Rhetoric and Human Consciousness A History, Fourth Edition Waveland Press The latest edition of Rhetoric and Human Consciousness remains a well-researched, accessible examination of rhetorical theory in Western civilization. Smiths coverage of the major figures who advanced rhetoric is strengthened by his keen analysis of developments in rhetorical theory that resulted from its interaction with other disciplines and the cultures surrounding it. The dialectic between rhetoric and other disciplines (notably philosophy and psychology) illuminate evolving definitions of rhetoric, from myth and display to persuasion and symbolic inducement. Well-chosen, engaging examples demonstrate how rhetoric can find truths, particularly at times when science and reason fail to solve important human crises. Paramount to this well-wrought survey is Smiths ability to show that rhetorical criticism illustrates, verifies, and refines rhetor-ical theory. Thus, the synergistic relationship between theory and criticism in rhetoric is no different than in other arts. Chief among the Fourth Editions enhancements are expanded discussions of the historical context for the creation of rhetorical theory and its use in public address; additional coverage of Isocrates, Cicero, Machiavelli, Kenneth Burke, and Michel Foucault; new material on the rhetoric of civil religion, ideological criticism, constitutive discourse, and feminist rhetorical theory; and many fresh examples. Each chapter ends with questions that sharpen readers retention of concepts and the ability to apply those to everyday life. **Rhetoric and Human Consciousness A History, Fifth Edition Waveland Press** For two decades, students and instructors have relied on award-winning author Craig Smith's detailed description and analysis of rhetorical theories and the historical contexts for major thinkers who advanced them. He employs key themes from important philosophical schools in this well-researched chronicle of rhetoric and human consciousness. One is that rhetoric is a

response to uncertainty. The modern philosophers, like the naturalists of ancient Greece and the Scholastics who preceded them, tried to end uncertainty by combining the discoveries of science and psychology with rationalism. Their aim was progress and a consensus among experts as to what truth is. However, where modernism proved ineffective, rhetoric was revived to fill the breach. Another significant theme is that different conceptions of human consciousness lead to different theories of rhetoric, and for every major school of thought, another school of thought forms in reaction. Classic and contemporary examples demonstrate the usefulness of rhetorical theory, especially its ability to inform and guide. By providing probes for rhetorical criticism, discussions also demonstrate that rhetorical criticism illustrates, verifies, and refines rhetorical theory. Thus, the synergistic relationship between theory and criticism in rhetoric is no different than in other arts: Theory informs practice; analysis of successful practice refines theory. Smith's absorbing study has been expanded to include thorough treatments of rhetoric in the Romantic Era, feminist and queer theory, and historical context for the creation of rhetorical theory and its use in public address.

Rhetorical Realism Rhetoric, Ethics, and the Ontology of Things Routledge Rhetorical Realism responds to the surging interest in nonhumans across the humanities by exploring how realist commitments have historically accompanied understandings of rhetoric from antiquity to the present. For a discipline that often defines itself according to human speech and writing, the nonhuman turn poses a number of challenges and opportunities for rhetoric. To date, many of the responses to the nonhuman turn in rhetoric have sought to address rhetoric's compatibility with new conceptions of materiality. In Rhetorical Realism, Scot Barnett extends this work by transforming it into a new historiographic methodology attuned to the presence and occlusion of things in rhetorical history. Through investigations of rhetoric's place in Aristotelian metaphysics, the language invention movement of the seventeenth century, and postmodern conceptions of rhetoric as an epistemic art, Barnett's study expands the scope of rhetorical inquiry by showing how realist ideas have worked to frame rhetoric's scope and meanings during key moments in its history. Ultimately, Barnett argues that all versions of rhetoric depend upon some realist assumptions about the world. Rather than conceive of the nonhuman as a dramatic turning point in rhetorical theory, Rhetorical Realism encourages rhetorical theorists to turn another eye toward what rhetoricians have always done—defining and configuring rhetoric within a broader ontology of things.

Rhetorical Criticism Perspectives in Action Rowman & Littlefield Now in its second edition, Rhetorical Criticism: Perspectives in Action presents a thorough, accessible, and well-grounded introduction to contemporary rhetorical criticism. Systematic chapters contributed by noted experts introduce the fundamental aspects of a perspective, provide students with an example to model when writing their own criticism, and address the potentials and pitfalls of the approach. In addition to covering traditional modes of rhetorical criticism, the volume presents less commonly discussed rhetorical perspectives, exposing students to a wide cross-section of techniques.

