**The Language of Science and Faith Straight Answers to Genuine Questions** *InterVarsity Press* World-renowned scientist Francis Collins and fellow scientist Karl Giberson show how we can embrace both science and faith without compromising either. Their fascinating treatment explains how God cares for and interacts with his creation while science offers a reliable way to understand the world he made. **The Language of God A Scientist Presents Evidence for Belief** *Simon and Schuster* Dr Francis S. Collins, head of the Human Genome Project, is one of the world's leading scientists, working at the cutting edge of the study of DNA, the code of life. Yet he is also a man of unshakable faith in God. How does he reconcile the seemingly unreconcilable? In THE LANGUAGE OF GOD he explains his own journey from atheism to faith, and then takes the reader on a stunning tour of modern science to show that physics, chemistry and biology -- indeed, reason itself -- are not incompatible with belief. His book is essential reading for anyone who wonders about the deepest questions of all: why are we here? How did we get here? And what does life mean? **The Language of Science and Faith Straight Answers to Genuine Questions (16pt Large Print Edition)** Christians affirm that everything exists because of God--from subatomic quarks to black holes. Science often claims to explain nature without including God at all. And thinking Christians often feel forced to choose between the two. But the good news is that we don't have to make a choice. Science does not overthrow the Bible. Faith does not require rejecting science. World-renowned scientist Francis Collins, author of The Language of God, along with fellow scientist Karl Giberson show how we can embrace both. Their fascinating treatment explains how God cares for and interacts with his creation while science offers a reliable way to understand the world he made. Together they clearly answer dozens of the most common questions people ask about Darwin, evolution, the age of the earth, the Bible, the existence of God and our finely tuned universe. They also consider how their views stack up against the new atheists as well as against creationists and adherents of intelligent design. The authors disentangle the false conclusions of Christians and atheists alike about science and evolution from the actual results of research in astronomy, physics, geology and genetics. In its place they find a story of the grandeur and beauty of a world made by a supremely creative God. **The Language of Life DNA and the Revolution in Personalised Medicine** *Profile Books* We are in the midst of a medical revolution: in just a few years, we will be able to have our complete DNA sequenced at an affordable cost. Analysing the content of our genomes will allow a powerful estimate of our future risks of illness - from cystic fibrosis and Huntington's disease, to cancer and diabetes - which will help us devise our own personalised blueprint of preventive medicine. This will have enormous implications on everything from our day-to-day choices like diet and exercise, to childbearing and health insurance - and it may even challenge what we thought we knew about our ethnic histories. Combining cutting-edge scientific research with practical advice, Francis Collins examines this remarkable phenomenon, which will transform healthcare worldwide. We now know that the language spoken by our DNA is the language of life itself, and in this important book Collins shows how reading that language will help save lives. **Belief in God in an Age of Science** *Yale University Press* John Polkinghorne is a major figure in today's debates over the compatibility of science and religion. Internationally known as both a theoretical physicist and a theologian—the only ordained member of the Royal Society—Polkinghorne brings unique qualifications to his inquiry into the possibilities of believing in God in an age of science. In this thought-provoking book, the author focuses on the collegiality between science and theology, contending that these "intellectual cousins" are both concerned with interpreted experience and with the quest for truth about reality. He argues eloquently that scientific and theological inquiries are parallel. The book begins with a discussion of what belief in God can mean in our times. Polkinghorne explores a new natural theology and emphasizes the importance of moral and aesthetic experience and the human intuition of value and hope. In other chapters, he compares science's struggle to understand the nature of light with Christian theology's struggle to understand the nature of Christ. He addresses the question, Does God act in the physical world? And he extends his ideas about the role of chaos theory, surveys the prospects for future dialogue between scientific and theological thinkers, and defends a critical realist understanding of the activities of both disciplines. Polkinghorne concludes with a consideration of the nature of mathematical truths and the links between the complementary realities of physical and