Hands-On Science and Technology for Ontario, Grade 6

An Inquiry Approach

Portage & Main Press *Hands-On Science and Technology: An Inquiry Approach is filled with a year's worth of classroom-tested activity-based lesson plans. The grade 6 book is divided into four units based on the current Ontario curriculum for science and technology. Biodiversity Flight Electricity and Electrical Devices Space This new edition includes many familiar great features for both teachers and students: curriculum correlation charts; background information on the science and technology topics; complete, easy-to-follow lesson plans; reproducible student materials; materials lists; and hands-on, student-centred activities. Useful new features include: the components of an inquiry-based scientific and technological approach Indigenous knowledge and perspective embedded in lesson plans a four-part instructional process—activate, action, consolidate and debrief, and enhance an emphasis on technology, sustainability, and differentiated instruction a fully developed assessment plan that includes opportunities for assessment for, as, and of learning a focus on real-life technological problem solving learning centres that focus on multiple intelligences and universal design for learning (UDL) land-based learning activities a bank of science related images*

Science with Storytelling

Strategies for the K-5 Classroom

McFarland *This book is about the intersection of storytelling and science. Recognizing that humans are hard-wired for narrative, this collection of new essays integrates the two in a special way to teach science in the K-6 classroom. As science education changes its focus to concepts that bridge various disciplines, along with science and engineering practices, storytelling offers opportunities to enhance the science classroom. Lesson plans are provided, each presenting a story, its alignment with science (Next Generation Science Standards), language arts (Common Core State Standards) and theater arts standards (National Core Arts Standards). Instructional plans include a rationale, preparation, activities and assessment.*

