ShortCuts in Mathematics : World's First Book With Short cuts, Secrets, Story and Motivation [Lulu.com](#) ShortCuts in Mathematics [Lulu.com](#) Data Interpretation & Data Sufficiency Arihant Publications India limited Quantitative Aptitude for Competitive Examinations Tips, Techniques & Short-cut Methods Python Machine Learning [Packt Publishing Ltd](#) Unlock deeper insights into Machine Learning with this vital guide to cutting-edge predictive analytics About This Book Leverage Python's most powerful open-source libraries for deep learning, data wrangling, and data visualization Learn effective strategies and best practices to improve and optimize machine learning systems and algorithms Ask - and answer - tough questions of your data with robust statistical models, built for a range of datasets Who This Book Is For If you want to find out how to use Python to start answering critical questions of your data, pick up Python Machine Learning - whether you want to get started from scratch or want to extend your data science knowledge, this is an essential and unmissable resource. What You Will Learn Explore how to use different machine learning models to ask different questions of your data Learn how to build neural networks using Keras and Theano Find out how to write clean and elegant Python code that will optimize the strength of your algorithms Discover how to embed your machine learning model in a web application for increased accessibility Predict continuous target outcomes using regression analysis Uncover hidden patterns and structures in data with clustering Organize data using effective pre-processing techniques Get to grips with sentiment analysis to delve deeper into textual and social media data In Detail Machine learning and predictive analytics are transforming the way businesses and other organizations operate. Being able to

understand trends and patterns in complex data is critical to success, becoming one of the key strategies for unlocking growth in a challenging contemporary marketplace. Python can help you deliver key insights into your data - its unique capabilities as a language let you build sophisticated algorithms and statistical models that can reveal new perspectives and answer key questions that are vital for success. Python Machine Learning gives you access to the world of predictive analytics and demonstrates why Python is one of the world's leading data science languages. If you want to ask better questions of data, or need to improve and extend the capabilities of your machine learning systems, this practical data science book is invaluable. Covering a wide range of powerful Python libraries, including scikit-learn, Theano, and Keras, and featuring guidance and tips on everything from sentiment analysis to neural networks, you'll soon be able to answer some of the most important questions facing you and your organization. Style and approach Python Machine Learning connects the fundamental theoretical principles behind machine learning to their practical application in a way that focuses you on asking and answering the right questions. It walks you through the key elements of Python and its powerful machine learning libraries, while demonstrating how to get to grips with a range of statistical models. Organisational Behaviour Programming Collective Intelligence Building Smart Web 2.0 Applications "O'Reilly Media, Inc." Want to tap the power behind search rankings, product recommendations, social bookmarking, and online matchmaking? This fascinating book demonstrates how you can build Web 2.0 applications to mine the enormous amount of data created by people on the Internet. With the sophisticated algorithms in this book, you can write smart programs to access interesting datasets from other web sites, collect data from users of your own applications, and analyze and understand the data once you've found it. Programming Collective Intelligence takes you into the world of machine learning and statistics, and explains how to draw conclusions about user experience, marketing, personal tastes, and human behavior in general -- all from information that you and others collect every day. Each algorithm is described clearly and concisely with code that can immediately be used on your web site, blog, Wiki, or specialized application. This book explains: Collaborative filtering techniques that enable online retailers to recommend products or media Methods of clustering to detect groups of similar items in a large dataset Search engine features -- crawlers, indexers, query engines, and the PageRank algorithm Optimization algorithms that search millions of possible solutions to a problem and choose the best one Bayesian filtering, used in spam filters for classifying documents based on word types and other features Using decision trees not only to make predictions, but to model the way decisions are made Predicting numerical values rather than classifications to build price models Support vector machines to match people in online dating sites Non-negative matrix factorization to find the independent features in a dataset Evolving intelligence for problem solving -- how a computer develops its skill by improving its own code the

