Workplace discrimination is an experience that, despite four decades of equality legislation, continues to blight the lives of thousands every year. Discrimination persists on the protected grounds of sex, race, disability, age, sexual orientation, religion or belief and gender reassignment, as well as where no legal protection exists such as in relation to class background or migration status. The Handbook discusses recent changes in equality legislation as well as considering the limitations of legal frameworks in addressing inequality. However, complying with the law is only the first step towards addressing discrimination in the workplace, and the book goes beyond the law and provides evidence of good practice in promoting organisational culture change, as well as considering future directions for policy on equality action. The Gower Handbook of Discrimination at Work looks at both social justice and business case perspectives, and its message is not a negative one. The contributors have considerable depth of understanding of workplace discrimination, both as academics and equality practitioners, their work has contributed to policy formation and all are committed to improving the lives of people at work. They offer insights into existing international developments and make suggestions for the ways in which positive change can be realised. Practitioners, such as human resources professionals and other managers involved in addressing equality at work, trade unionists, equality trainers, and academics concerned with researching or teaching in the areas of employment and equality will all find this book of interest. Furthermore, it will be of value to students in the fields of business and management, employment law, equality and diversity and human resource management. **Gower Handbook of Internal Communication** CRC Press A comprehensive guide to managing communication within organizations, the Handbook recognises Internal Communication's continued growth as a management discipline. Its starting point was the idea that traditional approaches to training in the organization were no longer effective. The Handbook introduced a new model and set out the practical implications. The world of HRD has moved on, and Martyn Sloman has now drastically revised the text to reflect the increased complexity of organizational life and the many recent developments in the field. His aim remains the same: to help readers to develop a framework in which training can be effectively managed and delivered. In Part I of the text the author draws attention to the opportunities created for training by the current emphasis on competition through people. In Part II he poses the question: 'What should training managers be doing to ensure that training in their organization is as good as it can be?' Here he stresses the need to keep training aligned with business objectives, and to encourage line managers to work alongside the human resource professionals. The third and final Part considers the trainer as a strategic facilitator and examines the skills required. Martyn Sloman writes as an experienced training manager and his book is concerned, above all, with implementation. Thus the text is supported by questionnaires, survey instruments and specimen documents. With its combination of thought-provoking argument and practical guidance, the Handbook will continue to serve all those with an interest in organizational training. **A Handbook of Practical Wisdom** Leadership, Organization and Integral Business Practice Gower Publishing, Ltd. The current financial and on-going ecological crises have taught us that without practical wisdom, business, organisations and leadership cannot be sustainable. In response to this situation, the Handbook of Practical Wisdom presents a critically informed understanding of wise practices, contributing to more integrative organizational and leadership studies and practice. The focus on integration emphasises the interdependencies of practical wisdom in relation to members, groups and cultures of organisations in their socio-cultural spheres. Wisdom has long slipped from the scholarly map, and so this handbook provides revived and new mappings for today and the future. Seeking to actualize creative potentials of practical wisdom, this book and series aspires to contribute to the contemporary odysseys and quests for orientation in organisation and management research and practice. Wisdom research, as presented in this book, provides bridges to underestimated, neglected or forgotten knowledge and offers transformative passages between Scylla - the rocks of dogmatic modernity - and Charybdis - the whirlpool of dispersed post-modernity. Practical wisdom allows for a better equipped and more experiential and reflexive journey and fosters the art of mindful travelling, beyond a reactive, moralizing sentimentalism. Accordingly, this handbook serves as a medium for reassessing and rearticulating more responsible ways of 'praxis' in the field of organization and management. In this spirit, each chapter opens a space for dialogue and debate, inviting further inquiries, conversations and explorations by and among its readers: students, academics and practitioners. **Social and Critical Practice in Art Education** Trentham Books Essays describe how art can be used to explore cultural, social, and personal issues with students. **Learning to Teach Physical Education in the Secondary School** A Companion to School Experience Routledge What skills are required of secondary student physical education teachers? Shopping 3.0 Shopping, the Internet or Both? Routledge Retailers are in difficult times. The recession, global competition, government regulation and the growth of the Internet mean that costs are rising but margins are increasingly squeezed. Cor Molenaar's Shopping 3.0 offers an engaging, convincing and well-researched manifesto for the future of retailing; a manifesto which encourages retailers to switch their approach from a strategy that is based around transactions to one that is based around customers. Logic dictates that there is no one single strategy that will work for all retailers; some of them may indeed benefit from investing in e-retailing solutions and the Internet but for others, success will lie in developing a service based on customer experience or one with some apparently bespoke elements; a strategy to appeal to customers as individuals. Shopping 3.0 examines all these changes. It sketches the world of consumers; those who make their purchases from the comfort of their armchair and those who enjoy shopping with friends. Cor Molenaar explores the impact of changing consumer attitudes to shopping; the role of new technology in future retailing and the changing face of both city centre and out of town shops and malls. Shopping 3.0 offers a welcome helping hand for retailers, both physical and web-based shopkeepers; something to help you make sense of the ongoing revolution in shopping and to plan or adjust your business strategy to enable you not just to survive but to thrive in a world that will look very different in a few years time. The Discourse of Teaching Practice Feedback A Corpus-Based Investigation of Spoken and Written Modes Routledge In this book, Farr examines the spoken and written language of post-observation teaching-practice feedback on teacher education programs. To do so, she draws upon theories from discourse analysis, conversation analysis, and pragmatics to frame the analysis of feedback meetings and written tutor reports, which are then examined using comparative quantitative and qualitative corpus-based techniques. The overall aim is to determine the defining characteristics of this genre, focusing especially on pragmatic factors, with the ultimate goal of investigating the salient aspects responsible for making feedback both effective and affective. Farr's research draws upon a spoken corpus of feedback interactions and a written corpus of tutor reports from language teacher education and is also strongly informed by data in the form of diary reflections and questionnaire responses from student teachers and questionnaire responses from the relevant tutors. Evaluating and Selecting EFL Teaching Materials Heinemann Educational Publishers The Academic Library and Its Users Routledge The many recent changes in higher and further education mean that it is more important than ever to analyse the needs of academic library users, and both promote and provide the service they require. This constructive book, pervaded throughout by the impact of IT on the learning environment, surveys the influences on today's academic library, and explains how to increase user satisfaction through quality management. The author focuses particularly on users' behaviour in the library, the problems they cause or encounter, and how libraries cope. The book examines the varying needs of undergraduate and graduate, mature and part-time students, overseas students, franchised students, distance learners and other groups with special needs, explaining ways in which these needs can be identified and the service evaluated. One chapter is devoted to research and researchers' information demands. The particular requirements of subject communities and their consequences for academic libraries are also investigated, as well as the requirements of teaching staff and ways in which the library can work with them. The author emphasizes the importance of user education programmes and explains how to promote the library effectively with limited resources. For librarians, heads of services and senior library managers in further and higher education, and those, such as subject librarians, responsible for specific student groups, this book provides a comprehensive and realistic guide to providing and promoting a quality service. Students of librarianship and information management will gain valuable insight from this book into user analysis and improving the performance of information provision.