mental experience. **The Science of God The Convergence of Scientific and Biblical Wisdom** *Simon*

and Schuster For the readers of *The Language of God*, another instant classic from "a sophisticated and original scholar" (Kirkus Reviews) that disputes the idea that science is contrary to religion. In *The Science of God*, distinguished physicist and Biblical scholar Gerald L. Schroeder demonstrates the surprising parallels between a variety of Biblical teachings and the findings of biochemists, paleontologists, astrophysicists, and quantum physicists. In a brilliant and wide-ranging discussion of key topics that have divided science and religion—free will, the development of the universe, the origin of life, and the origin of man—Schroeder argues that the latest science and a close reading of the Bible are not just compatible but interdependent. This timely reissue of *The Science of God* features a brand-new preface by Schroeder and a compelling appendix that addresses the highly publicized experiment in 2008 in which scientists attempted to re-create the chemical composition of the cosmos immediately after the Big Bang. It also details Schroeder's lucid explanations of complex scientific and religious concepts, such as the theory of relativity, the passage of time, and the definitions of crucial Hebrew words in the Bible. Religious skeptics, Biblical literalists, scientists, students, and physicists alike will be riveted by Schroeder's remarkable contribution to the raging debate between science and religion. **Belief Readings on the Reason for Faith** Harper Collins "A brilliant, wide ranging and powerful series of readings on the possibilities, problems and mysteries of faith. This book belongs on the shelf of every believer—and every serious skeptic." — Rabbi David Wolpe, author of *Why Faith Matters* "This life-giving, faith-filled and hard-nosed collection reveals why, as St. Anselm wrote, true faith always seeks to understand." — Rev. James Martin, author of *My Life with the Saints* From Dr. Francis Collins, New York Times bestselling author of *The Language of God*, comes the definitive reader on the rationality of faith. **The Power of Faith, Exemplified in the Life and Writings of the Late Mrs. ...** BoD - Books on Demand Reproduction of the original: *The Power of Faith, Exemplified in the Life and Writings of the Late Mrs. ...* by Isabella Graham **A History of the Warfare of Science with Theology in Christendom Created on Purpose for Purpose Manifesting Your God Purpose** Tate Publishing Do you know that you were well thought out in the mind of God? Do you know you were not a by-chance product? Do you know you have a God purpose? *Created On Purpose For Purpose* holds the keys that will unlock all the answers and equip you to walk out your God purpose! Everyone has a sense that they were born for a purpose. But there is something more than just a purpose. The God purpose was designed specifically for you, and it's your responsibility to live out this assignment! From her own experience in discovering her God purpose, author Lisa Singh has outlined the steps to take to discover your God purpose. This easy-to-read guide will instruct you to explore why God designed a special purpose for you and how you can come to understand it. Once you know your place in the world, you can begin to live your purpose and thereby bless not only yourself, but the world you live in. Realize who you are and learn practical applications for victorious, fulfilling living. Whether studying alone or in a small Bible study, you'll find the tools you need to find your God purpose and start living your life the way it was intended to be lived—on purpose! **Proof of God Within & Beyond Science** Notion Press While extending a strong challenge to the superstition of atheism, the principal aim of this book is to demonstrate the fact that the major scientific discoveries that have been made so far, distinctively and expressly reveal the existence of an intelligent and omnipotent Designer who has thoughtfully and intentionally instituted all universal laws with stark precision and accuracy. In this discussion I have also emphasized the incapability of science to stand alone as a final deciding instrument on matters that extend beyond the natural realm. Hence no proof of the Divine Existence can be established by reference to science alone, but through logical reasoning based on obvious and explicit facts. I have also highlighted the reality that most scientific phenomena cannot be explained without recourse to the role of a Supernatural Power. **The Revelation of St. John an Open Book What's the Least I Can Believe and Still Be a Christian? New Edition with Study Guide A Guide to What Matters Most** Westminster John Knox Press Pastor and author Martin Thielen has compiled a list of ten things people need to believe, and ten things they don't, in order to be a Christian. This lively and engaging book will be a help to seekers as well as a comfort to believers who may find themselves questioning some of the assumptions they grew up with. With an