## 21st Century Anthropology: A Reference Handbook

**SAGE** Via 100 entries or 'mini-chapters,' the SAGE 21st Century Reference Series volumes on Anthropology will highlight the most important topics, issues, questions, and debates any student obtaining a degree in the field of anthropology ought to have mastered for effectiveness in the 21st century. The purpose is to provide undergraduate students with an authoritative reference source that will serve their research needs with more detailed information than encyclopedia entries but not so much jargon, detail or density as a journal article or a research handbook chapter.

## Handbook to Life in Ancient Mesopotamia

**Infobase Publishing** Explores the lifestyles of ancient Mesopotamia, including the civilization, rulers and leaders, economics, and more.

## Ancient Near Eastern History and Culture

**Routledge** This introduction to the Ancient Near East includes coverage of Egypt and a balance of political, social, and cultural coverage. Organized by the periods, kingdoms, and empires generally used in Near Eastern political history, the text interlaces social and cultural history with the political narrative. This combination allows students to get a rounded introduction to the subject of Ancient Near Eastern history. An emphasis on problems and areas of uncertainty helps students understand how evidence is used to create interpretations and allows them to realize that several different interpretations of the same evidence are possible. This introduction to the Ancient Near East includes coverage of Egypt and a balance of political, social, and cultural coverage.

# Art & Architecture in Ancient Rome

Midnight Marquee & BearManor Media **Classical archaeology was long equated to ancient art history. Today these fields find themselves at a major crossroads. The influence on them—from the discipline of anthropology—has increased substantially in the past 15 years, adding to the ways in which scholars can study the Roman past. The classical archaeologist of the 21st century is likely to be versed in Greek and Latin, computer technology, ancient history, great monuments, various hard sciences such as physics or even astronomy, GPS, GIS, surveying, mapping, digitizing, artistic rendering, numismatics, geo-science, astronomy, environmental studies, material culture analysis and/or a host of other disciplines and sub-disciplines. Universities are seeking specialists whose talents embrace not one but several different fields of research. It is not necessary for each scholar to know everything about each discipline being used within the fields of art history, classical archaeology and anthropology, but these days a basic knowledge of all relevant disciplines is becoming indispensable. This book will layout the basic information and steps necessary to take the beginning archaeologist's search for knowledge of the past and lead them to adventures of the future.**

# Arrowheads and Spear Points in the Prehistoric Southeast

# A Guide to Understanding Cultural Artifacts

Univ. Press of Mississippi **The Native American tribes of what is now the southeastern United States left intriguing relics of their ancient cultural life. Arrowheads, spear points, stone tools, and other artifacts are found in newly plowed fields, on hillsides after a fresh rain, or in washed-out creek beds. These are tangible clues to the anthropology of the Paleo-Indians, and the highly developed Mississippian peoples. This indispensable guide to identifying and understanding such finds is for conscientious amateur archeologists who make their discoveries in surface terrain. Many are eager to understand the culture that produced the artifact, what kind of people created it, how it was made, how old it is, and what its purpose was. Here is a handbook that seeks identification through the clues of cultural history. In discussing materials used, the process of manufacture, and the relationship between the artifacts and the environments, it reveals ancient discoveries to be not merely interesting trinkets but by-products from the once vital societies in areas that are now Alabama, Arkansas,**

Georgia, Kentucky, Louisiana, Mississippi, the Carolinas, as well as in southeastern Texas, southern Missouri, southern Illinois, and southern Indiana. The text is documented by more than a hundred drawings in the actual size of the artifacts, as well as by a glossary of archeological terms and a helpful list of state and regional archeological societies.

## History through material culture

Manchester University Press **History through material culture is an excellent guide for students and researchers who wish to use objects as historical sources. Responding to the significant, scholarly interest in historical**

material culture studies, this book provides the first step-by-step guide to developing historical research based around objects. The book makes clear how students and researchers can use these rich material sources to make important, valuable and original contributions to history. Written by two experienced museum practitioners and historians, the book recognises the theoretical and practical challenges of this approach and offers clear advice on methods to get the best out of material culture research. With a focus on the early modern and modern periods, this book draws on examples from across the world and demonstrates how to use material culture to answer a range of enquiries, including social, economic, gender, cultural and global history.

