Newton and the Antigravity Formula

Flashes of Genius Back in the late 1600s, science was still in its infancy. If you dropped an apple it would fall to the ground, but nobody could explain why. That changed in 1687 when Isaac Newton, a professor at the University of Cambridge, published a book describing three laws of motion as well as a theory of universal gravitation. Newton also came up with a brand new field of mathematics, called calculus, to explain it all. The same equations that described the motion of a falling apple could also be used to describe the motion of planets orbiting the sun. It was revolutionary! Newton would go on to make new discoveries on the nature of light. But he also made mistakes; his fascination with alchemy, the hope of turning one element into another, was a tremendous waste of his genius. But science is not just about successful experiments--sometimes it takes a few failures to achieve success. **Newton and the Antigravity Formula** is a fast-paced, entertaining biography of the man who launched the field of modern physics. In addition to its lively story, it includes 190 illustrations, a glossary, and sidebars covering related topics, from the plague to the planets to the telescope.

Twelve Years a Slave

Prabhat Prakashan "Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Darwin and the True Story of the Dinosaurs

Flashes of Genius When Charles Darwin published *The Origin of Species* in 1859, he forever altered the way people looked at their place in the world humans were just another animal species that evolved from more primitive life forms. After graduating college, Charles was hired as a naturalist aboard the HMS Beagle where he would collect the specimens he would use to make the case for biologic evolution through natural selection. By the time he returned to England in 1836 he was a celebrity, but it would be more than 20 years before he published his groundbreaking work. Darwin s

theory ultimately helped Richard Owen solve the riddle of the enormous fossils found all over the world they were not dragon bones of lore, but the remnants of extinct species that once inhabited the earth. Darwin and the True Story of the Dinosaurs is a fast-paced, entertaining biography of the naturalist who changed humankind's understanding of its origins. In addition to its lively story, it includes 220 illustrations, a glossary, and sidebars covering related topics, from fossils to continental drift to medicine in the 19th century."

Big Book of Stars and Planets

Millionaire by Thirty

The Quickest Path to Early Financial Independence

Business Plus Most people know that there are 70 million Baby Boomers in America today....but what is less known is that there are approximately 100 million people in America between the ages of 16 and 30. This generation has just entered, or will soon be entering the work force. And they have no idea how to invest, save, or handle their money. Young people today come out of school having had little or no formal education on the basics of money management. Many have large debts from student loans looming over their heads. And many feel confused and powerless when their pricey educations don't translate into high paying jobs. They feel that their \$30,000-\$40,000 salary is too meager to bother with investing, and they constantly fear that there will be "too much month left at the end of their money." Douglas R. Andrew has shown the parents of this generation a different pathway to financial freedom. Now Doug and his sons, Emron and Aaron - both of whom are in their mid-20s - show the under-30 crowd how they can break from traditional 401k investment plans and instead can find a better way by investing in real estate, budgeting effectively, avoiding unnecessary taxes and using life insurance to create tax-free income. With the principles outlined in *Millionaire by Thirty*, recent graduates will be earning enough interest on their savings to meet their basic living expenses by the time they're 30. And by the time they're 35, their investments will be earning more money than they are, guaranteeing them a happy, wealthy future.

Morals of Legitimacy

Between Agency and the System

Berghahn Books With the growing fragmentation of western societies and disillusionment with the political process, the question of legitimacy has become one of the key issues of contemporary politics and is examined in this volume in depth for the first time. Drawing on ethnographic material from the U.S., Europe, India, Japan, and Africa, anthropologists and legal scholars investigate the morally diversified definitions of legitimacy that co-exist in any one society. Aware of the tensions between state morality

and community morality, they offer reflections on the relationship between agency - individual and collective - and the legal and political systems. In a situation in which politics has only too often degenerated into vacuous rhetoric, this volume demonstrates how critical the relationship between trust and legitimacy is for the authoritative exercise of power in democratic societies.

Drunk Stoned Brilliant Dead

The Writers and Artists Who Made the National Lampoon Insanely Great

Abrams From its first issue in April, 1970, the National Lampoon blazed like a comet, defining comedy as we know it today. To create **Drunk Stoned Brilliant Dead**, former Lampoon illustrator Rick Meyerowitz selected the funniest material from the magazine and sought out the survivors of its first electrifying decade to gather their most revealing and outrageous stories. The result is a mind-boggling tour through the early days of an institution whose alumni left their fingerprints all over popular culture: **Animal House**, **Caddyshack**, **Saturday Night Live**, **Ghostbusters**, **SCTV**, **Spinal Tap**, **In Living Color**, **Ren & Stimpy**, **The Simpsons**—even **Sesame Street** counts a few Lamponers among its ranks. Long before there was **The Onion** and **Comedy Central** news shows, there was the **National Lampoon**, setting the bar in comedy impossibly high! A very similar title, differing only in the subtitle, was used for the 2015 documentary film, **Drunk Stoned Brilliant Dead: The Story of the National Lampoon**, for which Rick Meyerowitz designed the poster, as he also did for the 1978 film **National Lampoon's Animal House**.