accessible, storytelling style that's grounded in solid biblical scholarship, Thielen shows how Christians don't need to believe that sinners will be "left behind" to burn in hell or that it's heresy to believe in evolution. And while we must always take the Bible seriously, we don't always have to take it literally. At the same time, Christians do need to believe in Jesus—his life, his teachings, his death and resurrection, and his vision for the world. A great benefit of those beliefs is that they provide promising answers to life's most profound questions, including: Where is God? What matters most? What brings fulfillment? What about suffering? Is there hope? Thielen articulates centrist, mainline Christianity in a way that's fresh and easy to understand, and offers authentic Christian insights that speak to our deepest needs. This new edition includes a leader's guide, previously only available online, and a new introduction from the author that reflects on the book's reception. The leader's guide features unique and easily implemented aids for carrying out a seven-week, congregation-wide initiative that will help local churches reach out to their communities. As revealed in this book, the answer is a resounding yes. *Faith and Physics* takes the reader on a step-by-step journey through the often startling world of modern physics, showing how recent scientific evidence not only supports, but in many cases, demands an acceptance of spiritual, mystical, and paranormal principles. If you, like many modern people, have yearned to believe in something beyond the mundane day-to-day physicality of life, but have feared that to do so would be tantamount to intellectual suicide, this book will prove that you need not choose between modern certainty and mystical doctrine, for both are completely consistent. **The Science of Being Great** GENERAL PRESS The author of 'The Science of Getting Rich' brings you 'The Science of Being Great'. Wallace D. Wattles introduced the world to the power of positive thinking. Greatness is equally inherent in all and therefore every person may become great. Man may overcome both heredity and circumstances by exercising the inherent creative power of the soul. Talent may merely be one faculty developed out of proportion to other faculties, but genius is the union of man and God in the acts of the soul. Great men are always greater than their deeds. They are in connection with a reserve of power that is without limit. We do not know where the boundary of the mental powers of man is; we do not even know that there is a boundary. **What's So Great About Christianity** Simon and Schuster FIRM STREET DATE = NOVEMBER 4, 2008. STORES MUST NOT HAVE THIS TITLE ON DISPLAY BEFORE 11/4/08. A low-cost softcover that is perfect to give to seeking friends and neighbors to explain why an intelligent, college-educated person can believe in Christianity. Is Christianity true?

Can educated, thinking people really believe the Bible? Or, do the atheists have it right? Has Christianity been disproved by science and discredited as a guide to morality? Best-selling author Dinesh D'Souza (*What's So Great About America*) approaches Christianity with a skeptical eye, but treats the skeptics with equal skepticism. The result is a book that will challenge the assumptions of doubters and affirm that there really is, indeed, something great about Christianity. **Believing Is Seeing A Physicist Explains How Science Shattered His Atheism and Revealed the Necessity of Faith** Tyndale House Publishers, Inc. Is your worldview enlightened enough to accommodate both science and God at the same time? Dr. Michael Guillen, a best-selling author, Emmy award-winning journalist and former physics instructor at Harvard, used to be an Atheist—until science changed his mind. Once of the opinion that people of faith are weak, small-minded folks who just don't understand science, Dr. Guillen ultimately concluded that not only does science itself depend on faith, but faith is actually the mightiest power in the universe. In *Believing Is Seeing*, Dr. Guillen recounts the fascinating story of his journey from Atheism to Christianity, citing the latest discoveries in neuroscience, physics, astronomy, and mathematics to pull back the curtain on the mystery of faith as no one ever has. Is it true that "seeing is believing?" Or is it possible that reality can be perceived most clearly with the eyes of faith—and that truth is bigger than proof? Let Dr. Guillen be your guide as he brilliantly argues for a large and enlightened worldview consistent with both God and modern science. **The Comprehensive Guide to Science and Faith Exploring the Ultimate Questions About Life and the Cosmos** Harvest House Publishers Science and Faith Can—and Do—Support Each Other Science and Christianity are often presented as opposites, when in fact the order of the universe and the complexity of life powerfully testify to intelligent design. With this comprehensive resource that includes the latest research, you'll witness how the findings of scientists provide compelling