## Writing about Archaeology

Cambridge University Press In this book, Graham Connah offers an overview of archaeological authorship: its diversity, its challenges, and its methodology. Based on his own experiences, he presents his personal views about the task of writing about archaeology. The book is not intended to be a technical manual. Instead, Connah aims to encourage archaeologists who write about their subject to think about the process of writing. He writes with the beginning author in mind, but the book will be of interest to all archaeologists who plan to publish their work. Connah's overall premise is that those who write about archaeology need to be less concerned with content and more concerned with how they present it. It is not enough to be a good archaeologist. One must also become a good writer and be able to communicate effectively. Archaeology, he argues, is above all a literary discipline.

## Handbook to Life in Prehistoric Europe

**Oxford University Press on Demand What we know of prehistoric Europe stems from archeological finds, ranging from cave paintings to the frozen body of a hunter exposed by a retreating glacier. This means that our knowledge is largely of the ordinary individual - the hunter-gatherer, farmer, or Metallurgist - rather than of kings. In this intriguing book, Jane McIntosh gathers the results of recent archaeological discoveries and scholarly research, covering all aspects of life in prehistoric Europe: the geography of the continent, economy, settlement, trade, transport, industry and crafts, religion, death and burial, warfare, language, the arts, and more.**

Throughout, McIntosh stresses the lives lived by the majority, rather than the privileged elite (as is so often the case in recorded history). Not that evidence of the latter is lacking: exquisite jewelry, elaborately woven cloth, and finely wrought weaponstell us a great deal about the rulers of this lost world. Including more than 75 illustrations and maps, the Handbook to Life in Prehistoric Europe provides an accessible introduction to the 7000-year period that immediately preceded the Roman Empire.

## Challenging History

### Race, Equity, and the Practice of

# Public History

Univ of South Carolina Press **A collection of essays that examine how the history of slavery and race in the United States has been interpreted and inserted at public historic sites For decades racism and social inequity have stayed at the center of the national conversation in the United States, sustaining the debate around public historic places and monuments and what they represent. These conversations are a reminder of the crucial role that public history professionals play in engaging public audiences on subjects of race and slavery. This "difficult history" has often remained un- or underexplored in our public discourse, hidden from view by the tourism industry, or even by public history professionals themselves, as they created historic sites, museums, and public squares based on white-centric interpretations of history and heritage. Challenging History, through a collection of essays by a diverse group of scholars and practitioners, examines how difficult histories, specifically those of slavery and race in the United States, are being interpreted and inserted at public history sites and in public history work. Several essays explore the successes and challenges of recent projects, while others discuss gaps that public historians can fill at sites where Black history took place but is absent in the interpretation. Through case studies, the contributors reveal the entrenched false narratives that public history workers are countering in established public history spaces and the work they are conducting to reorient our collective understanding of the past. History practitioners help the public better understand the world. Their choices help to shape ideas about heritage and historical remembrances and can reform, even transform, worldviews through more inclusive and ethically narrated histories. Challenging History invites public historians to consider the ethical implications of the narratives they choose to share and makes the case that an inclusive, honest, and complete portrayal of the past has the potential to reshape collective memory and ideas about the meaning of American history and citizenship.**

## Archaeological Typology and Practical Reality

### A Dialectical Approach to Artifact Classification and Sorting

Cambridge University Press A study of the various ways in which field archaeologists set about making and using classifications to meet a variety of practical needs. The authors discuss how humans form concepts. They then describe and analyse in detail a specific example of an archaeological classification, and go on to consider the theoretical generalizations that can be derived from the study of actual in-use classifications.

### Taking Archaeology out of Heritage

Cambridge Scholars Publishing Archaeology has, on the whole, tended to dominate the development of public policies and practices applicable to what is often referred to as “heritage”. This book aims to examine the conflation of heritage with archaeology that has occurred as a result. To do so, it asks whether archaeology can usefully contribute to critical understandings of heritage, which, the volume contends, must consider heritage both in terms of what it is and the cultural, social and political work it does in contemporary societies. Archaeologists have been very successful in protecting what they perceive to be their database—a success that owes much to the development and maintenance of a suite of heritage management practices that work to legitimize their privileged access to, and control of, that database. However, is archaeological data actually heritage? Moreover, does archaeological knowledge offer a meaningful reflection of “the historic environment”, in terms of the uses, values and associations it carries for the various and different communities or publics that engage with that environment/heritage? The volume brings together academic and field archaeologists, academics from heritage studies and community activists from the UK and Europe more generally to debate these issues.

