KEY=AND - HARTMAN KAYDEN

THE GREATEST MINDS AND IDEAS OF ALL TIME

Simon and Schuster A wise and witty compendium of the greatest thoughts, greatest minds, and greatest books of all time -- listed in accessible and succinct form -- by one of the world's greatest scholars. From the "Hundred Best Books" to the "Ten Greatest Thinkers" to the "Ten Greatest Poets," here is a concise collection of the world's most significant knowledge. For the better part of a century, Will Durant dwelled upon -- and wrote about -- the most significant eras, individuals, and achievements of human history. His selections have finally been brought together in a single, compact volume. Durant eloquently defends his choices of the greatest minds and ideas, but he also stimulates readers into forming their own opinions, encouraging them to shed their surroundings and biases and enter "The Country of the Mind," a timeless realm where the heroes of our species dwell. From a thinker who always chose to exalt the positive in the human species, The Greatest Minds and Ideas of All Time stays true to Durant's optimism. This is a book containing the absolute best of our heritage, passed on for the benefit of future generations. Filled with Durant's renowned wit, knowledge, and unique ability to explain events and ideas in simple and exciting terms, this is a pocket-size liberal arts and humanist curriculum in one volume.

THE GREATEST MINDS AND IDEAS OF ALL TIME

A compendium of the greatest thoughts, greatest minds and greatest books - listed in accessible and concise form - from one of the world's greatest scholars.

THE TWO GREATEST IDEAS

HOW OUR GRASP OF THE UNIVERSE AND OUR MINDS CHANGED EVERYTHING

Princeton University Press Two simple yet tremendously powerful ideas that shaped virtually every aspect of civilization This book is a breathtaking examination of the two greatest ideas in human history. The first is the idea that the human mind can grasp the universe. The second is the idea that the human mind can grasp itself. Acclaimed philosopher Linda Zagzebski shows how the first unleashed a cultural awakening that swept across the world in the first millennium BCE, giving birth to philosophy, mathematics, science, and virtually all the major world religions. It dominated until the Renaissance, when the discovery of subjectivity profoundly transformed the arts and sciences. This second great idea governed our perception of reality up until the dawn of the twenty-first century. Zagzebski explores how the interplay of the two ideas led to conflicts that have left us ambivalent about the relationship between the mind and the universe, and have given rise to a host of moral and political rifts over the deepest questions human beings face. Should we organize civil society around the ideal of living in harmony with the world or that of individual autonomy? Zagzebski explains how the two greatest ideas continue to divide us today over issues such as abortion, the environment, free speech, and racial and gender identity. This panoramic book reveals what is missing in our conception of ourselves and the world, and imagines a not-too-distant future when a third great idea, the idea that human minds can grasp each other, will help us gain an idea of the whole of reality.

GOD SEEN THROUGH THE EYES OF THE GREATEST MINDS

Simon and Schuster Through years of exhaustive research, Caputo has discovered letters, writings and quotes revealing what the world's greatest artists, scientists, philosophers, writers and musicians thought about the God of heaven. Through the pages of this timeless work, readers can engage the thoughts of history's most celebrated people, including Mozart, Isaac Newton, Elizabeth Barrett Browning, Shakespeare, Albert Einstein and Michelangelo.

GREAT MINDS SPEAK TO YOU

Light Technology Publishing Many in spirit look on these times of difficulty, abundance, trouble, and innovation and wish to share with you their experiences and ideas. Some famous names and faces will come to mind as you read this book, and you will glean some fine information about their own learning, their own suffering, and indeed their own experience in the life after this life, for they all wish to tell you that there is no death as you perceive it to be. They are all there in their astral forms, enjoying their continued growth, their continued expansion, and their continued joy in living. Their messages are as varied as their lives were, and our purpose is this: For you to understand your true nature, your true potential, you must let go of your fear of death, for it makes you afraid to live. It causes you to rush and panic, to become scared, and to become paralyzed. If you truly understood that you are eternal beings, forgiven for all your errors and blamed for nothing that you would call a sin, you would open your hearts and minds to so much more and enjoy yourselves so much more. You would not suffer so at the loss of your loved ones, and you would work less and achieve more, for when you are in fear and grief, you are not yourselves and cannot achieve the goals that you have set for yourselves before you decided to be born onto this plane you call life. Read this with an open mind and heart, and hear what these beings have to say. You have revered and reviled them in life; now let them complete their stories in what you call death, for that is the complete story, is it not? ? Ananda