reasons to acknowledge the mind and presence of a creator. Featuring more than 45 entries by top-caliber experts, you'll better understand... how scientific concepts like intelligent design are supported by evidence the scientific findings that support the history and accounts found in the Bible the biases that lead to scientific information being presented as a challenge—rather than a complement—to Christianity Whether you're looking for answers to your own questions or seeking to explain the case for intelligent design to others, *The Comprehensive Guide to Science and Faith* is an invaluable apologetic tool that will help you explore and analyze the relevant facts, research, and theories in light of biblical truth. **E Does Not Equal Mc Squared** This is an engaging book ready to take you on an afternoon voyage through the cosmos. You help with experiments and learn some of the processes that go into making up scientific hypotheses on relativity, the speed of light and other light matters. Some humor is interjected to soften the dryness of the subject matter. Delightful illustrations will welcome you along for the fun. Come along for the ride and begin your adventure into light science. Find out why some ideas from days past are no longer considered correct and how that changes the way we will all look at the science of the stars in the future. **I Am Safe. I Am Good. I Am Loved. A Second Language Learner's Journey** Createspace Independent Publishing Platform Imagine a class of disenchanting, turned-off teens, mostly males. Then imagine those same students feeling poorly about themselves - feeling they are dumb because they have not been told it takes time to learn a second language. Coloring is an activity that comes with many benefits, including the development of motor skills, the stimulation of creativity and the improvement of hand and eye coordination, too. Grab a copy now! **Exhortations to Pray Religion and Science Biblically Sound Embracing Doctrine for Life** Studying doctrine for the Christian often feels like watching a construction crew build a foundation. There seems to be a great amount of activity, but the results don't appear visible. Just like the foundation is essential for the stability of a building, studying theology is crucial to the long-term stability of the believer. The goal of this study is to provide you with the basics of biblical doctrine to make sure your foundation is sound. At times this will feel like the difficult work of laying an unseen foundation for a building. At other times, however, it will feel like we are soaring to great heights as we explore the breadth and length and height and depth of our faith. During the course of this study, we will consider the questions: Why study theology? Who is God? Who am I? What is the church? Where do I go when I die? Why do other people believe differently? **Essential Grace Understanding God's Power for Spiritual Life, Liberty and Service** What is grace? The answer lies deeper than you might suppose. To understand grace in its fullness, we must explore the great mystery of our very existence. In search of that deep understanding, *Essential Grace* takes you on an eternal journey. It begins with the mind of God, all alone in eternity past. It consummates in the heights of heaven, where we see God surrounded by the glorious host of His redeemed people. In between, it explores the multi-faceted grace of God poured out on His creation. Powerful and vivid, *Essential Grace* will open your eyes to the liberating reality of God's grace. **Am I an Antisemite?** Createspace Independent Publishing Platform Properly, while I endeavor to expound the principles of Christian social justice, I shall also endeavor to show you how these principles can be applied. And just as properly, it will be my hope to bestir you to action-Christian action, American action-for faith without good works is dead. Thus, at the outset, while I am deeply grateful to everyone of you for, the heroic sacrifices you have made, and will make, to keep me on the air over this independent chain of radio stations, may I ask you for one more favor today-the favor of a prayer to the Holy Ghost. I beseech all of you to ask the spirit of understanding to fill me with prudence; and the spirit of fortitude to give me strength and courage to carry on the battle against the hidden powers of darkness-perhaps not quite so hidden today as yesterday. May I also suggest that you will ask your little children who are ignorant of the causes of poverty, wretchedness and exploitation-may I suggest that you ask these innocent children to whisper a prayer for one who fully recognizes how unworthy he is but who fully realizes what a golden opportunity God has given to him to be an instrument for good. You are anxious to know what topics I shall discuss during the ensuing year. Roundly speaking, it is my hope that these addresses will be concerned chiefly with Christian social justice. While my ultimate objective is to help more and more men to save their immortal souls, I recognize how difficult it is for man to practice Christian virtue, to live a holy life in peace and contentment, when he and a great group of his fellowmen are denied unjustly an equitable share in the goods and wealth of this world-goods and wealth which our common Father in heaven bestowed upon all men for all men to use and enjoy-goods and wealth, which, alas, have been concentrated in the hands of a few to the detriment of the many because an un-Christian species of social injustice was foisted upon us in the past few centuries and because, as a result of this, an alien philosophy of social injustice, under the name either of