The Eye of Ra

Robbers of the Sacred Stone

David Klooz "...a large planet stood above the North Pole for a very long time." That is what all the mythology throughout the world uniformly states. Mythology from every nation, region, tribe, and period, in thousands of languages, in hundreds of forms, from every continent; they all resound, "a large planet stood above the North Pole for a very long time." Every country is accounted for except those located more than 10 degrees below the equator. The mythology of regions as far removed from each other as Siberia, North Africa, and Guatemala all agree. As others have indicated, I will also suggest that this planet was Saturn and that Saturn was initially a brown dwarf star that created Earth, Mars and later Venus. In order to put the story into context, I will make it abundantly clear that the framework will be based upon plasma physics and the existence of the aether. The Solvay Conference, founded by the Belgian industrialist Ernest Solvay in 1912, was considered a turning point in the world of physics. Located in Brussels, the conferences were devoted to outstanding open problems in both physics and chemistry. The most famous conference was the October 1927 Fifth Solvay International Conference on Electrons and Photons, where the world's most so-called notable physicists met to discuss the newly formulated quantum theory. The leading figures were Albert Einstein and Niels Bohr. "Settled Science" and "Consensus Science" began at this time and it is also the moment we stopped doing real physics in the 20th and 21st centuries. The bold theoretical and experimental era of physics, by the likes of Maxwell, at the very dawn of science, as we know it, ended abruptly at the start of the 20th Century. That was when our currently accepted, and very different, view of "physics", everything from the "Big Bang" Expanding Universe Cosmology, to Relativistic limitations imposed by "flat" space and non-simultaneous time, complicated by a non-intuitive "Quantum Mechanics" of suddenly uncertain atomic "realities", all took a very different turn from where they had been headed. The quantum theory discarded the basic physics principle of cause followed by effect. Einstein was disenchanted with the Heisenberg Uncertainty Principle and created his own fatal damage when his "thought experiment" made-up the theory of relativity. He isolated his arbitrary observer from the rest of the universe, discarded the absolute standards of length and time, invented an imaginary proper clock that does not exist, removed the aether, and the effect of gravity became an illusion. Make sure you understand this was not done using any scientific method, i.e., observation, experimentation and replication, but by what became known as a "thought experiment". Einstein should have kept his day job in the post office, as he has set physics, the so-called Queen of the Sciences back 100 years. This conference was also the culmination of the struggle between Einstein and the scientific realists, who wanted strict rules of scientific method as laid out by Charles Peirce and Karl Popper, versus Bohr and the instrumentalists, who wanted looser rules based on 'expected' outcomes, regardless of causes and effects. Starting at this point, the instrumentalists won, instrumentalism having been seen as the norm ever since. And that has been the insurmountable problem with science ever since, the loss of the scientific method and accepting causes without effects and conversely. These are all unforgivable losses to the great physicists of the past. We were propelled nearly 2,000 years into past to the Greek Ptolemaic era when geometric symmetry and mathematical beauty dictated that endless the ad-hoc epicycles be added to perfect circular planetary orbits in order to match appearances. That dogma lasted almost 1500 years. How long will we allow relativity dogma and its taboos to persist? It should be no surprise that since that fateful conference in 1927, science has failed to produce any fundamental breakthroughs anything like the 19th century, when some of the finest experimental physicists, such as Ampere, Gauss, Faraday, and Maxwell were discovering the secrets of electricity and electromagnetism. The electric universe and plasma physics and cosmology follows the lead of these experimenting electrical pioneers. According, I will also discard the "thought experiments" of Einstein and defer to real scientists, namely Tesla, Maxwell, Thornhill, and others, who long ago recognized that all perceptible matter comes from a primary substance, of a tenuity beyond conception and filling all space, the Akasha, or luminiferous aether, which is acted upon by the life-giving Prana or creative force, calling into existence, in never ending cycles, all things and phenomena. This primary substance, thrown into infinitesimal whirls of prodigious velocity, becomes gross matter; the force subsiding, the motion ceases and matter disappears, reverting to the primary substance. The structure and nature is most likely a vortex, appearing like a donut from above or below. What I will attempt to present to you in the book, is the real story of our history and the real fact that we, and the universe and everything in it, is electric in nature. I will present facts and evidence that demonstrate that all religions, mystery schools, the Bible, and other religious books are nothing more than a rewritten and edited story of a solar system wide cataclysm. A story that was written, rewritten and edited to make it appear that Jewish people were the 'Chosen People of God', We will see that all the pyramids, especially those on the Giza Plateau were built as an energy gathering, converting and storing machines to try to save the Earth and Mankind from the electromagnetic perturbations caused by the Sirius System (the Sun's binary twin) that occurs approximately every 24,000 years. The Great Pyramid was not a weapon, and certainly not a death star used to explode planets. There has been no atomic wars on Earth and no landings by 'alien' beings on Earth, nor on any other planet in our solar system. There is no Planet X and there is no Nibiru. The so-called 'Planet of the Crossing' is actually the star Sirius, the Sun's binary twin. We will see that all the five visible planets, Saturn, Mercury, Mars, Jupiter, Venus and the two luminaries, the Moon and our current Sun, became the Gods, with several of them, coming down to Earth from the Heavens to write our history only a few thousand years ago. We will also see and understand that the vast amount of cratering and channels on all of the planets in our solar system are not the result of random meteor or comet strikes, wind or water erosion, but are the results of electrical arcing between planets that has scarred the surface of the planets and has been demonstrated and replicated, in exact detail, in plasma laboratories. We will examine the Exodus, within the context of the Earth in upheaval from a natural solar system-wide cataclysm, and how Akhenaton, Moses and the Ark are main characters in the event. We will also examine Mount Sinai and its real identity and location, as well as, the Sacred Stone(s), its use, who stole them, and why. This story does not depend on miracles or faith, but is based upon evidence, both ancient and current. It is our genuine history that has been kept from us in order to maintain control by those in power. If you can not see the truth in this story and you want to believe in religions or the current false, consensus or settled 'science', you must believe them in one of three ways: by faith; by ignorance; or by indoctrination: by faith, because you cannot believe something which does not have adequate scientific evidence except as a philosophical viewpoint; by ignorance, because the only way to be certain in your mind that these theories could work, is because you do not have all the facts; or, if you have been so far indoctrinated you have not made a logical conclusion with your own rational mind, you may have never even tried to question what you have been told to believe. You must decide for yourself what you will believe. If you decide to believe in today's biblical religious myths or "consensus and settled pseudoscience of the quackademics and media", that is fine, just realize that none are supported by true science using the Scientific Method. They are myths, and not even good ones, at that. Just remember, believing this nonsense and everything else the 'authorities' say is just what they want, i.e., no change in the status quo and leave the thinking to them.

