Belonging: The Science of Creating Connection and

Bridging Divides

W. W. Norton & Company “This is perhaps the richest book on belonging you’ll ever read.... The inspiration one draws from every page of this book is an enhanced sense of what is possible. It revives the very thing we need most in these times: hope.” —Claude M. Steele, author of *Whistling Vivaldi* We live in enormously polarized times. From politics to race, religion, gender, and class, division runs rampant. In 2020, 40 percent of each political party said that supporters of the opposing party were “downright evil.” In 2019, hate crimes reached a ten-year high in the United States. One in five Americans suffers from chronic loneliness, with teenagers and young adults at increasing risk. Social ties at work, at school, and in our communities have frayed. How did we become so alienated? Why is our sense of belonging so undermined? What if there were a set of science-backed techniques for navigating modern social life that could help us overcome our differences, create empathy, and forge lasting connections even across divides? What if there were a useful set of takeaways for managers and educators of all stripes to create connection even during challenging times? In *Belonging*, Stanford University professor Geoffrey L. Cohen applies his and others’ groundbreaking research to the myriad problems of communal existence and offers concrete solutions for improving daily life at work, in school, in our homes, and in our communities. We all feel a deep need to belong, but most of us don’t fully appreciate that need in others. Often inadvertently, we behave in ways that threaten others’ sense of belonging. Yet small acts that establish connection, brief activities such as reflecting on our core values, and a suite of practices that Cohen defines as “situation-crafting” have been shown to lessen political polarization, improve motivation and performance in school and work, combat racism in our communities, enhance health and well-being, and unleash the potential in ourselves and in our relationships. Belonging is essential for managers, educators, parents, administrators, caregivers, and everyone who wants those around them to thrive.

Skills for Using Theory in Social Work

32 Lessons for Evidence-Informed Practice

Routledge Using theory, research evidence and experiential knowledge is a critical component of good social work. This unique text is designed to help social work students and practitioners to integrate theorizing into practice, demonstrating how to search for, select and translate academic knowledge for practical use in helping people improve their lives and environments. Presenting 32 core skills, Skills for Using Theory in Social Work provides a conceptual foundation, a vocabulary, and a set of skills to aid competent social work theorizing. Each chapter outlines the knowledge and action components of the skill and its relationship to core practice behaviours, along with learning and reflection activities. The lessons are divided into four parts: Section one discusses foundational material, including self-identification as a theorist-practitioner, the deliberate use of the term theory, and a social work approach to the selection of knowledge. Section two focuses on the adept use of theorizing skills. It covers identifying assumptions, using concepts, formulating propositions, organizing theory elements inductively or deductively, summarizing and displaying the elements of a theory, gathering and organizing assessment information and communicating with clients and colleagues about tentative theories. Section three includes lessons preparing social workers for the construction of useful middle-range theories including causal theories and interpretive theories and for testing and sharing these practical theories. Section four presents skills to develop critical thinking about theoretical knowledge. These include avoiding the misuse of theory, judging a theory using scientific standards, judging a theory by professional standards, critiquing theory in its cultural and historical context and making judgments about the likely long-term impact of a theory. This key text will help readers to demonstrate their expertise in reflective, competent, and theory-informed practice. It is suitable for all social work students and practitioners, particularly those taking practice, theory and human behaviour in the social environment courses.