This book is for you because you will learn - **The Rational Shakespeare Peter Ramus, Edward de Vere, and the Question of Authorship Springer** The Rational Shakespeare: Peter Ramus, Edward de Vere, and the Question of Authorship examines William Shakespeare's rationality from a Ramist perspective, linking that examination to the leading intellectuals of late humanism, and extending those links to the life of Edward de Vere, Seventeenth Earl of Oxford. The application to Shakespeare's plays and sonnets of a game-theoretic hermeneutic, an interpretive approach that Ramism suggests but ultimately evades, strengthens these connections in further supporting the Oxfordian answer to the question of Shakespearean authorship. **Confessions of a Presidential Speechwriter MSU Press** An avid high school debater and enthusiastic student body president, Craig Smith seemed destined for a life in public service from an early age. As a sought-after speechwriter, Smith had a front-row seat at some of the most important events of the twentieth century, meeting with Robert Kennedy and Richard Nixon, advising Governor Ronald Reagan, writing for President Ford, serving as a campaign manager for a major U.S. senator's reelection campaign, and writing speeches for a contender for the Republican nomination for president. Life in the volatile world of politics wasn't always easy, however, and as a closeted gay man, Smith struggled to reconcile his private and professional lives. In this revealing memoir, Smith sheds light on what it takes to make it as a speechwriter in a field where the only constant is change. While bouncing in and out of the academic world, Smith transitions from consultantships with George H. W. Bush and the Republican caucus of the U.S. Senate to a position with Chrysler CEO Lee Iacocca. When Smith returns to Washington, D.C., as president and founder of the Freedom of Expression Foundation, he becomes a leading player on First Amendment issues in the nation's capital. Returning at long last to academia, Smith finds happiness coming out of the closet and reaping the benefits of a dedicated and highly successful career. **Authoring Autism On Rhetoric and Neurological Queerness Duke University Press** In *Authoring Autism* Melanie Yergeau defines neurodivergence as an identity—neuroqueerness—rather than an impairment. Using a queer theory framework, Yergeau notes the stereotypes that deny autistic people their humanity and the chance to define themselves while also challenging cognitive studies scholarship and its reification of the neurological passivity of autistics. She also

critiques early intensive behavioral interventions—which have much in common with gay conversion therapy—and questions the ableist privileging of intentionality and diplomacy in rhetorical traditions. Using storying as her method, she presents an alternative view of autistic rhetoricity by foregrounding the cunning rhetorical abilities of autistics and by framing autism as a narrative condition wherein autistics are the best-equipped people to define their experience. Contending that autism represents a queer way of being that simultaneously embraces and rejects the rhetorical, Yergeau shows how autistic people queer the lines of rhetoric, humanity, and agency. In so doing, she demonstrates how an autistic rhetoric requires the reconceptualization of rhetoric's very essence.

Marketing, Rhetoric and Control

The Magical Foundations of Marketing Theory Routledge

Marketing, Rhetoric and Control investigates the tensions that surround the place of persuasion (and, more broadly, control) in marketing. Persuasion has variously been seen as an embarrassment to the discipline, a target for anti-marketing sentiment, the source of marketing's value in the modern organisation, a mysterious black box inside the otherwise rational and logical endeavour of enterprise, and a rather insignificant part of the marketing programme. This book argues that this multifarious reputation for persuasion within marketing stems from the influence of two quite oppositional paradigms – the scientific and the magico-rhetorical – that ebb and flow across the discourses of its discipline and practice. Constructing an interface between original, challenging close readings of texts from the beginnings of the Western rhetorical tradition and an examination of the ways in which marketing has set about describing itself, this text argues for a Sophistic interpretation of marketing. From this perspective, marketing is understood as providing intermediary services to facilitate the continuing exchange of attention and regard between firm/client and stakeholders. It seeks to manage and direct this exchange through an appreciation of the changing rational and irrational motivations of the firm and stakeholders, using these as resources for the construction of both planned and improvised persuasive interactions in agonistic (or competitive) environments. This book is aimed primarily at researchers and academics working in the fields of marketing, marketing communications, and the related disciplines of marketing theory, critical marketing, and digital marketing. It will also be of value to marketing academics in business schools, including those working in the areas of media and communication studies who have an interest in commercial and corporate communication, brand use of interactive media, and communication theory.