The Forgotten Planet

Perennial Press Beneath dense gray clouds through which no sun shone lay a forgotten planet. It was a nightmare world of grotesque and terrifying animal-plant life. Gigantic beetles, spiders, bugs and ants filled the putrid, musty earth - ready to kill and devour anything in sight. There were men amidst this horror - men who cringed and ran from the ravening monsters and huddled in the mushroom forests at night. Burl was one of these creatures. But one day inspiration hit Burl. He would find a weapon - he would fight back. And with this idea the first step was taken in man's most desperate flight for freedom in this most horrible of all worlds. But it was only a first step.

The Seeds of New Earth (the Silent Earth, Book 2)

CreateSpace The Earth is in ruins. Cities and nations destroyed. Mankind is extinct. Brant and Arsha are synthetics, machines made in the image of people. They dream of bringing humans back into the world and have the technology to succeed, but the obstacles in their way are mounting. Not only are their own conflicting ideals creating a rift between them, but now the sinister Marauders are closing in as they seek revenge on Brant. Out in the wasteland, strange lights and mysterious objects in the sky herald the arrival of new factions that seek to control the region. Even in the once quiet streets of their own city, malevolent forces are beginning to unfurl that threaten the sanctity of everything they hold dear, jeopardising the future that is within their grasp. The Duh! Book of Management and Supervision

Dispelling Common Leadership Myths

Common Sense Press (Melrose, FL) Managerial styles are influenced by habit, familiarity, and workplace culture. It's no wonder that well-intentioned professionals doing their best to be good organizational leaders often repeat unhelpful supervisory practices experienced in their early careers, even if they disliked them at the time. In the *DUH! Book of Management and Supervision*, the author disagrees with many accepted leadership principles (unabashedly referring to them as myths) and makes new and different approaches easier to imagine. Her challenging and controversial concepts illustrated with poignant stories suggest common-sense and immediately applicable alternatives more suitable in today's workplace.

A Brief Guide to the Greek Myths

Robinson Publishing A uniquely authoritative yet lightly handled examination of the key tales in the corpus of Greek mythology.

Legends of Emergence

A Memoir of Mythology

PROCEEDS OF THIS BOOK donated to Civil Liberties Defense Center in Eugene, Ore. which assists varied groups protecting Mother Earth. (www.cldc.org). This book is a mythological telling of memoir, based on true events that happened to the author in and around Dineh (Navajo) lands in Arizona, USA. And within the "hippy" movement in the Pacific Northwest during the 1970's and 1980's. Dineh (Navajo) asked rag tag hippies and the active environmental movement of the time, for help in their resistance to forced relocation by the U.S. Government. Hippies responded happily. "Legends" depicts their converging paths and the treacheries involved in demanding human rights for American Indian nations. Using both mythology and memoir the endnotes of this book help readers to learn about facts of Big Mountain resistance, and the overall landscape of white and Red worlds, meeting. The story weaves truths otherwise unseen. With Love, as the theme.

Uses of Comparative Mythology

Essays on the Work of Joseph Campbell

Routledge This collection, first published in 1992, offers critical-interpretive essays on various aspects of the work of Joseph Campbell (1904-1987), one of a very few international experts on myth. Joseph Campbell examines myths and mythologies from a comparative point of view, and he stresses those similarities among myths the world over as they suggest an existing, transcendent unity of all humankind. His interpretations foster an openness, even a generous appreciation of, all myths; and he attempts to generate a broad, sympathetic understanding of the role of these 'stories' in human history, in our present-day lives, and in the possibilities of our future.

Kingdom of the Sun

A Book of the Planets

A child's introduction to the planets in our solar system. Dr Jacqueline Mitton describes each planet, drawing on scientific information. She also discusses the gods that the planets are named after, and examines the relationships between contemporary facts and ancient myths.