MAIMONIDES

THE LIFE AND WORLD OF ONE OF CIVILIZATION'S GREATEST MINDS

Doubleday Religion Presents a full history of the medieval philosopher, physician, and lawmaker, placing the events of his life in contact with the social, religious, and political issues of the medieval Mediterranean world.

GREAT MINDS IN REGIONAL SCIENCE

VOLUME 1

Springer Nature This is the first volume in a new series on 'Great Minds in Regional Science,' which seeks to present a contemporary view on the scientific relevance of the work done by great thinkers in regional science. It presents, among others, Walter Isard, Martin Beckmann and Gunnar Myrdal. Each contribution combines factual biographical information, a description of their major contributions, and a discussion of the broader context of the work, as well as an assessment of its current relevance, scientific recognition and policy impact. The book attempts to fill a gap in our knowledge, and to respond to the growing interest in the formation and development of the field of regional science and its key influential figures.

THE GREAT MINDS OF INVESTING

OUT OF THEIR MINDS

Open Road Media A writer finds himself trapped in an isolated village where anything imagined becomes reality in this wildly inventive contemporary fantasy Hoping to write his book in quiet and seclusion, Horton Smith has returned home to Pilot Knob. Here, in the tiny village where he passed so many carefree childhood years, he is untroubled by the pressures of the big city and can freely answer the call of his muse. Of course, back in the city Horton didn't have to run from dinosaurs. There were no cartoon hillbillies offering him moonshine, Don Quixote was content to confine himself to the pages of a book, and the Devil himself was not on Horton's tail. Something very, very unusual is going on in Pilot Knob, and Horton Smith is determined to get to the bottom of it—if his own imagination doesn't kill him first! In Out of Their Minds, science fiction Grand Master Clifford D. Simak changes gears, treating his readers to a delightfully satiric flight of fancy and fantasy. An award-winning author renowned for his remarkable visions of the future, Simak brings creatures and characters from humankind's collective imagination to breathtaking life in this fast-moving and unforgettable tale.

GREAT MINDS DON'T THINK ALIKE - DEBATES ON CONSCIOUSNESS, REALITY, INTELLIGENCE, FAITH, TIME, AI, IMMORTALITY, AND THE HUMAN

Leading scientists, philosophers, historians, and public intellectuals debate the big questions. These public dialogues model constructive engagement between the sciences and the humanities--and show why intellectual cooperation is necessary to shape our collective future.

GREAT MINDS AND HOW TO GROW THEM

HIGH PERFORMANCE LEARNING

Routledge Great Minds and How to Grow Them is a handbook for parents that shows how they can grow the minds of their children and teenagers and guide them to success both at school and in life. The latest neurological and psychological research is proving that most children are capable of reaching high levels of performance that were previously associated only with the gifted and talented. Brains are malleable and IQ is not fixed yet, without parental engagement in their learning, many children don't reach the levels of performance that are associated with academic success. Combining new knowledge with extensive research into how we learn, this book proves that by using simple, everyday techniques that are both rooted in research and accessible for parents, children can learn to learn more successfully. There is room at the top of the class for many more children than we ever thought possible. An engaging collaboration between a world-class academic and an award-winning journalist, this inspirational book includes chapters on: how to develop a good home learning environment; how to make the most of school; how to develop values, attitudes and attributes that are associated with success at school and in life; how to develop thinking and learning skills in the three ages of learning; how to tackle potentially tricky areas like homework and adolescence. This practical guide will be essential reading for parents, teachers and all those interested in helping children and young people to reach their full potential.

