He wrote the first modern treatise on painting, the first modern manual of classical architecture, and a powerful set of "dialogues" about the princely families that dominated his home city of Florence. He rediscovered the forgotten aesthetics of classical architecture and described, in incomparably vivid terms, the artistic revolution in Florence that began what we now call the Renaissance. But Alberti was more than a mere chronicler--he practiced what he preached. He made spectacular advances in the art of painting and in engineering, and as an architect he was responsible for some of the most exciting buildings in Italy. Yet in spite of his central importance, work on Alberti has for the most part been confined to scholarly monographs. Here, one of our greatest Renaissance scholars offers the general book that Alberti has so long deserved. This is a compelling portrait of a mysterious, original, and highly unusual intellectual, and a colorful tableau of the cities and courts in which he lived and worked. **Michigan Manufacturer and Financial Record Nature Automobile Engineer The Life and Times of Daniel De Leon** Humanities Press International **The Engineer Texas and Northeastern Mexico, 1630-1690** University of Texas Press In the seventeenth century, South Texas and Northeastern Mexico formed El Nuevo Reino de Leon, a frontier province of New Spain where Spanish settlements were widely scattered and subject to clashes with the Native American inhabitants. In 1690, a resident Spanish official looked back over the eventful, sometimes tumultuous history of Nuevo Leon and penned a richly detailed account of the years 1630 to 1690. Although Juan Bautista Chapa's Historia de Nuevo Leon was not published until 1909, it has since been acclaimed as the key contemporary document for any historical study of Spanish colonial Texas. This book offers the only accurate and annotated English translation of Chapa's Historia. Drawing on the Discourses of Governor Alonso de Leon (the elder), which cover the years 1580 to 1649, and on his own experiences as permanent secretary to the governors of Nuevo Leon, Chapa traces the history and colonization of Texas and Northeastern Mexico from the 1630s onward. He presents the only account of the Spanish expeditions in the 1660s against the Cacaxtle Indians, who had raided south of the Rio Grande for horses and slaves, and the only diary account of Alonso (the younger) de Leon's 1686 expedition to the Gulf of Mexico in search of La Salle's French settlement. Chapa was also an authority on the local Indians, and his Historia lists the names and locations of over 300 Indian tribes. This information, together with descriptions of the vegetation, wildlife, and climate in seventeenth-century Texas, will be of interest to ethnographers, anthropologists, biogeographers, and other scholars. **Internal Combustion Engineering American Inventor**
