History and Society

Essays by R.H. Tawney

Routledge R. H. Tawney believed that the subject of economic history raises questions which touch the fundamental concerns of all thinking people. By setting economic development firmly within the framework of cultural and political life, he provided an alternative to the recent fragmentation of economic history into a number of increasingly technical specialisms. First published as a collection in 1978, these ten essays, spanning the length of Professor Tawney's career remain as controversial and potent as ever, and the original introduction by J. M. Winter provides the first full evaluation and significance of R. H. Tawney's approach to economic history. Among the essays included in this volume are the indispensable studies of 'The Rise of the Gentry' and 'Harrington's Interpretation of His Age', as well as 'The Abolition of Economic Controls, 1918-1921', here published in full for the first time. Other selections, such as Tawney's celebrated inaugural lecture as Professor of Economic History at the London School of Economics in 1933, 'the Study of Economic History', offer a representative sample of the range and sweep of Tawney's historical imagination. Taken together, these essays demonstrate the validity of Tawney's conviction that economic historians must confront not only the creation of wealth, but also the moral questions surrounding its distribution.

Railway Recruitment Board (RRB) Group-D (CBT) 2018

Parliamentary Papers

Oversight Hearing on the Head Start Program

Hearing Before the Subcommittee on Human Resources of the Committee on Education and Labor, House of Representatives, Ninety-seventh Congress, Second Session, Hearing Held in Washington, D.C., on February 23, 1982

Compromised Campus

The Collaboration of Universities with the Intelligence Community, 1945-1955

Oxford University Press In the early 1950s, a young Harvard professor named Henry Kissinger approached the FBI with alleged evidence of communist subversion among the foreign students of his summer seminar. His evidence was a flyer criticizing the nuclear arms build-up and promoting world peace. At the same time at Yale, young William F. Buckley, Jr., was discovering more than God while writing *God and Man at Yale* as an undergraduate. He was discovering J. Edgar Hoover. These are just two examples of how ambitious young men used the "special relationship" developing between the FBI and the universities to advance their fledgling careers. Revelations such as these abound in Sigmund Diamond's *Compromised Campus*, an eye-opening look at the role American intelligence agencies played at some of America's most prestigious universities. It is often said that in the 1950s, American universities were free of the McCarthyism that pervaded the rest of the nation. Not so, says Diamond. Using previously secret materials newly made available under the Freedom of Information Act, and an impressive amount of information gained from years of research in university and foundation archives, he reveals that despite academia's "official story" of autonomy from the federal government, in fact university administrators, faculty, and students secretly and actively sought close ties with intelligence agencies. Diamond describes the cooperation of Harvard President James B. Conant with intelligence agencies, the institution and operation of Harvard's Russian Research Center, Yale's shadowy "liaison agent" H.B. Fisher, who moved from problems of student drinking to cooperation with the FBI in loyalty-security matters, and the existence of formal and informal relations with the FBI and other intelligence agencies at major universities throughout the country. He calls attention to the cooperation of university presidents--Griswold of Yale, Dodds of Princeton, Wriston of Brown, Sproul of California, among others--with the FBI and state governors on the techniques of blacklisting. Diamond shows how this interaction between intelligence agencies and American universities has had serious consequences for America ever since--on foreign policy, questions of law and constitutional government, the role of secrecy, separation of public and private activities, and the existence and control of government deceit and lawlessness. Dismissed himself from Harvard in the 1950s by McGeorge Bundy (for refusing to talk to the FBI about former associates), Diamond brings a special immediacy to this revealing study.

Graph Algorithms

Practical Examples in Apache Spark and Neo4j

"O'Reilly Media, Inc." Discover how graph algorithms can help you leverage the relationships within your data to develop more intelligent solutions and enhance your machine learning models. You'll learn how graph analytics are uniquely suited to unfold complex structures and reveal difficult-to-find patterns lurking in your data. Whether you are trying to build dynamic network models or forecast real-world behavior, this book illustrates how graph algorithms deliver value—from finding vulnerabilities and bottlenecks to detecting communities and improving machine learning predictions. This practical book walks you through hands-on examples of how to use graph algorithms in Apache Spark and Neo4j—two of the most common choices for graph analytics. Also included: sample code and tips for over 20 practical graph algorithms that cover optimal pathfinding, importance through centrality, and community detection. Learn how graph analytics vary from conventional statistical analysis Understand how classic graph algorithms work, and how they are applied Get guidance on which algorithms to use for different types of questions Explore algorithm examples with working code and sample datasets from Spark and Neo4j See how connected feature extraction can increase machine learning accuracy and precision Walk through creating an ML workflow for link prediction combining Neo4j and Spark