GREAT MINDS IN MANAGEMENT

THE PROCESS OF THEORY DEVELOPMENT

Oxford University Press on Demand Michael Hitt and Ken Smith bring together some of the most influential and original thinkers in management. They also reflect on the process of theory development, presenting their own personal accounts of the gestation of these theories.

BITE-SIZE EINSTEIN

QUOTATIONS ON JUST ABOUT EVERYTHING FROM THE GREATEST MIND OF THE TWENTIETH CENTURY

St. Martin's Press The kindly, white-haired old fellow with the bushy mustache once called "the world's grandfather," Albert Einstein was easily the twentieth century's most remarkable and revered man of science. His leaps of imagination changed forever the way we look at the universe. He gained international celebrity by the very force of his personality, his wry sense of humor (often at the expense of himself), and his limitless humanity. The mind of Albert Einstein bulged at the seams not only with mathematics and physics but also with an insatiable curiosity about life itself. His wide-ranging observations and opinions about the nature of life and the world--not to mention the life and world of nature--are rich in insight, wit, and wisdom. His vision also us a unique opportunity to see ourselves. His thoughts are treasures in small packages; taken as a whole, they offer images and ideas of what we are and what it is possible to be.

HEROES OF HISTORY

A BRIEF HISTORY OF CIVILIZATION FROM ANCIENT TIMES TO THE DAWN OF THE MODERN AGE

Simon and Schuster In the tradition of his own bestselling masterpieces The Story of Civilization and The Lessons of History, Pulitzer Prize-winning historian Will Durant traces the lives and ideas of those who have helped to define civilization, from its dawn to the beginning of the modern world. Heroes of History is a book of life-enhancing wisdom and optimism, complete with Durant's wit, knowledge, and unique ability to explain events and ideas in simple, exciting terms. It is the lessons of our heritage passed on for the edification and benefit of future generations—a fitting legacy from America's most beloved historian and philosopher. Will Durant's popularity as America's favorite teacher of history and philosophy remains undiminished by time. His books are accessible to readers of every kind, and his unique ability to compress complicated ideas and events into a few pages without ever "talking down" to the reader, enhanced by his memorable wit and a razor-sharp judgment about men and their motives, made all of his books huge bestsellers. Heroes of History carries on this tradition of making scholarship and philosophy understandable to the general reader, and making them good reading, as well. At the dawn of a new millennium and the beginning of a new century, nothing could be more appropriate than this brilliant book that examines the meaning of human civilization and history and draws from the experience of the past the lessons we need to know to put the future into context and live in confidence, rather than fear and ignorance.

FALLEN LEAVES

LAST WORDS ON LIFE, LOVE, WAR, AND GOD

Simon and Schuster Praised as a "revelatory" book by The Wall Street Journal, this is the last and most personal work of Pulitzer Prize-winning author and historian Will Durant, discovered thirty-two years after his death. The culmination of Will Durant's sixty-plus years spent researching the philosophies, religions, arts, sciences, and civilizations from across the world, Fallen Leaves is the distilled wisdom of one of the world's greatest minds, a man with a renowned talent for rendering the insights of the past accessible. Over the course of Durant's career he received numerous letters from "curious readers who have challenged me to speak my mind on the timeless questions of human life and fate." With Fallen Leaves, his final book, he at last accepted their challenge. In twenty-two short chapters, Durant addresses everything from youth and old age to religion, morals, sex, war, politics, and art. Fallen Leaves is "a thought-provoking array of opinions" (Publishers Weekly), offering elegant prose, deep insights, and Durant's revealing conclusions about the perennial problems and greatest joys we face as a species. In Durant's singular voice, here is a message of insight for everyone who has ever sought meaning in life or the counsel of a learned friend while navigating life's journey.