## Arkansas Archaeology

### Essays in Honor of Dan and Phyllis Morse

University of Arkansas Press Arkansas has long been recognized as a state with a rich archaeological heritage that is unsurpassed in North America. The Toltec Mounds were made famous by the Smithsonian's research at the turn of the century. The Sloan site, dated to 8500 B.C., is the oldest documented burial ground in the New World. The alluvial plain of the central Mississippi River valley supported perhaps the greatest prehistoric urban population. And the Parkin site has yielded important information about the de Soto incursion into the continent. This festschrift recognizes the contributions made in researching this varied heritage by Dan and Phyllis Morse from the inception of the Arkansas Archeological Survey in 1967 to their retirement in 1997. The essays were prepared by thirteen of their colleagues, recognized experts in archaeology and related fields, and represent state-of-the-art knowledge about Arkansas's archaeology. The topics range broadly: from prehistoric environments and regional syntheses to specialized studies of specific culture periods and historical archaeology. Paul and Hazel Delcourt and Roger Saucier provide a chapter that will serve as a standard reference for many years on Holocene environments; Chris Gillam's contribution demonstrates the utility of Geographic Information Systems in broad-scale pattern analysis; Robert Mainfort uses large collections of ceramics to show that traditional methods for grouping Late Mississippian sites are insufficient; Michael Hoffman introduces a new line of evidence from old newspaper accounts; and Frank Schambach, in reinterpreting the spectacular Spiro site in eastern Oklahoma, gives us a powerful, classic example of archaeological and ethnohistoric interpretation. This volume will, of course, be of great interest to professional archaeologists and anthropologists, but the essays are also accessible to students, amateur archaeologists, historians, and enthusiastic general readers. As the new millennium dawns, this book celebrates the legacy of two very distinguished careers in archaeology and

heralds the proliferation of innovative new approaches and techniques for the continuing study of Arkansas's prehistoric peoples.

## Being a Narrative of Explorations in

# that State, 1912-1920, Together with Work at Lake Champlain, 1917 Archaeology: Down to Earth

Cengage Learning This new brief edition pairs two of archaeology's most recognized names -- David Hurst Thomas of the American Museum of Natural History and Robert L. Kelly of the University of Wyoming. Their well-chosen examples show how archaeologists have worked through actual problems in the field and in the lab. After using this book, readers will be better able to ask questions, solve problems, and discern truth from fiction. They will learn about the nature of archaeological data and how archaeologists do such things as archaeological survey and excavation. They also will develop their sense of scientific logic and gain a better understanding of career opportunities available to archaeologists. This edition's enhanced full-color design improves the visual presentation and enables users to more clearly see the key points of an image. A rich array of supplemental resources includes a new companion website, as well as the option to use the Doing Fieldwork: Archaeological Demonstrations CD-ROM, Version 2.0, also developed by the authors. Available with InfoTrac Student Collections <http://gocengage.com/infotrac>. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

## Children and Material Culture

Routledge This is the first book to focus entirely on children and material culture. The contributors ask: \* what is the relationship between children and the material world? \* how does the material culture of children vary across time and space? \* how can we access the actions and identities of children in the material record? The collection spans the Palaeolithic to the late twentieth century, and uses data from across Europe, Scandinavia, the Americas and Asia. The international contributors are from a wide range of disciplines including archaeology, cultural and biological anthropology, psychology and museum studies. All skilfully integrate theory and data to illustrate fully the significance and potential of studying children.

### America Before

### The Key to Earth's Lost Civilization

St. Martin's Press **The Instant New York Times Bestseller! Was an advanced civilization lost to history in the global cataclysm that ended the last Ice Age? Graham Hancock, the internationally bestselling author, has made it his life's work to find out--and in America Before, he draws on the latest archaeological and DNA evidence to bring his quest to a stunning**

conclusion. We've been taught that North and South America were empty of humans until around 13,000 years ago - amongst the last great landmasses on earth to have been settled by our ancestors. But new discoveries have radically reshaped this long-established picture and we know now that the Americas were first peopled more than 130,000 years ago - many tens of thousands of years before human settlements became established elsewhere. Hancock's research takes us on a series of journeys and encounters with the scientists responsible for the recent extraordinary breakthroughs. In the process, from the Mississippi Valley to the Amazon rainforest, he reveals that ancient "New World" cultures share a legacy of advanced scientific knowledge and sophisticated spiritual beliefs with supposedly unconnected "Old World" cultures. Have archaeologists focused for too long only on the "Old World" in their search for the origins of civilization while failing to consider the revolutionary possibility that those origins might in fact be found in the "New World"? *America Before: The Key to Earth's Lost Civilization* is the culmination of everything that millions of readers have loved in Hancock's body of work over the past decades, namely a mind-dilating exploration of the mysteries of the past, amazing archaeological discoveries and profound implications for how we lead our lives today.
