CONCEPTUAL LEARNING IN SOCIAL STUDIES CLASSROOM

AN ANALYSIS OF TEXAS ASSESSMENT OF KNOWLEDGE AND SKILLS (TAKS) SOCIAL STUDIES QUESTIONS WITH AND WITHOUT CONCEPT

We are living in a conceptual world which we build through both informal and systematic interaction. Concepts enable us to simplify and organize our environment and communicate efficiently with others. The learning of concepts is represented by a general idea, usually expressed by a word, which represent a class or group of things or actions having certain characteristics in common, is a matter of central concern for designing effective instructional conditions in the school setting. Thus, concept attainment is a cornerstone of social studies to help students to make informed and reasonable decisions and therefore is a fundamental and challenging aspect of social studies content. Previous studies had not focused specifically on concept questions and nonconcept questions. The purpose of this study is to determine whether 8th, 10th, and 11th grade students perform better on social studies questions which were classified as concept questions compared to questions which were classified as nonconcept questions. This study also attempts to identify the relationship between correct answers on concept questions and students' demographics. This study used a non-experimental descriptive, correlational, and causal-comparative research designs. This study used secondary data analysis, which involves a re-analysis of data collected for another study or purpose. The data for this study was gathered from Texas Education Agency, for all students who took the Spring 2006 and Spring 2009 version of the Grade 8, Grade 10, and Grade 11 Social Studies TAKS Tests. A statistical significant difference was found between the percentage of correct concept question and nonconcept questions. Students had higher achievement on nonconcept questions than concept questions. The researcher compared students' correct answers for concept questions between years, the result indicated that students scored higher on concept questions in 2009 than 2006. Also, there was a significant difference between male students and female students. Male students had a higher mean of concept questions than female students. In addition, Grade 11 had a higher mean on concept questions than Grade 10 and Grade 8. The researcher found significant differences among ethnicity. Asian students and White students scored better on concept question than other ethnic groups. The researcher also examined the correlation between concept questions and nonconcept questions. The result indicated that there was a significant positive high correlation between choosing correct answers for concept question and nonconcept questions. Last, native speaker students had a higher achievement on concept questions than ESL students.

THE RELATIONSHIP OF TEACHER PERCEPTIONS OF THE IMPACT OF TECHNOLOGY INTEGRATION ON TEXAS ASSESSMENT OF KNOWLEDGE AND SKILLS (TAKS) SCORES OF 9TH-11TH GRADE STUDENTS AT ALAMO HEIGHTS INDEPENDENT SCHOOL DISTRICT, SAN ANTONIO, TEXAS

This study examines Levels of Technology Implementation (LoTi) teacher selfratings and Texas Assessment of Knowledge and Skills (TAKS) scores. The LoTi instrument is explained comprehensively in the study. Using a series of survey questions about classroom instruction and technology use, the instrument measures a teacher's level of technology implementation in terms of that teacher's perception of classroom practices. The study assesses the relationship between LoTi ratings and TAKS scores of 9th, 10th, and 11th grade students as reported in student records at Alamo Heights Independent School District, San Antonio, Texas. The study determined the degree to which teacher LoTi ratings were a predictor of success on TAKS exam scores as reported in student records at Alamo Heights Independent School District, San Antonio, Texas. In addition, the study ascertained the existence of differences among the variable of student economic status. For the purposes of this study, school and student performance analysis included only Alamo Heights High School in the Alamo Heights Independent School District (AHISD). The student data in the study came from approximately 359 9th graders, 372 10th graders, and 309 11th graders (1040 total students). A total of 11 English teachers, 14 math teachers, 9 science teachers, and 10 social studies teachers (44 total teachers) from this campus made up the population under study. The research findings of this study included: 1. A positive relationship exists between the level of technology implementation in the classroom and student performance on the TAKS test in math, English Language Arts/Reading, science, and social studies. 2. Further, the findings showed that this relationship impacts economically disadvantaged students the most in English Language Arts/Reading and math.

AN ANALYSIS OF PERFORMANCE OF ESL STUDENTS ON VARIOUS SOCIAL STUDIES OBJECTIVES AND TEST ITEMS ON THE TEXAS ASSESSMENT OF KNOWLEDGE AND SKILLS (TAKS) TEST

The content area of social studies has not been given as much attention as its counterparts despite its inclusion in the state wide TAKS exam in Texas. All students in grades 8, 10, and 11 are required to take the social studies portion, and must pass it in order to graduate. The consequences of such a test and the importance of social studies in the everyday lives of students make this content area important. In addition, since ESL students constitute a considerable segment of the student population in our schools nowadays, it is essential that educators understand the challenges these students face and the experiences they go through in such content areas and tests; thus, their performance in the TAKS exam is examined in this study. The purpose of this study was to analyze the performance of ESL students in the social studies TAKS exams in grades 8 and 11 in relation to content (represented by the five objectives of the test), and question item format (limited to two text-enriched question types: excerpt-based, and bullet-point questions). The study also sought to find the effects of demographic variables on student performance. The results of the study can further familiarize educators with the challenges ESL students face in social studies to be able to assist them succeed in their classrooms and on standardized tests. This study utilized secondary data analysis with a set of data provided from the Texas Education Agency. The data included information of the students who took the Spring 2003, 2006, and 2009 social studies TAKS exams, which allowed the researcher to conduct longitudinal analysis to further support the results. Overall, the study was non-experimental and descriptive in nature. A statistical significant difference was found between the percentages of correct answers by objective. ESL students performed better on objectives 3 (economics) and 5 (social studies skills), while lagging behind in objective 1 (history). The results were also confirmed in the longitudinal study that showed that although ESL students' performance increased in all five objectives, there was statistically significant difference in the performance of ESL students among the objectives. In relation to question type, ESL students chose more correct answers for the bullet-point questions than they did for the excerpt-based questions with statistical significance. Longitudinal analysis of excerpt-based questions only showed that ESL students who took the exam in 11th grade three years after taking it in 8th grade, achieved higher. Finally, the results of the study show that the three demographic variables of gender, ethnicity, and socio-economic status had an effect on the performance of ESL students. Overall, males scored higher than females, economically non-disadvantaged students outperformed disadvantaged students, and Hispanic ESL students had the lowest scores of all the ethnic groups. BUILDING THINKING CLASSROOMS IN MATHEMATICS, GRADES K-12