more it plays a game Each chapter includes exercises for extending the algorithms to make them more powerful. Go beyond simple database-backed applications and put the wealth of Internet data to work for you. "Bravo! I cannot think of a better way for a developer to first learn these algorithms and methods, nor can I think of a better way for me (an old AI dog) to reinvigorate my knowledge of the details." -- Dan Russell, Google "Toby's book does a great job of breaking down the complex subject matter of machine-learning algorithms into practical, easy-to-understand examples that can be directly applied to analysis of social interaction across the Web today. If I had this book two years ago, it would have saved precious time going down some fruitless paths." -- Tim Wolters, CTO, Collective Intellect Debugging with GDB The GNU Source-level Debugger Fast Track Objective Arithmetic [Arihant Publications India limited](#) Here comes the Best Seller! Since its first edition in 2012, Fast Track Objective Arithmetic has been great architect for building and enhancing Aptitude skills in lakhs of aspirant across the country. The first book of its kind has all the necessary elements required to master the concepts of Arithmetic through Level Graded Exercises, namely Base Level & Higher Skill Level. Comprehensively covering the syllabus of almost all competitive examinations like, RBI, SBI, IBPS PO, SSC, LIC, CDS, UPSC, Management and all other Entrance Recruitment and Aptitude Test, the books has perfect compilation of Basic Concepts & Short Tricks to solve different types of Arithmetical problems. Unlike before, this completely revised 2018 edition promises to be more beneficial than the older ones. With up to date coverage of all exam questions, new types of questions and tricks, the thoroughly checked error free edition will ensure Complete Command over the subject and help you succeed in the examinations. Quicker Maths Mathematics for Machine Learning [Cambridge University Press](#) The fundamental mathematical tools needed to understand machine learning include linear algebra, analytic geometry, matrix decompositions, vector calculus, optimization, probability and statistics. These topics are traditionally taught in disparate courses, making it hard for data science or computer science students, or professionals, to efficiently learn the mathematics. This self-contained textbook bridges the gap between mathematical and machine learning texts, introducing the mathematical concepts with a minimum of prerequisites. It uses these concepts to derive four central machine learning methods: linear regression, principal component analysis, Gaussian mixture models and support vector machines. For students and others with a mathematical background, these derivations provide a starting point to machine learning texts. For those learning the mathematics for the first time, the methods help build intuition and practical experience with applying mathematical concepts. Every chapter includes worked examples and exercises to test understanding. Programming tutorials are offered on the book's web site. Quantitative Aptitude Quantum Cat [Arihant Publications India limited](#) 1. 'Quantum Cat'- the bestselling study guide for Management entrances 2. The entire syllabus has been divided into 21 Chapters 3. Every chapter is accompanied with

CAT Test for quick revision of concepts 4. More than 400 Fundamental Concepts are provided for better understanding 5. More than 1000 Examples are provided with Use-Cases, Twists, Tricks Choices and Lateral Solutions 6. More than 5000 hand crafted problem are given for the practice 7. 2000 New MCQs have been provided for thorough practice

Quantitative Aptitude is a core component for getting a winning CAT Score. Out of every section, Quantitative Ability is one of the most unpredictable and time consuming section. Quantitative Aptitude stems an important part of an individuals' analytical and logical ability for solving complex problems, making it a filtering tool for qualifying CAT and other Management Entrances. The current edition of "Quantum Cat" has been designed by keeping in mind the needs of those who wish to enhance Quantitative Aptitude for CAT and other Management Examinations. The entire syllabus of Quantitative Aptitude section is divided into 21 Chapters and every topic has 2-3 levels of questions that help students to get prepared for the most difficult problems even beyond the CAT Level. At the end of every chapter there is 'CAT Test' that contains problems related to the topic that helps in the quick revision of the concepts. This edition has more than 400 Fundamental Concepts to remember, more than 1000 examples are used to give the conceptual clarity with the methods and tricks are used to solve the questions. With the solution oriented approach this book provides more than 5000 hand crafted problems with their respective solution. It also includes more than 2000 MCQs for thorough practice. This book provides the alternative and smarter solutions to get correct answers in lesser time to crack CAT. This book is highly useful for not only for management entrances but for other competitive examinations. With so many features this book is a complete preparatory guide for those who have aim to score high in CAT.

Organisational Behaviour [S. Chand Publishing](#) For the students of MBA, PGDBM, M.Com. And other Management Courses. Contains a variety of real-life examples. Glossary given at the end of the book enables students to have knowledge and be familiar with the important key terms used.