Communism or Naziism, is endeavoring to win our allegiance today. Fearlessly, Christian social justice challenges these several systems for the attention and the support, in this instance, of the American public-a public composed of persons who, despite their many faults and shortcomings, will never surrender the heritage of Bethlehem, of Pilate's hall, of Calvary Hill or of the Easter morning sepulchre from whose empty depths there echo and re-echo the immortal words, "I am the Resurrection and the Life." Fortified with these precious heritages it is our hope to carry on a campaign of instruction and inspiration even though we find ourselves opposed by the rugged individualists on the right and by the unchristly radicals on the left. It is our hope to convert a zealous band of followers into a group of active Christians-. Christians who, by the sincerity of their lives and the logic of their doctrines shall win millions of followers who are convinced that there is no way other than Christ's way for saving America and restoring prosperity and peace for all. My friends, at the outset, permit me to clarify the fundamental doctrine of Christian social justice-the doctrine that differentiates it from every other plan of life proposed for man to follow. It is this: Christ came on earth not only to redeem and save individuals but also to establish an absolutely new social order. Recognizing the chaotic condition of society in His own time; aware of the universal slavery practiced virtually by every nation; and conscious of the spiritual darkness which had encompassed every kingdom, empire, republic and tribe, our Saviour well understood that man, left to his natural abilities, was unable to acquire peace and prosperity in this world and save his immortal soul in the hereafter. **The Audacity of Faith** The Audacity of Faith is about the greatest five-letter word in the English language: FAITH, and about how critical it is to our survival, whether or not we are Christians. **Strings of Faith** Is it possible to experience joy made full? This story is one of heroic recovery. Darcy's sights are firmly set on winning The National Oldtime Fiddle Contest in Weiser, Idaho. She barely gains traction with her quest when tragedy strikes. **Book2 English - Chinese for Beginners A Book in 2 Languages** Createspace Independent Pub book2 - is available in many languages - is ideal for beginners - has 100 short and easy chapters - corresponds to the European levels A1 and A2 - requires no prior knowledge of grammar - covers the basic vocabulary - uses simple structures to help you learn a language - helps you to speak complete sentences immediately - applies the latest memory research All downloads can be accessed at [www.book2.de](http://www.book2.de). By the end of the 25th Century few had as storied a career as Doctor J. Burke. An historian who used quantum superluminal teleportation to mingle among her forebears through twenty different decades making discoveries and recovering lost artifacts, she was the last of the Historical Archive Collection's 'big three' antiquinants. The physical effects of the profession had grounded jovial Ike Chernovich in old San Francisco, companion Braham Lilienthal had vanished without a trace three years before, and the indifference of the Minders from the future, who were best positioned to help, left Burke with a weary cynicism. Only the promise of a special mission, the brainchild of rookie archivist Nathan Rialto, brought her back again. It was Burke's specialty, the recovery of a glamorous old airliner from 1951 using a revolutionary new teleport, and in California as well. She would gather her trusty team of specialists, teach the rookie the ropes and perhaps contemplate a different kind of future afterward with Ike. From the moment it began it felt as if the whole mission had been created just for her...and that was only the beginning of her problems! **Isis Unveiled Ancient Religious Mysteries, Holy Science & Universal Spirituality 1** S.O.U.L. Publishing Isis Unveiled is a classic spiritual book written by Helena Petrovna Blavatsky of The Theosophical Society. This Isis Unveiled contains new calculations of the yugas by Sri Yukteswar author of The Holy Science. The Veil of Isis, Blavatsky's Secret Doctrine on A Mastery Key to the Mysteries of Ancient and Modern Science and Theology is her opus. It encompasses a thorough examination of religion, spirituality, yoga, Sanatana dharma, kabbalism and Christianity. MAKE