Branches to Heaven The Geniuses of C. S. Lewis Wipf and Stock Publishers

Of Edmund Spenser, C. S. Lewis wrote, "his work is one, like a growing thing, a tree with branches to heaven and roots to hell. And in between these two extremes comes all the multiplicity of human life." This book seeks to demonstrate the aptness of that quotation when applied to Lewis himself. From his deepest emotional and psychological landscape, to his prevailing temperament, and then to his training, Lewis marshaled his magnificent rhetorical skills on behalf of his vocation: to make Christianity a reasonable and inviting alternative to doubters. In this--and through the many genres of which he was a master--he never wavered. These are the branches--"the available means of persuasion," as Aristotle put it. Sources, influences, experience and his very self: these are the roots. A close look at these, with a combination of

argument, critical analysis, and some fresh connections, finally yield an unexpected portrait. C. S. Lewis and his work are indeed one, with deeper roots and loftier branches than the current reputation of the master and his avuncular persona suggest. **Public Speaking: The Evolving Art Cengage Learning** Coopman and Lull's PUBLIC SPEAKING: THE EVOLVING ART, 4th Edition, combines time-tested techniques with innovative variations on the well-respected traditions of public speaking instruction to equip you with the skills you need to become a confident, competent, and ethical public speaker. Introduction to Rhetorical Theory Second Edition Waveland Press In this highly accessible new edition, Hauser systematically provides a humanistic account of what transpires when people communicate for some purpose. His masterful blend of classical and contemporary thinking about the use of language and the value of symbolic inducements for social cooperation illuminates fundamental rhetorical precepts and their implications for shaping human realities. The new chapter on public theory complements the four chapters that introduce the broad themes and issues essential for a rhetorical approach to communication. The new chapter on narrative theory bridges the four chapters devoted to the content of rhetoric and the concluding chapters that emphasize symbolic processes by which humans induce social cooperation and constitute social reality. Throughout the text, Hauser skillfully underscores the power of language to present a particular reality. He explores the fundamental relationship between public discourse and judgment, helping students understand the core of rhetoric's civic function. Through relevant, current examples, he illustrates how knowledge and power shape our social and political practices and how both are formed through discourse. **Public Speaking: The Evolving Art Cengage Learning** PUBLIC SPEAKING: THE EVOLVING ART is the first book to meet the expectations of today's students while both preserving and offering innovative variations on the well-respected traditions of public speaking instruction. Highlighting cutting-edge ideas from scholars from all over the world,

