cycles of shaft engines

(piston, turboprop, turboshaft and propfan); jet engines (pulsejet, pulse detonation engine, ramjet, scramjet, turbojet and turbofan); chemical and non-chemical rocket engines; conceptual design of modular rocket engines (combustor, nozzle and turbopumps); and conceptual design of different modules of aero-engines in their design and off-design state. Aimed at graduate and final-year undergraduate students, this textbook provides a thorough grounding in the history and classification of both aircraft and rocket engines, important design features of all the engines detailed, and particular consideration of special aircraft such as unmanned aerial and short/vertical takeoff and landing aircraft. End-of-chapter exercises make this a valuable student resource, and the provision of a downloadable solutions manual will be of further benefit for course instructors.

WHO Recommendations on Intrapartum Care for a Positive Childbirth Experience

World Health Organization This up-to-date, comprehensive and consolidated guideline on essential intrapartum care brings together new and existing WHO recommendations that, when delivered as a package, will ensure good-quality and evidence-based care irrespective of the setting or level of health care. The recommendations presented in this guideline are neither country nor region specific and acknowledge the variations that exist globally as to the level of available health services within and between countries. The guideline highlights the importance of woman-centered care to optimize the experience of labor and childbirth for women and their babies through a holistic, human rights-based approach. It introduces a global model of intrapartum care, which takes into account the complexity and diverse nature of prevailing models of care and contemporary practice. The recommendations in this guideline are intended to inform the development of relevant national- and local-level health policies and clinical protocols. Therefore, the target audience includes national and local public health policy-makers, implementers and managers of maternal and child health programs, health care facility managers, nongovernmental organizations (NGOs), professional societies involved in the planning and management of maternal and child health services, health care professionals (including nurses, midwives, general medical practitioners and obstetricians) and academic staff involved in training health care professionals.

New Technique of No Mesh Inguinal Hernia Repair

Desarda Repair

Desarda Repair is a mesh free, tension free pure tissue repair based on physiological principle. It gives a complete understanding of new concepts of basic aetiopathology of inguinal hernia and its operation technique based on those new concepts. The book will give you complete idea about the cause of hernia, new concepts, operation technique in detail as well as in short, its complications, recurrences, pain and how to treat them and much more for under graduates, post graduates, consultants and also the non medical general public. Be careful about mesh used in hernia surgery. It is a simple piece of synthetic cloth !!!NEWS IN TIMES OF INDIA Pune surgeon's hernia work lauded at world conference, T NN | Ma y 2 2 , 2 0 1 5 , 0 6 . 2 7 PM IS T PUNE: City-based senior surgeon and hernia expert Mohan

Desarda was invited faculty and guest speaker at the first World Hernia Conference which was held at Milan in Italy last month. The invited experts demonstrate their work to surgeons from all over the world so that they can carry this knowledge to their country for the benefit of society at large," said Desarda who has done basic invention in the hernia disease. Desarda challenged the old concepts that cough or weight lifting causes hernia and established that hernia occurs only because of a defect in the muscle. Desarda also developed a new operation technique of muscle transfer to close this defect. The technique is now included in the medical text books of international repute. "In traditional operations done today, surgeons stitch a mesh by open or laproscopic surgery. Mesh being a foreign body has many inherent disadvantages and complications. And these complications are much more serious in laparoscopic surgery because mesh is stitched inside the abdomen. Desarda did not register patent of this technique so that any surgeon can use this freely for the benefit of their patients. Patient can bend, squat, climb up the staircase, carry luggage and travel or go to office within couple of days after surgery. Please circulate this message to your friends and groups in the interest of general public. I have no personal interest involved in this.