Onshore Structural Design Calculations Power Plant and Energy Processing Facilities [Butterworth-Heinemann](#) Onshore Structural Design Calculations: Energy Processing Facilities provides structural engineers and designers with the necessary calculations and advanced computer software program instruction for creating effective design solutions using structural steel and concrete, also helping users comply with the myriad of international codes and standards for designing structures that is required to house or transport the material being processed. In addition, the book includes the design, construction, and installation of structural systems, such as distillation towers, heaters, compressors, pumps, fans, and building structures, as well as pipe racks and mechanical and electrical equipment platform structures. Each calculation is discussed in a concise, easy-to-understand manner that provides an authoritative guide for selecting the right formula and solving even the most difficult design calculation. Provides information on the analysis and design of steel, concrete, wood, and masonry

building structures and components Presents the necessary international codes and calculations for the construction and the installation of systems Covers steel and concrete structures design in industrial projects, such as oil and gas plants, refinery, petrochemical, and power generation projects, in addition to general industrial projects A Textbook of Electronic Circuits [S. Chand](#) The foremost and primary aim of the book is to meet the requirements of students of Anna University, Bharathidasan University, Mumbai University as well as B.E. / B.Sc of all other Indian Universities. Physics Galaxy 2021 JEE Main Physics - 19 Years' Chapter-Wise Solutions (2002-2020) [Gk Publications](#) For a science student preparing for JEE Main, Physics is the most important subject. If you wish to make the concepts of Physics strong, you should try to understand core concepts of Physics practically rather than focusing too much on theory or only on practice. With this aim, it becomes pertinent for students to become familiar with Past years' Questions asked in before undertaking JEE Main. Not only do you get familiar with the exam pattern, but you also understand the question paper trend. This book 'Physics galaxy JEE Main solutions' has answers to all questions previously asked in JEE Main online and offline papers from 2002 to 2020 I.E. 19 years. All questions are categorized into 30 topics in sequence based on NCERT chapters to support the teaching methodology by all JEE Physics mentors and guides across country. Cumulative weightage of all the 30 topics is given in the beginning to plan final strategy of JEE Main exam by which any student can achieve well deserving score in finals based on preparation. Features 19 years' completely solved online and offline papers from 2002 to 2020 questions divided into 30 topics as per weightage, preparation strategy given inside detailed, in-depth solutions to each question. IIMA - Managers Who Make A Difference Sharpening Your Management Skills [Random House India](#) What qualities do you need to be a successful manager, and how can you develop the qualities you already possess? Managers Who Make a Difference examines how managers' perceptions about themselves shape their behaviour at work, and studies the ways in which people can translate their ambition, sense of purpose, perseverance, confidence, and resourcefulness into successful management. How can you train yourself to spot competences in others and build on them to create an effective team? How do you achieve the right balance between adherence to existing systems, and creative or experimental problem-solving? And do you have the people skills—the ability to network extensively and build trust-based relationships—required to be a leader? Richly illustrated with anecdotes and experiences of well-known managers, and with a broad array of tips and self-assessment tools to sharpen your management skills, this book is a must read for all practising and aspiring managers. The IIM Ahmedabad Business Books bring key issues in management and business to a general audience. A New Approach to REASONING Verbal &

Non-Verbal Reasoning is equally weighed section in any competitive examination. Reasoning tests the thinking power and mind applicability skills of the candidates. The questions on reasoning asked in various competitive examinations are not easy to solve without having enough practice. The revised edition of **A New Approach to Reasoning** will help candidates master the 'Tricks of the Trade' as it covers all the three types of reasoning very much comprehensively. This book has been divided into 3 Sections - Verbal Reasoning, Analytical Reasoning and Non-Verbal Reasoning each sub-divided into number of chapters with different types of questions of multiple patterns asked in various exams. The Verbal Reasoning section covers Analogy, Clocks, Calendar, Puzzles, Coding-Decoding, Classification, Number Series, Letter Series, Blood Relations, Clerical Aptitude, etc. whereas, the Analytical Reasoning section covers Statement & Arguments, Statement & Assumptions, Course of Action, Cause & Effects, Syllogism, etc. The Non-Verbal Reasoning section covers Analogy, Classification, Completion of Figures, Cubes, Paper Folding, Mirror Image, Water Image, Figure Matrix, etc. Two Leveled Exercises have been given for practice. More than 2000 Previous Years' Questions of different competitive examinations including MAT and other MBA entrances, Bank PO, Clerk, SSC, LIC, RBI, RRB, B.Ed. etc along with their authentic and detailed solutions have been covered in the exercises. The ample number of previous years' questions will help the candidates get an insight into the trends and types of questions asked in the test of reasoning in various competitive and recruitment examinations.