this volume anatomizes American power as well as the counters and alternatives to 'the American empire.' Topics include US economic and military power, American culture overseas, human rights and humanitarianism, third-world internationalism, immigration, communications technology, and the Anthropocene. **Forty Centuries of Wage and Price Controls How Not to Fight Inflation Ludwig von Mises Institute** The Mises Institute is thrilled to bring back this popular guide to ridiculous economic policy from the ancient world to modern times. This outstanding history illustrates the utter futility of fighting the market process through legislation. It always uses despotic measures to yield socially catastrophic results. It covers the ancient world, the Roman Republic and Empire, Medieval Europe, the first centuries of the U.S. and Canada, the French Revolution, the 19th century, World Wars I and II, the Nazis, the Soviets, postwar rent control, and the 1970s. It also includes a very helpful conclusion spelling out the theory of wage and price controls. This book is a treasure, and super entertaining! **Contemporary Perspectives on Rhetoric 30th Anniversary Edition Waveland Press** The anniversary edition marks thirty years of offering an indispensable review and analysis of thinkers who have exerted a profound influence on contemporary rhetorical theory: I. A. Richards, Ernesto Grassi, Chaim Perelman and Lucie Olbrechts-Tyteca, Stephen Toulmin, Richard Weaver, Kenneth Burke, Jürgen Habermas, bell hooks, Jean Baudrillard, and Michel Foucault. The brief biographical sketches locate the theorists in time and place, showing how life experiences influenced perspectives on rhetorical thought. The concise explanations of complex concepts are clear, engaging, insightful, and highly accessible, serving as an excellent primer for reading the major works of these scholars. The critical commentary is carefully chosen to highlight implications and to place the theories within a broader rhetorical context. Each chapter ends with a complete bibliography of works by the theorists. **The Art of Rhetorical Criticism Allyn & Bacon** Covering a broader range of rhetorical perspectives, "The Art of Rhetorical Criticism" presents a thorough, accessible introduction to rhetorical criticism. Throughout the text, sample essays written by experts in the field provide students with models for writing their own criticism. In addition to covering traditional modes of rhetorical criticism, "The Art of Rhetorical Criticism" presents less commonly-discussed rhetorical perspectives (for example, mythic criticism, framing analysis, and ideographical criticism), exposing students to a broad range of material. Features Each chapter and sample essay is written by a nationally-recognized scholar in that field, ensuring that students are offered the best and most current research for each perspective. Each author comments on his or her writing process to demonstrate the very personal nature of criticism. With this unique emphasis, students will begin to appreciate that writing criticism is an artistic process and not a simple formula. The "Potentials and Pitfalls" feature in each chapter highlights the strengths and weaknesses, pros and cons, of the rhetorical perspective being discussed. Each chapter includes a short, accessible sample essay, written specifically with the student audience in mind, offering students a model of rhetorical criticism for their own assignments. **Internal Rhetorics: Toward a History and Theory of Self-persuasion Toward a History and Theory of Self-persuasion SIU Press Walking and Talking Feminist Rhetorics Landmark Essays and Controversies Parlor Press LLC** Walking and Talking

The Language of History in the Renaissance Rhetoric and Historical Consciousness in Florentine Humanism **Princeton University Press** At any time, basic assumptions about language have a direct effect on the writing of history. The structure of language is related to the structure of knowledge and thus to the definition of historical reality, while linguistic competence gives insights into the relation of ideas and action. Within the framework of these ideas, and drawing on recent work in linguistic theory, including that of the French structuralists. Professor Struever studies the major shift in attitudes toward language and history which the Renaissance represents. One of the essential innovations of Renaissance Humanism is the substitution of rhetoric for dialectic as the dominant language discipline; rhetoric gives the Humanists their cohesion as a lay intellectual elite, as well as the force and direction of their thought. The author accepts the current trend in classical studies, the rehabilitation of the Sophists which finds its source in Nietzsche and includes the work of Rostagni, Untersteiner, and Buccellato, to reinstate rhetoric as the historical vehicle of Sophistic insight. In cultures where action is favoured over inaction, like in the West, direct action is considered a virtue while inaction is little more than laziness or cowardice. Let us be more subtle and nuanced in our understanding. There is a time for both action and inaction. Non-action gives access to a deeper intuitive awareness than that gained through action, since knowledge that comes through action is obscured by situation-specific reactions. Non-action is an aspect of going with the flow, not resisting the larger forces that govern a world of which you are a small part. It acknowledges that events are governed by the laws of Nature, and it is often best to simply allow those laws to operate and play out in their own time, in their own way. Non-action can help us towards our goals by encouraging patience and taking the long-view. Humanistic Psychology says that it is within our reach to create the life we

