OUTCOMES AND COMPETENCIES FOR GRADUATES OF PRACTICAL/VOCATIONAL, DIPLOMA, ASSOCIATE DEGREE, BACCALAUREATE, MASTER'S, PRACTICE DOCTORATE, AND RESEARCH DOCTORATE PROGRAMS IN NURSING

National League for Nursing Press Outcomes and Competencies for Graduates of Practical/Vocational, Diploma, Associate Degree, Baccalaureate, Master's, Practice Doctorate, and Research Doctorate Programs in Nursing, is a first-of-its-kind report by the NLN Education Competency Work Group, which collaborated over a two-year period to evaluate how best to prepare graduates of nursing programs across the academic spectrum to function in an evolving, dynamic health care environment. This document lays the foundation for ensuring that all United States nursing programs can expand and develop while maintaining the highest standards of quality and excellence. Nurse educators examined program outcomes and competencies across all types of programs -- rather than looking at each program type in isolation from others, as has been the case. Such a wide-ranging, inclusive approach serves to clarify concepts that cut across all program types while clarifying the unique focus of each program type in relation to each concept. The group from education and practice, therefore, reviewed existing literature, work previously completed by NLN advisory councils and task groups, and emerging national concerns and initiatives to formulate outcomes and competencies. They vetted these with the nursing education community and finalized a set of outcomes and competencies that address all program types. The result is a comprehensive document that is both contemporary and futuristic and fills a gap in the existing body of scholarly research. It helps nurse educators to build curricula, further the science of nursing education, and explore and refine teaching, learning and evaluation.

PEA IN A POD, THIRD EDITION

YOUR COMPLETE GUIDE TO PREGNANCY, CHILDBIRTH & BEYOND

Square One Publishers, Inc. *Pregnancy and childbirth are not what they used to be. Fifty years ago, mothers-to-be visited their obstetricians once a month, did exactly what they were told, and gave birth to their babies while heavily sedated or anesthetized. Their husbands, who most likely had never even once accompanied them to the doctor, paced nervously in the waiting room, barred from the inner sanctum of the labor and delivery rooms. Today, some expectant parents still stand on the sidelines. But more choose to be active players. If you want to be a participant, not a spectator, in the birth of your baby, Pea in a Pod, Third Edition is your playbook. The labor and birth options available to modern parents-to-be are numerous, and Pea in a Pod covers them all. Taking you from your first day of pregnancy through your child's first year, it presents everything from relaxation exercises to practice during pregnancy, to birth positions and breathing techniques—a treasure-trove of information designed to make your labor and delivery easier. This comprehensive guide offers a month-by-month breakdown of the physical changes to expect during pregnancy; describes the emotional aspects of pregnancy; and discusses the do's and don'ts of sex during and after pregnancy. It also provides a nutrition plan for the pregnant woman; exercise plans for the mother-to-be, new mother, and cesarean mother; and a wealth of hints for the father-to-be, labor partner, and new father. In addition, the basics of infant care and an in-depth discussion of breastfeeding are included. The third edition of this bestseller—with over a half-million copies sold—reflects the most up-to-date information on nutrition, prenatal testing, labor and delivery options, infant care, and more. Over 200 photographs and illustrations summarize and highlight the text, while witty cartoons offer humorous insights into parenthood and serve as welcome proof that you're not alone in your fears and frustrations.