SURE YOU GET BOTH VOLUMES OF ISIS UNVEILED: Book I ISBN: 1939199042 & Book II ISBN: 1939199077 to help answer the question: "Does God Really Exist"? This is a question that has been asked since the beginning of time and probably will not be answered until the individual comes face to face with the Truth! However, if a critical examination on the subject matter is what you're looking for then there probably is no better source than "Isis Unveiled." This book is an exhaustive effort to discuss man, life and Spirit from as many angles as possible; from all ancient cultures, myths, religions and scientific perspectives. This book goes in depth to explore man's place in the world, how we all relate to one another and what connects us all. For the mystic, that answer is undeniably that we are all part of One Source, One Essence and One Spirit. Supported by extensive evidence from religious, esoteric and mystical traditions and classical scholarship, these volumes aid the student in detecting the vital principles which underlie the philosophical systems of old. Volume I consists of two books focusing on prevailing scientific theories balanced with Ancient Universal Wisdom Religion. Volume II's two books examine the creeds of religions past and present, alongside the myths and symbols of various cultures. Throughout, the author strikes at the root of dogma and affirms the 'paramount importance of any religion' for the individual to "Know Thyself!" After reading this classic book with a new translation and modernization, you will see how although time, cultures and languages may change - Truth is Eternal! Take this journey through history touching upon the wealth of spiritual knowledge from the Hindus, Chaldeans and Egyptians to Kabbalism, Christianity and Science. Enjoy the travels through the legendary Lemuria and Atlantis to the Mayans with quotes from Plato, the Chaldean Oracles, the Egyptian Book of the Dead, the Bible, Pythagoras, Apollonius of Tyana, the Popol Vuh, Paracelsus, Giordano Bruno, Marco Polo, Jesus the Nazarene, Siddhartha Gautama, Zoroaster, Hermes Trismegistus and Max Muller, as well as Buddhist, Brahmanical, Chinese, Persian, Babylonian, Syrian, Gnostics and so much more. Ultimately, it is the yogi who tells us that to the disbeliever there will never be substantial enough evidence to convince the doubter. However, for those who aren't merely skeptics but have a sincere thirst for Truth, then only by going within will you ever be quenched! Isis Unveiled is the rapid river leading you to the water within... it is up to you to drink! For those that don't know, Blavatsky is very advanced reading for spiritual students. It is NOT the type of book you read from front cover to back. You must take your time with this reading. You should use the table of contents and/or index to go to the subject you have interest in, read it and let it digest. As time goes on and you experience more life then you will find yourself coming back to various subjects and gaining something new with each reading! "Many rivers... One Ocean; many branches... One Tree; many paths... One Destination; many stories... One Truth!" 1 S.O.U.L. Publishing [www.selfawakened.com](http://www.selfawakened.com) **What Is Evolution?** Createspace Independent Publishing Platform When it comes to evolution, most people are thumbs up, thumbs down, or even thumbs sideways. No matter where your thumb is pointing, you must ask the question: what is evolution? The U.S. Court System has witnessed seemingly endless litigation over this topic, yet it has used the term in major cases without clearly outlining a consistent and scientifically agreed upon definition. Public schools are required to

teach it, but have also not outlined a scientifically agreed upon definition. State and federal educational agencies that create standard curricula frameworks have failed to offer a consistent and scientifically agreed upon definition of biological evolution. Public educators are free to teach evolution based on the direction their thumbs are pointed. This reality has placed the future of science at risk. How logical is it for our nation's educational framework to require biological evolution, but not require a standard definition? If Theodosius Dobzhansky is correct in saying that "nothing in biology makes sense except in the light of evolution," then what is evolution? **Free Thought, Faith, and Science Finding Unity Through Seeking Truth** *Outskirts Press* This book is about thought—not the basic thought that we use to determine what to eat or wear or buy—but the Free Thought we use to make personal choices about the higher things of life: faith or unbelief, justice, morality, and the development and use of our creativity. Free Thought can have any outcome, including unbelief or faith, which is defined here as personal belief and trust in God, not as a religious affiliation. Free Thought is founded on free will. Everyone is a unique combination of a material body-mind and a spiritual soul. Free Thought is the integrated and iterative processing of information from the material