want for ourselves. As we think and believe, so we create our world. This is indeed true, but only up to a point. We can transform our lives in goal fulfilling ways, but the transformation is relatively slow, its progress measured in months and years. **A New History of Classical Rhetoric Princeton University Press** George Kennedy's three volumes on classical rhetoric have long been regarded as authoritative treatments of the subject. This new volume, an extensive revision and abridgment of *The Art of Persuasion in Greece, The Art of Rhetoric in the Roman World, and Greek Rhetoric under Christian Emperors*, provides a comprehensive history of classical rhetoric, one that is sure to become a standard for its time. Kennedy begins by identifying the rhetorical features of early Greek literature that anticipated the formulation of "metarhetoric," or a theory of rhetoric, in the fifth and fourth centuries b.c.e. and then traces the development of that theory through the Greco-Roman period. He gives an account of the teaching of literary and oral composition in schools, and of Greek and Latin oratory as the primary rhetorical genre. He also discusses the overlapping disciplines of ancient philosophy and religion and their interaction with rhetoric. The result is a broad and engaging history of classical rhetoric that will prove especially useful for students and for others who want an overview of classical rhetoric in condensed form. **Philosophy of History After Hayden White A&C Black** This anthology of new essays by an international group of preeminent scholars explores the ground-breaking work of Hayden White, whose thought, beginning with his seminal *Metahistory* (1973), has revolutionized the way we think about the philosophy of history, historiography, narrative, and the relation between history and literature. Representing a variety of disciplines and approaches, the contributions to this volume testify to the far-reaching effects and significance of White's philosophy of history. Individual essays relate White's ideas to contemporary art, cognitive studies, Heideggerian hermeneutics, experimental history, Kant's transcendental philosophy, analytic philosophy of history, Marxist cultural theory, the Kantian sublime, and American academic historiography. A substantial introduction by the editor traces the genesis of White's philosophy of history, situating it with respect to both the Anglo-American and Continental traditions. The volume also features a previously unpublished essay by White, which offers a concise overview of his later thought, and a "Comment" written specifically for this volume, in which White revisits the question of the philosophy of history. **Thought Power - Its Control and Culture Lulu.com** From the FOREWORD. THIS little book is intended to help the student to study his own nature, so far as its intellectual part is concerned. If he masters the principles herein laid down, he will be in a fair way to co-operate with Nature in his own evolution, and to increase his mental stature far more rapidly than is possible while he remains ignorant of the conditions of his growth. The Introduction may offer some difficulties to the lay reader, and may perhaps be skipped by such at the first reading. It is necessary, however, as a foundation for those who would see the relation of the intellect to the other parts of their nature and to the outer world. And those who would fulfill the maxim, "'Know thyself,'" must not shrink from a little mental exertion, nor must expect mental food to drop ready-cooked from the sky into a lazily-opened mouth. If the booklet help even a few earnest students, and clear some difficulties out of the way, its purpose will have been served. -Annie Besant. **Rhetoric and the Writing of History,**

400-1500 Manchester University Press This book provides an analytical overview of the vast range of historiography which was produced in western Europe over a thousand-year period between c.400 and c.1500. Concentrating on the general principles of classical rhetoric central to the language of this writing, alongside the more familiar traditions of ancient history, biblical exegesis and patristic theology, this survey introduces the conceptual sophistication and semantic rigour with which medieval authors could approach their narratives of past and present events, and the diversity of ends to which this history could then be put. By providing a close reading of some of the historians who put these linguistic principles and strategies into practice (from Augustine and Orosius through Otto of Freising and William of Malmesbury to Machiavelli and Guicciardini), it traces and questions some of the key methodological changes that characterise the function and purpose of the western historiographical tradition in this formative period of its development.

Readings in Contemporary Rhetoric Waveland Press Inc Wilhelm Dilthey: Selected Works, Volume IV Hermeneutics and the Study of History

Princeton University Press The philosopher and historian of culture Wilhelm Dilthey (1833-1911) has had a significant and continuing influence on twentieth-century Continental philosophy and in a broad range of scholarly disciplines. This volume is the third to be published in Princeton University Press's projected six-volume series of his most important works. Part One makes available three of his works on hermeneutics and its history: "Schleiermacher's Hermeneutical System in Relation to Earlier Protestant Hermeneutics" (The Prize Essay of 1860); "On Understanding and Hermeneutics" (1867-68), based on student lecture notes, and the "The Rise of Hermeneutics" (1900), which traces the history of hermeneutics back to Hellenistic Greece. All the addenda to this well-known essay are translated here, some for the first time. In them Dilthey articulates three philosophical aporias concerning hermeneutics and projects an ultimate convergence between understanding and explanation. Part Two provides translations of review essays by Dilthey on Buckle's use of statistical history and on Burckhardt's cultural history; an essay "Friedrich Schlosser and the Problem of Universal History;" and a talk recalling his early years as a student of Boeckh, Jakob Grimm, Mommsen, Ranke, and Ritter. It also contains the important historical essay "The Eighteenth Century and the Historical World," in which Dilthey reexamines the Enlightenment to show its significant contributions to the rise of historical consciousness. **The Return of the**