14 TEACHING PRACTICES FOR ENHANCING LEARNING

Corwin Press A thinking student is an engaged student Teachers often find it difficult to implement lessons that help students go beyond rote memorization and repetitive calculations. In fact, institutional norms and habits that permeate all classrooms can actually be enabling "non-thinking" student behavior. Sparked by observing teachers struggle to implement rich mathematics tasks to engage students in deep thinking, Peter Liljedahl has translated his 15 years of research into this practical guide on how to move toward a thinking classroom. Building Thinking Classrooms in Mathematics, Grades K-12 helps teachers implement 14 optimal practices for thinking that create an ideal setting for deep mathematics learning to occur. This guide Provides the what, why, and how of each practice and answers teachers' most frequently asked questions Includes firsthand accounts of how these practices foster thinking through teacher and student interviews and student work samples Offers a plethora of macro moves, micro moves, and rich tasks to get started Organizes the 14 practices into four toolkits that can be implemented in order and built on throughout the year When combined, these unique research-based practices create the optimal conditions for learner-centered, student-owned deep mathematical thinking and learning, and have the power to transform mathematics classrooms like never before.

EUREKA MATH GRADE 2 STUDY GUIDE

John Wiley & Sons Eureka Math is a comprehensive, content-rich PreK–12 curriculum that follows the focus and coherence of the Common Core State Standards in Mathematics (CCSSM) and carefully sequences the mathematical progressions into expertly crafted instructional modules. The companion Study Guides to Eureka Math gather the key components of the curriculum for each grade into a single location, unpacking the standards in detail so that both users and non-users of Eureka Math can benefit equally from the content presented. Each of the Eureka Math Curriculum Study Guides includes narratives that provide educators with an overview of what students should be learning throughout the year, information on alignment to the instructional shifts and the standards, design of curricular components, approaches to differentiated instruction, and descriptions of mathematical models. The Study Guides can serve as either a self-study professional development resource or as the basis for a deep group study of the standards for a particular grade. For teachers who are new to the classroom or the standards, the Study Guides introduce them not only to Eureka Math but also to the content of the grade level in a way they will find manageable and useful. Teachers familiar with the Eureka Math curriculum will also find this resource valuable as it allows for a meaningful study of the grade level content in a way that highlights the coherence between modules and topics. The Study Guides allow teachers to obtain a firm grasp on what it is that students should master during the year. The Eureka Math Curriculum Study Guide, Grade 2 provides an overview of all of the Grade 2 modules, including Sums and Differences to 20; Addition and Subtraction of Length Units; Place Value, Counting, and Comparison of Numbers to 1,000; Addition and Subtraction Within 200 with Word Problems to 100; Addition and Subtraction Within 1,000 with Word Problems to 100; Foundations of Multiplication and Division; Problem Solving with Length, Money, and Data; and Time, Shapes, and Fractions as Equal Parts of Shapes.

THE PATCHWORK OF WORLD HISTORY IN TEXAS HIGH SCHOOLS

UNPACKING EUROCENTRISM, IMPERIALISM, AND NATIONALISM IN THE CURRICULUM, 1920-2021

Taylor & Francis This book traces the historical development of the World History course as it has been taught in high school classrooms in Texas, a populous and nationally influential state, over the last hundred years. The author argues that the course has dynamically evolved to reflect a patchwork of competing visions that have intersected over the past century, with each new framework partially but never completely erasing or replacing those that came before. The first part of the book presents an overview of the World History course supported by a numerical analysis of textbook content and public documents, whilst the second focuses on the depiction of non-Western peoples, and persistent narratives of Eurocentrism, imperialism, and nationalism. It ultimately concludes that a more global, accurate, and balanced curriculum is possible, despite the tension between the ideas of professional world historians, who often de-center the nation-state in their quest for a truly global approach to the subject, and the historical core rationale of state-sponsored education in the United States: to produce loyal citizens. Offering a new, conceptual understanding of how colonial themes in world history curriculum have been dealt with in the past and are now engaged with in contemporary times, it provides essential context for scholars and educators with interests in the history of education, curriculum studies, and the teaching of World History in the United States.

FERTILIZERS, PILLS & MAGNETIC STRIPS

THE FATE OF PUBLIC EDUCATION IN AMERICA

IAP Now available for Kindle. Click here. "We shape our tools and then they shape us." With these words, Kenneth Boulding captured one of the great truths of the modern world. In Fertilizers, Pills, and Magnetic Strips, Gene V Glass analyzes how a few key technological inventions changed culture in America and how public education has changed as a result. Driving these changes are material self-interest and the desire for comfort and security, both of which have transformed American culture into a hyper-consuming, xenophobic society that is systematically degrading public education. Glass shows how the central education policy debates at the start of the 21st century (vouchers, charter schools, tax credits, high-stakes testing, bilingual education) are actually about two underlying issues: how can the costs of public education be cut, and how can the education of the White middle-class be "quasi-privatized" at public expense? Working from the demographic realities of the past thirty years, he projects a challenging and disturbing future for public education in America.