GREAT MINDS. ALEXANDER VON HUMBOLDT

Great Minds The Great Minds series introduces young children to the greatest scientists of all time. First up: Alexander von Humboldt, the father of the climate movement. For researchers ages 9 years and up. Young Alexander von Humboldt's pockets are always full of treasures from the forest: stones, insects, plants, and fossils. In the second half of the nineteenth century, he grows up to become a science-adventurer and climate genius. His expeditions take him all over the world and lead to many new discoveries.

THE CODDLING OF THE AMERICAN MIND

HOW GOOD INTENTIONS AND BAD IDEAS ARE SETTING UP A GENERATION FOR FAILURE

Penguin New York Times Bestseller • Finalist for the 2018 National Book Critics Circle Award in Nonfiction • A New York Times Notable Book • Bloomberg Best Book of 2018 "Their distinctive contribution to the higher-education debate is to meet safetyism on its own, psychological turf . . . Lukianoff and Haidt tell us that safetyism undermines the freedom of inquiry and speech that are indispensable to universities." —Jonathan Marks, Commentary "The remedies the book outlines should be considered on college campuses, among parents of current and future students, and by anyone longing for a more sane society." —Pittsburgh Post-Gazette Something has been going wrong on many college campuses in the last few years. Speakers are shouted down. Students and professors say they are walking on eggshells and are afraid to speak honestly. Rates of anxiety, depression, and

suicide are rising—on campus as well as nationally. How did this happen? First Amendment expert Greg Lukianoff and social psychologist Jonathan Haidt show how the new problems on campus have their origins in three terrible ideas that have become increasingly woven into American childhood and education: What doesn't kill you makes you weaker; always trust your feelings; and life is a battle between good people and evil people. These three Great Untruths contradict basic psychological principles about well-being and ancient wisdom from many cultures. Embracing these untruths—and the resulting culture of safetyism—interferes with young people's social, emotional, and intellectual development. It makes it harder for them to become autonomous adults who are able to navigate the bumpy road of life. Lukianoff and Haidt investigate the many social trends that have intersected to promote the spread of these untruths. They explore changes in childhood such as the rise of fearful parenting, the decline of unsupervised, child-directed play, and the new world of social media that has engulfed teenagers in the last decade. They examine changes on campus, including the corporatization of universities and the emergence of new ideas about identity and justice. They situate the conflicts on campus within the context of America's rapidly rising political polarization and dysfunction. This is a book for anyone who is confused by what is happening on college campuses today, or has children, or is concerned about the growing inability of Americans to live, work, and cooperate across party lines.

I THINK THEREFORE I EAT

THE WORLD'S GREATEST MINDS TACKLE THE FOOD QUESTION

Turner I Think Therefore I Eat offers wisdom and practical advice, from scientific studies to personal accounts, to make sense of one of life's inescapable questions: "What to eat?"

ILLUMINATIONS: WISDOM FROM THIS PLANET'S GREATEST MINDS

Wisdom is a key to wealth, health, and happiness. More valuable than knowledge, wisdom is gained by learning from the past to solve problems in the present. Divided into ten easy-to-read sections, ILLUMINATIONS gives insight into the minds of billionaires, royalty, inventors, politicians, and spiritual leaders who have discovered the secrets of prosperity. Topics include: Power & Leadership Love & Relationships Wealth & Success Fame & Prestige Knowledge & Wisdom Choices & Decisions Hardships & Bravery Science & Belief Health & Healing Life & Death Presented in beautiful pages with artwork throughout, ILLUMINATIONS is a compass for all who seek lives of greatness.

