Jossey-Bass This volume provides an updated examination of student tracking systems. It illustrates how policymakers, administrators, and institutional researchers are using data to follow student paths through postsecondary education and to measure student success. Chapters discuss: Using Transcripts in Analyses: Directions and Opportunities Retention Tracking Using Institutional Data Using Student Tracking Data from an Institutional Perspective A Statewide Student Unit Record System: Florida as a Case Study The National Student Clearinghouse: The Largest Current Student Tracking Database Tracking Low-Skill Adult Students Longitudinally Using Research to Guide Policy and Practice Using State Student Unit Record Data to Increase Community College Student Success Beyond Higher Education: Other Sources of Data for Tracking Students The focus in student tracking today has shifted away from an examination of prospective students and students in academic difficulty, and toward an understanding of student progress through and beyond a single college or university. This new emphasis results from a variety of pressures: state and public calls for accountability, accreditation criteria that place greater attention on learning outcomes, recognition that enrollment does not ensure success, and an understanding that many students swirl through multiple institutions. This is the 143rd volume of the Jossey-Bass higher education quarterly report series New Directions for Community Colleges. Essential to the professional libraries of presidents, vice presidents, deans, and other leaders in today's open-door institutions, New Directions for Community Colleges provides expert guidance in meeting the challenges of their distinctive and expanding educational mission.

Sexual Harassment of Women

Climate, Culture, and Consequences in Academic Sciences, Engineering, and Medicine *National Academies Press Over the last few decades, research, activity, and funding has been devoted to improving the recruitment, retention, and advancement of women in the fields of science, engineering, and medicine. In recent years the diversity of those participating in these fields, particularly the participation of women, has improved and there are significantly more women entering careers and studying science, engineering, and medicine than ever before. However, as women increasingly enter these fields they face biases and barriers and it is not surprising that sexual harassment is one of these barriers. Over thirty years the incidence of sexual harassment in different industries has held steady, yet now more women are in the workforce and in academia, and in the fields of science, engineering, and medicine (as students and faculty) and so more women are experiencing sexual harassment as they work and learn. Over the last several years, revelations of the sexual harassment experienced by women in the workplace and in academic settings have raised*

urgent questions about the specific impact of this discriminatory behavior on women and the extent to which it is limiting their careers. *Sexual Harassment of Women* explores the influence of sexual harassment in academia on the career advancement of women in the scientific, technical, and medical workforce. This report reviews the research on the extent to which women in the fields of science, engineering, and medicine are victimized by sexual harassment and examines the existing information on the extent to which sexual harassment in academia negatively impacts the recruitment, retention, and advancement of women pursuing scientific, engineering, technical, and medical careers. It also identifies and analyzes the policies, strategies and practices that have been the most successful in preventing and addressing sexual harassment in these settings. **Diversity in Organizations** [Cengage Learning](#) Discover the value and importance of diversity for individuals and organizations today with the research-driven approach found in Bell/Leopold's *DIVERSITY IN ORGANIZATIONS, 4E*.
