FIRE STARTERS

IGNITING THE HOLY IN THE WEEKDAY HOMILY

Though daily Mass is held most frequently, resources for daily homilies can be in short supply. In this book, Bishop Sklba offers a rich collection of ideas -- fire starters -- for preparing brief, spiritually nourishing homilies for daily Eucharist. Like building a campfire, where one ignites the logs with more easily flammable paper, these fire starters" are intended to provide the spark for weekday homilies. God's Spirit provides the flame. Each day, the biblical citations and summary phrases for the reading and the gospel plus the refrain from the psalm are provided. After each citation, Bishop Sklba offers a series of meaningful insights from his expertise as a Scripture scholar, prayerful study of Scripture, and many years of preaching and pastoral experience. These brief entries provide knowledge and inspiration that will stimulate personal prayer and spark homily possibilities for the preacher every day. "Fire Starters "will support anyone privileged to be called to leadership at weekday celebrations of the

Eucharist to prepare for the important ministry of preaching. "Bishop Richard J. Skiba served as auxiliary bishop of Milwaukee for over thirty years. He is a well-known biblical scholar, completing the licentiate in Sacred Scripture from the Pontifical Biblical Institute in Rome. He is a member and former president of the Catholic Biblical Association of America. He has served on many committees of the U.S. Conference of Catholic Bishops, chairing its subcommittee on the Review of Scripture Translations from 1991 to 2001. In 1988, he received the Catholic Theological Society of America's John Courtney Murray Award for achievement in theology."

777 MATHEMATICAL CONVERSATION STARTERS

American Mathematical Soc. **777 Mathematical Conversation Starters** shows that there are few degrees of separation between mathematics and topics that provoke interesting conversations. The topics presented in this unique book are accessible to mathematicians and non-mathematicians alike. They include thought-provoking conversation starters such as: the value of fame; why language matters; the anatomy of thought; how we know what we know; how the Pythagorean theorem (with very little physics) shows that Einstein was correct about time dilation and distance contraction; and how mathematics produces intuition-defying examples. The format is unique, too: topics (conversation starters) are numbered, extensively cross-referenced, and divided into small digestible units. Published for the first time in *777 Mathematical Conversation Starters* are original quotes from Joshua Lederberg, Ron Graham, Jay Leno, Martin Gardner, and many others.