and spiritual realms, in one or more common nonmaterial formats, across a mind-soul interface. Through our Free Thought, God and the spiritual force for evil change us and we change the material realm. All truthful spiritual insights and truthful disclosures through mathematics and science come from God, and it is through faith and science that we approach one whole body of truth. Free Thought, Faith, and Science includes definitions of terms, summaries of the author's beliefs and background, a literature review, and a questionnaire for readers. It's a comprehensive and thought-provoking book that will contribute to bringing more believers and nonbelievers together in an expansion of the faith-science quest for truth. **How to Defend the Christian Faith Advice from an Atheist** *Pitchstone Publishing (US&CA)* The first book on Christian apologetics written by a leading atheist figure that teaches Christians the best and worst arguments for defending their faith against attack The Christian faith has been vigorously defended with a variety of philosophical, historical, and theological arguments, but many of the arguments that worked in an earlier age no longer resonate in today's educated West. Where has apologetics gone wrong? What is the best response to the growing challenge presented by scientific discovery and naturalistic thought? Unlike every work on Christian apologetics that has come before, *How to Defend the Christian Faith* is the first one written by an atheist for Christians. As a former Christian defender who is now a leading atheist thinker, John Loftus answers these questions and more. He shows readers why Christian apologists have failed to reach the intelligent nonbeliever and offers practical advice for Christians, whether they want to better defend their faith against atheist arguments, or actively convert more individuals to Christianity. **The Basics of Christian Belief Bible, Theology, and Life's Big Questions** *Baker Academic* This reader-friendly yet robust introduction to the Christian faith explores the essentials of Christianity and the impact they have on life, worldview, and witness. Written in an accessible and engaging voice for college-age readers, the book connects the biblical plotline, the Apostles' Creed, the comparative distinctiveness of Christianity, and life's big questions. The author shows how the Christian metanarrative speaks to questions about purpose, worth, ethics, personhood, and more, and helps readers understand what it means to be a Christian in a post-Christian world. **Letters to Young Scholars, Second Edition An Introduction to Christian Thought** *Wipf and Stock Publishers* Letters to Young Scholars is designed primarily for college students, advanced high school students, and church and parachurch study groups on spiritual development. As a college text, the book introduces beginning students to the general education (or liberal arts) portion of a Christian college education. It gives major emphasis to the humanities and social science disciplines, the integration of the Christian faith with those disciplines, and the application of Christian thought to daily living (applied Christianity). It seeks to challenge the students to become broader in perspective and appreciation, more compassionate toward all of God's creatures, and more confident and committed as they develop their worldviews and personal values. **Echoes of Coinherence Trinitarian Theology and Science Together** *Wipf and Stock Publishers* This book re-imagines the universe (and the scientific study of it) through the lens of a triune Creator, three persons of irreducible identity in a perichoretic or coinherent communion. It modestly proposes that Trinitarian theology, and especially the coinherent natures of the Son in the incarnation, provides the metaphysic or "theory of everything" that manifests itself in the subject matter of science. The presence of the image of the triune God in humanity and of traces of this God in the non-human creation are discussed, highlighting ontological resonances between God and creation (resonances between the being of God and his creation), such as goodness, immensity-yet-particularity, intelligibility, agency, relationality, and beauty. This Trinitarian reality suggests there should be a similarity also with respect to how we know in theology and science (critical realism), something reflected in the history of ideas in each. These resonances lead to the conclusion that the disciplines of theology and science are, in fact, coinherent, not conflicted. This involves recognition of both the mutuality of these vocations and also, importantly, their particularity. Science, its own distinct guild, yet finds its place ensconced within an encyclopedic theology, and subject to first-order, credal theology. **A Science-Theology Rapprochement Pannenberg, Peirce, and Lonergan in Conversation** *Cambridge Scholars Publishing* This timely and fascinating work addresses questions of ultimate concerns for Christian believers by clarifying what religious believers' statement "God