No Place Like Earth

Createspace Independent Publishing Platform A child's dream takes us on a journey through space. The child looks for a place to land while exploring each planet, but some are too hot, some are too cold, and some are just made of liquid and gas. Only planet Earth is just right. Fun rhyming text introduces children to each planet and basic facts about it. The text is accompanied by stunning images of a rocket traveling through the solar system, interspersed by close up images of each planet in order. While each planet is amazing in its own way, there is only one we can call home. If parents

choose, this can be the start to a conversation about how we can take better care of our planet. Visit lorifettner.wordpress.com/no-place-like-earth/ to see sample pages from the interior.

Greek Gods & Goddesses

Britannica Educational Publishing Giving Western literature and art many of its most enduring themes and archetypes, Greek mythology and the gods and goddesses at its core are a fundamental part of the popular imagination. At the heart of Greek mythology are exciting stories of drama, action, and adventure featuring gods and goddesses, who, while physically superior to humans, share many of their weaknesses. Readers will be introduced to the many figures once believed to populate Mount Olympus as well as related concepts and facts about the Greek mythological tradition.

Comets and the Horns of Moses

Laura Knight-Jadczyk's series, *The Secret History of the World*, is one of the most ambitious projects ever undertaken to provide a cogent, comprehensive account of humanity's true history and place in the cosmos. Following the great unifying vision of the Stoic Posidonius, Laura weaves together the study of history, mythology, religion, psychology and physics, revealing a view of the world that is both rational and breathtaking in its all-encompassing scope. This second volume, *Comets and the Horns of Moses*, (written in concert with several following volumes soon to be released) picks up the dangling threads of volume one with an analysis of the Biblical character of Moses -- his possible true history and nature -- and the cyclical nature of cosmic catastrophes in Earth's history. Laura skillfully tracks the science of comets, revealing evidence for the fundamentally electrical and electromagnetic nature of these celestial bodies and how they have repeatedly wreaked havoc and destruction on our planet over the course of human history. Even more startling however, is the evidence that comets and cometary fragments have played a central role in the formation of human myth and legend and the very concept of a 'god'. As she expertly navigates her way through the labyrinth of history, Laura uncovers the secret knowledge of comets that has been hidden in the great myths, ancient astronomy (and astrology) and the works of the Greek philosophers. Concluding with a look at the political and psychological implications of cyclical cometary catastrophes and what they portend for humanity today, *Comets and the Horns of Moses* is a marvel of original thought and keen detective work that will rock the foundations of your understanding of the world you live in, and no doubt ruffle the feathers of the many academics who still cling to an outdated and blinkered view of history.

Mythologies of the World

A Guide to Sources

National Council of Teachers This book surveys the important available books on mythologies of all parts of the globe and the cultural contexts from which the mythological traditions emerged. Written as a series of bibliographic essays, the guide opens with a description of major reference sources encompassing many cultures, as well as those tracing particular themes (such as that of the creation) across cultures. The other bibliographic essays discuss sources for studying prehistoric mythologies, the mythologies of West Asian peoples (Mesopotamian, Biblical, Islamic, and others), South and East Asian mythologies, European mythologies, American Indian mythologies (North, Central, and South American), African mythologies, and the mythologies of the Pacific and Australia. An appendix on contemporary mythology--mainly American--discusses a wide range of works that examine the beliefs, traditions, and dreams that manifest themselves in spectator sports, politics, advertising, and forms of popular culture in the United States. African Mythology

The Old World of Gods, Myths, and Mystery

Self Publisher This is a 2-book combo, which has the following titles: Book 1: The Africans have a long history, although not everything has been preserved in writing. And many folklore stories have been passed on through generations. The African tribes vary as much as the colors of the rainbow. It is for these reasons, and entertainment as well, that this book has been put together. It entails several mythological tales that refer to African gods, creatures, and entities. Some of these have morals. Others are symbolic of one thing or another. All in all, this is a short but fun and intriguing book about African culture and ancient religions from that region. Book 2: The extensive history of Africa provides us with a topic of curiosity and novelty. For this reason, this guide has been composed to help you understand some of the cultural anecdotes as well as the religious and traditional tales that have been told to previous generations. When we dive into some background information, you will have a better grasp of the context of the four intense stories that follow. Enjoy this short, simple yet profound compilation of African myths.