Treatise on Critical Reason [Princeton University Press](#) Albert approaches critical rationalism as an alternative to other philosophical standpoints dominant in Germany: the conceptions of the Frankfurt School, hermeneutical thinking as represented by Gadamer, analytic philosophy, and logical empiricism. The author's purpose is to find a way out of the foundationalism of classical philosophy without falling back on the skeptical views so prevalent in today's philosophical thinking. Originally published in 1985. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

A Modern Approach to Verbal & Non Verbal Reasoning [Springer](#) What is mechanical engineering? What a mechanical engineering does? How did the mechanical engineering change through ages? What is the future of mechanical engineering? This book answers these questions in a lucid manner. It also provides a brief chronological history of landmark events and answers questions such as: When was steam engine invented? Where was first CNC machine developed? When did the era of additive manufacturing start? When did the marriage of

mechanical and electronics give birth to discipline of mechatronics? This book informs and create interest on mechanical engineering in the general public and particular in students. It also helps to sensitize the engineering fraternity about the historical aspects of engineering. At the same time, it provides a common sense knowledge of mechanical engineering in a handy manner. General Awareness for SSC Exams - CGL/ CHSL/ MTS/ GD Constable/ Stenographer [Disha Publications](#) General Awareness for SSC Exams - CGL/ CHSL/ MTS/ GD Constable - is a tailor made product for all requirements of SSC aspirants. It provides a comprehensive study of all sections that are covered under the subject of General Knowledge. It comprehensively covers Geography, History, Polity, Economy, Business, General Science, Ecology & Environment, Art & Culture, Sports, Healthcare, Communication, News & Media, Education & Career, IT & Computers and Technology. [Sanskrit Computational Linguistics Third International Symposium, Hyderabad, India, January 15-17, 2009. Proceedings Springer Science & Business Media](#) This volume presents the proceedings of the Third International Sanskrit Computational Linguistics Symposium hosted by the University of Hyderabad, Hyderabad, India during January 15-17, 2009. The series of symposia on Sanskrit Computational Linguistics began in 2007. The first symposium was hosted by INRIA at Rocquencourt, France in October 2007 as a part of the joint collaboration between INRIA and the University of Hyderabad. This joint collaboration expanded both geographically as well as academically covering more facets of Sanskrit Computational Linguistics, when the second symposium was hosted by Brown University, USA in May 2008. We received 16 submissions, which were reviewed by the members of the Program Committee. After discussion, nine of them were selected for presentation. These nine papers fall under four broad categories: four papers deal with the structure of Panini's Astadhyayi. Two of them deal with parsing issues, two with various aspects of machine translation, and the last one with the Web concordance of an important Sanskrit text. If we look retrospectively over the last two years, the three symposia in succession have seen not only continuity of some of the themes, but also steady growth of the community. As is evident, researchers from diverse disciplines such as linguistics, computer science, philology, and vyākaraṇa are collaborating with the scholars from other disciplines, witnessing the growth of Sanskrit computational linguistics as an emergent discipline. We are grateful to S.D. Joshi, Jan Houben, and K.V.R. Krishnamacharyulu for accepting our invitation to deliver the invited speeches. Life Skills for

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy, or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we dont deny that. In an untried loch it is necessary to have the