creates" means in relation to the mechanistic determinism of science enthusiasts and the New Atheist Movement. Drawing from the methodological works of C.S. Peirce, Bernard Lonergan, and Wolfhart Pannenberg, the book creatively shows how the old science-theology conflict, or "warfare", can be turned into one of collaboration or rapprochement. Using the works of these three thinkers, it departs from the common practice of treating the field of science-theology as an abstract mainstream theology. The book takes a stand on contextual theology, treating the problem posed by Richard Dawkins and his fellow New Atheists as one in need of a creative solution. It also suggests that the dialogue between science and theology must take seriously the experiences and challenges from different social and cultural contexts. The text shows how these experiences can lead to the kind of creative theological thinking we see in the works of Pannenberg and Lonergan, who both explicate, not only how an understanding of an evolutionary universe is compatible with the Christian doctrine of creation, but also how a methodological comparison of science and theology reveals a common concern for human understanding and openness to divine agency. **The Reality of God The Layman's Guide to Scientific Evidence for the Creator** *TAN Books* Does God exist? Which is true? Evolution, creation...or both? Are we no more than meaningless collisions of molecules? Or do we owe our existence to a Creator, who has willed us (and everything else) into being, and who has a plan and purpose for our lives? The Reality of God addresses these all-important questions by providing an introductory overview of key scientific evidence, philosophical reasons, and

insights drawn from human nature demonstrating God's existence. In simple, accessible language, and well-supported by scientific experts, author Steven Hemler guides the reader through the most compelling evidence for the existence of God. Hemler shows how natural sciences such as biology, chemistry and physics far from disproving religious belief suggest and reveal the existence of a Creator at every turn. Those seeking sound reasons and credible science supporting belief in God will cherish this easy-to-read book. The Reality of God provides: • An opportunity to address doubts about God's existence • Persuasive reasons for belief • Arguments showing the compatibility of faith and reason • Answers to the evolution vs. creation debate The Reality of God puts forth in layman's terms how science and the natural world point to God's existence. Anyone seeking answers to life's deepest question will find in author Steven Hemler an indispensable guide. **Systematic Theology, Second Edition An Introduction to Biblical Doctrine** Zondervan Academic This new edition of Systematic Theology by Wayne Grudem is one of the most important resources for helping you understand Scripture and grow as a Christian. The most widely used resource of the last 25 years in its area, Systematic Theology has been thoroughly revised and expanded for the first time while retaining the features that have made it the standard in its field: clear explanations, an emphasis on each doctrine's scriptural basis, and practical applications to daily life. With nearly 250 pages of new content and revisions, this new edition now includes the following distinctive features: Updated analysis of recent controversies within evangelical theology, including the eternal relationship between the Father and the Son in the Trinity, the role of women in the church, miraculous gifts of the Holy Spirit, and contemporary worship music. New discussion and critiques of recent theological controversies situated outside of traditional evangelical theology, such as open theism, the "new perspective on Paul," Molinism (or "middle knowledge"), "Free Grace" theology, and the preterist view of Christ's second coming. Completely revised chapter on the clarity of Scripture. Completely revised chapter on creation and evolution, including a longer critique of theistic evolution and an extensive discussion on the age of the earth. New discussion of how biblical inerrancy applies to some specific "problem verses" in the Gospels. Additional material explaining evangelical Protestant differences with Roman Catholicism, Protestant liberalism, and Mormonism. Completely updated bibliographies. All Scripture quotations updated from RSV to ESV. Updated section on contemporary worship music. Numerous other updates and corrections. Part of the brilliance of Systematic Theology has been its simplicity and ease of use. Each chapter follows the same structure: discussion of the doctrine being considered, an explanation of that doctrine's biblical support and possible objections, followed by personal application and key terms to know for personal growth. Chapters also include a Scripture memory passage, references to other literature on the topic, and suggested hymns and worship songs. If you think theology is hard to understand or boring, then this new edition of Systematic Theology will change your mind.
