HOW TO GET YOUR BUSINESS LOAN FUNDED FASTER, CHEAPER, & WITH LESS STRESS

Morgan James Publishing This straightforward road map guides you through the SBA loan approval process—from business plan preparation to submitting a foolproof application. Few entrepreneurs are aware of the benefits and opportunities available through the Small Business Administration (SBA), mainly because there are few resources available to guide them through the process. *Approved* was written to fill that gap by providing a step-by-step guide to SBA loan approval—bypassing the difficulties, delays, and expenses that can complicate the procedure. After finishing *Approved*, you will be able to highlight strengths (and mitigate weaknesses) from a lender's perspective, provide a simple business plan identifying how the business will be profitable for the long term, and accurately prepare a business loan application that can be immediately submitted through underwriting—unlike most business applications.

AN ASSESSMENT OF THE SMALL BUSINESS INNOVATION RESEARCH PROGRAM

PROJECT METHODOLOGY

National Academies Press In response to a Congressional mandate, the National Research Council conducted a review of the SBIR program at the

five federal agencies with SBIR programs with budgets in excess of \$100 million (DOD, NIH, NASA, DOE, and NSF). The project was designed to answer questions of program operation and effectiveness, including the quality of the research projects being conducted under the SBIR program, the commercialization of the research, and the program's contribution to accomplishing agency missions. This report describes the proposed methodology for the project, identifying how the following tasks will be carried out: 1) collecting and analyzing agency databases and studies; 2) surveying firms and agencies; 3) conducting case studies organized around a common template; and 4) reviewing and analyzing survey and case study results and program accomplishments. Given the heterogeneity of goals and procedures across the five agencies involved, a broad spectrum of evaluative approaches is recommended.