guidance of a good boatman but the same argument holds good as to stream-fishing... My Truth Based on interviews and other source material My Truth is a rare and vitally important book; the story of much of Indira Gandhi's life in her own words. First published in India and France in 1980 when Mrs Gandhi was out of power, it now assumes an extra importance in view of her tragic and untimely death. Told simply and warmly, the book unfolds the life of a gifted person born into a remarkable family. There are evocative passages of her recollections of her grandfather and the days spent in Allahabad, of the heroes of her childhood, the books she admired, of Jawaharlal exhorting her to take to physical activities, of holidays in the hills, a dream, like childhood abruptly altered as her father plunged into the freedom movement. Mission in a Bottle The Honest Guide to Doing Business Differently--and Succeeding Currency In an incredibly fun and accessible two-color graphic-book format, the cofounders of Honest Tea tell the engaging story of how they created and built a mission-driven business, offering a wealth of insights and advice to entrepreneurs, would-be entrepreneurs, and millions of Honest Tea drinkers about the challenges and hurdles of creating a successful business--and the importance of perseverance and creative problem-solving. Seth Goldman and Barry Nalebuff began Honest Tea fifteen years ago with little more than a tea leaf of an idea and a passion to offer organic, freshly brewed, lightly sweetened bottled tea. Today Honest Tea is a rapidly expanding national brand sold in more than 100,000 grocery stores, restaurants, convenience stores and drugstores across the country. The brand has flourished as American consumers move toward healthier and greener lifestyles. 50 Best Slow Cooker Recipes 2021 Easy Recipe You Can Replicate in Your Home Slow Cooker Thanks to This Brilliant Way of Infusing Rich Flavors Into Hearty, Warming Meals Cooking Slowly Staff □55% SPECIAL DISCOUNT only for Bookstores! Bootstrapping a Software Company Arizona Business Alliance We have great pleasure in presenting this book (Concept) to forthcoming/budding Entrepreneurs in the software development arena. The future of Indian software industry is bright and we want to help create leaders in the software industry. This book throws light on a step-by-step approach to set up a software company with little or no money known as bootstrapping. This book is an essence of experiences of people who worked hard to become Entrepreneurs. This book does not describe the theory but presents a 100% practical approach. It doesn't matter whether you are experienced in this field, are looking to invest or making a fresh start, we hope that this book will boost your confidence tremendously. We express our sincere thanks to all Entrepreneurs who helped us in sharing their valuable time, experiences, guidance and knowledge to make this project a grand success. In fact, without them it would have remained a mere hypothesis. With the help of our expert entrepreneurs, we have divided the majority of our concepts into two parts: 1. Pre-planning: Planning is required before starting the start up. 2. Post-planning: Planning required for sustaining the company with profitability after you have started it. In spite of our best efforts, the book may contain within it some shortcomings. We would be thankful if they are brought to our notice. We shall consider our labor amply rewarded if this concept is appreciated for whom it is meant.

About the Author Pawan Yadav is an enthusiastic writer on entrepreneur skills and youth expert. He writes extensively on youth, careers and entrepreneurship. Recently he has written a book "Bootstrapping A Software Company" which is sole source of inspiration and motivation for budding entrepreneurs. This book ensures a step by step approach to start and run a software company even if you have no budgets. The bootstrapping stands for same. He took three plus years to compile this concept for aspirants which is hundred percent practical approach for getting into a new venture. He has simplified the ways of business through vast market research. This market research was major challenge for him where he had interacted with the founders of various software companies and discussed deeply on the matter. This book is essence of experiences enriched by founders across the nation, who started their businesses almost with no money. Pawan is consultant for budding Entrepreneurs; He mentors students and young entrepreneurs in professional colleges, in and around Pune. A graduate engineer from Army Institute of Technology (AIT), Pune and MBA - Marketing. His expertise in marketing strategies almost of eight plus years with various MNC s provides niche in presenting this concept. He strongly believes in team work. He lives in Pune and can be reached at bootstrapping.pawan@gmail.com Make Yourself Unforgettable How to Become the Person Everyone Remembers and

Over the next few months, sections of the television, print and social media turned the country into a choric chamber of hate, riveting national attention. The proliferating 'charges' produced great political and intellectual disquiet in the JNU community of students and teachers. As a creative response, the Jawaharlal Nehru University Teachers' Association organized a teach-in for a month between 17 February and 17 March 2016. The lectures addressed the meanings, histories and experience of nationalism, and its unresolved dilemmas, in India and beyond. The teach-in lectures, which were initially intended for members of the JNU community, and delivered principally by JNU teachers, soon gained unanticipated audiences across India and in international forums. Reports and translations of the lectures, live streamed on YouTube, made for a reach that echoed well beyond the 'Freedom Square', the area in front of JNU's Administrative Block, which became the space of this intellectual and political occupation. The book, therefore, is both an archive of that historic moment and a tribute to the effort that succeeded in refocusing national attention on the university as the space for sustaining serious, well-historicized and critical thought. **HT THINK LIKE A COMPUTER SCIEN** [Samurai Media Limited](#) The goal of this book is to teach you to think like a computer scientist. This way of thinking combines some of the best features of mathematics, engineering, and natural science. Like mathematicians, computer scientists use formal languages to denote ideas (specifically computations). Like engineers, they design things, assembling components into systems and evaluating tradeoffs among alternatives. Like scientists, they observe the behavior of complex systems, form hypotheses, and test predictions. The single most important skill for a computer scientist is problem solving. Problem solving means the ability to formulate problems, think creatively about solutions, and express a solution clearly and accurately. As it turns out, the process of learning to program is an excellent opportunity to practice problem-solving skills. That's why this chapter is called, The way of the program. On one level, you will be learning to program, a useful skill by itself. On another level, you will use programming as a means to an end. As we go along, that end will become clearer.