GREAT MINDS

ISAAC NEWTON, NIKOLA TESLA, AND ALBERT EINSTEIN FOUNDERS OF THE SCIENTIFIC AGE

Createspace Independent Publishing Platform Great Minds: Isaac Newton, Nikola Tesla, and Albert Einstein Founders of the Scientific Age The last four hundred years have been some of the most incredible years in human history. From the 17th century to the 21st century, humans went from being almost universally agrarian with sailing vessels, muskets, and astrolabes being the most cutting edge technology on the planet to an era where the world is almost universally industrial or post-industrial with airplanes, cars, spaceships, computers, widespread electricity, enormous power from coal, oil, and nuclear power, and the ability to produce much more food than was ever possible before the Industrial Revolution. This book describes the lives and ideas of three of the minds who made this transition possible: Isaac Newton, Nikola Tesla, and Albert Einstein. What was it about these men that allowed them to change the world with their ideas how the universe and technology worked? In this book you will learn about how these three men were able to turn their respective worlds upside-down with their unconventional thinking, thirst for knowledge, far-reaching vision for the world, and their sheer genius. They all had rather different personalities but what unites them is that they all wanted to know how the world really worked were able to train their minds to accomplish that goal. It wasn't easy for any of them and they all lived in relative isolation developing their ideas and inventions while often receiving opposition from the existing scientific, political, and cultural establishment, but in so doing they were able to transform our understanding of universe and society in a way that led to the birth of the modern scientific age. The Modern World is indebted to these men for good or ill.

THE WORLDS GREAT MINDS

Bounty Books Information on 12 people of changed the world: Aristotle, Galileo Galilei, William Harvey, Isaac Newton, Antoine Lavoisier, Alexander von Humboldt, Michael Faraday, Charles Darwin, Louis Pasteur, Marie Curie, Sigmund Freud, Albert Einstein.

ARISTOTLE

GENIUS PHILOSOPHER AND SCIENTIST

Enslow Publishing, LLC Aristotle is one of the most significant figures in all of human history. Over the course of his life, he studied and wrote about every possible field of knowledge. He studied physics, zoology, botany, and chemistry before any of these fields of science even had names. Without the benefit of modern tools like the telescope or microscope, Aristotle still laid the foundation for nearly all later developments in Western science. In addition to his work in science, Aristotle contributed a great deal to our ideas about art, literature, ethics, and theology. Aristotle's influence is so deep, in fact, that many of his ideas have been absorbed into the very language of science and philosophy.

BIG NATE: GREAT MINDS THINK ALIKE

Andrews McMeel Publishing Nate Wright is a wisecracking 11-year-old who knows he's destined for greatness. The star of Big Nate, the daily and Sunday comic strip that made its debut in 1991, Nate's a sixth-grade chess prodigy, a self-described genius, and the all-time record holder for detentions in school history. He's often in hot water with his teachers and classmates, but Nate's winning personality and can-do attitude always make him a big hit with readers.

THE RIGHTEOUS MIND

WHY GOOD PEOPLE ARE DIVIDED BY POLITICS AND RELIGION

Vintage Presents a groundbreaking investigation into the origins of morality at the core of religion and politics, offering scholarly insight into the motivations behind cultural clashes that are polarizing America.

100 BEST BOOKS FOR AN EDUCATION

EINSTEIN'S DICE AND SCHRÖDINGER'S CAT

HOW TWO GREAT MINDS BATTLED QUANTUM RANDOMNESS TO CREATE A UNIFIED THEORY OF PHYSICS

Basic Books When the fuzzy indeterminacy of quantum mechanics overthrew the orderly world of Isaac Newton, Albert Einstein and Erwin Schrödinger were at the forefront of the revolution. Neither man was ever satisfied with the standard interpretation of quantum mechanics, however, and both rebelled against what they considered the most preposterous aspect of quantum mechanics: its randomness. Einstein famously quipped that God does not play dice with the universe, and Schrödinger constructed his famous fable of a cat that was neither alive nor dead not to explain quantum mechanics but to highlight the apparent absurdity of a theory gone wrong. But these two giants did more than just criticize: they fought back, seeking a Theory of Everything that would make the universe seem sensible again. In Einstein's Dice and Schrödinger's Cat, physicist Paul Halpern tells the little-known story of how Einstein and Schrödinger searched, first as collaborators and then as competitors, for a theory that transcended quantum weirdness. This story of their quest—which ultimately failed—provides readers with new insights into the history of physics and the lives and work of two scientists whose obsessions drove its progress. Today, much of modern physics remains focused on the search for a Theory of Everything. As Halpern explains, the recent discovery of the Higgs Boson makes the Standard Model—the closest thing we have to a unified theory—nearly complete. And while Einstein and Schrödinger failed in their attempt to explain everything in the cosmos through pure geometry, the development of string theory has, in its own quantum way, brought this idea back into vogue. As in so many things, even when they were wrong, Einstein and Schrödinger couldn't help but get a great deal right.

