Criteria Of Certainty

Truth and Judgment in the English Enlightenment

University Press of Kentucky **British writers of the Restoration and eighteenth century initiated a critique of human knowledge unrivaled in both its scope and its enthusiasm. Author Kevin L. Cope now attempts to provide a coherent, evocative account of explanatory rhetoric in early modern Britain. Critics and historians, Cope argues, have done an admirable job of describing the details of the intellectual movements of this period but they have failed to examine the intellectual, social, and psychological implications of explanation itself. Criteria of Certainty makes up for this shortcoming by treating explanation as a composite literary and philosophical mode, as a kind of "master genre" governing the development of a variety of genres, from pithy maxims and lyric poems to lengthy treatises and epics of explanation. Cope's probing and inventive analyses of seven writers—Rochester, Halifax, Dryden, Locke, Swift, Pope, and Smith—shed new light on many major issues in both eighteenth-century studies and critical theory. Discussing the gradual enlargement of the claims of explanatory discourse, Cope explores the problematic psychological relation between "philosophizing" authors and their expansionist, systematizing discourse. By applying the methods of recent literary criticism to philosophical texts, Cope reexamines the possibility of a philosophical reading of literary texts, opens the possibility of "characterizing" an age, and sets a variety of genres on a common intellectual foundation. Drawing on both "canonical" and overlooked authors, he also shows how the writers of the Restoration and eighteenth century may help us to understand the immensity, vitality, and irresistibility of explanatory rhetoric in our own age.**

The Revised Fundamentals of Caregiving

A Novel

Algonquin Books In The Revised Fundamentals of Caregiving (releasing June 24, 2016 as a Netflix Original Film titled The Fundamentals of Caring, starring Paul Rudd and Selena Gomez), Jonathan Evison, author of the new novel This Is Your Life, Harriet Chance! and the New York Times bestseller West of Here, has crafted a novel of the heart, a story of unlikely heroes in a grand American landscape. For Ben Benjamin, all has been lost--his wife, his family, his home, his livelihood. Hoping to find a new direction, he enrolls in a night class called The Fundamentals of Caregiving, where he will learn to take care of people with disabilities. He is instructed about professionalism, about how to keep an emotional distance between client and provider, and about the art of inserting catheters while avoiding liability. But when Ben is assigned his first client--a tyrannical nineteen-year-old boy named Trevor, who is in the advanced stages of Duchenne muscular dystrophy--he soon discovers that the endless service checklists have done nothing to prepare him for the reality of caring for a fiercely stubborn, sexually frustrated teenager who has an ax to grind with the whole world. Over time, the relationship between Ben and Trev, which had begun with mutual misgivings, evolves into a close friendship, and the traditional boundaries between patient and caregiver begin to blur. The bond between them strengthens as they embark on a road trip to visit Trev's ailing father--a journey rerouted by a series of bizarre roadside attractions that propel them into an impulsive adventure disrupted by one birth, two arrests, a freakish dust storm, and a six-hundred-mile cat-and-mouse pursuit by a mysterious brown Buick Skylark. By the end of that journey, Trev has had his first taste of love, and Ben has found a new reason to love life. Bursting with energy and filled with moments of absolute beauty, this big-hearted and inspired novel ponders life's terrible surprises as well as what it takes to truly care for another human being.

Castles of Steel

Britain, Germany, and the Winning of the Great War at Sea

Random House In a work of extraordinary narrative power, filled with brilliant personalities and vivid scenes of dramatic action, Robert K. Massie, the Pulitzer Prize-winning author of *Peter the Great*, *Nicholas and Alexandra*, and *Dreadnought*, elevates to its proper historical importance the role of sea power in the winning of the Great War. The predominant image of this first world war is of mud and trenches, barbed wire, machine guns, poison gas, and slaughter. A generation of European manhood was massacred, and a wound was inflicted on European civilization that required the remainder of the twentieth century to heal. But with all its sacrifice, trench warfare did not win the war for one side or lose it for the other. Over the course of four years, the lines on the Western Front moved scarcely at all; attempts to break through led only to the lengthening of the already unbearably long casualty lists. For the true story of military upheaval, we must look to the sea. On the eve of the war in August 1914, Great Britain and Germany possessed the two greatest navies the world had ever seen. When war came, these two fleets of dreadnoughts—gigantic floating castles of steel able to hurl massive shells at an enemy miles away—were ready to test their terrible power against each other. Their struggles took place in the North Sea and the Pacific, at the Falkland Islands and the Dardanelles. They reached their climax when Germany, suffocated by an implacable naval blockade, decided to strike against the British ring of steel. The result was Jutland, a titanic clash of fifty-eight dreadnoughts, each the home of a thousand men. When the German High Seas Fleet retreated, the kaiser unleashed unrestricted U-boat warfare, which, in its indiscriminate violence, brought a reluctant America into the war. In this way, the German effort to “seize the trident” by defeating the British navy led to the fall of the German empire. Ultimately, the distinguishing feature of *Castles of Steel* is the author himself. The knowledge, understanding, and literary power Massie brings to this story are unparalleled. His portrayals of Winston Churchill, the British admirals Fisher, Jellicoe, and Beatty, and the Germans Scheer, Hipper, and Tirpitz are stunning in their veracity and artistry. *Castles of Steel* is about war at sea, leadership and command, courage, genius, and folly. All these elements are given magnificent scope by Robert K. Massie's special and widely hailed literary mastery. **BONUS:** This edition contains an excerpt from Robert K. Massie's *Catherine the Great*.
