Crosslinguistic Encounters in Language Acquisition Typical and Atypical Development Multilingual Matters This book presents diverse, original research studies on typical and atypical child language acquisition in monolingual, bilingual and bi-dialectal settings, with a focus on development, assessment and research methodology. Languages investigated in the studies

include underrepresented languages, such as Farsi, Greek, Icelandic, isiXhosa, Maltese, Mandarin and Slovene, without excluding representative work in major languages like English and Spanish. The language areas of focus are phonology, lexicon, morphology and syntax and the book incorporates studies in under-researched language impairment, such as Obstructive Sleep Apnea Syndrome and language impairment in 22q11.2 Deletion Syndrome. The book has practical significance in that it proposes tools and assessment practices that are of universal crosslinguistic relevance while also dealing with language-specific complications. The studies presented enhance existing knowledge and stimulate answers on what the acquisition of disparate languages in different contexts can teach us about language/communication development in the presence or absence of disorder. Is That a Fact? Frauds, Quacks, and the Real Science of Everyday Life ECW Press The bestselling "quackbuster" and "tireless tub-thumper against pseudoscience" fishes for the facts in a flood of misinformation (Maclean's). Eat this and live to 100. Don't, and die. Today, hyperboles dominate the media, which makes parsing science from fiction an arduous task when deciding what to eat, what chemicals to avoid, and what's best for the environment. In Is That a Fact?, bestselling author Dr. Joe Schwarcz carefully navigates through the storm of misinformation to help us separate fact from folly and shrewdness from foolishness. Are GMOs really harmful? Or could they help developing countries? Which "miracle weight-loss foods" gained popularity through exuberant data dredging? Is BPA dangerous or just a victim of unforgiving media hype? Is organic better? Schwarcz questions the reliability and motives of "experts" in this "easy-to-understand yet critical look at what's fact and what's plain nonsense. "Takes its readers through the carnival of pseudoscience, the morass of half-truths and, finally, the relatively safe road of reproducible scientific knowledge. This journey is made all the more enjoyable by Dr. Schwarcz's surgical use of words and his mastery of public writing . . . [He] can always be counted on to write about the chemistry of the world in a way that is both entertaining and educational." —Cracked Science "Written with a light touch and refreshing humor, this book provides a solid, authoritative starting point for anyone beginning to look at the world with a skeptical eye and a refresher for those further along that path." —Library Journal Splat the Cat and the Duck with No Quack Harper Collins A duck with no quack? Who has ever heard of that? Certainly not Splat—and he decides to investigate. Beginning readers will love the zany wordplay in this Splat book! Want Me A Sex Writer's Journey into the Heart of Desire Penguin A NEW YORK TIMES "NEW & NOTEWORTHY" BOOK | A BUSTLE "MOST ANTICIPATED BOOK OF 2021" | ONE OF PUREWOW'S "BOOKS WE CAN'T WAIT TO READ IN FEBRUARY" | VANITY FAIR'S "THE BEST BOOKS TO BUY THIS VALENTINE'S DAY" "Want Me is complicated, fun, shocking, and heart-warming all at once." —Jessica Valenti, New York Times bestselling author of Sex Object "Intimate, challenging, and so very smart. Want Me is a gift." —Rebecca Traister, New York Times bestselling author of Good and Mad Tracy Clark-Flory grew up wedged between fizzy declarations of "girl power" and the sexualized mandates of pop culture. It was "broken glass ceilings" and Girls Gone Wild infomercials. With a vague aim toward sexual empowerment, she set out to become what men wanted--or, at least, understand it. In her moving, fresh, and darkly humorous memoir, she shares the thrilling and heartbreaking events that led to discovering conflicting truths about her own desire, first as a woman coming of age and then as a veteran journalist covering the sex beat. Tracing her experiences on adult film sets, at fetish conventions, and during an orgasmic meditation retreat (to name just a few), Clark-Flory weaves in statistics and expert voices to reckon with our views on sexual freedom. Want Me is about looking for love, sex, and power as a woman in a culture that is "freer" than ever, yet defined by unprecedented pressures and enduring constraints. This is a first-hand example of one woman who navigated the mixed messages of sexual expectation, only to discover the complexity of her own wants and our collective need to change the limitations of that journey. Strengthening Forensic Science in the United States A Path Forward National Academies Press Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that

change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Fraud A Carter Ross Mystery Minotaur Books In *The Fraud*, the most thrilling entry yet in Brad Parks's award-winning series, investigative reporter Carter Ross must chose who gets to live: him or his unborn child. A rash of carjackings terrorizing Newark become newsworthy when one such theft ends in the murder of a wealthy banking executive. The affable, wisecracking Ross is assigned the story, but he's weary of only writing about victims of crime who happen to be rich and white. To balance his reporting, he finds a Nigerian immigrant of more modest means who was also killed during a recent carjacking. When it turns out the two victims knew each other, sharing an unexplained round of golf at a tony country club shortly before their deaths, Carter is plunged onto the trail of a deadly band of car thieves that includes a sociopathic ex-convict. When his unborn child is put in harm's way, it becomes more than just a story for Carter. And he'll stop at nothing to rescue the baby—even if it costs him his own life. Parks, a rising star on the crime fiction scene known for his mix of wit and grit, delivers his most emotionally resonant book yet.