HUMANS OF MAGIC

INTERVIEWS WITH THE GAME'S GREATEST MINDS

"Ahead of its time...James figures out what really makes some of the greatest minds in Magic tick." --Autumn Burchett, Magic Pro League member and two-time English National Champion "For the Magic The Gathering player who is a part of this community, who loves not just the cards but the world of Magic itself, this is a great pickup for reading." --Tolarian Community College, YouTube video review "James fills a gap in the Magic the Gathering world with his work behind the scenes, not only with CardBoard Live, but also with his ethnographic research into the lives of Magic personalities." --Vincent "Deathsie" Chu, professional Magic Arena streamer 12 of Magic: The Gathering's finest players. 12 interviews. THE DAILY SHOW (THE BOOK)

AN ORAL HISTORY AS TOLD BY JON STEWART, THE CORRESPONDENTS, STAFF AND GUESTS

Grand Central Publishing NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning The Daily Show with Jon Stewart, as told by its correspondents,

writers, and host. For almost seventeen years, *The Daily Show* with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of *The Daily Show*'s most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, *The Daily Show* has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

THE FOURTH INDUSTRIAL REVOLUTION

Currency Between the 18th and 19th centuries, Britain experienced massive leaps in technological, scientific, and economical advancement

GREAT MINDS DON'T THINK ALIKE!

SUCCESS FOR STUDENTS THROUGH THE APPLICATION OF PSYCHOLOGICAL TYPE IN SCHOOLS

Every day teachers are faced with a sea of expectant faces, each with a different way of seeing and learning. How can we motivate and empower every one of these young people to reach their highest potential? In *Great Minds Don't Think Alike* education experts Diane Payne and Sondra VanSant provide the ultimate lesson plan for transforming classrooms into places where every child becomes engaged in the learning process. Some of our greatest thinkers make illustrative appearances inside, including Einstein, Aristotle, Earhart and Caldecott, demonstrating and reinforcing the value of diversity in the highest standards of thought and action. Presenting a variety of paths to success allows students to take responsibility for their choices, and yields a love of learning that will stay with them for life. The authors' practical insights into psychological type and distinct learning styles are accompanied by a comprehensive library of reproducible handouts, exercises, and support materials on the included Resource CD-ROM. Teachers, principals, administrators, and parents will appreciate this book as a lens that reveals the power of diversity in learning styles and relationships this book elucidates, inspiring everyone to help each of those faces to do their best!

CEO EXCELLENCE

THE SIX MINDSETS THAT DISTINGUISH THE BEST LEADERS FROM THE REST

Simon and Schuster "Based on extensive interviews with today's . . . corporate leaders, this look at how the best CEOs do their jobs focuses on the mindsets and actions that foster an environment of excellence"--

RESCUING SOCRATES

HOW THE GREAT BOOKS CHANGED MY LIFE AND WHY THEY MATTER FOR A NEW GENERATION

Princeton University Press A Dominican-born academic tells the story of how the Great Books transformed his life—and why they have the power to speak to people of all backgrounds What is the value of a liberal education? Traditionally characterized by a rigorous engagement with the classics of Western thought and literature, this approach to education is all but extinct in American universities, replaced by flexible distribution requirements and ever-narrower academic specialization. Many academics attack the very idea of a Western canon as chauvinistic, while the general public increasingly doubts the value of the humanities. In *Rescuing Socrates*, Dominican-born American academic Roosevelt Montás tells the story of how a liberal education transformed his life, and offers an intimate account of the relevance of the Great Books today, especially to members of historically marginalized communities. Montás emigrated from the Dominican Republic to Queens, New York, when he was twelve and encountered the Western classics as an undergraduate in Columbia University's renowned Core Curriculum, one of America's last remaining Great Books programs. The experience changed his life and determined his career—he went on to earn a PhD in English and comparative literature, serve as director of Columbia's Center for the Core Curriculum, and start a Great Books program for low-income high school students who aspire to be the first in their families to attend college. Weaving together memoir and literary reflection, *Rescuing Socrates* describes how four authors—Plato, Augustine, Freud, and Gandhi—had a profound impact on Montás's life. In doing so, the book drives home what it's like to experience a liberal education—and why it can still remake lives.