How Star Wars Conquered the Universe

The Past, Present, and Future of a Multibillion Dollar Franchise

Basic Books In 1973, a young filmmaker named George Lucas scribbled some notes for a far-fetched space-fantasy epic. Some forty years and 37 billion later, Star Wars -- related products outnumber human beings, a growing stormtrooper army spans the globe, and "Jediism" has become a religion in its own right. Lucas's creation has grown into far more than a cinematic classic; it is, quite simply, one of the most lucrative, influential, and interactive franchises of all time. Yet incredibly, until now the complete history of Star Wars -- its influences and impact, the controversies it has spawned, its financial growth and long-term prospects -- has never been told. In *How Star Wars Conquered the Universe*, veteran journalist Chris Taylor traces the series from the difficult birth of the original film through its sequels, the franchise's death and rebirth, the prequels, and the preparations for a new trilogy. Providing portraits of the friends, writers, artists, producers, and marketers who labored behind the scenes to turn Lucas's idea into a legend, Taylor also jousts with modern-day Jedi, tinkers with droid builders, and gets inside Boba Fett's helmet, all to find out how Star Wars has attracted and inspired so many fans for so long. Since the first film's release in 1977, Taylor shows, Star Wars has conquered our culture with a sense of lightness and exuberance, while remaining serious enough to influence politics in far-flung countries and spread a spirituality that appeals to religious groups and atheists alike. Controversial digital upgrades and poorly received prequels have actually made the franchise stronger than ever. Now, with a savvy new set of bosses holding the reins and Episode VII on the horizon, it looks like Star Wars is just getting started. An energetic, fast-moving account of this creative and commercial phenomenon, *How Star Wars Conquered the Universe* explains how a young filmmaker's fragile dream beat out a surprising number of rivals to gain a diehard, multigenerational fan base -- and why it will be galvanizing our imaginations and minting money for generations to come.

The State of Architecture. Aldo Rossi and the Tools of Internationalization

Although architecture was historically considered the most public of the arts and the interdependence between building and the public realm was a key feature of the post-war discourse, the process of postmodernization

undermined some of the traditional structures of power through which architecture operated. At the center of this shakeup was the modern structure par excellence: the State.00This book analyzes the dissolution of the bond between architecture and the State through a double lens. First, this study is framed by the workings of an architect, Aldo Rossi, whose practice mirrored this transformation in a unique way, going from Mussolini's Italy to Reagan's America, from the Communist Party to Disneyland. The second lens is provided by a set of technological apparatuses that, in this pre-digital world, impacted the reach of the State and the boundaries of architecture. Drawing on the multifaceted root of the term "State," this book sets out to explore a series of case studies that addressed the need to re-state architecture "both in the sense of relocating architecture within new structures of power and in the sense of finding ways to keep reproducing it in those uncharted territories.

The Mountains Sing

Algonquin Books The International Bestseller A New York Times Editors' Choice Selection A Winner of the 2020 Lannan Literary Awards Fellowship "[An] absorbing, stirring novel . . . that, in more than one sense, remedies history." —The New York Times Book Review "A triumph, a novelistic rendition of one of the most difficult times in Vietnamese history . . . Vast in scope and intimate in its telling . . . Moving and riveting." —VIET THANH NGUYEN, author of *The Sympathizer*, winner of the Pulitzer Prize With the epic sweep of Min Jin Lee's *Pachinko* or Yaa Gyasi's *Homegoing* and the lyrical beauty of Vaddey Ratner's *In the Shadow of the Banyan*, *The Mountains Sing* tells an enveloping, multigenerational tale of the Trần

family, set against the backdrop of the Việt Nam War. Trần Diệu Lan, who was born in 1920, was forced to flee her family farm with her six children during the Land Reform as the Communist government rose in the North. Years later in Hà Nội, her young granddaughter, Hương, comes of age as her parents and uncles head off down the Hồ Chí Minh Trail to fight in a conflict that tore apart not just her beloved country, but also her family. Vivid, gripping, and steeped in the language and traditions of Việt Nam, *The Mountains Sing* brings to life the human costs of this conflict from the point of view of the Vietnamese people themselves, while showing us the true power of kindness and hope. *The Mountains Sing* is celebrated Vietnamese poet Nguyễn Phan Quế Mai's first novel in English.

Cross the Streets

Drago Media Kompany Srl Cross the Streets is a multimedia exhibition that celebrates 40 years of the evolution of street art in Rome. No other city has such an untouched history and so it is fitting that Rome begins its cultural regeneration from its streets and its past. Creative inspiration has always been driven by instinct and these fleeting moments are preserved as etchings on everything from caves to catacombs, from Pasquino to propaganda murals. Rome remains one of the most important cities driving this movement and therefore it is right to celebrate it at the Museum of Contemporary Art of Rome (MACRO).
