THE TRADE-MARK REPORTER

RELIGION AND THE MAKING OF NIGERIA

Duke University Press In Religion and the Making of Nigeria, Olufemi Vaughan examines how Christian, Muslim, and indigenous religious structures have provided the essential social and ideological frameworks for the construction of contemporary Nigeria. Using a wealth of archival sources and extensive Africanist scholarship, Vaughan traces Nigeria's social, religious, and political history from the early nineteenth century to the present. During the nineteenth century, the historic Sokoto Jihad in today's northern Nigeria and the Christian missionary movement in what is now southwestern Nigeria provided the frameworks for ethno-religious divisions in colonial society. Following Nigeria's independence from Britain in 1960, Christian-Muslim tensions became manifest in regional and religious conflicts over the expansion of sharia, in fierce competition among political elites for state power, and in the rise of Boko Haram. These tensions are not simply conflicts over religious beliefs, ethnicity, and regionalism; they represent structural imbalances founded on the religious divisions forged under colonial rule.

ISLAMIC INTERNATIONAL LAW

HISTORICAL FOUNDATIONS AND AL-SHAYBANI'S SIYAR

Edward Elgar Publishing Through the analysis of Al-Shaybani's most prolific work As-Siyar Al Kabier, this book offers a unique insight into the classic Islamic perspective on international law. Despite being recognised as one of the earliest contributors to the field of international law, there has been little written, in English, on Al-Shaybani's work; this book will go some way towards filling the lacuna. International Islamic Law examines Al-Shaybani's work alongside that of other leading scholars such as: Augustine, Gratian, Aquinas, Vitoria and Grotius, proving a full picture of early thinking on international law. Individual chapters provide discussion on Al-Shaybani's writing in relation to war, peace, the consequences of war and diplomatic missions. Khaled Ramadan Bashir uses contemporary international law vocabulary to enable the reader to consider Al-Shaybani's writing in a modern context. This book will be a useful and unique resource for scholars in the field of Islamic International Law, bringing together and translating a number of historical sources to form one accessible and coherent text. Scholars researching the historical and jurisprudential origins of public international law topics, such as: international humanitarian law, 'just war', international dispute resolution, asylum and diplomacy will also find the book to be an interesting and valuable text.

EARLY ISLAM AND THE BIRTH OF CAPITALISM

Lexington Books Early Islam and the Birth of Capitalism proposes a strikingly original thesis—that capitalism first emerged in Arabia, not in late medieval Italian city states as is commonly assumed. Early Islam made a seminal but largely unrecognized contribution to the history of economic thought; it is the only religion founded by an entrepreneur. Descending from an elite dynasty of religious, civil, and commercial leaders, Muhammad was a successful businessman before founding Islam. As such, the new religion had much to say on trade, consumer protection, business ethics, and property. As Islam rapidly spread across the region so did the economic teachings of early Islam, which eventually made their way to Europe. Early Islam and the Birth of Capitalism demonstrates how Islamic institutions and business practices were adopted and adapted in Venice and Genoa. These financial innovations include the invention of the corporation, business management techniques, commercial arithmetic, and monetary reform. There were other Islamic institutions assimilated in Europe: charities, the waqf, inspired trusts, and institutions of higher learning; the madrasas were models for the oldest colleges of Oxford and Cambridge. As such, it can be rightfully said that these essential aspects of capitalist thought all have Islamic roots.

CREATIVITY

UNDERSTANDING INNOVATION IN PROBLEM SOLVING, SCIENCE, INVENTION, AND THE ARTS

John Wiley & Sons How cognitive psychology explains human creativity Conventional wisdom holds that creativity is a mysterious quality present in a select few individuals. The rest of us, the common view goes, can only stand in awe of great creative achievements: we could never paint Guernica or devise the structure of the DNA molecule because we lack access to the rarified thoughts and inspirations that bless geniuses like Picasso or Watson and Crick. Presented with this view, today's cognitive psychologists largely differ finding instead that "ordinary" people employ the same creative thought processes as the greats. Though used and developed differently by different people, creativity can and should be studied as a positive psychological feature shared by all humans. Creativity: Understanding Innovation in Problem Solving, Science, Invention, and the Arts presents the major psychological theories of creativity and illustrates important concepts with vibrant and detailed case studies that exemplify how to study creative acts with scientific rigor. Creativity includes: * Two in-depth case studies--Watson and Crick's modeling of the DNA structure and Picasso's painting of Guernica - serve as examples throughout the text * Methods used by psychologists to study the multiple facets of creativity * The "ordinary thinking" or cognitive view of creativity and its challengers * How problem-solving and experience relate to creative thinking * Genius and madness and the relationship between creativity and psychopathology * The possible role of the unconscious in creativity * Psychometrics--testing for creativity and how personality factors affect creativity * Confluence theories that use cognitive, personality, environmental, and other components to describe creativity Clearly and engagingly written by noted creativity expert Robert Weisberg, Creativity: Understanding Innovation in Problem Solving, Science, Invention, and the Arts takes both students and lay readers on an in-depth journey through contemporary cognitive psychology, showing how the discipline understands one of the most fundamental and fascinating human abilities. "This book will be a hit. It fills a large gap in the literature. It is a well-written, scholarly, balanced, and engaging book that will be enjoyed by students and faculty alike." --David Goldstein, University of Toronto

MUSLIMS IN SPAIN, 1500 TO 1614

University of Chicago Press On December 18, 1499, the Muslims in Granada revolted against the Christian city government's attempts to suppress their rights to live and worship as followers of Islam. Although the Granada riot was a local phenomenon that was soon contained, subsequent widespread rebellion provided the Christian government with an excuse—or justification, as its leaders saw things—to embark on the systematic elimination of the Islamic presence from Spain, as well as from the Iberian Peninsula as a whole, over the next hundred years. Picking up at the end of his earlier classic study, Islamic Spain, 1250 to 1500— which described the courageous efforts of the followers of Islam to preserve their secular, as well as sacred, culture in late medieval Spain—L. P. Harvey chronicles here the struggles of the Moriscos. These forced converts to Christianity lived clandestinely in the sixteenth century as Muslims, communicating in aljamiado— Spanish written in Arabic characters. More broadly, Muslims in Spain, 1500 to 1614, tells the story of an early modern nation struggling to deal with diversity and multiculturalism while torn by the fanaticism of the Counter-Reformation on one side and the threat of Ottoman expansion on the other. Harvey recounts how a century of tolerance degenerated into a vicious cycle of repression and rebellion until the final expulsion in 1614 of all Muslims from the Iberian Peninsula. Retold in all its complexity and poignancy, this tale of religious intolerance, political maneuvering, and ethnic cleansing resonates with many modern concerns. Eagerly awaited by Islamist and Hispanist scholars since Harvey's first volume appeared in 1990, Muslims in Spain, 1500 to 1614, will be compulsory reading for student and specialist alike. "The year's most rewarding historical work is L. P. Harvey's Muslims in Spain 1500 to 1614, a sobering account of the various ways in which a venerable Islamic culture fell victim to Christian bigotry. Harvey never urges the topicality of his subject on us, but this aspect inevitably sharpens an already compelling book."—Jonathan Keats, Times Literary Supplement