GREAT MINDS IN ENTREPRENEURSHIP RESEARCH

CONTRIBUTIONS, CRITIQUES, AND CONVERSATIONS

Springer Nature Awarded every year since 1996, the Global Award for Entrepreneurship Research (GAER) recognizes outstanding contributions in quality and importance to scientific research in entrepreneurship. This book examines the work of GAER award winners (1996-2020), discusses major contributions to the field, identifies critiques of their work, and highlights directions for future research. Students and faculty will find this book to be a rich resource for understanding the impact of leading entrepreneurship scholars.

ZEN AND THE ART OF MOTORCYCLE MAINTENANCE

AN INQUIRY INTO VALUES

Harper Collins THE CLASSIC BOOK THAT HAS INSPIRED MILLIONS A penetrating examination of how we live and how to live better Few books transform a generation and then establish themselves as touchstones for the generations that follow. *Zen and the Art of Motorcycle Maintenance* is one such book. This modern epic of a man's search for meaning became an instant bestseller on publication in 1974, acclaimed as one of the most exciting books in the history of American letters. It continues to inspire millions. A narration of a summer motorcycle trip undertaken by a father and his son, *Zen and the Art of Motorcycle Maintenance* becomes a personal and philosophical odyssey into fundamental questions on how to live. The narrator's relationship with his son leads to a powerful self-reckoning; the craft of motorcycle maintenance leads to an austere beautiful process of reconciling science, religion, and humanism. Resonant with the confusions of existence, this classic is a touching and transcendent book of life. This new edition contains an interview with Pirsig and letters and documents detailing how this extraordinary book came to be.

STAMPED FROM THE BEGINNING

THE DEFINITIVE HISTORY OF RACIST IDEAS IN AMERICA

Bold Type Books The National Book Award winning history of how racist ideas were created, spread, and deeply rooted in American society. Some Americans insist that we're living in a post-racial society. But racist thought is not just alive and well in America -- it is more sophisticated and more insidious than ever. And as award-winning historian Ibram X. Kendi argues, racist ideas have a long and lingering history, one in which nearly every great American thinker is complicit. In this deeply researched and fast-moving narrative, Kendi chronicles the entire story of anti-black racist ideas and their staggering power over the course of American history. He uses the life stories of five major American intellectuals to drive this history: Puritan minister Cotton Mather, Thomas Jefferson, abolitionist William Lloyd Garrison, W.E.B. Du Bois, and legendary activist Angela Davis. As Kendi shows, racist ideas did not arise from ignorance or hatred. They were created to justify and rationalize deeply entrenched discriminatory policies and the nation's racial inequities. In shedding light on this history, *Stamped from the Beginning* offers us the tools we need to expose racist thinking. In the process, he gives us reason to hope.

BREAKFAST WITH SOCRATES

THE PHILOSOPHY OF EVERYDAY LIFE

Profile Books What does it mean to be awake? What exactly is therapeutic about retail therapy? And what are you really working on when you're at your desk, in the gym, or having dinner? From getting ready in the morning, through heading to work, going to a party, having sex and falling back to sleep, *Breakfast with Socrates* provides an hour-by-hour commentary on what history's greatest philosophers have said about the meaning behind everything we do. A fascinating exploration of our daily lives, *Breakfast with Socrates* also draws on literature, art, politics and psychology to offer an informal introduction to the history of ideas that will help anyone to think more healthily. *Breakfast with Socrates* will never be the same again...
