International Handbook of Universities 2019 Palgrave Macmillan First published in 1959 by the International Association of Universities (IAU), the International Handbook of Universities provides detailed information on Education Systems and higher education institutions that offer at least a four-year degree or a four-year professional diploma. For Education Systems: Description of the higher education system of each country Stages of studies as well as information on distance education Admission criteria, including information for foreign students Quality assurance and recognition systems Contact details for national bodies For Institutions: Contact details: name, address, telephone, fax, website Historical background, special facilities and publications Degrees and diplomas offered at each level of study Key personnel, including principal academic and administrative officers Description of facilities, schools and departments Valuable information on academic year, admission requirements, academic staff and student numbers **Managers Not MBAs A Hard Look at the Soft Practice of Managing and Management Development Berrett-Koehler Publishers** In this sweeping critique of how managers are educated and how, as a consequence, management is practiced, Henry Mintzberg offers thoughtful and controversial ideas for reforming both. "The MBA trains the wrong people in the wrong ways with the wrong consequences," Mintzberg writes. "Using the classroom to help develop people already practicing management is a fine idea, but pretending to create managers out of people who have never managed is a sham." Leaders cannot be created in a classroom. They arise in context. But people who already practice management can significantly improve their effectiveness given the opportunity to learn thoughtfully from their own experience. Mintzberg calls for a more engaging approach to managing and a more reflective approach to management education. He also outlines how business schools can become true schools of management. **The Future of Business Schools Scenarios and Strategies for 2012 Palgrave Macmillan** European Business Schools tend to imitate their North American counterparts in an attempt to catch up in the worldwide competition for knowledge creation and training in management. Is this relevant? To what extent do business schools in Europe contribute to competitiveness of the economy? What will be the impact of new technologies, e.g. on executive education? Will there be a European job market for business professors? Will market forces win against state owned universities? The book compares the current institutional setting of business schools in various countries and presents five foresight scenarios for 2020. **Hacking IT Tiger Eye Productions, LLC** Some secrets should never be uncovered. Independent software developer Kylie Grant is on top of her game in the world of IT. She has loyal clients, a good reputation, and a prestigious membership in technology giant Afire Industries' small business accelerator. Things are going well until she stumbles across an innocuous issue with the lighting in the building where she rents space. When she digs into the problem, she discovers something unexpected—a hack. The incursion doesn't affect her, but Kylie leaves enough clues to fix the problem. That earns her a visit from Luke McAllister, Afire's chief security officer. Luke is handsome and rugged and everything that Kylie likes in a man, but she soon finds that he is blaming her for the security breach. Before long, the two are on a collision course, but also secretly looking at more than each other's digital footprints. When a fluke accident sends Kylie to the emergency room, Luke fears that the beautiful developer is in danger beyond the online world. Little does he know that she is also hiding a secret that threatens to jeopardize their now sizzling relationship. Can Kylie fix Afire's problems without falling victim to the hacker? And can Luke learn to trust her and keep her safe before their enemy strikes again? **China Logistics Industry China Knowledge Press Managing Learning Organization in Industry 4.0 Proceedings of the International Seminar and Conference on Learning Organization (ISCLLO 2019), Bandung, Indonesia, October 9-10, 2019 Routledge** The proceedings of the 6th International Seminar & Conference on Learning Organization (ISCLLO) with the theme "Enhancing Organization's Competitiveness through Knowledge Sharing and Learning Culture in the 4.0 Era" provides research results from scientists, scholars and practitioners, exchanging information and discussing the latest issues related to topics such as Marketing, Human Resources, Industrial Behavior and Knowledge Management, Entrepreneurship and Strategic Management Economics, Financial and Accounting. Participation, Accountability and Efficiency Cambridge University Press This book asks whether a modern, efficient economy can be rendered democratically accountable, and, if so, what strategic changes might be required to regulate the market-based interaction of economic agents. The contributors bring contemporary microeconomic theory to bear in an attempt to find a progressive replacement to traditional state socialism. Various approaches to the study of economic interaction are considered in an attempt to understand the relationship between power and efficiency in market economies.

Challenging the Secular State The Islamization of Law in Modern Indonesia University of Hawaii Press It was an impossible crime: knock off an entire North Dakota town called Copper Canyon—clean out the plant payroll, both banks, and all the stores in one night. Parker called it "science fiction," but with the right men (a score of them), he could figure it out to the last detail. It could work. If the men behaved like pros, cool and smart; if they didn't get impatient, start chasing skirts, or decide to take the opportunity to settle secret old scores...they just might pull it off.

The Metric Tide Independent Review of the Role of Metrics in Research Assessment and Management SAGE 'Represents the culmination of an 18-month-long project that aims to be the definitive review of this important topic. Accompanied by a scholarly literature review, some new analysis, and a wealth of evidence and insight... the report is a tour de force; a once-in-a-generation opportunity to take stock.' - Dr Steven Hill, Head of Policy, HEFCE, LSE Impact of Social Sciences Blog 'A must-read if you are interested in having a deeper understanding of research culture, management issues and the range of information we have on this field. It should be disseminated and discussed within institutions, disciplines and other sites of research collaboration.' - Dr Meera Sabaratnam, Lecturer in International Relations at the School of Oriental and African Studies, University of London, LSE Impact of Social Sciences Blog Metrics evoke a mixed reaction from the research community. A commitment to using data and evidence to inform decisions makes many of us sympathetic, even enthusiastic, about the prospect of granular, real-time analysis of our own activities. Yet we only have to look around us at the blunt use of metrics to be reminded of the pitfalls. Metrics hold real power: they are constitutive of values, identities and livelihoods. How to exercise that power to positive ends is the focus of this book. Using extensive evidence-gathering, analysis and consultation, the authors take a thorough look at potential uses and limitations of research metrics and indicators. They explore the use of metrics across different disciplines, assess their potential contribution to the development of research excellence and impact and consider the changing ways in which universities are using quantitative indicators in their management systems. Finally, they consider the negative or unintended effects of metrics on various aspects of research culture. Including an updated introduction from James Wilsdon, the book proposes a framework for responsible metrics and makes a series of targeted recommendations to show how responsible metrics can be applied in research management, by funders, and in the next cycle of the Research Excellence Framework. The metric tide is certainly rising. Unlike King Canute, we have the agency and opportunity - and in this book, a serious body of evidence - to influence how it washes through higher education and research.

Islam and the Everyday World Public Policy Dilemmas Routledge This is a new examination of how Shari'a law affects public policy both theoretically and in practice, across a wide range of public policy areas, including for example human rights and family law. The process by which public policy is decided - through elections, debates, political processes, and political discourse - has an additional dimension in the Islamic world. This is because Shari'a (divine law) has a great deal to say on many mundane matters of everyday life and must be taken into account in matters of public policy. In addition, matters are complicated further by the fact that there are differing interpretations of the Shari'a and how it should be applied to contemporary social issues. Written by leading experts in their field, this is the first comprehensive single volume analysis of Islam and public policy in the English language and offers further understanding of Islam and its wider social and political implications.
